BUDGET SUPPLEMENT FOR HEALTH AND WELFARE EDUCATION

FOR 1974-75

Submitted by
RONALD REAGAN
Governor
to the
CALIFORNIA LEGISLATURE

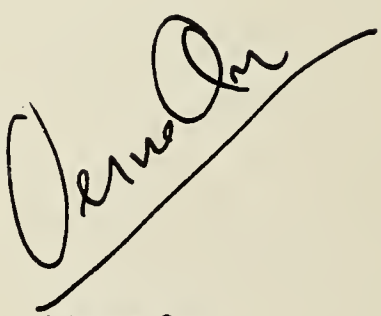
1973-74 Regular Session

Volume II

INTRODUCTION

This volume of the budget is a supplement containing the detailed expenditure program of each department of the Health and Welfare Agency as well as each of the segments comprising the Education and Higher Education areas.

The presentation in this supplement includes the Program Budget and the Capital Outlay Budget.



VERNE ORR
Director of Finance

HEALTH AND WELFARE

Health and Welfare Agency

OFFICE OF EDUCATIONAL LIAISON

Program Objectives

The Office of Educational Liaison serves as the main contact for communication and coordination between the Health and Welfare Agency and the Department of Education for programs relating to comprehensive child development services and other agency-related education and training programs.

As a result of the enactment of Chapter 1176, Statutes of 1973 the office has been assigned the responsibility for contracting with accredited medical schools and other agencies for the implementation of training programs to prepare family physicians and physician assistants to help meet primary care health manpower needs in California.

SUMMARY OF PROGRAM REQUIREMENTS	ACTUAL 1972–73	ESTIMATED 1973–74	PROPOSED 1974–75
I. Coordination of education and child development programs	$1,196,131	$5,333,683	$3,582,623
Reported in departmental budgets	–	–	(2,800,000)
II. Training family practitioners program	–	29,070	1,035,845

Subventions *(General Fund)*	1,147,250	5,102,824	4,400,000
Personnel man-years	2.2	8.3	8.3

I. COORDINATION OF EDUCATION AND CHILD DEVELOPMENT PROGRAMS

Need

The enactment of Chapter 670, Statutes of 1972, included the creation of the Office of Educational Liaison to coordinate with various departments of state government in the creation of comprehensive child development services to meet a variety of child needs. The need exists to provide better communication and coordination between departments of state government concerned with child care programs so as to avoid duplication of effort and to improve program and cost effectiveness. Systematic educational policy development and program analysis is needed at the Health and Welfare Agency level to meet these needs.

Objectives

1. Coordinate with departments of state government for the development of effective, integrated, and comprehensive child-development services including, but not limited to, the following programs: preschools, day care for children of migrant families, children's centers, neighborhood family day care, experimental projects in providing child care, and to assist in the development of neighborhood day care systems.
2. Provide consultative and coordination services in policy and program development to the Health and Welfare Agency in a variety of education and training-related programs, as appropriate.

Authority

Chapter 670, Statutes of 1972 (The Child Development Act), and Chapters 1005 (preschool education) and 1191 (child care), Statutes of 1973.

General Description

The Office of Educational Liaison performs the following functions for the Secretary of the Health and Welfare Agency:

1. Coordination, consultation, technical assistance, legislative analysis, guidance, and information in development of policy, programs, and procedures within the agency and with departments of state government for the effective implementation of child development services and other agency-related education and training programs.
2. Negotiation of interagency agreements with the Department of Education for the delivery of certain child development services. These agreements also involve the Departments of Benefit Payments, Health, and Employment Development.
3. Advisory input, representing the Health and Welfare Agency, to the Department of Finance and the Legislative Analyst in their respective audits and evaluations of child care and preschool programs.

The amount shown as reported in departmental budgets represents the county child care programs covered by Chapter 1177, Statutes of 1972 (AB 282), which programs are assumed by the Department of Education as of July 1, 1974.

PROGRAM REQUIREMENTS

	72–73	73–74	74–75	1972–73	1973–74	1974–75
Totals, Coordination of Education and Child Development Programs	2.2	8.3	8.3	$1,196,131	$5,333,683	$3,582,623
Reported in departmental budgets	–	–	–	–	–	(2,800,000)
Support *(General Fund)*				48,881	230,859	182,623

OFFICE OF EDUCATIONAL LIAISON—Continued

II. PROGRAM TO TRAIN FAMILY PHYSICIANS AND PHYSICIAN ASSISTANTS

Need

There currently exists in California an inadequate number of students and residents receiving quality education and training in the specialty of family practice, and an inadequate supply of primary health care services in various areas of the state. With the trend toward increased specialization in medicine, there has been a decline in the ratio of family physicians to other specialists. More doctors and physician assistants need to be prepared to provide primary care services in order to help meet the general health care needs throughout the state. The supply of such physicians in rural parts of the state is a particularly critical need.

Objective

Effective implementation of the provisions of the Song-Brown Family Physician Training Act of 1973 (Chapter 1176, Statutes of 1973). This will include an increase in the number of students and residents receiving quality education and training in the specialty of family practice and as physician assistants and improvement of the delivery of primary health care services to specific areas of the state where there is a recognized unmet priority need for such services through the application of funds appropriated by the act.

Authority

Chapter 1176, Statutes of 1973.

General Description

Funds appropriated cover planning for, and implementation of, state-contracted family physician and physician assistant medical training programs. The Health Manpower Policy Commission, with staff assistance from the Office of Educational Liaison, will establish necessary criteria and procedures for the allocation of these funds, to be expended through contracts with accredited medical schools and other health agencies for programs designed to prepare family practitioners and physician assistants to serve in areas with priority needs.

Specific administrative functions will include:

1. Determine specific areas within California having priority unmet needs for primary health care services.
2. Serve as executive secretary and provide staff support to the Health Manpower Policy Commission to develop program standards and contract criteria.
3. Perform review and analysis of training program proposals including cost effectiveness standards.
4. Solicit, review and award medical training grants with accredited medical schools and other health agencies subject to final approval of the Secretary of the Health and Welfare Agency.
5. Perform program evaluation, related research and reporting of findings.

OFFICE ON AGING

Program Objectives

The Health and Welfare Agency through the Office on Aging is charged with administering funds allocated to the federal Older Americans Act of 1965, as amended, and with further serving the state's aging population now numbering nearly 2.7 million persons 60 years of age and older.

The Office on Aging serves the aging population by acting as a clearinghouse and information center for information on aging; conducting public hearings on all matters relating to the well being of the elderly; cooperating with federal, state and local bodies to promulgate effective programs for the elderly; acting as the funds administrator for the more than $13 million dollars in federal moneys allocated to California under the Older Americans Act of 1965 as amended; providing consultative services for development and implementation of Community Grant and Nutrition Programs; stimulating effective use of existing resources and supporting all available services offered to the elderly at state and community levels.

Specific functions of the Office on Aging include providing staff consultation to community and volunteer groups in fields such as nutrition, education, employment, health services, housing and living arrangements, income maintenance, preretirement planning, recreational and social services; providing demographic and other data essential to implementation of Titles III and VII of the Older Americans Act of 1965, as amended; providing consultation services and informational materials for local committees or councils on aging, universities and colleges, church organizations, industry, labor and federal, state and local government agencies; and coordinating, planning and developing a comprehensive delivery system of services to the elderly, utilizing existing resources to the maximum possible extent.

SUMMARY OF PROGRAM REQUIREMENTS

	ACTUAL 1972–73	ESTIMATED 1973–74	PROPOSED 1974–75
I. Coordinated services for aging	$2,855,936	$14,203,584	$19,477,370
General Fund	*98,473*	*783,580*	*794,015*
Federal funds	*2,757,463*	*13,420,004*	*18,683,355*
Personnel man-years	15.1	84.4	85.4

I. COORDINATED SERVICES FOR AGING

Need

Nearly 2,700,000 Californians, or 11 percent of the state's population, are 60 years of age or older. Of this number, almost 7 percent are below the poverty level established by the U.S. Census Bureau in 1970.

Senior citizens are entitled to: (1) economic and personal independence, and (2) maximum independence and dignity in a home environment whenever possible with appropriate supportive service.

Specific needs of the senior population are for: physical and mental health, nutrition, income, employment (for financial and social purposes), transportation (for recreation and life-maintenance purposes), education and housing.

Objective

Objectives of the Office on Aging are:

1. To administer federal funds to community-based nutrition, voluntary action and community service projects for the aging under provisions of the Older Americans Act of 1965, as amended.
2. To promote public awareness of, and focus attention on, problems and concerns of the elderly, through legislation and public and private agency activity.
3. To develop and provide consultative services in planning and coordinating a statewide comprehensive services delivery system for the elderly.

Output

The Older Americans Act of 1965, as amended in 1973, provides new direction and funds for program development to: (1) strengthen the aging programs at both the state and national levels and (2) alter the focus and scope of Title III programs.

Previous Title III involvement emphasized sponsorship of specific community services. The new Title III direction emphasizes assistance to state and local agencies in concentrating resources toward developing greater capacity and in fostering the development of comprehensive and coordinated systems of serving older people.

This new focus requires that community service programs be larger in size and scope; more comprehensive in service provision; more systematic and sophisticated; directed toward priority problems; developed on a more factual basis; and aligned more closely and effectively with other services.

Specific output will include:

1. Establish comprehensive community service projects in priority geographic service areas.
2. Establish specialized community service projects in nonpriority geographic areas.
3. Establish nutrition projects to serve at least 16,000 meals daily, with minimum project output of 100 meals daily each.
4. Develop evaluation criteria, addressing cost-effectiveness and adherence to rules and regulations relating to the Older Americans Act of 1965, as amended.
5. Increase the participation of seniors in volunteer and income-producing activities, including maintenance or expansion of 44 retired senior volunteer programs (RSVP).

OFFICE ON AGING—Continued

I. COORDINATED SERVICES FOR AGING—Continued

Authority

Division 8.5 of the Welfare and Institutions Code.

General Description

The staff of the Office on Aging will develop and implement on-going evaluation techniques to determine: the achievement of measurable project objectives; cost-effectiveness; the extent to which the needs of the elderly remain unmet; the extent to which consumers are involved in policymaking and implementation of the projects.

Effective supervision of fiscal and administrative functions will be provided for internal controls, reliable data, and operational efficiencies.

In addition, staff will provide technical assistance, including the development of a local resource base, to agencies and organizations implementing aging programs and to the statewide advisory committee.

The Office on Aging will encourage volunteer participation at the project level in aging services as well as in other public service activities. A public relations program will be developed to maximize the visibility of all activities and demonstrate program effectiveness to consumers and sponsors.

a. Retired Senior Volunteers Program (RSVP) Element

Need

Retired persons feel a need to continue social or economic contributions, but because of retirement and pension laws, are precluded from remaining on their jobs. Skilled and talented persons stagnate and withdraw as a result of feeling unneeded.

Objective

(1) To provide significant volunteer service opportunities in local communities for persons of retirement age.

(2) To make volunteer resources known and available to the local community.

General Description

RSVP projects are funded directly by the federal government, although monitoring, reporting and administrative assistance services are provided by Office on Aging staff assigned to RSVP Resource Specialist duties. Funds allocated to RSVP are designed as support for public and private nonprofit agencies, with grants money also covering payment of out-of-pocket expenses (costs incidental to service, such as transportation) to volunteers.

Output

RSVP has more than 40 projects in California providing a range of services, particularly meeting an increasing demand for volunteer services at hospitals for the mentally disabled.

Input	1972–73	1973–74	1974–75
Expenditures—federal ____	$67,636	$183,000	$183,355
Personnel man-years _____	1	5	5

a(1). Retired Senior Volunteers Program (RSVP) Component

Summary

RSVP projects were first authorized under the Older Americans Act of 1965, as amended in 1969. The commission contracts with the federal ACTION Agency to administer RSVP projects in California. Total grants, allocated directly to projects by the ACTION Agency, equal nearly $1.3 million dollars. RSVP staff provides guidance to, and monitors activities of, RSVP projects, following standards and guidelines of the federal government.

Schedule

Monthly reports on each project are prepared and submitted to the federal government. Each of the 44 projects are visited at least bimonthly by RSVP staff members.

Objectives

(1) To convey and interpret federal policies, regulations and guidelines to local RSVP projects.

(2) To monitor and report on local RSVP activities.

Work Program for Current Year

By March 31, 1974, complete single-year report cycle. Work with local and regional RSVP units to ensure effective utilization of RSVP funds. Recommend methods of extending program impact. Review proposals for new RSVP projects and provide project recommendtations to federal government.

Work Program for Budget Year

Depending on outcome of possible changes in Title VI (Voluntary Action Program) administration, will continue in current status or will be contracted to expand administration activities to include other Voluntary Action Programs such as Foster Grandparents and Green Thumb.

Element	1972–73	1973–74	1974–75
Expenditures—federal ____	$67,636	$183,000	$183,355
Personnel man-years _____	1	5	5

OFFICE ON AGING—Continued

I. COORDINATED SERVICES FOR AGING—Continued

b. Nutrition Element

Need

California's elderly are in need of low-cost, nutritionally sound meals and a reduction in the isolation of old age, which often accompanies—or is a result of—the physical or mental inability to shop alone, to prepare hot meals, or to plan and prepare nutritionally sound meals independently.

Objective

The Nutrition Program will provide low-cost, nutritionally sound meals on a regular basis in attractive surroundings, with supportive social services. The program will involve local community support in these efforts, with continually decreasing reliance on federal funds and other resources. A minimum of 16,000 meals daily are mandatory.

Output

There are six nutrition projects operating in California under Title VII of the Older Americans' Act, and as many as 20 more are operating under Title III of the Act. California is immediately anticipating as many as 20,000 meals daily by March 31, 1974.

General Description

Federal funds for nutrition projects are administered by the Office on Aging through application from, and local review of, community-based public and private nonprofit groups. Under the Older Americans Act of 1965, as amended, federal money is used on a federal-local resource basis. Resource development, funding sources and field assistance to projects are provided by Office on Aging administrative staff.

Input	1972–73	1973–74	1974–75
Proposal and Grants:			
Expenditures	–	$6,216,177	$8,823,529
Personnel man-years	–	25	25
Reporting:			
Expenditures	–	$994,588	$1,411,765
Personnel man-years	–	4	4
Evaluation:			
Expenditures	–	$1,243,235	$1,764,706
Personnel man-years	–	5	5

b(1). Proposal and Grants Coordination Component

Summary

This component has been in existence only since September 10, 1973, when Nutrition Program for the Elderly funding became available in California. Federal regulations require the use of specific application formats and information in proposals for grants under the nutrition program. Additionally, in order that the most effective value of staff time can be extracted, complicated by the various state and agency requirements with respect to review and coordination, a logical sequence of input, review, modification and documentation must be followed.

Schedule

Projects requesting funding under the Nutrition Program must submit applications to the Office on Aging in sufficient time that review may be completed prior to submission to the commission for review and approval. Applications may be submitted at any time. The commission meets monthly to approve requests.

Objectives

(1) To insure that grant proposals meet minimum federal requirements.

(2) To recommend for funding only those projects providing maximum value per dollar spent.

(3) To document and process grant requests approved for funding.

Work Program for Current Year

By December 31, 1973, California's FY 73, Title VII allocation must be committed to suitable nutrition projects throughout the state. Preliminary site evaluations and proposal and grants coordination activities must be substantially completed. Suitable menus for projects must be prepared for use by field consultants in assisting local groups to apply for funding. Full Nutrition Program staffing must be hired, trained and assigned to work in the program. Directors of projects funded by December 31, 1973 under Title VII must have been coordinated through federally sponsored training. At least one member of the Nutrition Program headquarters staff must also participate in this training.

Work Program for Budget Year

During fiscal year 1975, innovations in food service are expected to include pilot introductions of a restaurant voucher system and variations on bulk catering. Additional monies are expected to increase the size of existing projects. Multicounty projects are also expected.

Element	1972–73	1973–74	1974–75
Expenditures	–	$6,216,177	$8,823,529
Personnel man-years	–	25	25

OFFICE ON AGING—Continued

I. COORDINATED SERVICES FOR AGING—Continued

b(2). Reporting Component

Summary

This component has been in existence since September 10, 1973, when Nutrition Program for the Elderly funding became available in California and nutrition projects were established under temporary waiver conditions set forth by HEW. Reporting requirements are mandated by federal regulation, and at present are weekly and quarterly in nature.

Schedule

Formal reporting on the Nutrition Program is quarterly. The first report is due October 5, 1973 for quarter ending September 30, 1973. Interim weekly reporting began on September 14, 1973 and is expected to continue indefinitely, overlapping the formal quarterly reporting.

Objectives

(1) To provide a continuing watch over expenditures and participation in the program.

(2) To provide a management information tool for the Office on Aging and for each project director to use in improving the effectiveness of each project.

Work Program for Current Year

By the end of fiscal year 1974, more than 160 nutrition projects are expected to be in operation in California. Reporting must incorporate exact and definable data on each project, as well as statewide and nationally comparable figures.

Work Program for Budget Year

By the end of fiscal year 1975, quarterly reports may expand from approximately 40 reportable items to in excess of 100 items per project. The number of projects is expected to increase, also.

Element	1972–73	1973–74	1974–75
Expenditures	–	$994,588	$1,411,765
Personnel man-years	–	4	4

b(3). Evaluation Component

Summary

Implementation of the Nutrition Program for the Elderly in California became effective September 10, 1973. Federal regulations require extensive evaluation and monitoring schemes in the general areas of nutritional content, project supportive services content, fiscal impact and management, and services to target area low-income elderly. Evaluation will be aimed equally at fiscal and program aspects.

Schedule

Evaluation schemes must be developed and implemented by December 31, 1973 and must be well begun no later than December 1, 1973. Evaluation staff must be on board no later than November 1, 1973 to meet the December 31, 1973 scheme development and implemention deadline. March 31, 1974 is the target date for full evaluation of projects funded under fiscal year 1973 moneys. June 30, 1974 is the deadline for evaluation of projects funded under fiscal year 1974 allocations. (Federal evaluation guidelines have not been released to date.)

Objectives

(1) To meet minimum federal evaluation guidelines when those guidelines have been announced.

(2) To pursue interim evaluation standards using California's size and complexity of service areas as a basis for developing standards.

Work Program for Current Year

Office on Aging staff will produce and implement a workable, effective evaluation scheme and will report direct, or through manipulation of gathered data, that detail required by the federal government. It will revise and modify evaluation techniques and output as required to meet guidelines when issued.

Work Program for Budget Year

Evaluation bases will be larger than in fiscal year 1974, and will include integration with Title III Community Service evaluation.

Element	1972–73	1973–74	1974–75
Expenditures	–	$1,243,235	$1,764,706
Personnel man-years	–	5	5

c. Community Service Element

Need

Efforts are required to ensure California's elderly of adequate living accommodations, transportation, nutrition, reassurance, health and health-related services, and recreation services. Overlap of, or total lack of, supportive services must be recognized and corrected through comprehensive planning.

Objectives

(1) To provide major service or multi-service units offering a variety of useful and sustaining services to the elderly.

(2) To extend the value of moneys available for community services through comprehensive resource planning.

OFFICE ON AGING—Continued

I. COORDINATED SERVICES FOR AGING—Continued

c. Community Service Element—Continued

Output

There are 74 community service grants in operation in California. Since 1966, more than 190 similar programs have been initiated, and more than 80 percent of these are self-sustaining without federal support. Included are projects designed to develop data needed in comprehensive planning, including resource identification and needs analysis. Future direction of community service grants are unclear. The thrust may be toward social services, planning services, or some combination of both.

General Description

Office on Aging field consultants assist local leaders in developing proposals which conform to federal guidelines. Headquarters staff monitor, evaluate and coordinate project activities to ensure compliance with regulations.

Input	1972–73	1973–74	1974–75
Proposal and Grants:			
Expenditures	$1,988,407	$3,162,447	$4,297,697
Personnel man-years	6	20	20

Evaluation:			
Expenditures	–	$786,678	$1,069,079
Personnel man-years	–	5	5

c(1). Proposal and Grants Coordination Component

Summary

This component has been in existence since 1966 under provisions of the Older Americans' Act of 1965. Federal regulations require that applications and proposals meet certain minimum standards, and that grants meet minimum federal standards of preparation. California state law further imposes limitations and requirements on processing. Finally, the Office on Aging itself has included certain standards of completion and procedural processing. This component addresses itself to meeting the combined requirements.

Schedule

Grant proposals must be reviewed, evaluated and verified for technical and program content prior to submission for Office on Aging approval. Applications may be submitted at any time. The Office on Aging meets monthly to approve requests.

Objectives

(1) To ensure that grant proposals meet minimum federal requirements.

(2) To recommend for funding only those projects providing maximum value for dollar spent.

(3) To document and process grant requests approved for funding.

Work Program for Current Year

Requests for new, extended, renewal and converted funding will be processed under amended and interim Title III regulations, subject to regulation and policy changes handed down from the federal government.

Work Program for Budget Year

Proposal and grants coordination activities will increase both in numbers and in final amounts awarded, as a result of legislation currently being proposed to meet transportation, health services, and housing needs of the elderly.

Element	1972–73	1973–74	1974–75
Expenditures	$1,988,407	$3,162,447	$4,297,697
Personnel man-years	6	20	20

c(2). Planning Component

Summary

Title III regulations amended during the 1972 congressional session introduced the need for planning and service agencies. Some planning agencies were set up in 1969, but the majority of planning effort has been in the last year. A new planning aspect, bringing the local communities more directly into the funds allocation cycle, is the advent of the area agencies on aging as master service area plans.

Schedule

Local area planning, including needs identification, is to be completed by December 31, 1973. Each of the planning areas is required to report progress and activities on a monthly basis, with all reports reviewed and summarized. Comprehensive statewide planning is scheduled to begin January 1, 1974, and is scheduled for first phase completion by March 31, 1974.

OFFICE ON AGING—Continued

I. COORDINATED SERVICES FOR AGING—Continued

c(2). Planning Component—Continued

Objectives

(1) To provide an overview of planning activities performed on the local level.
(2) To disseminate planning guidelines and requirements issued by the federal government.
(3) To provide planning expertise to local groups.
(4) To ensure coordinated and unidirectional planning efforts.

Work Program for Current Year

Complete local community plans. Initiate area plans under area agency on aging concepts. Set up comprehensive services delivery system master plans. Assist local bodies in implementing planning stages.

Work Program for Budget Year

Assist local bodies in completing master plans. Develop and oversee implementation of broad spectrum inter-county and interarea planning efforts under guidelines expected from federal government by June, 1974.

Element	1972–73	1973–74	1974–75
Expenditures	–	$298,938	$406,250
Personnel man-years	–	2	2

c(3). Reporting Component

Summary

This component will not come into existence until on or after November 1, 1973. New changes proposed in Title III regulations call for reporting of community service activities under guidelines to be furnished by HEW.

Schedule

Formal reporting on Community Service Programs is expected to be quarterly, and may include interim weekly or monthly reporting cycles.

Objectives

(1) To provide a continuing watch over expenditures and participation in projects.
(2) To provide a management information tool for the commission and for each project director to use in improving the effectiveness of each project.

Work Program for Current Year

By the deadline to be established, a complete reporting cycle must be established, and reporting documentation must be installed in each project. Guidelines for reporting must be interpreted, and reporting instructions must be prepared or distributed as furnished by the federal government.

Work Program for Budget Year

Impact of reporting will be dictated by the extent of reporting required and the number of projects in operation during the period covered by the reports.

Element	1972–73	1973–74	1974–75
Expenditures	$701,420	$534,941	$726,974
Personnel man-years	2	3.4	3.4

c(4). Evaluation Component

Summary

This component will not come into existence until on or after November 1, 1973. New changes proposed in Title III regulations call for evaluation schemes to be applied against community service projects. It is expected that such evaluation will closely parallel evaluation required under Title VII, Nutrition Programs.

Schedule

It is anticipated that evaluation staff will be required to begin work by December 1, 1973, if regulation changes are effective November 1, 1973.

Objectives

(1) To meet minimum federal evaluation guidelines when those guidelines have been announced.
(2) To pursue interim evaluation standards, using California's size and complexity of service areas as a basis for developing standards.

Work Program for Current Year

Office on Aging staff will produce and implement a workable, effective evaluation plan and will report direct, or through manipulation of gathered data, that detail required by the federal government. It will revise and modify evaluation techniques and output as required to meet guidelines when issued.

Work Program for Budget Year

Evaluation bases will be larger than in fiscal year 1974, and will be more complex. Evaluation plan will require enlargement and enhancement.

Element	1972–73	1973–74	1974–75
Expenditures	–	$786,678	$1,069,079
Personnel man-years	–	5	5

OFFICE ON AGING—Continued

I. COORDINATED SERVICES FOR AGING—Continued

d. Administration Element

Need

The administration of nearly $14 million in federal moneys during fiscal year 1973 (with an extension of administration time until the end of fiscal year 1973 for $8.5 million on nutrition program money alone) must include fiscal and program safeguards against misuse or misappropriation to ensure the most effective possible use of those funds. Staff must be hired and trained. Federal and state rules and regulations must be observed. Appropriate legislation must be encouraged and supported to ensure continued support of programs aimed at the elderly in California.

Objective

To ensure that Office on Aging procedures and activities conform to the meaning and intent of existing legislation and the statutory and fiscal limits of federal and state rules, regulations and administrative policies.

Output

Administrative staff provides services in personnel, clerical support, fiscal management, legislation, public information, and affirmative action toward equal employment opportunities.

General Description

Office on Aging administrative staff will provide internal support in all areas required to maintain a fully functional and efficient headquarters unit. It will ensure Commission compliance with all federal, state and commission policies, rules and regulations.

Input	1972–73	1973–74	1974–75
Internal Operations:			
Expenditures	$84,794	$592,296	$600,983
Personnel man-years	5	12	13
Training:			
Expenditures	–	$59,175	$53,810
Personnel man-years	–	1	1
Legislation:			
Expenditures	$9,576	$40,500	$42,706
Personnel man-years	0.7	0.5	0.5
Public Information:			
Expenditures	$4,103	$54,681	$61,212
Personnel man-years	0.4	1	1
Affirmative Action:			
Expenditures	–	$36,928	$35,304
Personnel man-years	–	0.5	0.5

d(1). Internal Operations Component

Summary

The internal operations component was initiated August 1, 1973. Staff support is required in the areas of personnel transactions, clerical services, service, supply and equipment procurement, and related areas.

Schedule

Internal operations is a continuing "on-demand" function.

Objectives

(1) To provide adequate supportive administrative and clerical services to all phases of the Office on Aging activities.

(2) To ensure that Office on Aging activities conform to state and federal activities.

Work Program for Current Year

Attendance reporting, personnel transaction, fiscal reporting, procurement and clerical support activities will be carried out as necessary to support the commission's activities.

Work Program for Budget Year

Internal operations will continue at that level required to support commission activities.

Element	1972–73	1973–74	1974–75
Expenditures	$84,794	$592,296	$600,983
Personnel man-years	5	12	13

d(2). Training Component

Summary

The training component was initiated on September 12, 1973. The Office on Aging requires two major types of training: (1) staff development and operations and (2) aging program administration and field operation procedures. The training component is charged with the responsibility for both. In addition, this unit is responsible for coordinating all out-service training.

Schedule

Combined internal operations and field operation procedures training was completed for new Office on Aging staff during the week of September 14, 1973. Out-service training for project staff sponsored by the federal government is given on a monthly cycle. The first of these cyclical units begins October 15, with subsequent sessions running monthly through June 30, 1974.

OFFICE ON AGING—Continued

I. COORDINATED SERVICES FOR AGING—Continued

d(2). Training Component—Continued

Objective

(1) To prepare and deliver all necessary and desirable training to Office on Aging staff.

Work Program for Current Year

Training materials will be developed and delivered for presentation on: (1) field consultation services, (2) affirmative action, (3) planning techniques, (4) evaluation techniques, and (5) commission orientation for new employees.

Work Program for Budget Year

Training staff will modify, prepare and deliver training as necessary to meet federal and state demands.

Element	1972–73	1973–74	1974–75
Expenditures	–	$59,175	$53,810
Personnel man-years	–	1	1

d(3). Legislation Component

Summary

The legislative component was initiated in November, 1966. Increasing legislative activity in and support of programs for the aging is occurring on local, state and national levels. Maintaining awareness of on-going activity is equal in importance to suggesting or proposing legislation to meet unfilled need which cannot be addressed except through legislation.

Schedule

The Office on Aging concerns itself with any legislation having an actual or potential impact on the elderly in the state. Of paramount importance is analysis of bills introduced in the California Legislature. Peak periods of activity occur during legislative sessions. This component sees continuing action during recess sessions as well.

Objectives

(1) To maintain close watch over all legislation pertaining to the elderly.

(2) To provide appropriate legislation analysis.

(3) To identify indirect impact of legislation on the elderly.

Work Program for Current Year

Proposed legislation is analyzed for fiscal and program impact on activities designed to benefit the elderly population. Legislation is proposed as necessary to enhance the well-being of California's elderly in need.

Work Program for Budget Year

Legislative activity is expected to double as a result of increased availability of funds for aging programs and increased political pressure from advocates for the elderly.

Element	1972–73	1973–74	1974–75
Expenditures	$9,576	$40,500	$42,706
Personnel man-years	0.7	0.5	0.5

d(4). Public Information Component

Summary

Information on programs for, and status of, the elderly must be readily available, factual, and broadly publicized to call attention: (1) to the needs and demands of the elderly, (2) to the administration's efforts to meet those needs and (3) to the output or results of those efforts in as politically realistic a fashion as possible.

Schedule

Public information materials are distributed to interested legislators and members of the public as requested. Announcements are prepared and distributed to elaborate on key issues or events of significance to the Office on Aging activities. At present, there are no scheduled activities.

Objectives

(1) To provide timely and accurate responses to requests for information on programs for, and problems of, the elderly.

(2) To prepare public statements on Office on Aging activities.

(3) To participate in multiprogram campaigns designed to publicize and enhance activities of the administration.

Work Program for Current Year

By the end of June, 1974, there will have been approximately 50,000 pamphlets, booklets and similar items released through the commission. Most printed material is forwarded from other sources for distribution. A considerable increase in publicity work is expected by the end of current year 1973, when a public information officer is designated.

Work Program for Budget Year

A full-spectrum public information campaign is anticipated for implementation of the Area Agencies on aging. Substantial increase in requests for information on aging programs is expected as a direct result of increased state and national visibility of aging programs and aging program advocates.

Element	1972–73	1973–74	1974–75
Expenditures	$4,103	$54,681	$61,212
Personnel man-years	0.4	1	1

OFFICE ON AGING—Continued

I. COORDINATED SERVICES FOR AGING—Continued

d(5). Affirmative Action Component

Summary

An Affirmative Action program, acceptable to HEW, is mandated under regulations governing the administration of funds allocated by Congress for programs covered by the Older Americans Act of 1965, as amended. The Office on Aging and projects funded under grants administered by the office are governed by one or more affirmative action program requirements according to the legislation under which an activity is pursued.

Schedule

An approved affirmative action plan was signed on September 10, 1973. An Affirmative Action Coordinator will be named by November 1, 1973. Further action dates are stipulated in the Affirmative Action Plan.

Objective

(1) To ensure that the Office on Aging and projects funded through it adhere to state and federal policies and regulations prohibiting discrimination on the basis of age, sex, religion, race or ethnicity, or national origin.

Work Program for Current Year

Copies of the Affirmative Action Plan will be made a part of each proposal for funding. Each grantee will be required to accept conditions of the plan. Necessary training and reporting on conformity will be instituted. Translations of the plan will be prepared as necessary so that publicly displayed copies will be accessible to all participants in Office on Aging administered operations. Proposed changes in Title III regulations, due November 1, 1973, may increase the volume of activity in this area.

Work Program for Budget Year

As Office on Aging staff and community projects increase, the level of activity in this area is expected to increase in the areas of recruitment, job development and promotional opportunities.

OFFICE OF ALCOHOL PROGRAM MANAGEMENT

The Office of Alcohol Program Mauagement (OAPM) is responsible for the admiuistration of state and federal funds for the prevention, treatment, and rehabilitation programs that deal with alcohol abuse and alcoholism in California.

The office was established in 1970 to meld the existing fragmented, uncoordinated and duplicative alcoholism programs into a comprehensive, integrated delivery system for the prevention of alcoholism and for the treatment and rehabilitation of alcoholics.

The office operates through county alcoholism programs which are responsible for local planning, consultation, grant review, and the provision of alcoholism services directly or through contract arrangements with private and other public programs.

Staff of the Office of Alcohol Program Management, housed in the Local Programs Services Section of the Departmeut of Health, provides assistance and consultation to the county programs in preparation of local alcoholism plans, reviews and recommends approval of local alcoholism plaus, and authorizes reimbursement for approved plans.

The Office of Alcohol Program Mauagement is also responsible for the establishment of a uniform information collectiou aud processing system to monitor the activities and operatiou of county alcoholism programs.

The Office of Alcohol Program Management is responsible for technical assistance to local communities developing occupational, public inebriate, drunk driver evaluation and treatment, alcohol education and voluntary alcoholism programs.

The Office of Alcohol Program Management provides funds to the Department of Education for the developmeut and implementation of alcohol education programs and the Alcoholism Councils of Los Angeles and Sau Francisco for the development of private industry employee alcoholism programs.

SUMMARY OF PROGRAM REQUIREMENTS

Reflected in departmental budgets	(22,177,537)	–	–

I. COMMUNITY SERVICES

Need

It is estimated that over 1.3 million Californians are excessively heavy drinkers and another 5.5 million are directly affected by alcoholic behavior. Approximately 500,000 employees are experiencing alcohol-related problems on the job. Approximately one-third of California traffic fatalities are due or related to excessive drinking. Last year there were 225,556 arrests in California for drunk driving.

Objectives

The element objectives are:

1. To increase public awareness and consultation on alcoholism.
2. To reduce the cost of occupational alcoholism.

Alcoholism, as a disease, is defined in terms of individuals who are excessive drinkers. Their dependence on alcohol has attained such a degree as to interfere with their physical and mental health, interpersonal relations, and social, economic, and vocational functioning. In addition to the impact upon the health of the individual, alcoholism also contributes to many other problems, including family discord, poverty, violence, abuse and neglect of children, unemployability, welfare dependency and highway accidents.

In California, about nine million adults, almost three-fourths of the adult population, drink alcoholic beverages. The majority drink in moderation, but it is estimated that nearly one and one-half million Californians are alcoholics.

Deaths due to alcoholism are the fourth leading cause of death during the economically productive years from 35 to 54. Recent studies indicate that drinking drivers are involved in 36 percent of highway traffic fatalities in California and in 20 percent of the injury accidents. In terms of cost to the taxpayer, public drunkenness accounts for approximately 50 percent of all misdemeanor bookings into city and county jails iu Califoruia.

Objectives

The objectives of the statewide alcoholism program are:

1. To reduce the misuse of alcohol so as to reduce the rate of alcoholism in California.
2. To assist all persons in California impaired by alcoholism to attain their maximum physical, social, psychological, and economic functioning.
3. To monitor the effectiveness of the California Alcoholism Program.

Output

Demographic data collection will indicate that more people are utilizing alcoholism treatment resources at earlier stages in their alcoholism progression; the economic drain covered by alcoholism in industry and government will be reduced by establishing alcoholism programs in at least five major companies and five governmental agencies; and alcohol-related traffic fatalities per 100,000 population will be reduced.

Authority

Welfare and Institutions Code, Division 10, commencing with Section 19000.

Education Code, Division 7, commencing with Section 8751.

OFFICE OF ALCOHOL PROGRAM MANAGEMENT—Continued

I. COMMUNITY SERVICES—Continued

General Description

Public awareness of alcoholism on a statewide basis is primarily the responsibility of OAPM. Consultation on community organization, mass media, and the development of information centers is provided by this office. A highly visible public awareness campaign on alcoholism problems and resources called the "Alcoholism Strike Force" began this year and will continue in the budget year. Alcohol education in the schools is coordinated by the State Department of Education through an interagency agreement with OAPM. At the local level numerous private and public programs for awareness and information in the community and schools will continue. Consultation efforts on traffic safety will continue in fiscal year 1974–75. Efforts will be made to help counties conform to legislation requiring presentence investigation of drivers who receive a second conviction of drunk driving.

The Occupational Alcoholism Program in OAPM will continue on a contract with the National Institute of Alcohol Abuse and Alcoholism. Subcontracts to develop occupational alcoholism programs in private industry will also continue in Los Angeles and San Francisco.

PROGRAM REQUIREMENTS	1972–73	1973–74	1974–75
Totals, Community Services	$2,635,292	$3,451,292	$3,953,685

II. TREATMENT AND REHABILITATION

1. Outpatient

Outpatient treatment refers to community based outpatient services and facilities for the treatment and rehabilitation of defined alcoholic populations. The services provided by the outpatient treatment programs through a team approach include group and individual counseling, medication and other medical care for alcoholics and their families. Usually these are persons suffering from some physical, social, or psychological disturbance resulting from their excessive alcohol use.

Outpatient alcohol treatment programs are supported through reimbursement of the county alcoholism programs. They have demonstrated that they can effectively assist alcoholics to achieve and maintain sobriety, recover emotional and physical health, and achieve and maintain self-support. Facilities of the outpatient clinic type are needed; for each 200,000 persons in the state, it has been estimated 100 alcohol outpatient programs are needed.

2. Alcohol Recovery Home Services

Alcohol recovery homes are residential facilities where the alcoholic finds a home-like atmosphere, has an opportunity to develop healthy social relationships, can obtain help with acute personal problems, and where use of alcoholic beverages is forbidden.

Such facilities are essential in a community alcoholism program because many alcoholics have no permanent home or else need separation from their usual environment during the initial recovery phase.

Alcohol recovery homes provide an effective and economical alternative to inpatient alcoholism programs.

At present, the 164 existing alcohol recovery homes can accommodate about 4,000 alcoholics. However, very few alcohol recovery homes have received state reimbursement for alcoholism services due to past policy restrictions on use of Short-Doyle funds for recovery home services. On the basis of a need for at least one residence for each 100,000 of the population, 200 recovery homes would be required. There does not appear to be a need for new recovery homes; rather, the need is to provide an adequate base of funding to existing homes to assure their continued existence and to upgrade the level and quality of rehabilitation services they now provide.

3. Twenty-Four-Hour Care

Inpatient services in the state hospitals are provided by specialized alcoholism programs in Camarillo and Metropolitan State Hospitals. During the past year 3,043 alcoholics were admitted to state hospital alcoholism programs, a 24% decrease in admissions over the previous year. The number of admissions to state hospital alcoholism programs continues to decrease during the current year; however, the rate of decreased admissions is slowing down.

Inpatient services are also provided in specialized alcohol programs in local hospitals. A total of 50,000 days of inpatient treatment of alcoholics were provided in local hospital alcoholism programs. It is anticipated that the availability of lower cost recovery home programs of improved quality will reduce the number of days and the total cost for inpatient alcoholism services.

4. Vocational Rehabilitation

Vocational rehabilitation services for alcoholics are provided through specialized alcohol rehabilitation counselors assigned to Department of Rehabilitation field offices. The responsibility for purchase of alcoholism treatment services has been transferred from the Department of Rehabilitation to the Department of Health.

The alcohol rehabilitation counselors serve alcoholics referred from all sources in the local community. New emphasis has been placed on the unemployed alcoholic who can benefit from vocational rehabilitation services and return to work. This particular group of clients require more comprehensive and long term services; hence a greater cost per client and fewer persons served is expected in the initial phase of the new program. Particularly, the unemployed alcoholic needs facilities for establishing and maintaining stability such as recovery homes.

OFFICE OF ALCOHOL PROGRAM MANAGEMENT—Continued

II. TREATMENT AND REHABILITATION—Continued

PROGRAM REQUIREMENTS	1972–73	1973–74	1974–75
Totals, Treatment and Rehabilitation	$19,325,482	$25,126,482	$29,124,442

III. PROGRAM ADMINISTRATION

The State of California through the Office of Alcohol Program Management distributes to the counties state and federal funds for the purpose of providing alcoholism treatment services to citizens suffering from alcoholism or alcohol abuse. These funds are allocated to those local programs identified as providing alcoholism treatment.

Statewide program effectiveness depends on the Office of Alcohol Program Management's ability to guarantee that the funds are used to develop and finance effective alcoholism programs.

Because of the magnitude of the problem and the advent of new money and programs the development of trained manpower is a must to insure effective local programming. Unfortunately the nature of the problem has limited the number of trained profesionals in the field.

To harmonize and coordinate the proper use of alcoholism allocated funds with all of the counties, private agencies, and state and federal sources, a continuous planning process is essential.

Objectives

1. To oversee, harmonize and coordinate all stat programs relating to alcoholism.
2. To define problems, assess needs, and plan th development of alcohol abuse and alcoholism preven tion, treatment and rehabilitation programs.
3. To develop standards and guidelines for alcoho abuse and alcoholism programs, practices, personne or facilities.
4. To develop and implement a uniform data col lection and management information system.
5. To monitor the activities and operations o county alcoholism programs.
6. To develop and implement inservice training regional training, and regional training workshop for state and county alcoholism programs.
7. To assist the universities and other training institutions in the development of academic inservice training programs in the field of alcoholism.
8. To provide the many state, local and private alcoholism agencies that comprise the California alcoholism program with a continuously updated California Alcoholism Plan.

OFFICE OF DEVELOPMENTAL DISABILITIES

DEVELOPMENTAL DISABILITIES PROGRAM

The Office of Developmental Disabilities is responsible for insuring that state services to the mentally retarded and other developmentally disabled in California are provided efficiently, effectively, and economically. This responsibility includes establishing policy, responding to public issues, and measuring the effectiveness of the state's programs in meeting the goals and objectives of the programs.

The emphasis of all programs is to reduce the incidence of developmental disability and to increase the self-sufficiency of clients.

SUMMARY OF PROGRAM REQUIREMENTS

Need

The financial and emotional impact that accompanies the birth of a severely developmentally disabled child often leads to stress that can threaten maintenance of the family unit. In addition, as the developmentally disabled child grows up, he may be subject to exploitation, abuse, and neglect. The needs of the developmentally disabled individual particularly include the need to belong, to be useful, and the opportunity to attain the maximum of his or her potential. The complex interplay of social, medical, economic and legal factors that go into the design of programs and services to meet these needs calls for increased responsiveness by the private sector, as well as by the family and governmental agencies.

Objectives

(1) To reduce the incidence of developmental disabilities.

(2) To help maintain the family unit.

(3) To promote the maximum health and social, intellectual and vocational adjustment of the developmentally disabled.

(4) To protect the developmentally disabled from exploitation and abuse.

(5) To establish standards that promote enlightened care and treatment.

(6) To encourage a family and community approach toward meeting the needs of the developmentally disabled.

Authority

Health and Safety Code; Welfare and Institutions Code; Education Code; Social Security Act; Vocational Rehabilitation Act, and the California Administrative Code.

General Description

The developmental disabilities program provides that all developmentally disabled persons who are capable of it will be integrated into the community and be self-sufficient; that those of less ability will achieve a place in the community with supervision as needed, and that the severely disabled will be provided appropriate nursing and institutional care. Each locality would make general community services in the private sector accessible and available. Where general services are unable to meet special needs, the state seeks to identify the special services needed. Community-oriented programs are encouraged to provide comprehensive services, effectively coordinated, to assure a continuum of care, with services available to all age groups and degrees of handicap.

OFFICE OF DEVELOPMENTAL DISABILITIES—Continued

DEVELOPMENTAL DISABILITIES PROGRAM—Continued

PROGRAM REQUIREMENTS

	1972–73	1973–74	1974–75
Totals, Public Information and Prevention	$939,161	$238,831	$213,635

A. Public Information

The public information component of this program is designed to inform the public about the causes of developmental disabilities, the needs of the disabled and their families, and the state and local services available. The department's activities involve the use of press, radio and television, public appearances and publications in journals, magazines and pamphlets of wide distribution.

B. Prevention of Developmental Disabilities

In the prevention component, the Department of Health conducts basic research into the causes of developmental disabilities. They conduct programs of preventive measures including phenylketonuria (PKU) screening, genetic counseling, family counseling for high-risk families, and vaccination to prevent rubella, a known cause of developmental disabilities.

PROGRAM REQUIREMENTS

	1972–73	1973–74	1974–75
Totals, Case Identification and Case Management	$7,155,821	$13,279,255	$15,103,487

A. Casefinding and Identification

In order to ensure that services to the developmentally disabled including diagnosis, education, treatment and habitation are provided in the most effective way, early identification of the disabled is carried out by state agencies. This is done through contacts with community agencies, local school districts, health departments and medical care programs.

B. Case Evaluation

To achieve maximum health and transition into community life, the departments conduct programs of case valuation including medical, psychological, social and vocational assessment of individual clients. Each department attempts to use evaluation procedures already performed in order to prevent duplication. After evaluative data is obtained, the information is reviewed and, with the family's participation, a plan is developed for the client.

C. Case Management

In order to ensure proper implementation of the plan of services for the developmentally disabled and accomplishment of treatment goals, case management is carried out by assignment to a worker who has responsibility for the disabled individual. The worker ensures that the individual receives the services as planned and evaluates progress. If the individual is not attaining the goals set for him, a new plan is developed and new services arranged.

PROGRAM REQUIREMENTS

	1972–73	1973–74	1974–75
Totals, Basic Living and Care	$161,700,765	$211,507,790	$232,915,625

A. Living in Own Home

In order to maintain the family unit and protect the developmentally disabled individual, public assistance grants are made to eligible recipients. The grants provide basic food, shelter, clothing and related costs, and are provided by county welfare departments through a combination of federal, state and county funds. This program element includes the cost of the grants, plus staff required to administer the grant program and provide specialized social services.

B. Living Out of Own Home

Out-of-home placement services are provided by county welfare departments, state hospitals, the State Department of Health, the regional centers, and private organizations. Principal resources include care in private homes or licensed institutions, which are certified or approved by state departments or county welfare departments.

C. Routine Health Maintenance

In order to maintain the health status of the disabled individual, medical care and related services are provided by the state through the purchase of services, or through medical services in state hospitals. In most instances, the principal funding mechanism is the Medi-Cal program administered by the Department of Health. For developmentally disabled individuals not receiving medical care through the Department of Health or Medi-Cal, services may be purchased by the regional centers.

OFFICE OF DEVELOPMENTAL DISABILITIES—Continued

DEVELOPMENTAL DISABILITIES PROGRAM—Continued

PROGRAM REQUIREMENTS

	1972–73	1973–74	1974–75
Totals, Specialized Services	$71,047,613	$79,593,727	$79,523,724

In order to ensure the physical, social, intellectual and vocational adjustments of the developmentally disabled and achievement of as much independence as possible, specialized services are provided by the four state departments. These services include assistance with physical, social, intellectual, and vocational functioning.

A. Physical Functioning

Physical functioning services include, through the Department of Health, specialized medical and surgical treatment. The Department of Rehabilitation provides services to improve physical capacity to work. The Department of Education and the Department of Health provide services aimed at increasing motor development.

B. Social Functioning

Social functioning services to control or modify maladaptive behavior are provided by the Department of Health in state hospitals. The Department of Education, through special education classes, teaches behavior patterns in conformance with society's standards and trains developmentally disabled to develop relationships with others and to become part of a group. The Department of Social Welfare provides social work services to improve self-care, sustain family and social relationships and encourages participation in community life.

C. Intellectual Functioning

Intellectual functioning services are provided by the Department of Education through subvention to local school districts which operate special classes for the developmentally disabled. Education programs are also carried out by the Department of Health in state hospitals.

D. Vocational Functioning

Vocational functioning services are provided mainly by the Department of Rehabilitation. Following an assessment of the individual's ability to work, he is assisted in choosing a suitable job objective within his capabilities and limitations. Next, services such as job adjustment training in a workshop or on-the-job training in a work situation are provided. The program culminates in either competitive or sheltered employment in the community.

PROGRAM REQUIREMENTS

	1972–73	1973–74	1974–75
Totals, Research and Program Evaluation	$3,681,976	$3,806,120	$4,221,558

A. Research

Research programs are carried out in facilities of the Department of Health and by contracted research projects. Programs include clinical research to provide better diagnosis, treatment and preventive measures; sociocultural research to study the relationship between retardation and social factor; biological research on living subjects, human, animal or a life process and studies of physiology, biochemistry or genetics; and operational research concerned with planning, operating or evaluating systems or programs for delivery of services.

B. Program Evaluation

In order to carry out an effective and efficient program, each department conducts ongoing program evaluation. This evaluation is carried out by periodic review of individual cases, comparing results obtained with stated goals, and by review of entire programs such as family care, state hospitals, etc.

PROGRAM REQUIREMENTS

	1972–73	1973–74	1974–75
Totals, Manpower Development, Training and Utilization	$2,726,350	$942,275	$940,372

A. Manpower Development

The departments conduct programs of preservice and inservice training. The Department of Health offers medical residency training in state hospitals. The Department of Social Welfare, Rehabilitation and Health provide professional internships for social work, psychology, rehabilitation and ancillary workers. The Department of Education and the Department of Health provide stipends and training for teachers. These departments also provide training for volunteers who contributed their services.

OFFICE OF DEVELOPMENTAL DISABILITIES—Continued

PROGRAM REQUIREMENTS

	1972–73	1973–74	1974–75
Totals, Administration and Support	$5,604,007	$763,072	$750,013

A. Administration

In order to plan and coordinate the state's program for the developmentally disabled, the Office of Developmental Disabilities has three positions. All positions are funded from federal funds.

In addition, responsibility for administration of programs for the developmentally disabled is included in the overall administration of the involved departments. The Department of Health has an identifiable administrative unit solely responsible for developmental disabilities programs.

B. Guardianship and Conservatorship

For the protection of the disabled, the Department of Health provides guardianship and conservatorship services. The Director of Health may be named as guardian or conservator of a developmentally disabled individual. Following such action, the regional center prepares a case evaluation for submission to the court by the Attorney General's office. Upon appointment by the court, the staff of the regional center manages the affairs of the disabled individual for the Director of Health.

C. Licensing and Certification

The Department of Health licenses nurseries, family homes, resident schools, resident facilities, hospitals, nursing homes, day care and facilities for the developmentally disabled. The Department of Rehabilitation certifies workshops for the developmentally disabled.

OFFICE OF NARCOTICS AND DRUG ABUSE

The Office of Narcotics and Drug Abuse administers and coordinates the statewide Narcotics and Drug Abuse Program.

Drug abuse has become one of the rampant social ills of our time. No race, ethnic group, socioeconomic group or geographical location has escaped its effects. Drug abuse is a hazard to health, dramatically increases crime, promotes the breakup of the family, the breakdown of authority and strains our welfare, health and criminal justice systems.

In 1972, over 4,200 people died in California as a direct result of some form of drug abuse. This represents nearly a 100-percent increase since 1960. California police departments made approximately 145,500 drug law violation arrests. Of these, 22.3 percent or over 32,000 were juvenile arrests. It is the belief of many police officials that as much as 70 percent of all burglaries are committed by addicts. It is estimated by the California Council on Criminal Justice that addicts in California steal between $283,000,000 and $455,000,000 in cash and property annually. Programs devoted to the prevention, care, treatment, rehabilitation and control of narcotics and drug abuse are administered by several different state agencies in California. There is a need for coordination of these programs.

Attempts to deal with the problem have been mounted by federal, state and local governments and private agencies, but use, arrests, and overdose deaths continue to increase at a rate higher than normal population growth. The factors accounting for these increases in the face of our efforts to slow them down cannot be accurately pinpointed, but it appears that the problem rests with such things as insufficient technical knowledge on how to effectively prevent and treat drug addiction, insufficient data to permit the accurate assessment of prevention and treatment needs and the selection of the most appropriate strategies to affect the needs, the absence of a workable system or conceptual model for the delivery of prevention and treatment services that guarantees coordination and communication between the different agencies, programs and program elements involved, and the absence of a centrally directed plan to attack the problem and limited community concern and participation in the decisionmaking process pertaining to program needs and program operations.

The objectives of the statewide narcotics and drug abuse program are:

1. To coordinate state and local narcotics and drug abuse preventive, care, treatment and rehabilitation programs.

2. To develop and implement a comprehensive and uniform plan for the prevention, care, treatment and rehabilitation of narcotics and drug abuse throughout the state.

3. To provide technical assistance, guidance and information to local governments and state agencies with respect to the creation and implementation of programs and procedures for dealing effectively with narcotics and drug abuse prevention, care, treatment, and rehabilitation.

4. Establish goals and priorities for all state agencies providing narcotic and drug abuse service.

5. To publish yearly, an informational program budget which shows the status of expenditures by all state agencies which administer narcotic and drug abuse.

6. To launch a comprehensive program to evaluate the effectiveness of state and local drug programs and to enable the state to immediately redirect effort as usage patterns change.

As a result of the passage of SB 714, Chapter 1255, Statutes of 1972, the Office of Narcotics and Drug Abuse has a more prominent leadership role in the statewide narcotics and drug abuse prevention effort. New local programs are now being funded through the Department of Health which are devoted to countering the still increasing usage of drugs. To fully implement the coordination effort, a state plan for drug abuse prevention has been completed which provides the strategies and methodologies to evaluate prevention and treatment needs. The plan establishes a network for drug abuse prevention, care, treatment, rehabilitation and control that will provide a centrally directed or coordinated mechanism which has as its main objective the downward turn of the statistical curve on the use and abuse of narcotics and drugs. To show in one place in the Governor's Budget, the statewide narcotic and drug abuse expenditures of the Office of Narcotics and Drug Abuse annually publishes an information budget which sum-

OFFICE OF NARCOTICS AND DRUG ABUSE—Continued

marizes the prevention, care, treatment, rehabilitation, and control activities of the Departments of Corrections, Youth Authority, Health, Justice, Motor Vehicles, Rehabilitation, Education, Highway Patrol, the Board of Pharmacy, the State University and College system and the University of California.

Displayed below are summary descriptions of the narcotics and drug abuse activities of those components of state government with significent programs or activities in either of the areas of narcotics and drug abuse control, education, care, treatment and rehabilitation, training and manpower development and research and evaluation. Most of the fiscal information is based on departmental estimates since drug abuse program expenditures are not specifically identified in the budgets of some departments. The difficulty in isolating drug abuse program expenditure is partially due to the existing classification and diagnostic systems which often do not identify the recipient of a service as a drug addict. In other instances, drug programs are not identified as such because the program provides services to clients with both drug-related and non-drug-related problems.

The statutory authority and the outputs for each of the departments mentioned below is displayed in detail within their section of this budget document. The objectives of the statewide narcotics and drug program are:

1. Reduce the abuse of drugs and narcotics in the state.
2. Provide adequate treatment and rehabilitation services.
3. Promote the most effective use of fiscal and program resources allotted for prevention and treatment programs.

A. Control

Need

Drug abuse in crime in California is illustrated by the number of drug offenses in the total arrests for all crimes in California during 1972. Of the 240,231 total adult felony arrests, 113,140 were for drug law violations. In that same year, of the 103,347 major juvenile offenses, 32,448 were for drug law violations.

The narcotics and drug problem can be approached from two points of view: Limit the supply or availability of drugs and/or reduce the demand for drugs and narcotics. On the supply side, effective enforcement procedures must be maintained in order to limit the diversion of legitimate drugs into illicit channels, to stop the manufacture, import and flow of illicit drugs and to act as a deterrent to the illegal sale, possession and use of controlled drugs and narcotics.

Objectives

The objectives of the control program are:

a. To prevent, through the enforcement of law, the spread of drug abuse by limiting the supply of illegal drugs and narcotics and by providing a deterrent to the illegal use, distribution and sale of controlled drugs and narcotics.

b. Protect the public through the process of regulating and licensing the manufacture, transfer, storage and dispensing of drugs and narcotics.

General Description

The Bureau of Narcotics Enforcement of the Department of Justice enforces laws regulating the cultivation, production, sale, giving away, prescribing,

OFFICE OF NARCOTICS AND DRUG ABUSE—Continued

A. Control—Continued

administering, furnishing, or having in possession narcotics or other dangerous drugs. The State Board of Pharmacy examines, licenses and regulates the transportation, distribution and prescription of controlled drugs and narcotics.

The Department of the California Highway Patrol enforces California's Vehicle Code sections dealing with driving under the influence of drugs and narcotics. The Department of Motor Vehicles may refuse to issue a license, place a person on probation, or suspend or revoke the driving privilege of anyone who is a habitual user or is addicted to the use of drugs. The Department of Motor Vehicles is also required to suspend or revoke the driving privilege of persons who are convicted of driving when addicted to or under the influence of drugs. The Department of Health licenses all drug manufacturers within the state for the purpose of providing the consumer with safe and effective drugs.

B. Education

Need

Although the incidence of death by drug overdose has dropped slightly and the use of hard drugs by juveniles has dropped slightly, the overall usage of all drugs categories, dangerous drugs, opiates and marijuana has increased in the last year. While some who abuse drugs fully understand the risks in which they are involved, others are unaware or at least poorly grasp the potential destructiveness of the drugs they use.

Of course, this does not mean that an increase in factual knowledge about drugs will be adequate to prevent drug use by a great many. In addition to factual knowledge, the development of alternative styles of personal behavior and alternative methods of coping with the reality of life's stress are needed. Without viable alternatives, the individual who is fully cognizant of the potential destructiveness of drugs may still turn to their use.

Objectives

The objectives of the education program are:

a. To provide knowledge and learning experiences which prevent or reduce the abuse of drugs and narcotics.

b. To develop and provide information on the use and abuse of drugs and the availability of prevention, treatment and rehabilitation resources.

General Description

The State Department of Education will focus its efforts in drug education through the activities and programs of the health care within the Division of General Education. Consultant and technical assistance is provided to local school districts in cooperation with county school districts in cooperation with county school offices. Each district is required to include instruction on the nature and effects of narcotics and restricted dangerous drugs in the curriculum of all elementary and secondary schools. The State Board of Education has adopted guidelines for drug education which may serve as a basis for school districts and interested parties. In consulation with the State Department of Health, drug education materials will be reviewed and the results distributed to schools and community agencies. The department will continue to initiate and facilitate a variety of training and workshop experiences on both regional and statewide levels. The progress of drug education will be monitored in school districts and communities throughout the state, leading to recommendations for future leadership and service programs.

The Department of Health disseminates information on drug abuse and funds several drug abuse education and prevention programs throughout the state.

The Department of Health also maintains a resource file of printed materials on drug abuse for distribution to the public upon request, previews films on the subject of drug abuse, maintains contact with local drug abuse education projects and provides technical consultation to projects funded through 314(d) federal grants or contracts.

In the Department of the Youth Authority, efforts are directed toward youth and community-oriented publications and to being responsive to requests from the community for presentations and special meetings.

OFFICE OF NARCOTICS AND DRUG ABUSE—Continued

C. Care, Treatment and Rehabilitation

Need

The care, treatment and rehabilitation of drug addicts and abusers is a responsibility the state shares with the counties. Generally, those committed to the care of the state are the more mentally disturbed or delinquently oriented whose behavior has not improved through prior exposures to local programs. However, community resources are improving in both quantity and quality and it is expected through the maximization of these resources both commitments and length of stay in state institutions will decrease.

Objectives

The objectives of care, treatment and rehabilitation programs are:

a. The detection and diagnosis of individuals with narcotics and drug problems.

b. To restore or improve through inpatient and outpatient care the physical, social, psychological or vocational functioning of individuals with narcotics or drug problems.

General Description

The Department of Corrections maintains an institutional and intensive aftercare program for narcotic addicts committed for compulsory care through a civil commitment process similar to that for mentally ill patients hospitalized in state facilities. The major unit for the care of these residents is the California Rehabilitation Center at Corona and a unit for female addicts at the California Institute for Women at Frontera. An average of approximately 2,275 males and 365 females will be under the department's care in this program yearly. In the institutions, the treatment program calls for relatively short-term periods as an inpatient with release to the community in an outpatient status under close supervision by the department's parole services. The institution programs rely heavily on therapeutic community living concepts for control and rehabilitation. Community services include mandatory group counseling, antinarcotic testing, psychiatric outpatient services, and halfway houses. The department supervises approximately 5,500 people in its outpatient supervision program.

In addition to the civil addict program, the Department of Corrections has within its felon institution population approximately 3,590 inmates whose major felony charge involved possession, sale, or use of opiate derivatives, dangerous drugs, or marijuana.

The Department of the Youth Authority has developed a statewide community-centered drug program funded by the California Council on Criminal Justice. It is designed to make use of locally based drug treatment resources for cooperative case servicing of Youth Authority drug abusers. Its program goals are achieved by:

1. A system of identifying and classifying wards in ways which enable prediction of treatment outcome.

2. A system of identifying and classifying relevant treatment resources.

3. Procedures for treating Youth Authority drug abusers in the community-based drug treatment programs.

4. Stimulating development of community drug treatment programs where they are needed but do not exist.

Specific program activities to accomplish program goals are:

1. Two drug diagnostic and planning units (one north and one south).

2. A regional drug treatment prerelease center.

3. Drug resource specialists and drug resource aides to coordinate and facilitate drug programming, both in institutions and in parole regions.

The Department of Rehabilitation provides prevocational and vocational services to drug abusers who meet department eligibility standards, through contracts with local mental health programs and state institutions and through the general rehabilitation program in field district offices. The department is also engaged in a contract with the City of Long Beach to provide prevocational and vocational services to drug abusers in their drug overdose and drug dependency centers.

The Department of Health administers the California Medical Assistance Program. The basic objective of this department is to provide health care and related remedial or preventive services to recipients of public assistance and to medically needy persons. Drug addicts who meet the eligibility requirements of this program are receiving medical care assistance. The Department of Health also supports community drug treatment programs through the subvention of federal 314(d) funds.

The Department of Health, in carrying out its responsibility for treatment of drug abuse patients, operates three hospitals which admit patients with a drug disability. Metropolitan, Camarillo and Napa provide detoxification services. Educational and vocational counseling and training is included in the rehabilitation services at Camarillo and Metropolitan. Patients are accepted upon referral by local mental health services from local treatment facilities, criminal or civil courts and community agencies. Those placed in short-term programs may be involuntarily committed, but only voluntary patients are accepted for long-term programs. The hospitals work closely with county and community agencies to provide continuity of service to the patient. During the fiscal year 1972–73, more than 4,300 patients with drug-related diagnoses were admitted to state hospitals.

The department also administers programs and disburses state funds for the support of local mental health services, including those for patients having problems related to narcotics and drug abuse. Through the Short-Doyle Act, which provides for 90 percent state and 10 percent local funding of local mental health services, the department budgets for

OFFICE OF NARCOTICS AND DRUG ABUSE—Continued

C. Care, Treatment and Rehabilitation—Continued

58 county programs and two city programs. In addition, 15 percent of the federal funds available under Section 314(d) in the Public Health Services Act are allocated for support of innovative programs and community mental health that are approved by the department.

In several counties, Short-Doyle funds are supporting identifiable drug programs. These range from comprehensive in some counties to specific portions of comprehensive programs in others. Drug abuse patients who receive services through public agencies are expected to make reimbursement for the cost of the service to the extent that they are able to do so.

The Department of Health has expanded its services in narcotics and drug abuse pursuant to legislation enacted in 1972. Funds for community-based drug programs, to be subvented through Short-Doyle are administered by the department. Subventions to the counties by the department are based upon a separate portion of the Short-Doyle plan which is devoted exclusively to narcotics and drug abuse services. The range of services which are provided in the community include emergency detoxification services, residential treatment programs, crisis lines and outreach services. The department also began the approval, monitoring and evaluation of all methadone programs in the state, and provides consultation and technical assistance to such programs. Community-based drug programs receiving state funds are licensed by the department as are those laboratories providing body fluid testing services to methadone programs. A methadone patient identification system is being developed which prevents multiple program registration by methadone patients. The department also provides consultation and technical assistance to community groups and organizations wishing to develop narcotics and drug abuse prevention and treatment programs.

D. Training and Manpower Development

Need

In order to provide the highest level of service in narcotics and drug programs, adequate orientation and in-service training in prevention, treatment and rehabilitation must be conducted.

Objectives

The objective of the training and manpower development program is to provide or improve needed drug abuse prevention, treatment and rehabilitation skills of staff.

General Description

Staff in the Department of the Youth Authority's specialized drug programs are trained both within the department and through other state departments and community drug programs. Staff in the department's new community drug treatment program receive extensive preservice and in-service training from community-based programs. Staff in the Youth Authority also conduct training courses for community agencies on drug abuse with the goal of preparing those trained to return to their agencies to conduct their own in-service training programs. The California Highway Patrol conducts annual in-service training programs, a portion of which is devoted to narcotics and drug abuse. At the Highway Patrol Academy, each cadet receives eight hours of training in narcotics and drug abuse.

The Department of Corrections maintains a continuing ongoing training program in all of its institutions and within its parole field operations. Included in the curriculum are methods of understanding and modifying behavior of narcotic addicts and other inmates whose crimes have involved narcotics. The Department of Health conducts regular in-service training programs for staff working with drug patients in state hospitals. The department is augmenting its resources to provide ongoing program consultation and technical assistance to community groups, organizations and individuals in the areas of program development, operation, evaluation, community organization, and locating and securing program funds.

The Department of Justice, Bureau of Narcotics Enforcement, provides orientation and in-service training for the agents of the bureau in the procedures of detention, arrest and preparation of evidence. The department has changed its training program by shifting efforts from individual users to the sellers of drugs.

E. Research and Evaluation

Need

In order to receive the maximum benefit from resources invested, there is an ongoing need to evaluate the effectiveness of narcotics and drug abuse treatment programs. The widespread incidence of narcotics and drug abuse, and the relative failure of existing attempts to change the addict's behavior, points to the need for research in the prevention and cure of drug addiction.

Objectives

The objectives of the research and evaluation program are:

a. To identify the causes, effects and cure of narcotics and drug abusers.
b. To evaluate the effectiveness of drug abuse prevention, treatment and rehabilitation programs.

General Description

The Department of Corrections maintains a research unit at the California Rehabilitation Center for the evaluation of its institutional civil narcotics program and the status of residents released to outpatient supervision. An experimental program of methadone maintenance in the Los Angeles area for 350 addicts is in operation which included a portion of the outpatients from the California Rehabilitation Center and a portion of the felon addict parolee population.

The Department of the Youth Authority is valuating the results of the drug treatment program at the Youth Training School, the Preston School of Industry. The evaluation includes an analysis of the treatment amenability of subjects according to types of prior drug use as well as their background characteristics.

The program at Preston is being evaluated in terms of gauging the ward's potential for avoiding further drug use. Another project is attempting to clarify the decision process drug abusers undergo prior to their search for treatment. The characteristics of drug treatment facilities which successfully attract and treat specific drug users is being studied. The Youth Authority's special community-based drug treatment program has a strong research component which, among other things, will include a study of the factors which lead youths to engage in drug abuse and the relationship of these factors to the most appropriate treatment approaches.

The Department of Health monitors methadone programs and evaluates them in terms of their progress, workload and output for effectiveness. The department also is developing workable evaluation methodologies and will evaluate those community-based nonmethadone drug programs receiving state funds for their operation. The evaluations will include in-depth random evaluation workload evaluations and descriptive evaluations.

The department is also developing a centralized drug data collection system which provides objective information on the nature, scope and impact of drug abuse in California, including the populations affected, the geographical distribution of services, service gaps and overlaps. The department is also preparing an annual drug problem profile for the state which includes the scope of the problem, an assessment of the effectiveness of the existing resources, needed services, location of services needed and the populations to be served. Ongoing workload evaluation of drug programs in state hospitals will also continue to be conducted.

The Bureau of Criminal Statistics in the Department of Justice describes, interprets and reports statistical information on the incidence of crime and delinquency in its relation with narcotics and drug abuse.

As mentioned above in the general statement the full implementation of the state plan and the passage of SB 714, Chapter 1255, Statutes of 1972, will allow the state to expand its data retrieval system and program monitoring staff. With the expansion of these two functions, it is anticipated that the 1974–75 fiscal year will see a great increase in the research and evaluation capabilities which hopefully will begin to turn the statistical curve to a downward slope.

OFFICE OF SPECIAL SERVICES

The Office of Special Services was established by Chapter 918 of the Statutes of 1972 to centralize within the Health and Welfare Agency the overall responsibility for statewide programs dealing with alcoholism, developmental disabilities, and narcotics and drug abuse. Funding for the Office of Special Services was denied by legislative action in the 1973 legislative session. Those functions that would have been consolidated under the control of the Office of Special Services can be found in the Governor's budget listed as separate offices. Reported in this presentation are the 1972–73 expenditures for the Consolidated Management Section of the Office of Special Services.

Health and Welfare Agency

OFFICE OF DATA PROCESSING

Program Objectives

The primary objectives of the Office of Data Processing are:

To eliminate duplication of external collection of similar data by coordinating single source collection from external sources, where practical, of data that is common to the needs of more than one member department.

To improve the effectiveness of EDP applications throughout the Health and Welfare Agency according to annual plans through agency-level supervision of, and technical support to, departmental EDP staffs.

To develop and utilize common data elements of the member departments through consolidation into common data bases and, where feasible, to assure optimum availability of required information, consistent with effective information security requirements at minimum cost.

To develop and utilize EDP capabilities and an agency management information system for assisting the Secretary of the Health and Welfare Agency to monitor the performance of member departments.

To lower the overall unit cost of data communications, processing and storage, consistent with meeting the kinds and levels of service required by member departments in support of their programs through an orderly conversion of existing applications without major disruption in the level of services.

I. ORGANIZATION AND PLANNING

Need

Electronic data processing (EDP) is employed by most departments in the Health and Welfare Agency in support of their management and technical programs. Agency management must play a strong role in providing leadership to the data processing functions and in placing a high priority and emphasis on improving management of operations and systems coordination among departments.

Objective

To establish and place into operation a form of centralized management of EDP to insure that necessary EDP services are provided to Health and Welfare Agency member departments at minimum cost.

General Description

The Health and Welfare Agency will provide needed support to all member departments by:

a. Guiding departmental EDP staffs in effective systems design and efficient equipment utilization.

b. Developing common data base and single-source common data collection opportunities.

c. Coordinating the necessary equipment and operations capability required in the most cost effective manner.

Consolidation of equipment or personnel will not be an objective.

OFFICE OF DATA PROCESSING—Continued

II. ADMINISTRATION

Need

Legislative conference committee action immediately prior to the enactment of the 1973 Budget Bill eliminated support funds requested for the Consolidated Data Center. Employees who had not found employment were paid from the emergency fund during July 1973 until layoff notices took effect.

Objective

To comply with State Personnel Board Rule No. 455 and to allow remaining employees a reasonable period of time during which to secure other employment.

General Description

The current year represents a complete cessation of Consolidated Data Center activity and the creation of a new organizational entity with a substantially different objective. The man-years and expenditures enumerated above reflect the actions taken to phase out the Consolidated Data Center.

DEPARTMENT OF HEALTH

Program Objectives

The Department of Health consolidates the duties, powers, purposes, responsibilities, and jurisdictions of the former Departments of Mental Hygiene, Health Care Services, Public Health, the disability determination function of the Department of Rehabilitation, and the social services function of the Department of Social Welfare.

The department is composed of four health system line organizations: health treatment systems, health financing systems, health protection systems and health quality systems, whose respective functions are closely coordinated. Administrative support is provided by health administrative systems.

The department's specific goals are:

1. Identify health needs and develop programs to meet them, based on relative priorities and effectiveness.

2. Promote an environment that will contribute to human health and well-being.

3. Assure the availability of comprehensive health services for all Californians, utilizing both public and private health resources.

4. Assure that quality standards for health programs are established and maintained.

5. Assist in coordinating the activities of health agencies—state and local, public and private—along with medical schools, hospitals and private practitioners, in providing health services.

6. Promote the development of new knowledge concerning the causes and cures of illness and the means of delivering health services to the public.

7. Help all the state's citizens to understand the essentials of positive personal health and the effective use of available health services.

8. Provide maximum protection of the general public health environment.

HEALTH PROGRAMS FOR CHILDREN

Children receive special attention in Department of Health programs.

Perhaps the most ambitious health program ever undertaken in California is the Child Health Disability Program. Mandated by AB 2068 (1973), it is being implemented by a special project team headed by a deputy director.

The legislation calls for a comprehensive program of child health screening and assessment to be established in all 58 counties by July 1, 1974. It requires that beginning July 1, 1975, every child must undergo health screening before enrollment in the first grade.

Other department programs for children and young people include:

Health Financing Systems

Crippled children services (CCS) administers programs in 35 counties, develops standards and procedures in the other 23. CCS conducts early casefinding of children with handicapping conditions, and provides them with high quality comprehensive medical and related services.

Medi-Cal program provides total medical care for children of low-income families. Medi-Cal conducts early and periodic screening, diagnosis and treatment of eligible beneficiaries under age 21, as required by Title XIX of the Social Security Act. In California, this program is called Medi-Screen.

Health Protection Systems

Special Supplemental Food Program for Women, Infants and Children (WIC) administered by the Family Health Services Section, which distributes federal funds for this special nutrition program of the U.S. Department of Agriculture. Program will end June 30, 1974.

Adoption Services Section serves as central resource for information about, and control of all California adoptions, supervising and coordinating all public and private adoption agencies.

Family Health Services Section operates maternal and child health programs in local health agencies to reduce infant mortality and improve the health of children and mothers. This section also manages two programs to meet the particular health needs of children in so-called target groups:

Farmworkers health service.

Indian health.

As part of its maternal and child care service, the Family Health Services Section provides consultation, technical assistance, coordination, and help with health studies to some 40 local projects, ranging from informational services to total comprehensive health services for children in these groups.

Health Treatment Systems

Developmental Disabilities Program administers regional centers for developmentally disabled children and state hospital services for multihandicapped children.

Mental Disabilities Program provides services in the communities and in state hospitals for emotionally disturbed children who need 24-hour psychiatric care and other services. Special programs for children are conducted at Napa State Hospital and Camarillo State Hospital.

Substance Abuse Program administers local drug abuse programs that relate primarily to young people, many under 18, who are addicted to drugs.

Health Treatment Systems Programs

The Health Treatment Systems Programs provide services for the mentally disabled, developmental disabled, alcoholics and drug abusers in a variety of public and private facilities coordinated by regional centers and Local Mental Health Programs. The regional centers and Local Mental Health Programs screen, evaluate, diagnose, and refer persons for inpatient care in the community or at a state hospital, or other appropriate outpatient care facilities. Although the services of the health treatment systems are primarily of a health delivery nature, they also include public education, manpower training, and continuous program evaluation.

I. MENTAL DISABILITIES PROGRAM

The Mental Disabilities Program is responsible for the operation of the Lanterman-Petris-Short Act and the Short-Doyle Act. The single mental health program can be divided into community mental health operations and state hospitals operated on behalf of the various community programs. Penal Code and non-LPS patients receive services in the state hospitals but are not considered part of the community mental health programs.

Need

It is widely held that at some time in their lives, 10 percent of all people of all ages in California experience mental and emotional crises causing them to seek help. The economic and social costs of these crises are incalculable but enormous. These crises place the person at high risk for long-lasting disorders and disabilities. They sometimes take the form of mental illness, drug abuse or alcoholism. These dangers illustrate the need for early identification and speedy, skilled crisis intervention. When needs for identification and intervention are adequately met, the intensity and duration of the disability are minimized or avoided. Failure to meet this need early prolongs the duration of disability and requires time-consuming and expensive processes of specialized treatment, retraining and rehabilitation.

Objectives

1. Provide the means of prevention, early diagnosis and immediate treatment intervention of mental and emotional crises which result in damage to the principal and/or to others, in order to prevent such damage and extended treatment procedures.

2. Provide early and readily-available modes of treatment in order to reduce need for 24-hour total care hospitalization with its accompanying higher costs.

3. When 24-hour treatment is required, provide it in such a way that the patient is returned quickly to his environment with a good chance to lead a normal responsible life.

Authority

Divisions 4 through 8, Welfare and Institutions Code.

General Description

The care of the mentally disabled is a responsibility shared by the state and the counties. The counties bear the prime responsibility for the care and treatment within specified target groups and priorities as to types of treatment established by law. Under this system 24-hour hospitalization is the least acceptable form of treatment. Locally provided outpatient care is the most acceptable.

This philosophy, and accompanying legal requirements, have promoted the development of extensive county-based programs. State-operated hospitals which provide 24-hour hospitalization services in cases where such care is required, have been reduced in number, size and importance by these county-based programs.

The Health and Welfare Agency's Director of Health has major responsibilities for the local programs for the mentally disabled. After consultation

DEPARTMENT OF HEALTH—Continued

Health Treatment Systems Programs—Continued

I. MENTAL DISABILITIES PROGRAM—Continued

with the California Conference of Local Mental Health Directors, he adopts suitable rules, regulations, and standards governing the provision of care to the mentally disabled. He allocates appropriated funds to the various county programs based on their needs, and evaluates their performance.

This budget is presented on the basis of the direct local programs and programs carried on at the state hospitals which include services provided either under contract with the local mental health programs or carrying out legal responsibilities not covered by the Lanterman-Petris-Short Act.

A. Community Mental Health

Community mental health services have been established in every county. The rapid shift in locale of such services from state hospitals to the local level has made it possible for the first time to pursue mental health efforts on the basis of the same principles which govern other health services. These include: prevention; early and accurate diagnosis; prompt, appropriate and effective treatment; and virgorous rehabilitation efforts to prevent relapse.

Prevention of mental, emotional, and behavioral disorders requires public information and education, as well as consultation with persons in the community. People most likely to encounter individuals that develop disorders are their family members, teachers, social workers, probation and law enforcement officers, physicians, and clergymen. These activities are best carried out within the communities from which the potential patient comes.

Early diagnosis rests partly upon the same measures used in prevention and is facilitated by the existence of local mental health facilities where people will go more readily than they will to large and remote institutions. The accuracy of diagnosis is markedly improved when professional personnel are familiar with the social, cultural, and economic factors surrounding the person who has come for help.

Community mental health services have great flexibility in treatment methods and are able to employ substitutes for full-time hospitalization that have never before been possible on any large scale. These subsitutes include various forms of individual and group psychotherapy, partial hospitalization, brief reality-based full-time inpatient care aimed at crisis intervention and easy movement of patients from one treatment form to another, depending upon patient needs.

Units of Services Provided in County Programs

1972–73 *	2,133,518	491,510	319,725	514,558

* Estimated.

Under the Short-Doyle Act, all persons receiving services through the community programs are required to pay all or a part of the actual cost of the service, depending upon their ability to do so. A uniform statewide system for determining ability to pay was established by the department and went into effect October 1, 1971. The state pays 90 percent of those costs not recovered through patient fees, insurance or third-party payors. The counties pay the other 10 percent. The county share is substantial in terms of dollars and assures the interest and active participation by county governments as well as by numerous official and voluntary agencies within the communities served.

Medical directors of local programs are required to make the fullest possible use of all public and private mental health resources in the community, to involve all who have an interest in the development of an annual and a five-year county plan, to seek and accept advice from broadly representative local mental health advisory boards, and to obtain official approval of their plans from the governing body before submitting them to the department for final review and approval. Department headquarters staff lend advice and counsel to county planning bodies and actively participate in the preparation of the plans.

Local programs' efforts to reduce state hospital admissions and utilization have been recognized by prior agreements with individual local programs to transfer funds for each patient-day in the state hospitals which they do not use. This transfer of funds is based upon an annual forecast of expected patient-days arrived at by the department and the local program. Under this arrangement, funds transferred to local program use from state hospital savings must be used for planned augmentations, innovations, and expansions of service which have been reviewed and approved by the department.

All local programs supply preventive, diagnostic, and treatment services. A significant and growing trend resulting from local operation has been the development of a number of alternatives to full-time hospital care. Many persons formerly thought to require 24-hour inpatient hospital treatment, often for prolonged periods, respond more favorably to brief treatment. As a result, many persons are able, during treatment, to carry on much or most of their normal duties at work and remain with their families. Attention is shifting from what is wrong with the mental health patient to what is still all right about him, what resources he has to work with, and what assets

A. Community Mental Health—Continued

he brings to the task of full realization of his potential as a productive, or at least a nondependent, human being.

In keeping with the concept of a single system of mental health care in California and a single appropriation for providing such care regardless of where it is given, the community mental health programs have become the controlling element with respect to state utilization. They may choose to use state hospital facilities and programs when these are appropriate t the treatment needs of the patient and cannot other wise be provided by the local program directly o through contracts with private or other publi agencies.

With the continuing development of local programs the day is rapidly approaching when the state will b called upon to supply direct treatment services to onl a fraction of the present population in state hospitals

Widespread and growing public interest expressed directly and through the Legislature has led to the designation of target groups within the actual and potential patient population as subjects for intervention by publicly supported mental health programs. These target groups include mentally disordered children and adolescents, adults, and aged persons; alcoholics, and drug abusers. County plans are required to be written with special attention to each of these groups, and are to include specific plans for extending needed services to each, and to evaluate their effectiveness. Certain persons within the jurisdiction of the criminal courts, including mentally disordered sex offenders and mentally disordered criminal offenders, are treated in mental health programs.

DEPARTMENT OF HEALTH—Continued

Health Treatment Systems Programs—Continued

I. MENTAL DISABILITIES PROGRAM—Continued

A. Community Mental Health—Continued

1. Adult Mentally Ill

The largest class of patients in community programs is the mentally disordered adult. However, during the past decade there has been a shift in the pattern of services to mentally disordered adults. While utilization of all services has greatly increased, there is an increased emphasis of brief inpatient treatment and the use of alternatives to hospitalization.

2. Children and Adolescents

The establishment of programs and facilities for children has not developed as rapidly within the local communities as programs for mentally disordered adults. Children and adolescents make up about 27 percent of the California population but only account for 12 percent of the total 24-hour care utilization, partly because few children are generally considered to require institution-based treatment. They account for 14 percent of partial day care and 20 percent of outpatient care. Many children and adolescents are treated as part of a family unit which is why they amount to 44 percent of all collateral services.

3. Aged

The liberalization of old age assistance programs medical assistance to the aged, and Medi-Cal, together with the development of boarding homes and nursing care facilities have provided fiscal and residential resources required for community care. Community mental health services places emphasis on supportive and supplemental services for the aged rather than direct 24-hour care.

4. Precare and Aftercare Services

This may be provided directly by the county or through contact with the community services section of the department. This program provides out-of-home placements and monitoring services to assure a proper level of physical, medical and social conditions of persons released from active treatment in state hospitals or local programs.

5. Placement

Funds are available to pay for placement costs in board and care, family care, or private institutions. Placements are made either by the county program or by the community services section of the department.

[1] The inhospital population is limited to patients in the hospital on the last Wednesday of each year.

DEPARTMENT OF HEALTH—Continued

Health Treatment Systems Programs—Continued

I. MENTAL DISABILITIES PROGRAM—Continued

B. State Hospital Programs

1. Children and Adolescents

Napa and Camarillo State Hospitals presently have specialized programs for the treatment of mentally disordered children and adolescents. Metropolitan State Hospital has a small special program for the treatment of mentally disordered adolescents. These programs were begun in response to public demand and professional judgment. Their establishment reflects the fact that programs and facilities for children have not developed as rapidly within the local communities as programs for mentally disordered adults. Among the reasons for this lag in development is the fact that relatively few children are generally considered to require institution-based treatment. Small institutions on the local level might well prove to be prohibitively expensive in terms of staff and plant.

2. Adult Mentally Ill

The largest class of patients in state hospitals is the mentally disordered adult. However, during the past decade there has been a shift in the pattern of services to mentally disordered adults. While utilization of all services has greatly increased, there is an increased emphasis on brief inpatient treatment and the use of alternatives to hospitalization. This has led to two conditions:

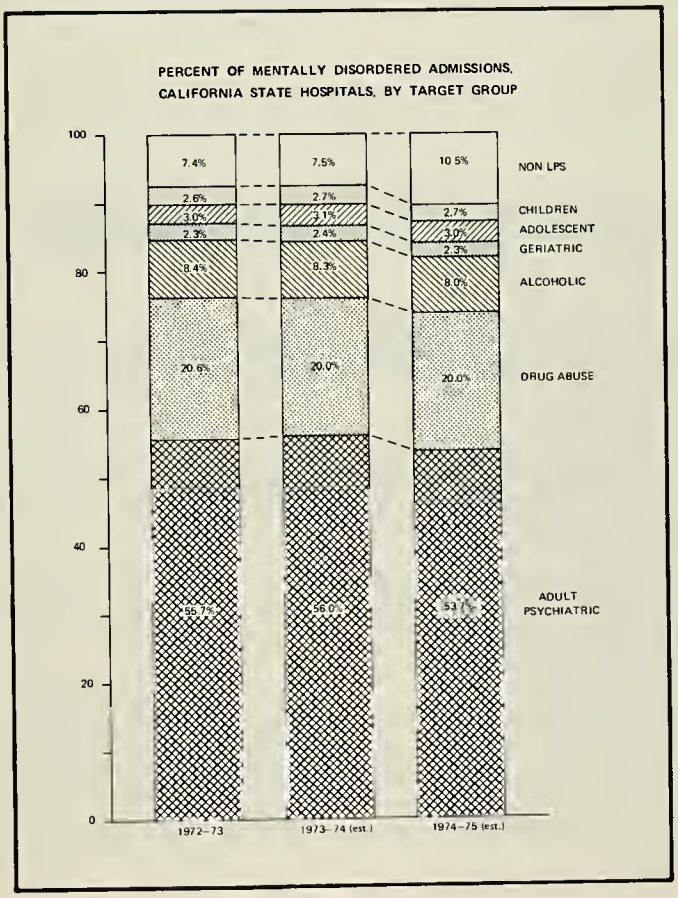
(1) Length of stay for adult first admissions now approaches that found in general hospitals and

(2) The number and proportion of long-stay state hospital patients has radically declined as alternative local resources have been developed and utilized.

A larger proportion of psychiatric hospital admissions are being made to local community short-stay hospitals. This has been aided by broadened coverage of psychiatric treatment by health insurance plans and by eligibility for disabled adults under Medi-Cal as well as public assistance grants under aid to the disabled.

3. Aged

Although there were 11,280 patients aged 65 and over in state hospital programs for the mentally disordered in 1961, in 1973 this had decreased 94 percent to only 719. Several factors have contributed to this decrease. First has been the development of screening programs both in the community and in the state hospitals to identify those patients actually requiring hospitalization for emotional disorders and those that can be more appropriately cared for in other ways within the community.



DEPARTMENT OF HEALTH—Continued

Health Treatment Systems Programs—Continued

I. MENTAL DISABILITIES PROGRAM—Continued

B. State Hospital Programs—Continued

Second, the liberalization of old age assistance programs, medical assistance to the aged, and Medi-Cal, together with the development of boarding homes and nursing care facilities have provided fiscal and residential resources required for community care. A careful review of aged persons in state hospitals has made it possible to identify large numbers of patients who can more appropriately be returned to the community for care outside the hospitals.

Third, state hospital programs for the geriatric patient focus on providing treatment to enable the patient to utilize community alternatives. The state hospital will continue to supply a backup service for the county programs for geriatric mentally disordered patients.

4. Penal Code Commitments

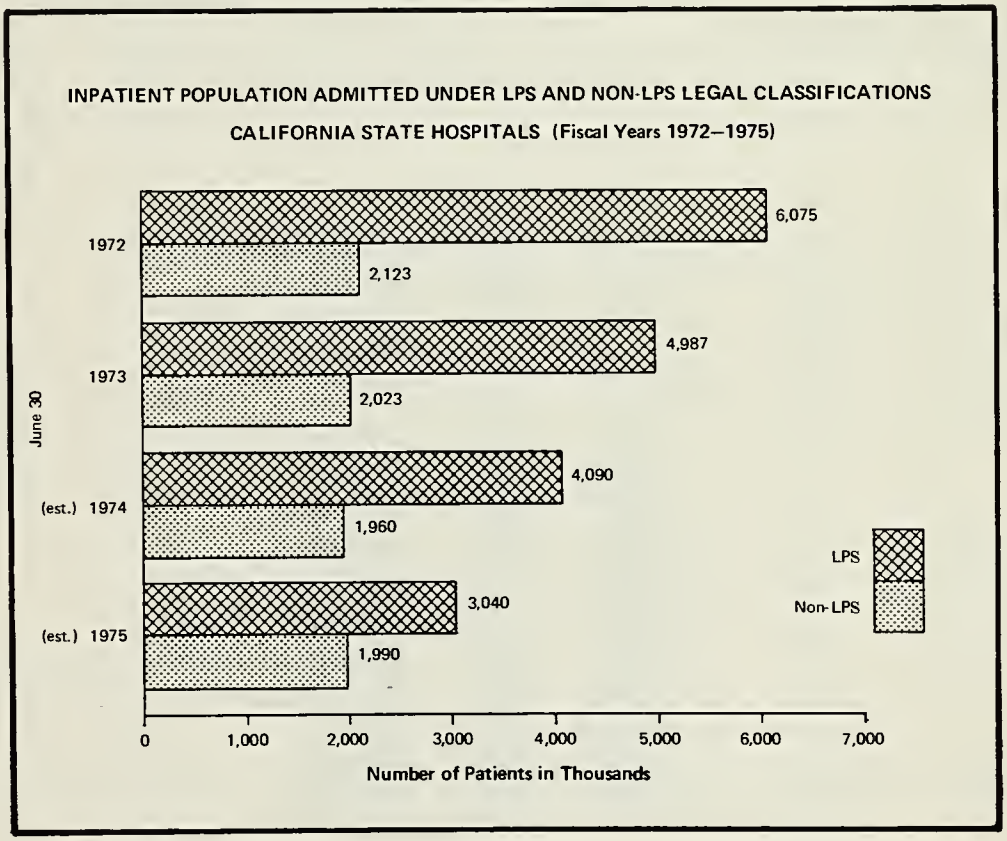
The department is required to provide a treatment-oriented environment for mentally ill persons who have been arrested for criminal offenses. These include primarily (1) mentally disordered sex offenders, (2) persons charged with a criminal offense who have been found not mentally competent to stand trial, (3) persons convicted of crimes but found not responsible because of insanity, and (4) county jail inmates who are referred as being mentally disordered by county mental health services. Treatment programs provided for such patients are similar to those for other types of patients, with the distinguishing feature of a higher degree of security for Penal Code patients.

Judicially committed patients are cared for at Atascadero and Patton State Hospitals. Atascadero treats male patients only and accepts admissions from the northern half of the state. Patton treats both males and females and receives admissions from southern counties. Atascadero is a specially designed maximum security facility; Patton provides medium security. Patients are transferred between these two hospitals on the basis of security need.

Among judicially committed patients, approximately 38 percent are mentally disordered sex offenders, 34 percent are unable to stand trial by reason of insanity, and 28 percent are not responsible by reason of insanity.

5. Non-LPS

With the transfer of the neuropsychiatric institutes to the University of California the only remaining non-LPS services are to individuals who receive treatment in state hospitals who are from out-of-state or out-of-country.



DEPARTMENT OF HEALTH—Continued

Health Treatment Systems Programs—Continued

I. MENTAL DISABILITIES PROGRAM—Continued

B. State Hospital Programs—Continued

6. Hospital Operations and Support Services

This service is unique from the other programs involving state hospitals in that it is directed at a function other than a target group of patients. It is responsible for the operation of eleven (11) state hospitals. All business services, support, subsistence, plant operations, and facilities planning are administered by this program. Central staff includes specialists in hospital administration, construction, commissary services and patient transfer.

Need

There are approximately 290,000 developmentally disabled individuals requiring care, treatment, development and maintenance in the State of California. Approximately 204,000 of these individuals are mentally retarded, 25,000 are cerebral palsied and 61,000 are epileptic. In addition, an undetermined number have other neurological conditions closely related to mental retardation or requiring treatment similar to that of the mentally retarded.

Developmental disabilities cause continuing lifetime problems to individuals and their families, to neighbors and communities, and cause social, medical, economic, and legal difficulties.

The complexities of these problems require the services of many state departments as well as the community. Care, treatment, development, maintenance, and management services are required to enable the affected mentally retarded/developmentally disabled individuals to develop and achieve as normal a life as possible, and to enable the family and community to assist in an effective and efficient manner. If the essential services are not available, the long-term costs to the individual and his family, to the community, and to the state will be much greater than the cost of the services.

Objectives

The developmental disabilities program will strive to answer the needs of the developmentally disabled by:

1. Reducing their degree of dependency.
2. Maintaining a high quality health and welfare environment.
3. Increasing their ability to control their world or environment.
4. Increasing the normalcy of their behavior.
5. Maximizing their human potential.

In addition, a major objective of the developmental disabilities program is the reduction of the incidence of developmental disabilities.

DEPARTMENT OF HEALTH—Continued

Health Treatment Systems Programs—Continued

II. DEVELOPMENTAL DISABILITIES PROGRAM—Continued

Authority

Welfare and Institution Code, Divisions 4, 6 and 7. Health and Safety Code, Division 25.

General Description

The four major sections of the developmental disabilities program administered by the Department of Health are:

Regional center services that (1) counsel the parents and guardians of the mentally retarded/developmentally disabled and (2) assess, diagnose, refer and place mentally retarded/developmentally disabled citizens to appropriate private or public basic living and care.

State hospital services that provide state-managed care, treatment, development, and maintenance services at the request of the regional centers.

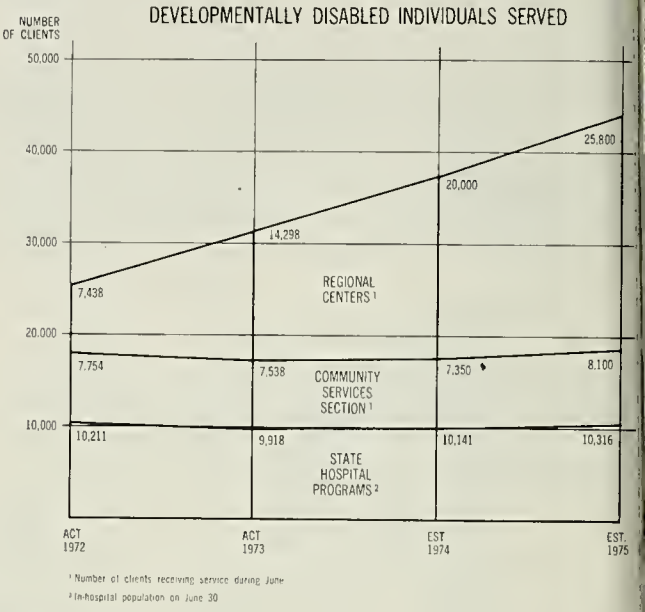
Community services which provide protective living services to developmentally disabled persons at the request of the regional centers.

Administrative services which provide centralized management and support for the regional centers, state hospitals, and community services section.

These organizational components are organized to fulfill the following program elements:

1. Case identification and case management.
2. Basic living and care.
3. Special services.
4. Research and program evaluation.
5. Manpower development and training.
6. Hospital operations and support services.

Programs of genetic counseling services, high-risk screening and counseling, and chromosomal diagnosis are being expanded to reduce the incidence of developmental disabilities. The administration, regional centers, state hospitals and community services sections provide public information through cooperative work with local, state, and federal agencies, multimedia presentations, tours, and guest speakers.



A. Regional Centers

Objectives

The primary objective of the regional centers is the normalization of the life situation of persons with developmental disabilities and of their families. A secondary objective is to maximize the utilization of existing resources and encourage the integration of state services and other programs designed to aid these persons and families.

General Description

Direct services for the retarded and their families are, by law, to be provided through regional diagnostic, counseling and service centers which are located in the community and are easily accessible.

Sixteen centers covering the entire state are currently operated by local agencies under contract with the Department of Health. These centers serve as the community's "single door" for referral and services for the mentally retarded and their families.

All mentally retarded individuals requiring state hospital care are screened and admitted through regional centers. When such care is no longer needed, the individuals are discharged to a regional center for continuing care in the community.

Three new regional centers will be established during 1974–75: two to serve Los Angeles County and another to serve the San Joaquin area. Establishment of these new centers, and expansion of the service capability of existing centers and community programs will provide the alternatives to placement in state hospitals and make it possible for more state hospital patients to be cared for in the community.

1. Case Identification and Case Management (Case Finding/Identification, Case Evaluation and Case Management)

Regional centers diagnose and evaluate persons who are thought to be developmentally disabled, and provide continuing lifetime counseling and case management services where needed. This is done directly by the centers in three regions of the state, and in cooperation with the community services section in all other regions.

DEPARTMENT OF HEALTH—Continued

Health Treatment Systems Programs—Continued

II. DEVELOPMENTAL DISABILITIES PROGRAM—Continued

A. Regional Centers—Continued

2. Basic Living and Care—Living in Own Home, Living Out of Own Home and Routine Health Maintenance

Services for clients, such as respite care, summer camping, or residential care are purchased by the centers according to the needs of individuals and their families. These services are purchased from approved specialists, private vendors, and voluntary associations.

3. Special Services

Services to improve the physical and social functioning of individuals with developmental disabilities are obtained or purchased by regional centers. Among these services are medical treatment, physical and occupational therapy, behavior modification and similar services that are provided by specialists throughout the state, including state hospital programs. Training and educational services to aid intellectual functioning are usually provided through the special classes and programs of the Department of Education.

Activity centers and sheltered workshops of various types are used to help train those individuals who have some employment potential. These services are coordinated with the Department of Rehabilitation and are financed by federal funds (75 percent) and state and local funds (25 percent).

4. Research and Program Evaluation

Continuing evaluation of regional center operations and services is carried out by the regional centers operations section in accordance with guidelines of the Health and Welfare Agency. Major program evaluation responsibility will be carried by the office of developmental disabilities.

5. Manpower Development and Training

Regional centers assist in increasing and improving the trained personnel available to help developmentally disabled individuals through specialized training and on-the-job career development among both employees, volunteers and students.

Output	1972–73	Estimated 1973–74	Estimated 1974–75
1. DD individuals receiving information and referral services	17,500	25,500	33,500
2. DD's receiving services	10,128	13,756	20,631
3. DD's with guardianship nominations	403	548	822
4. DD's with guardianship appointments	87	118	177
5. Individuals counseled for prevention of DD	728	990	1,485
6. DD's whose degree of dependency was reduced	2,026	2,751	4,126
7. DD's whose health and welfare was maintained	8,102	11,005	16,505
8. DD's who increased their ability to control their world or environment	2,026	2,751	4,126
9. DD's who increased normalcy of their behavior	253	344	516

B. State Hospital Programs

Objectives

1. To provide care, treatment, development and maintenance services to all clients/patients referred to the state hospital system by the regional centers.
2. To keep patients in programs that are compatible with their essential physical welfare and requirements of their developmental and habilitative needs. To maintain continuity in program participants' lives and services with their families, communities and posthospital programs.
3. To experience demonstrable, comprehensive gains by each program participant in a balanced individual program of medical developmental and habilitation skills. These include: physical, social, intellectual, and vocational functioning skills. Special emphasis is placed upon independent living skills, especially those of self-care.
4. To develop innovative program activities for use in community programs.

General Description

Since July 1, 1971, when the Lanterman Mental Retardation Services Act became effective, all mentally retarded patients are admitted through referral by the regional centers, or when they are dangerous to themselves or others, by court commitment. All patients discharged from state hospitals are discharged to the regional centers for aftercare and followup.

Five of the state hospitals provide care, treatment, development and maintenance for developmentally disabled individuals exclusively: Fairview, Pacific, Porterville, Sonoma, and Agnews. Four state hospitals (Camarillo, Napa, Stockton and Patton) operate multiple-specialized programs for the developmentally disabled in addition to their programs for the mentally disordered.

1. Case Identification and Case Management

State hospitals provide case evaluation for all patients referred for hospitalization by the regional centers. Each program director establishes care, treatment, development and maintenance objectives for

DEPARTMENT OF HEALTH—Continued

Health Treatment Systems Programs—Continued

II. DEVELOPMENTAL DISABILITIES PROGRAM—Continued

B. State Hospital Programs—Continued

patients in his program in conjunction with the regional center staff. Evaluative scales measure life status and subsequent changes in patient characteristics. Judgments are then applied to determine if the patient needs further treatment in his program, can move to another higher functioning program, or can be referred from the hospital.

2. Basic Living and Care

Care and maintenance is provided on a 24-hour basis for patients admitted to state hospitals. Each retarded patient is provided a bed and at least 70–80 square feet of space. For those patients who are bedfast, proper nursing care such as bed baths, repositioning, oral and nasal hygiene, grooming, and social stimulation are provided. Appropriate food is provided the patient and is served at his bedside or in dining rooms. Patients are provided suitable clothes if they do not have their own clothing. A comfortable and attractive environment is provided within a safely constructed and maintained ward. Daily excursions into the outdoors are provided. Supervision is provided for all patients on a 24-hour basis in order to assist them in activities of daily living as well as to protect them from accidents. Special supervision is provided for those patients who have maladaptive behaviors to assure that they do not injure themselves, other patients, or employees. Routine health maintenance, including periodic dental services, is provided to all patients in the state hospitals.

Special Services

Increasing numbers of multihandicapped retarded individuals are referred to the state hospitals for specialized attention. These include infants; blind, deaf, and disturbed persons; destructive, hyperactive acting-out adolescents; chronically physically ill people; individuals with cerebral palsy, uncontrolled epilepsy and other neurological conditions; and persons needing physical, social, intellectual, and vocational development. These patients require highly specialized services to increase their ability to become independent and minimize their need to rely upon public resources when they are returned to community living.

The state hospitals are organized into 70 clearly defined goal-oriented programs in a continuum of services based upon the identified primary needs of the patients. This unified performance system makes it possible to meet the patients' individual physical, social, intellectual, vocational development, and special supportive care and treatment service needs within a management framework that features systematic evaluation and control.

a. Physical Functioning

Objectives

To develop motor skills that lead to or promote greater self-sufficiency, increased motor development self-care skills, and ambulation.

Activities

Sensorimotor and mobility training and development. Personal self-care skills development.

b. Social Functioning

Objectives

To enhance the individuals' awareness of surroundings, etiquette, and relationships with others; to modify maladaptive behavior, sustain or improve family and social relationships; to use community resources participate in community life, and develop necessary skills to cope with his environment.

Activities

Perceptual, emotional, social, and personality training and development.

c. Intellectual (Psychological) Functioning

Objectives

To develop intellectually, acquire and apply knowledge, develop language, communicate verbally and nonverbally, express and understand through abstract symbols, and to acquire knowledge of real life problems.

Activities

Conceptual, language, cognitive, intellectual, value-moral training and development.

d. Vocational Functioning

Objectives

To develop the ability to work and attain vocational objectives based on capacities and limitations, obtain competitive or sheltered employment, maintain jobs, learn simple routine tasks, and work independently and cooperatively with others.

Activities

Career and independent life training and development programs.

3. Evaluation and Research

Evaluation of each patient's functional change, effectiveness of care, treatment, development, and maintenance is conducted on a continuing basis. A management informational system provides uniformly accepted objective standard measures of patient benefits. Progress is measured by application of standardized evaluation instruments and at appropriate

DEPARTMENT OF HEALTH—Continued

Health Treatment Systems Programs—Continued

B. State Hospital Programs—Continued

times reevaluated to note the progress that patient has made toward stated performance objectives. The hospital program system is evaluated by hospital program review staff and by headquarters program management staff, using objective evaluation criteria to determine the overall effectiveness of each program.

4. Manpower Development and Training

Each state hospital provides ongoing development and training programs for employees, volunteers and patients. Particular emphasis is placed on psychiatric technician training in conjunction with local junior colleges.

5. Hospital Operations and Support Services

Hospital operations and support services provide the support necessary for maintaining the health environment at each state hospital. These services include construction, remodeling, clothing, feeding, security and fire protection, residents' financial affairs, housekeeping, medical and nonmedical recordkeeping, and many other equally essential nontreatment services to residents.

Output	1972–73	Estimated 1973–74	Estimated 1974–75
DD individuals receiving care, treatment, development and maintenance services in state hospitals	9,843	9,822	10,019

DD individuals entering MR hospital programs during year from community	634	692	715
DD individuals referred for placement into community	711	745	820
DD individuals placed in community	620	353	124
Individuals counseled for purposes of preventing DD	100	96	98
DD individuals whose degree of dependency was reduced	2,602	2,558	2,571
DD individuals whose health and welfare was maintained	9,141	8,992	9,043
DD individuals who increased their ability to control their world or environment	2,602	2,558	2,571
DD individuals who increased their normalcy of behavior	2,169	2,132	2,143

C. Protective Living Services

Objective

1. To protect developmentally disabled persons referred for services from neglect, exploitation, or hazardous living conditions.

2. To stabilize and support the activities of such persons in the community, thus reducing their chances of requiring future care in a state hospital.

3. For those developmentally disabled persons who are not able to live at home, to provide an alternate living arrangement which approximates as nearly as possible a home environment, and at the same time, meets the needs of the developmentally disabled person for whatever specialized services may be required.

4. To assist developmentally disabled persons to develop an awareness of, and the necessary skills to cope with, their environments; to assist them to develop social relationships and to minimize maladaptive behavior.

General Description

The Community Services Section provides protective living services to 9,200 developmentally disabled persons so that these individuals may remain in their own homes, or in acceptable alternative living arrangements. Services are provided, at the request of the regional centers, through 41 CSS offices located throughout the state. The majority of the individuals served are linked to county welfare and therefore the section's wide range of services are dependent on federal matching funds. The section's services range from total institutional care in licensed nursing facilities to substitute families and sheltered workshops.

1. Case Identification and Case Management—(Case Finding/Identification, Case Evaluation and Case Management)

On referral from a regional center, or for the developmentally disabled on leave of absence from a state hospital, the section provides a full range of case management services, including placement, facility surveillance and certification, and on-going client supervision. This includes responsibility, in cooperation with state hospitals and regional centers, for assessment of client needs; development of plans for meeting them; and periodic evaluation of accomplishments.

2. Basic Living and Care—(Living in Own Home, Living Out of Own Home and Routine Health Maintenance)

As a protective services unit, the section takes responsibility for a full range of services in relation to the basic living arrangements and care components

DEPARTMENT OF HEALTH—Continued

Health Treatment Systems Programs—Continued

II. DEVELOPMENTAL DISABILITIES PROGRAM—Continued

C. Protective Living Services—Continued

of the developmentally disabled for whom it is responsible. This includes selection of appropriate placement facilities; placement and aftercare in the facilities; and attention to the physical, emotional, growth, and health needs of the placed individuals.

Particular attention is directed by the section to the educational, recreational, and vocational needs of the developmentally disabled, as well as to other aspects of daily living which are significent parts of an enriched experience. Referral is made to appropriate community resources in relation to the above. In addition, activity programs which supplement basic care are either sought out and utilized on behalf of the developmentally disabled, or in some instances actually operated by section staff. Other special services aimed at providing a well-rounded growth experience are identified by section staff (e.g. transportation, sporting activities, camping, etc.) and funded through regional centers, public welfare, o other available resources.

Output	1972–73	Estimated 1973–74	Estimated 1974–75
Number DD clients served	8,724	9,224	9,70
Number DD clients in out-of-home placement	7,197	8,000	9,20
Individuals counseled for purpose of preventing incidence of DD	436	825	1,25
DD individuals whose degree of dependency was reduced	4,180	6,125	7,05
DD individuals whose health and welfare was maintained	8,288	9,175	9,62
DD individuals who increased their ability to control their world or environment	3,723	5,010	4,99
DD individuals who increased their normalcy of behavior	436	950	98

D. Administration

The developmental disabilities program administration includes support and supervision of regional centers, community services, and state hospital programs. Elements included under the support category include the DD programs' pro rata share of accounting, budgeting, personnel, program analysis data processing, training, etc. The supervisory staf is headquartered in Sacramento with staff member located throughout the state in field offices, state hospitals, and regional centers.

Need

Increases in narcotics, drug and alcohol abuse, arrests, deaths and individuals seeking treatment have increased in the past several years. The abuse of these substances not only affects the individual involved but also affects families, the criminal-justice system and the state's economic welfare through increases in divorce, crime and lost productivity.

Authority

Chapter 3, Division 4 and Part 3, Division 5 of the Welfare and Institutions Code.

Objectives

Prevent the illicit use and abuse of dangerous drugs and alcohol.

Provide treatment and rehabilitation services designed to increase the personal and social functioning of individuals using drugs and alcohol abusively.

Assist communities in the planning, development and evaluation of community drug abuse and alcohol prevention and treatment programs.

Provide for more effective community drug and alcohol abuse programs through the development of standards, guidelines and regulations for the protection of the patient and the public.

DEPARTMENT OF HEALTH—Continued

Health Treatment Systems Programs—Continued

III. SUBSTANCE ABUSE PROGRAM—Continued

General Description

Administration of the substance abuse program is the direct responsibility of the substance abuse section with input from the State Office of Alcohol Program Management, State Office of Narcotics and Drug Abuse, the local programs services section and the Hospital Program Administration.

The care and treatment of alcohol and drug abusers is a responsibility shared by the state and counties. The counties bear the major responsibility under the Short-Doyle and Lanterman-Petris-Short Acts for care and treatment. State hospitals provide some specialized programs but these are limited in nature.

The drug abuse component of the substance abuse section is responsible for the implementation of the Campbell-Moretti-Deukmejian Drug Treatment Act of 1972. This involves working primarily through the community mental health (Short-Doyle) system. Other duties include the responsibility to approve, set standards for, monitor and evaluate methadone programs in California; act as a central information resource on narcotics and drug abuse programs, review and coordinate drug research and service projects; develop a centralized drug data collection system and prepare an annual drug profile for the state; provide program consultation and technical assistance to the communities; and administer federal contract funds for community drug programs.

A. Alcohol Abuse

Since their inception, most local programs have been deeply involved in the acute and long-term treatment of alcoholism. Today they are unquestionably the principal therapeutic resource addressed to this enormous medical-social-legal problem. While law enforcement agencies probably encounter far more persons with alcohol problems than anyone else, they and the courts are referring increasing numbers of alcoholics to community mental health services for management. The trend is likely to continue.

The state will be working with community programs to develop new community resources and expand existing community resources for persons suffering from alcoholism. The trend will be away from expensive short-term medical services toward long term nonmedical rehabilitation services in the community.

B. Drug Abuse

There are two major components funded by the Campbell-Moretti-Deukmejian Drug Treatment Act. They are separately identified because of the specific responsibilities associated with methadone programs.

1. Methadone Services

The methadone services area has the responsibility for the approval and regulation of methadone maintenance and detoxification programs; the approval of hospital pharmacies to order and dispense methadone; the approval of drug wholesalers to distribute methadone; and the providing of consultation and technical assistance to methadone maintenance and detoxification programs.

The objectives of the service are to upgrade the quality of treatment services of methadone programs and to protect the patient and the public through the reduction of the illicit diversion of methadone from treatment programs, hospital pharmacies and manufacturers' outlets.

2. General Drug Treatment Programs

This area concentrates on the development of comprehensive community drug prevention and treatment programs that operate primarily through county mental health services. The additional funds made available by the Campbell-Moretti-Deukmejian Drug Treatment Act are being used to expand or add new services at the local level. The intent is to also strengthen, through increased coordination, existing drug programs funded by Short-Doyle and other public and private resources.

C. State Hospital Service

1. Alcoholism

Persons with secondary diagnosis of alcoholism are seen and treated in any state hospital for the mentally disordered. Specific programs for alcoholics exist only at Camarillo and Metropolitan State Hospitals. These will be continued as long as the community programs refer patients who need these services.

2. Drug Abuse

A few special treatment programs for patients with drug abuse problems exist in state hospitals. Community demand for such services are declining as more services are provided locally. Only Patton, Napa, Camarillo and Metropolitan will have cost centers for drug abusers in 1974–75.

3. Hospital Operations and Support

Programs for persons who abuse drugs and alcohol are part of the overall hospital operations. The hospital operation and support section is responsible for the maintenance of support and operations services which includes seeing that services are available to these special programs.

DEPARTMENT OF HEALTH—Continued

Health Treatment Systems Programs—Continued

B. Developmental disabilities program	–	(4)	(4)	–	(68,417)	(69,724)
C. Substance abuse program	–	(2)	(2)	–	(34,210)	(34,861)

Need

The changing role of state hospitals in the total California health care delivery system creates unique administrative problems and situations.

Total resident population in several of the 11 state hospitals has become relatively stable, but new treatment concepts and programs in all state hospitals are accelerating both intrahospital and interhospital shifting of residents. This activity generates administrative problems associated with building, remodeling, feeding, clothing, security, residents' financial affairs, housekeeping, recordkeeping, physical transfer of residents, and many other less frequent but equally essential nontreatment services for residents.

Close coordination and program control, professional expertise, and specialized assistance from a central headquarters staff are essential to the successful operation of administrative support programs in state hospitals.

Objectives

1. To administer and coordinate all non-treatment services for state hospitals such as business services, support, subsistence, plan operations, and facilities planning.

2. To provide central staff for coordination and administration of these services including specialists in hospital administration, construction, commissary services, and patient transfer.

Authority

The Hospital Operations Program was created within the health treatment system, as a segment of the Department of Health, established by Assembly Bill 698, Chapter 1593, Statutes of 1971.

Output

At 11 state hospitals over 3,500 administrative and support personnel provide support services on a 24-hour basis to more than 17,000 residents.

In 1972–73 fiscal year 18,900,000 meals were prepared and served. Installation of a new specialized feeding system at state hospitals for developmentally disabled progressive problems in feeding being presented by accelerating supply shortages and rising food costs, and reduction of budgeted food service positions are all current problems for the nutrition unit in the Hospital Operations Program.

General Description

The Hospital Operations Program plans, organizes, directs and coordinates nontreatment and support services provided to all treatment programs in the 11 state hospitals.

State hospital services to and in behalf of mentally disordered and the more severely retarded and developmentally disabled include: education, prevention, basic living and care, specialized medical and habilitative services, service related research and power development and training.

The prevalence of administrative problems common to more than one hospital accent the importance of coordination as a major activity in the Hospital Operations Program. Close contact between hospital administration and headquarters is promoted by daily telephone contact on urgent or emergency matters, monthly written reports to headquarters, quarterly conferences attended by all hospital administrators and headquarters unit chiefs, and visits to the hospital by headquarters personnel. Hospital operations headquarters personnel maintain constant liaison with many county, federal and state agencies and Department of Health personnel in other sections and programs concerned with treatment of state hospital residents, during and after their stay in a state hospital.

DEPARTMENT OF HEALTH—Continued

Health Treatment Systems Programs—Continued

IV. HOSPITAL OPERATIONS AND SUPPORT SERVICES—Continued

Element 1

Hospital Service Unit—Coordinates planning and operations of all state hospital administrative functions not assigned to other headquarters units in the Hospital Operations Program. It is also responsible for interstate residence determination and for intrastate and interstate movement of mentally disordered and developmentally disabled persons.

Element 2

Facilities Planning Unit—Provides architectural and engineering consulting assistance to state hospitals and to various other programs and sections at department headquarters. Serves as liaison between state hospital, department headquarters, State Fire Marshal, Department of Finance, Legislative Analyst, Office of Architecture and Construction and other state and public agencies essential to successful completion of major and minor capital outlay programs at state hospitals.

Element 3

Medical Records Unit—Plans, implements, and evaluates recordkeeping systems that will reflect quality of patient care as required by standard setting agencies (i.e. JCAH, Title 19, etc.). Develops policies and procedures relating to recordkeeping practices. Designs records forms and training programs. Provides consultations to interrelated hospital treatment programs.

Element 4

Nutrition Unit—Coordinates food logistics and subsistence functions between headquarters and 11 state hospitals. Develops management information relative to hospital patient feeding, provides consultation and direction on changing food service conditions and costs.

Element 5

State Hospital Administrators (11)—Manage and coordinate all administrative and support services in a state hospital to meet overall objectives within available resources and in accordance with overall policies, regulations and priorities. Participate with the hospital medical director in formulating, implementing and evaluating hospital policy and programs. Participates in defining and integrating hospital programs and negotiates contractual arrangements with other governmental and regional mental health planning bodies.

Health Financing Systems

Within the Department of Health the health financing systems has primary responsibility for administering the California Medical Assistance Program and the Crippled Children Services Program. Both programs require determinations affecting eligibility, appropriate program controls and provide payment functions. Responsibility for standard setting, quality control, program evaluation participation certification and surveillance rests in the Health Quality system.

DEPARTMENT OF HEALTH—Continued

Health Financing Systems—Continued

V. CALIFORNIA MEDICAL ASSISTANCE PROGRAM—Continued

Need

For those California residents unable, either wholly or in part, to pay for their medical services, California participates in the federal-state Medicaid Program. Medi-Cal, as it is known in California, provides this low-income population with access to needed medical services, in an effort to increase opportunities for self-support.

Objectives

The basic objective of Medi-Cal is to upgrade the health of California's population by providing access to necessary health care services for public assistance recipients. This must be achieved at a reasonable cost and under proper controls to insure maximum return for public funds invested. Program control mechanisms must be defined and procedures for implementation established so that persons entitled to Medi-Cal benefits can be identified and their benefits determined to be medically necessary.

Authority

Welfare and Institutions Code, Division 9, Part 3, Chapter 7, Section 14000; Title XIX of the Social Security Act, as amended.

General Description

Eligibility for the Medi-Cal Program is determined by local county welfare departments and through local offices of the Social Security Administration. The program entitles beneficiaries to seek assistance from health care service providers and assures the payment of proper claims submitted by participating program providers for their services. These are: (1) the Health Systems Element, (2) the Financing Operations Element, and (3) the Medi-Cal Benefits and Eligibility Element.

A. Title XIX Medi-Cal Services:

The medical assistance program is known as Medi-Cal in California and provides health care for needy or lower income California residents of all ages. Medi-Cal lets a resident choose his or her own doctor, hospital, or other health service, or, a resident may obtain these services under a Prepaid Health Plan. The entire program is supported by taxes at the federal, state and county level and no person who qualifies for Medi-Cal shall be denied program benefits.

There are four major categories of residents who may obtain Medi-Cal benefits. They are (1) Public Assistance Recipients who receive a welfare check through Old Age Security (OAS), Aid to the Blind (AB), Aid to the Disabled (ATD) Aid to Families with Dependent Children (AFDC), and children in AFDC families who do not receive welfare aid because they are not in school or enrolled in a training program and persons or families who could receive a welfare check, but do not want it; (2) Medically needy persons and families; (3) Indigent persons under age 18; and, (4) Other indigent persons 18 through 64 years, and indigent married persons under 18 years of age.

Health services available to Medi-Cal eligibles include, but in some cases are restricted as to the number of times a service may be used in a month, the following: physician's office or home visits, hospital outpatient services, physical, occupational or speech therapy, foot care, eye care, chiropractic services, psychological services, prescribed drugs (under certain conditions), laboratory, X-ray and radioisotope services, blood and plasma, hemodialysis services, nursing home services, dental services, home health agency services, medical transportation, artificial limbs and braces, hearing aids, assistive devices and durable medical equipment, eyeglasses, artificial eyes, eye appliances, inpatient hospital services and Medi-screening for persons under age 21. Some of the above services must be approved by Medi-Cal before they may be given.

B. Health Systems Element

This element administers two areas within the Medi-Cal Program: (a) Prepaid Health Plans and (b) Pilot Projects.

The Medi-Cal Reform Act, authorized Medi-Cal administrators to contract with groups of medical providers to supply services on a prepaid basis to Medi-Cal beneficiaries. Such contracts stipulate that the carrier will provide or arrange for health care services for voluntarily enrolled cash grant recipients within a geographically defined area. The prepaid health plan is paid a fixed monthly premium per capita for providing health care services to enrollees; however, the monthly premium is less than the costs the department would spend for the same services under the fee-for-service system. Prepaid health plans must provide, as a minimum, physician services, hospital outpatient services, laboratory and X-ray services, prescription drugs, and hospital inpatient care. As a matter of policy, plan proposals which provide the full scope of Medi-Cal benefits receive prime consideration from the department.

DEPARTMENT OF HEALTH—Continued

Health Financing Systems—Continued

V. CALIFORNIA MEDICAL ASSISTANCE PROGRAM—Continued

Prepaid health plans are not subject to the Medi-Cal utilization controls, such as prior authorization, which is required in the fee-for-service system of medical care.

The pilot projects unit is responsible for receiving and evaluating proposals from various individuals or governmental and private groups for the establishment of pilot projects. A pilot project is a plan which offers an innovative, creative, or experimental concept related to the organization, delivery, or financing of health care services to Medi-Cal beneficiaries which can be tested and evaluated over a specific period of time.

In the current year, 18 positions were administratively established and authorization requested to continue them in budget year to adequately manage and review the operations of over 48 approved PHP contracts and to develop and manage the increased number of proposals received.

How the Department Determines Prepaid Health Plan Capitation Rates

A basic outline for PHP rate setting is contained in the Welfare and Institutions Code, Section 14300. It specifies that:

"The department shall determine by actuarial methods, with respect to any prepaid health plan, a prospective per capita rate of payment for services provided under this chapter for eligibles enrolled with such organizations. Such rate of payment shall be designed to provide a rate of payment which does not exceed the amount which the department estimates would be payable for services covered under the prepaid health plan contract if such services were to be furnished by other than a prepaid health plan."

Given these guidelines for establishing a rate setting mechanism, before the PHP program began, the department obtained actuarial data, primarily from long established private prepaid groups (Kaiser, Ross-Loos, etc.). Other data was available from five years of fee-for-service experience with the Medi-Cal program.

To adjust this data for potential savings of prepaid group delivery, the department adopted a guideline of a 10 percent saving factor. Then on a county-by-county basis, it analyzed all expenditure data separately for each eligible aid category and each covered service. The information was then divided by the number of eligible beneficiaries in each county. The result was a per capita cost by county, by service type, and by aid category for the time period on which these calculations were based.

These projections are used only as a base, to be adjusted for services not provided in some PHP contracts, and for other factors such as administrative and marketing costs, which vary by area, and differing overhead costs experienced by different types of PHPs (foundation, hospital-based, clinic based).

Rates are negotiated by each PHP individually with the department, subject to the director's approval.

The final negotiated rate becomes full capitation, and the contractor accepts the rate at his risk for the contract period.

C. Financing Operations Element

This element administers two major areas of the Medi-Cal Program—(a) Program Implementation and (b) Rates and Fees. Program Implementation implements Medi-Cal Program policy and directs the

Health Financing Systems—Continued

V. CALIFORNIA MEDICAL ASSISTANCE PROGRAM—Continued

processing of fee-for-service claims through contracts with private insurance carriers, acting as intermediaries; coordinates program policy changes; issues directives to contractors creating new policy or modifying existing policy; coordinates and approves provider information bulletins published by the intermediaries; responds to inquiries, comments, and complaints from providers of services, beneficiaries, public officials, and the general public; processes formal grievances and Board of Control claims relating to the Medi-Cal Program; examines claims for services provided out of state to beneficiaries; and finally, insures that department policies, regulations, and procedures are implemented into the intermediaries' operating systems in a prompt and efficient manner. Proposals are being requested for a statewide Medi-Cal intermediary system to replace the Medi-Cal Management System (MMS) and the Medi-Cal Intermediary Operations (MIO) Systems now in effect. The new contractor shall implement the new system in budget year 1974–75. The system will combine the best features of MMS and MIO and give the state quick and accurate information on claims, providers, and other information to allow management to more effectively control the Medi-Cal Program.

The primary function of the rates and fees section is to establish and maintain reimbursement rates for all medical and health care services purchased by the state, with the exception of hospital inpatient services. Each rate study requires the identification of services to be provided, a method of determining the cost or price for the service, and a report of the study presenting recommendations.

D. Medi-Cal Benefits and Eligibility Element

This element administers three areas within the Medi-Cal Program. They are: (a) Program Benefits, (b) Program Eligibility and (c) Field Services.

Program benefits is responsible for functions relating to the scope of benefits, provision of services and payment for health care services; recommending and developing laws and regulations for administration of these functions; recommending and developing policy; and maintaining liaison between the department, providers, professional organizations and beneficiaries.

Program Eligibility is responsible for the development, interpretation and implementation of policy and procedures relating to Medi-Cal eligibility. The unit reviews and evaluates federal eligibility requirements and assures that the state program is in compliance with Federal Medicaid laws and regulations; proposes legislation and regulations; and carries out county consultation and training programs.

Field Services authorizes the provisions of those health services under the Medi-Cal Program which require prior approval; administers utilization control procedures and determines the appropriateness of placement of patients in skilled nursing and intermediate care facilities. These functions are performed in 14 field offices by licensed professional Medi-Cal consultants representing the medical, dental, optometric, nursing and social services disciplines with the assistance of administrative and clerical staff. In addition, medical review teams determine the necessity for and quality of care given recipients by institutional providers.

In the current year, the state entered into a contract with California Dental Services, a nonprofit California corporation, under which CDS will provide dental services to all Medi-Cal beneficiaries on a prepaid basis. Approximately 12,000 dentists are members of CDS and all are eligible to participate in the program.

Health Benefits

	1972–73	1973–74[a]	1974–75[a]
Professional services	$329,408,845	$324,770,800	$327,784,000

Children	37,687	59,700	63,900

[a] Medically Needy I—"Reduced grant" and "long term non-grant" persons.
[b] Medically Needy II—Those persons who are categorically linked but do not qualify for money payments because their income and/or resources exceed maintenance levels but are insufficient to meet needs for health care.

BENEFIT PAYMENTS

To consolidate all "banking" functions the Governor's Reorganization Plan No. 1 of 1970 has been expanded to include the creation of the Department of Benefit Payments. Consolidating all payment systems into a single department will increase operating efficiency for functions related to collection and disbursement of money, will reduce program cost and improve services. The Department of Health will transfer 164 positions supporting various banking functions to the Department of Benefit Payments effective July 1, 1974.

Reimbursements:						
Federal				–	–	–
Other				–	*454,616*	*471,570*
Program Elements:						
A. Diagnosis	–	5	5	–	1,469,204	1,526,684
B. Treatment	–	38	38	–	17,079,498	17,747,706
C. Therapy	–	18.5	18.5	–	4,666,452	4,813,679
D. Administration	–	(9)	(9)	–	(258,839)	(233,625)

Need

Nineteen thousand infants are born each year in California with congenital deformities serious enough to endanger life or result in lifelong disability. Several hundred children each year are severely burned, paralyzed or suffer other severe injuries. Infections, diseases and poisoning further contribute to the picture of childhood disability. Many children whose handicap prevents regular school attendance can receive education in special schools if physical and occupational therapy is a part of the school day activity. Modern medical science can correct or modify most of these handicaps but the cost of treating such cases is greater than most families can afford from their own resources. Medical care for these children with handicaps provided at the appropriate time can prevent lifetime dependency on public funds.

Objectives

The objectives are to: (a) maintain continuing early casefinding of children with handicapping conditions; and (b) assure that those eligible are provided high quality comprehensive medical and related services to correct, ameliorate, or eliminate their handicap.

Authority

California Health and Safety Code, Division 1, Part 1, Chapter 2, Sections 249–270, inclusive, and California Administrative Code, Title 17, Chapter 4, Subchapter 3, Group 1, Section 2890 to 2906, inclusive.

General Description

Services for handicapped children are administered "independently" by the 23 larger counties (over 200,000 population), under standards and procedures developed by the department. For the remaining 35 "dependent" counties, the department administers the program directly.

Each county is required to appropriate funds to support the cost of the CCS program. These are matched by state and federal funds on a 3:1 state-local basis. In addition, family repayments contribute to the cost of treatment services in accordance with uniform standards of financial eligibility and a uniform repayment formula.

At the state level, liaison is maintained with the Departments of Education and Rehabilitation, with the Medi-Cal Program and the Developmental Disabilities Program.

Output	Actual 1972–73	Estimated 1973–74	Proposed 1974–75
Program Size Indicators			
1. Number of children served	47,790	48,600	48,90
2. Number of Medi-Cal case management children	15,790	16,400	16,5
3. Therapy in schools—children served	6,960	7,100	7,3
4. Number of consultation visits to counties and providers of service	502	510	5
5. Number of providers who were excluded from program participation	24	26	

The three major program elements are:

A. Diagnosis

Activities such as birth certificate surveillance, medical screening programs and child health conferences are designed to promote and provide early casefinding and referral services which assure comprehensive medical evaluation by appropriate physician specialists; to assure uniformity in the payment for these services; and to evaluate the services provided. The trend in medical eligibility is to accept children with conditions that are severe, chronic, physically handicapping and require specialist care where the cost of care is catastrophic in relation to the families' resources.

DEPARTMENT OF HEALTH—Continued

Health Financing Systems—Continued

VI. CRIPPLED CHILDREN'S SERVICES PROGRAM—Continued

B. Treatment

The program provides, or assists in arranging for specialized medical care and allied services for eligible handicapped children. Appropriate referrals and authorization to specific "panel" physicians to treatment facilities are made for eligible children from the 35 "dependent" counties. Technical consultation is provided "independent" counties in carrying out referral and authorization procedures and in developing local community resources. (A "dependent" county is one with a population under 200 000 persons whereas an "independent" county is one with a population over 200,000 as defined by Section 252 of the Health and Safety Code). Through physician reports, personal communication, contact with the family, and case management education and assistance, the program assists the physician and the family in successfully following through with recommended treatment. By coordinating care with all appropriate official and voluntary welfare and rehabilitative agencies such as Medi-Cal, Department of Rehabilitation, and the Easter Seal Society, maximum use is made of all available resources.

C. Therapy

Therapy services in medical therapy units of special schools and classrooms are provided in conjunction with the State Department of Education.

Standards for space, equipment, number of therapists in special schools and administrative procedure are established and revised as necessary. Plans for new therapy units are reviewed with the State Department of Education and local school districts. Assistance is given to counties in the recruitment and in-service training of therapists, planning for the use of subprofessional personnel, training and instruction of parents, and coordination of therapy services with the education of the child. Consultation and assistance is provided to therapy staff in the counties and to panel physicians in the special schools, and the utilization of therapy time is evaluated.

Health Protection Systems

The objective of the Health Protection Systems is to safeguard California's health through (1) control or elimination of environmental health hazards, (2) prevention and control of infectious disease, (3) protection of families and individuals against social disruption or social disorganization, and (4) with the other systems to plan and develop facilities and manpower to meet health needs. The Health Protection Systems has four programs: Environmental Health Services, Laboratory Services, Preventive Medical Services and Social Services.

VII. ENVIRONMENTAL HEALTH SERVICES PROGRAM

The Environmental Health Services Program is responsible for management and operation of a variety of programs designed to (1) protect California consumers from unsafe, unwholesome and ineffective or misrepresented foods, drugs and other products, and (2) promote and maintain a physical environment that contributes positively to health.

PROGRAM REQUIREMENTS	72–73	73–74	74–75	1972–73	1973–74	1974–75

Health Protection Systems—Continued

VII. ENVIRONMENTAL HEALTH SERVICES PROGRAM—Continued

Need

The health of California's citizens is critically dependent on many factors over which the individual has little control, but on which this program has a major regulatory, supportive, or advisory influence.

These factors relate to the quality and safety of our working, home, and recreational environments, and to the food, water, and other products we consume or contact.

Foods, drugs, medical devices, cosmetics and household products that are pure, safe, and honestly represented are essential to the good health of California consumers. When such products are produced or sold irresponsibly the result may be adulteration, misbranding, false advertising, or malfunction, and cause disease or injury.

Recent technological advances in production and marketing and use of hazardous products in the home can create serious health hazards. For example, botulism not only can be fatal, but a single occurrence can cause financial ruin to a multimillion dollar canning industry.

Fraudulent promotion of drugs, health devices and illegal cancer cures cost Californians $200 million annually.

Ionizing radiation has become indispensable to the practice of modern medicine and dentistry, but it involves some risk. Its harmful effects are insidious because of the typically long delay between exposure and effect, and because it is seldom possible to attribute an adverse condition uniquely to radiation exposure. To minimize the risk of irreparable genetic damage, careful control of radiation is necessary.

The quality and safety of water used for domestic water supplies, food production, and recreation are increasingly threatened by man's activities. Within the past seven years, California has experienced six waterborne outbreaks of disease. Prior to 1965 there had not been a waterborne outbreak in 20 years. A significant number of domestic water systems need additional treatment facilities. The cycle between water use, sewage disposal, and reuse of water for domestic purposes has become shorter and shorter; natural protection barriers are diminishing, and areas isolated from public contact no longer exist.

Over 50 clearly defined animal-borne diseases are now known to be indigenous or have become established in California. Another 35 diseases present a potential threat as possible imports. Over 1,000 insects and other invertebrate species are known or suspected vectors of these diseases or are of concern because of their venomous bites, stings, or nuisance characteristics. Over 200 kinds of animals, birds, and reptiles serve as real or potential hosts or reservoirs of infectious agents or are of public health concern because of their venomous bites or filth impact. Intensified use of wilderness areas is exposing an increasing number of people to vectors and animal-borne disease hazards. Parasites are developing resistance to availab drugs; insect vectors are becoming increasingly r sistant to available insecticides. The great potenti for transmission to humans of a variety of anima borne diseases requires intensified prevention and co trol efforts.

The solid waste problem in California has reache enormous proportions, causing disease, bringir rodents, fire hazards, and general environmental pc lution.

Over 30,000 cases of work-induced disease occu each year in California. These include cancer, lun fibrosis, emphysema, deafness, dermatitis and a gre variety of systemic poisonings. Many of these can b prevented.

Forty-six local health departments operate enviro mental health programs, employing a total of approx mately 1,500 sanitarians. The programs must mec acceptable standards to qualify for state and federa subventions.

Objectives

The program's objectives are (1) to promote an maintain a physical environment which contribute positively to health, and (2) to assure protection o the consumer public against unsafe, unwholesome, an ineffective or misrepresented foods, drugs, and othe products.

General Description

The program provides public health protection over the quality of domestic water; it exercises control to maintain exposure from radiation-producing machines and materials at safe levels; it seeks effective control of conditions responsible for transmission of animal-

DEPARTMENT OF HEALTH—Continued

Health Protection Systems—Continued

VII. ENVIRONMENTAL HEALTH SERVICES PROGRAM—Continued

borne diseases; it strives toward the reduction of the incidence and severity of work-related diseases; it searches for cause-effect relationships in environmental exposures to health; and it develops and applies preventive medical and corrective strategies to overcome adverse effects of physical and chemical agents in the environment. It also reduces poor manufacturing practices which cause food, drugs, and other consumer products to become hazardous; it removes hazardous products from trade channels; it reduces labeling and advertising inaccuracies, and it lessens financial loss and health hazards resulting from cancer quackery and other fraudulent promotion of health devices, drugs, foods, and other products. Activities of the program are carried on primarily in the six elements described below, supported by the Laboratory Services Program.

A. Food and Drug

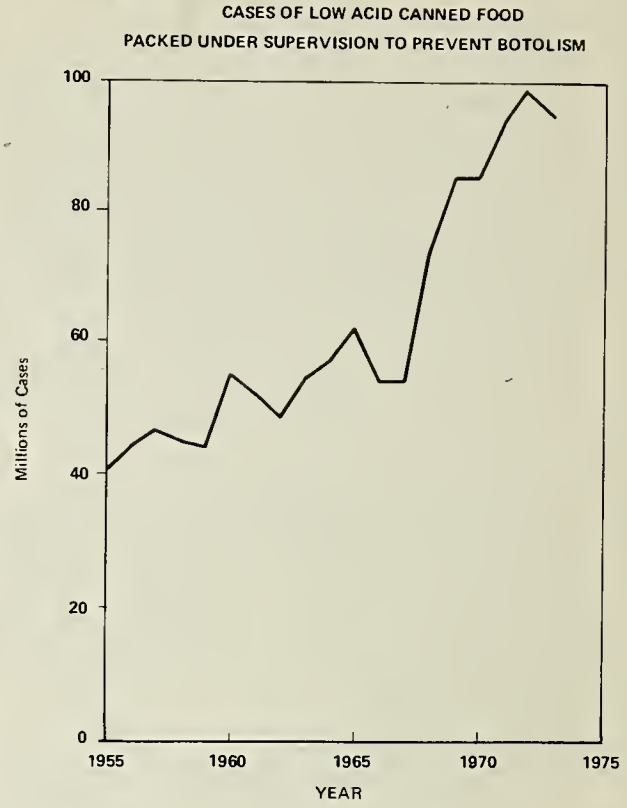
The food and drug section implements, directs and coordinates detection and control activities to protect consumers against adulterated, misbranded, or falsely advertised foods, drugs, medical devices, hazardous household products and cosmetics. The food and drug laboratory, southern California Public Health laboratory, and microbial disease laboratory provide support by analyzing food and drug samples. This section has five components: food protection, cannery control, drugs and medical devices, hazardous household products and health fraud control.

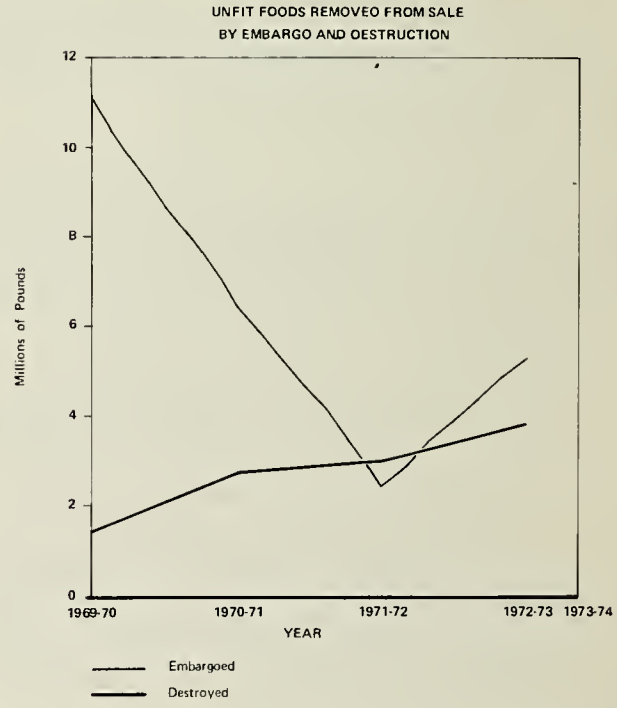
(a) *Food Protection*

This component inspects manufacturers and wholesalers to detect and correct violations relating to adulteration, misbranding and false advertising of food; conducts investigations of consumer complaints and removes products from sale which have become adulterated.

(b) *Cannery Control*

Botulism from commercially canned low-acid foods can be prevented by maintaining daily inspections to assure compliance with processing standards and all other provisions of the laws relating to adulteration and misbranding. Annual licenses are issued to those canneries which are properly equipped and have adequate trained personnel. This activity also exercises the similar control measures for pet food manufacturers.





DEPARTMENT OF HEALTH—Continued

Health Protection Systems—Continued

VII. ENVIRONMENTAL HEALTH SERVICES PROGRAM—Continued

(c) *Drugs and Medical Devices*

Manufacturers are inspected and licensed annually to improve manufacturing practices and reduce the risk of adulterated, misbranded, falsely advertised, or ineffective and unsafe drugs or medical devices. New drugs and devices are reviewed to assure their safety and effectiveness prior to marketing. Investigations involving the use of humans to evaluate drugs and devices are monitored to assure protection of the subjects of the investigation and to assure data will be useful in establishing the safety and effectiveness of drugs and devices. Consumer complaints are investigated. Drug handling and labeling is reviewed to assure that patients receive properly manufactured drugs. Special drug labeling required by California law is assured on all drugs sold in California.

(d) *Hazardous Household Products*

Manufacturers and distributors of household chemicals and products, including toys and articles used by children, are inspected to assure appropriate warning labeling and, where necessary, to ban the sale of unduly hazardous products. Manufacturers or distributors of glazed ceramic tableware are certified after data is submitted to assure the absence of hazards in these products.

(e) *Health Fraud Control*

This component conducts investigations to detect and eliminate unorthodox cancer treatment and fraudulent promotions of drugs, health devices, foods, and cosmetics. Criminal actions and injunctions are filed to terminate health frauds. Educational activities are conducted to alert consumers to the hazards of fraudulent health promotions.

B. Water Sanitation

The water sanitation element provides essential safeguards for domestic water supplies, waste disposal operations, shellfish production and harvesting operations in recreation waters by a continuing program of standard setting, surveillance, evaluation, education and enforcement. This element has four components:

(a) Domestic Water Supply: Domestic water utilities and bottled water companies are required to have a permit from the State Department of Health, issued after requirements designed to provide a safe product have been met. Certificates are issued to qualified water treatment plant operators. Preventive, corrective, and enforcement actions are taken, based on: annual surveillance of all systems; comprehensive reviews on a decennial basis; prompt investigation of waterborne illness; failure to meet bacteriological standards; and substantial consumer complaints about water quality.

(b) Domestic Sewage Disposal and Safe Use Reclaimed Sewage: Sewage treatment and disposa and sewage reclamation and reuse projects are eval ated to assess health protection; preventive, correcti and enforcement actions are taken. Recommendatio are made to the State Water Resources Control Boa and the nine regional water quality control boar (RWQCB) to ensure health input into those wat pollution control programs.

(c) Recreation Water Sanitation: Guides, stan ards and regulations are developed, and technical a sistance is provided, for local health department ar industry use.

(d) Shellfish Sanitation: Surveillance, samplir and testing are conducted in shellfish growing are and preventive, corrective, and enforcement actio are taken to assure that shellfish are safe for co sumption, and to assure protection against shellfi toxin. Certificates for growing areas and processir plants are issued.

C. Radiologic Health

The element's objective is to reduce the incidenc of unnecessary radiation exposure to workers and th public resulting from either the use of radioactiv materials or radiation machines including contamina tion of the environment with radioactive material This element has five components:

(a) *Electronic Products Radiation Control*

Maintains and enforces standards to assure tha radiation-producing machines are safely used an maintained in good operating condition.

(b) *Certification*

Through examination of workers maintains stand ards of competence for persons using radiatio machines for medical purposes. It establishes and en forces standards for schools providing medical X-ra training.

(c) *Radioactive Material Licensing*

Establishes standards for person using radioactiv materials for any purpose. It authorizes such use t those persons whose training, facilities, and operatin procedures are safe and in the case of medical us effective. The unit is assisted in this work by th Department of Industrial Relations and local contrac agencies.

(d) *Radioactive Material Inspection and Compliance*

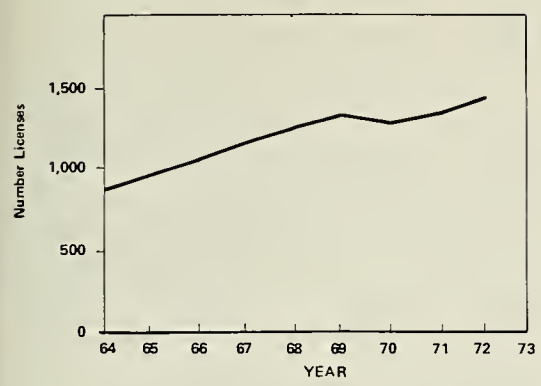
Maintains and enforces standards for safe use o radioactive material and investigates incidents arisin out of such use. The component is assisted in thi work by the Department of Industrial Relations and local contract agencies.

DEPARTMENT OF HEALTH—Continued

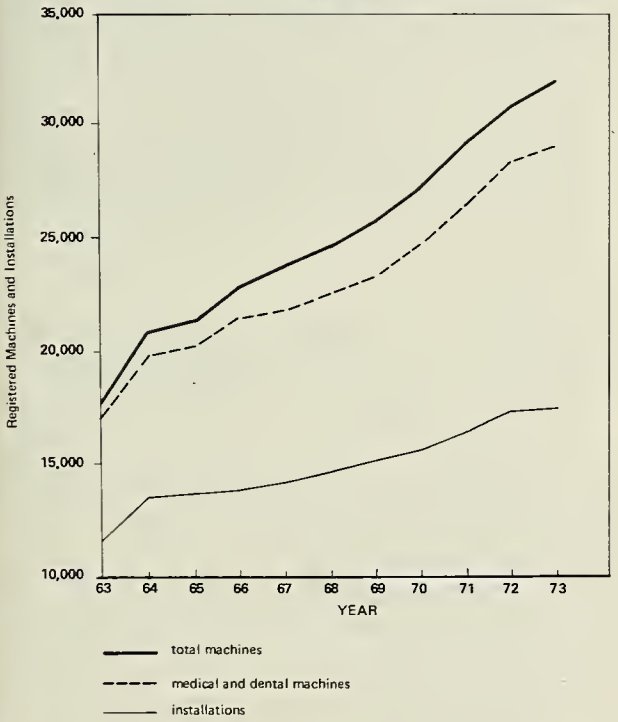
Health Protection Systems—Continued

VII. ENVIRONMENTAL HEALTH SERVICES PROGRAM—Continued

INCREASE IN NUMBER OF RADIOACTIVE MATERIAL LICENSES IN CALIFORNIA
1964 – 1973



INCREASE IN USE OF RADIATION MACHINES IN CALIFORNIA
1963 – 1973



(e) *Environmental Control*

With the support of the Sanitation and Radiation Laboratory, this unit assesses the levels of radioactive contamination in the environment and establishes standards and control measures necessary to protect the public health. It disseminates such environmental information to the media as required by law. It represents the department on the California Powerplant Siting Committee.

D. Occupational Health

The Occupational Health Element identifies environmental factors which constitute sources of disease in places of employment; it develops and applies medical and engineering techniques for the prevention of occupational illness; and it provides technical assistance and information to the State Division of Industrial Safety in the enforcement of the state's Occupational Safety and Health laws and standards. The element's activities are required under and supported through an interagency agreement with the Department of Industrial Relations, in conformance with the state plan for occupational safety and health. The occupational health element is assisted in this activity by the air and industrial hygiene laboratory and the Southern California Public Health Laboratory.

(a) Standards Development: This component develops and evaluates occupational health standards prior to adoption by the Occupational Safety and Health Standards Board.

(b) Field Studies: The component investigates the occupational health status of workplaces throughout the state at the request of the Division of Industrial Safety, in response to complaints from employees, at the request of employers, or on its own initiative, and provides the Division of Industrial Safety with its findings for enforcement and compliance purposes.

(c) Training and Evaluation: The component provides Division of Industrial Safety personnel with training in the recognition of common health hazards; it provides information to employers and employees for preventing occupational disease; and it evaluates the effects of occupational health activities.

E. Vector Control

The Vector Control Element, which deals with insects and other animals (vectors) causing human disease and discomfort, is supported by departmental laboratory services in conducting a statewide program to prevent vectors or diseases transmitted by them. Surveillance of vector production and pesticide resistance are maintained. Control technology is developed and evaluated, including engineering, biological and chemical approaches. Public education is included. Technical guidance and training are provided vector control personnel within over 100 local vector control and health agencies.

(a) To suppress animal-related diseases, epidemiological/ecological investigations are directed toward the infectious agent (viruses, bacteria, etc.), the animals that maintain the infectious agent in nature, the vector, and the environment. Control measures are recommended and applied where appropriate.

(b) To prevent diseases associated with water-related vectors, epidemiological surveillance is maintained of vector mosquitoes, animals that provide virus reservoirs in nature, and virus occurrence. Mosquito pesticide resistance is monitored and alternative pesticides are recommended and their use regulated through cooperative agreement with local vector control agencies, including certification of pesticide applicators. Engineering and biological evaluations and demonstrations are conducted to guide local agencies in developing programs that will prevent outbreaks of vectors through broad ecological approaches

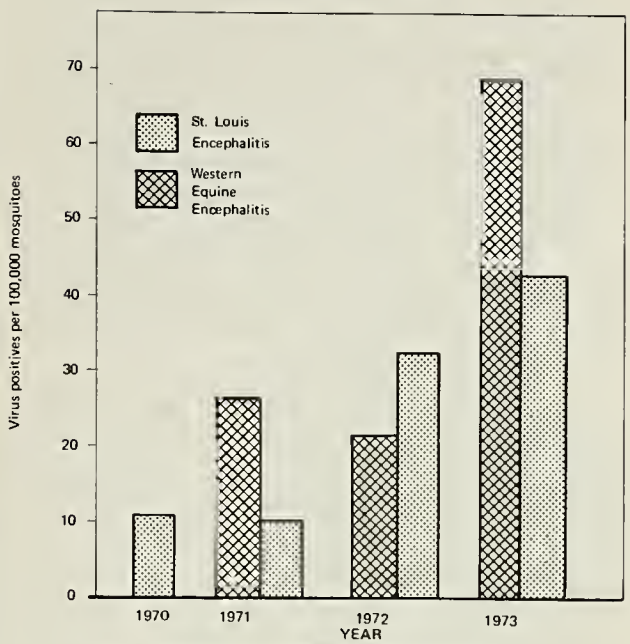
MOSQUITO–BORNE ENCEPHALITIS VIRUS ACTIVITY IN CALIFORNIA



Note: No positives for Western Equine Encephalitis in 1970.

"Mosquito-borne virus activity has been steadily increasing in nature during the past several years. This presents a worsening threat to the health of the citizens of California."

including land and water management and biological control. Other activities include epidemiological surveillance and control procedures development to suppress annoying and biting insects of aquatic origin and snail-associated swimmer's itch (schistosome dermatitis).

(c) Solid waste management and related vector prevention and control activities are directed toward reducing human health threats associated with hazardous wastes and vectors produced by solid wastes in general, at the same time emphasizing resource conservation. Primary concerns are such vectors as flies, cockroaches and rodents; toxic and infectious materials; and the effects upon human health of solid waste storage, collection, and disposal. Criteria and standards related to health aspects are being developed in response to legislative mandates.

(d) Community premises and related vector prevention and control involves monitoring vectors that affect people in residential, commercial and industrial areas, and developing control methods, materials and techniques. Prevention through ecological measures is emphasized to reduce the use of toxic substances (pesticides) in close proximity to people and their food, and precautions and precise application methods are developed where pesticides must be used. Local health agencies are assisted in developing domestic rat control programs augmented by short-term federal funds.

(e) Field-wilderness area vector prevention ar control activities are focused on reducing publ health risks associated with venomous or noxious ve tebrates and invertebrate animals, occurring in rur or wilderness recreational environments.

(f) Veterinary services include surveillance, r porting, investigation, analysis and distribution epizootiologic-epidemiologic data on the occurrence man of disease acquired from animal reservoirs (f example, brucellosis, leptospirosis, psittacosis, rabi and salmonellosis). The solving of problems of di ease processes as they affect all animals, includir man, is an area of major concern to veterinarians public health work.

F. Sanitarian Services

The Sanitarian services element reviews and eval ates local environmental health programs for conte and output to determine federal and state subventic eligibility, administers the State Sanitarian Registr tion Act, recruits potential environmentalists into t profession, assists colleges and universities in curri ula content, serves as a secretariat to the Californ Conference of Directors of Environmental Health, an provides coordinating leadership to local departmen in the development of component program objectiv and program priority determinations.

Output	1972–73	1973–74	1974–75
Measures of Effectiveness			
Food and Drug			
Violations detected and corrected	14,668	16,000	16,0
Percent low-acid canned food free of botulism	100	100	1
Consumer savings from health frauds terminated	$6,000,000	$8,000,000	$8,000,0
Pounds of adulterated food removed from sale	5,486,844	5,500,000	5,500,0
Dosage units of adulterated drugs removed from sale	7,568,000	8,000,000	8,000,0

B. Biomedical laboratories	–	153.8	158.8	–	2,863,759	3,087,592
C. Laboratory central services	–	67.8	67.8	–	1,262,102	1,310,290
D. Administration	–	(63)	(65)	–	(1,500,527)	(1,634,592)

Need

Departmental programs depend upon accurate and timely laboratory analyses to identify infectious disease agents, adulterants of foods, drugs and other consumer products as well as specific polutants in air and water which are detrimental to health. Program planning and new program implementation in virtually all areas of health protection depend on advances in laboratory technology and competence of staff in the health laboratory sciences.

Also important is the quality of health-related laboratory services provided by medical and health-related facilities and agencies, both governmental and private. Through regulation or support, this program influences compliance with standards which assure the public reliable health-related laboratory services.

While some laboratory techniques are well known and used by local laboratory personnel, many are so complex and others so rare that they can only be performed at laboratories in the Department of Health. Analyses requiring these laboratory techniques are in addition to those analyses required by law to be performed at the state laboratory.

Objectives

To provide laboratory support and services essential to departmental programs for disease diagnosis and prevention, environmental health and consumer protection, and for personal health maintenance; to assist other medical and health-related agencies to fulfill their responsibilities for health protection and in delivering quality health care; assure continued development of high quality reliable laboratory services provided by local medical and health-related facilities and personnel.

General Description

The Laboratory Services Program provides administrative direction and coordinates activities of eight internationally recognized laboratories.

DEPARTMENT OF HEALTH—Continued

Health Protection Systems—Continued

VIII. LABORATORY SERVICES PROGRAM—Continued

Analyses—chemical, biochemical, biological, microbiological, virological—to identify disease agents, adulterants of foods and drugs and other consumer products as well as pollutants in air and water are performed for disease diagnosis and prevention, and environmental health and consumer protection. Laboratory services provides technical assistance, consultation and guidance in program planning to departmental elements and components which require laboratory support.

The program provides technical assistance, consultation, reference analytical services, and direct laboratory analyses to other state agencies, local health agencies and physicians. Delivery of quality laboratory services by health-related facilities and personn is provided through: establishing standards of labor tory practice; monitoring laboratory performance ar proficiency testing; licensing and certification; training program for local agency and private labor tory personnel; provision of technical informatio consultation and assistance with laboratory method reagents, and instrumentation; and development, r finement, and dissemination of laboratory metho ology. The program also conducts studies of t properties and health effects of infectious diseas agents, chemical and biological pollutants, contamin auts or disease vectors relevant to their detectio identification, aud control.

A. Bioenvironmental Laboratories

1. Air and Industrial Hygiene Laboratory

The air and industrial hygiene laboratory provides chemical and related support necessary for the control of air pollution and the protection of employees against the health hazards of their work environments. Support is provided to the occupational health and environmental epidemiology component, the Air Resources Board, Division of Industrial Safety of the State Department of Industrial Relations, local health departments and local air pollution control districts. The laboratory analyzes samples; develops, evaluates, and standardizes new methods for chemical identity of air pollutants so that necessary air quality criteria can be developed. The laboratory provides chemical and physical analytical services for the protection of employees against health and safety hazards in their work environment.

2. Food and Drug Laboratory

The food and drug laboratory helps assure the safety of a wide variety of foods, drugs, and other consumer products. Primary support is given to food and drug and other components of the department and secondarily to other state and local agencies, physicians, hospitals in emergency situations, and to local health departments. The laboratory develops or evaluates procedures for the analysis of foods and drugs, provides consultation on the interpretation of the results of laboratory work, conducts animal studies to determine if and to what extent various substances are poisonous and participates in collaborative studies of analytical procedures by governmental agencies and professional organizations. Staff is required t give expert testimony on matters before the court and hearing boards as part of the legal process for re moval of violative products from the marketplace.

3. Sanitation and Radiation Laboratory

The sanitation and radiation laboratory provide support necessary for the control of water and wast water quality and to avert health hazards associate with radioactive materials. Support is provided to th department's water sanitation, radiological health and contract county components, and through thes to regional water quality control boards; the Stat Department of Fish and Game; and to local healt departments. The laboratory analyzes samples and develops, evaluates, and standardizes new biological, chemical, or radiological methods necessary for such analysis. It also carries out inspection and general surveillance of public and private laboratories ap proved for water analysis.

4. Southern California Laboratory

The southern California laboratory provides the necessary support for the control of hazards associated with foods, drugs, hazardous substances, water aud waste water, and work-induced diseases. Support is provided primarily to the food and drug, water sanitation, occupational health components and secondarily to other state and local agencies in the area. The laboratory performs chemical bacteriological, physical and other laboratory analyses.

DEPARTMENT OF HEALTH—Continued

VIII. LABORATORY SERVICES PROGRAM—Continued

A. Bioenvironmental Laboratories—Continued

5. Epidemiological Studies Laboratory

The epidemiological studies laboratory collects and analyzes data and associated information relative to the causation and course of disease, or other harmful effects due to exposure to chemicals, physical agents, or stress encountered in the environment; develops procedures, criteria, and standards for the prevention or control of such diseases and effects; and provides technical support to state and local agencies responsible for the prevention, control and detection of impaired health which results from exposure to environmental hazards.

B. Biomedical Laboratories

6. Clinical Chemistry Laboratory

The clinical chemistry laboratory provides support to maintain and improve the quality of clinical chemistry services utilized by physicians throughout the state. This includes consultation concerning problems revealed by the state proficiency testing program for clinical laboratories; evaluation of analytical methods, laboratory instruments, and commercial test kits and reagents for use by clinical laboratories. The laboratory provides analytical support to further the detection, prevention and control of chronic, metabolic and hereditary diseases. The clinical chemistry laboratory has responsibility for inspecting and licensing laboratories which perform tests to determine blood alcohol levels of persons involved in traffic accidents and violations, for licensing persons who perform forensic alcohol analysis, and for evaluating analytical methods and instrumentation for forensic alcohol determinations. The laboratory also administers regulations governing methadone drug analysis laboratories including licensure of such laboratories, evaluating and approval of methods of analysis, qualifications of personnel, and monitoring of laboratory performance. Clinical chemistry services are also provided to contract counties and local health departments.

7. Microbial Disease Laboratory

The microbial disease laboratory provides support essential for the detection and control of communicable diseases caused by bacteria, fungi, and animal parasites. The laboratory provides services to the department, local agencies contracting with the department, local health department laboratories in emergencies, and certain other state agencies. Reference services (encompassing procedures not performed locally or required by statute to be done at the state laboratory) are provided to microbiologists and physicians throughout the state. The laboratory develops, prepares, and provides special reagents for use here and in other California laboratories. In addition, the laboratory develops, improves, and evaluates technical procedures in microbiology of such newer methodologies for cultivation and identification of anaerobes where they are the dominant infecting agents.

8. Viral and Rickettsial Diseases Laboratory

The laboratory provides diagnostic and other technical support required for public health programs for surveillance, epidemiologic investigations, control and prevention of viral and rickettsial diseases. Support and services are provided to departmental programs, local health departments and, when not available elsewhere, diagnostic procedures supportive of viral disease control are provided to local clinical facilities and physicians. Services and support include performance of complex procedures to detect and identify causative viruses in human clinical specimens, animals, ticks, mosquitoes, other vectors and environmental sources; to measure antibody responses and susceptibility of individuals and selected populations to infections; assess efficacy of vaccines; characterize newly recognized viruses and assess their infectious properties. To assist local health departments and medical facilities to develop and maintain local viral services the laboratory provides specialized training in virology for laboratory personnel, provides consultation and technical information on laboratory methods and reagents, prepares and provides special reagents not elsewhere available, evaluates methods for local use, and assess local laboratory results.

The laboratory also develops and evaluates new procedures, reagents, and materials for improvement of laboratory methods, and conducts applied research on the properties of viruses and their causative role in diseases relevant to diagnosis and possible means of prevention.

9. Laboratory Field Services

The field staff provides support and assists in the development of reliable biomedical laboratory services throughout California by administering a comprehensive program to assure compliance with standards by these laboratories and their personnel as required in the laws and regulations relating to clinical laboratories, public health laboratories, biologics producers, and related facilities. The activities planned, organized, and conducted by this staff are those relating to licensing, certification, standard setting, surveillance, consultation, and training.

DEPARTMENT OF HEALTH—Continued

Health Protection Systems—Continued

VIII. LABORATORY SERVICES PROGRAM—Continued

C. Laboratory Central Services

1. The laboratory central services section provides consolidated centralized support services necessary to meet departmental laboratory requirements. This includes: (1) laboratory statistical services for seven laboratories; (2) consultation and training in laboratory technique and technical information in related discipline areas to public and private laboratories; (3) provision for a central source of all technical supplies and equipment necessary for the laboratory program; (4) maintenance of the Fairfield animal facility which provides the laboratory department with the necessary animals required in various research projects; and (5) provision of central clerical support to activities which do not have assigned clerical personnel. The central laboratory files are also maintained by this element.

DEPARTMENT OF HEALTH—Continued

Health Protection Systems—Continued

IX. PREVENTIVE MEDICAL SERVICES PROGRAM—Continued

Need

The best of medical care is no substitute for preventive care. Unless greater attention is given to the prevention of illness and injury, the present health care delivery system may become overburdened and not able to meet future health care demands. The prepaid health plan concept is being widely endorsed for keeping people healthy because the financial incentives are structured to favor prevention and early detection of disease and are weighted against costlier episodic care and hospitalization. In contrast to the immediacy and urgency of curative programs, preventive programs can be planned and conducted on a systematic and orderly basis.

Families in poverty have infant death rates more than twice those of the more affluent; maternal death rates are double; twice as many mothers receive late or no prenatal care and have four times as many out-of-wedlock births. Among these high-risk children and adults, 20–30 percent suffer from anemia, and over 60 percent have acute unmet dental needs. Diseases such as cancer, heart, and emphysema, utilize over one-half of medical manpower and time; account for three-quarters of hospital admissions; and cause a great majority of disabilities and deaths at all ages.

While some infectious diseases such as poliomyelitis, measles, and diptheria are well controlled, continuing surveillance and application of proven control measures are necessary to prevent their resurgence. There were over 101,000 cases of gonorrhea and over 5,000 cases of early infectious syphilis reported in California during 1972. These figures represent only the tip of the iceberg. A moderate estimate of the number of gonorrhea and syphilis cases would be 500,000 and 50,000 respectively. Effective control measures for many infectious diseases such as the common cold and hepatitis are not currently available.

Emergency medical services will be used by four to five million Californians in 1974–75. There is a serious lack of uniform, coordinated, accessible emergency services provided by properly trained personnel to prevent deaths and disabilities among individuals receiving emergency care.

Basic public health services must be provided to 15 sparsely populated counties which are unable to operate full-time health departments. These counties are major recreational areas; therefore, it is of great concern that they be safe for vacationing Californias as well as the permanent residents.

Objective

To search for, assemble, and disseminate new and existing knowledge, technology, and skills to prevent, control and minimize the incidence, causes, and effects of disease, reduce the extent and duration of illness and the number of deaths, and to improve the quality of life through the promotion of positive health.

Authority

Health and Safety Code Sections 200–211.5, 217, 280, 290, 295, 300, 310, 350, 417, 418, 420, 428, 429.30, 429.60, 1157, 1481.2, 1760, 1761, 3000–3125, 3180–3199, 3220–3229, 3279–3356, 3380–3387, 3400–3482; Health and Education Code Section 16728: California Administrative Code, Title 18: Subchapter 5. Section 1104(f); Government Code Section 53114.1: Welfare and Institutions Code Section 10053.2 and 10053.3; Vehicle Code Sections 12522, 2512, 21714; Government Code Section 53114.1.

General Description

Preventive health care, not crisis health care, can significantly reduce the high costs in today's health care delivery system. In a preventive program the public is educated to care for its health and to recognize problems at an early stage of development while they are still manageable by less costly measures. When a health problem reaches the crisis stage, it must be treated by highly paid specialists with expensive equipment and costly facilities.

This program provides services through the following elements: family health services, infectious disease, emergency medical services, and contract counties health services.

The family health services element provides services through five components: (a) the dental health component evaluates the state's dental health needs, promotes and develops preventive programs in schools and industry, and evaluates their cost effectiveness; (b) the maternal and child health component assists California mothers and their children in achieving good health and assists those most in need to obtain adequate health care services by encouraging health agencies to provide clinic health services funded through department awarded contracts and grants; (c) the target populations health component provides technical assistance and funds to promote health services among the rural poor, American Indian, and the aged; (d) the chronic diseases control component provides technical assistance in planning, developing and operating local health programs in cancer control, cardiovascular disease and kidney disease control areas; (e) the epidemiology component maintains continuing surveillance over maternal and infant mortality, fertility, abortion practices, factors in the environment or in population groups which may be contributing to morbidity and mortality, and in addition carries out studies directed at determining the relationship between the various types of cancer and environmental and cultural influences on the prevalence of the disease. The infectious disease element provides services through two components: (a) the communicable disease control component responsible for the surveillance, investigation and control of over 75 different infectious diseases which occur in California. Staff also advice, assist and support local disease control activities; (b) the venereal disease control component plans, mobilizes, coordinates and administers state and federal programs in venereal disease control in the areas of casefinding and disease control in the

DEPARTMENT OF HEALTH—Continued

Health Protection Systems—Continued

IX. PREVENTIVE MEDICAL SERVICES PROGRAM—Continued

areas of casefinding and prevention, screening and control, public and professional education, and community mobilization. The emergency medical services element is responsible for developing coordinated emergency medical services systems to provide uniform quality, adequate accessibility, and improved response to emergencies throughout the state. It is also responsible for preparing and maintaining the medical annex to the state emergency plan. The contract counties health services element provides basic public health services to counties under contract with the department. Under special administrative and fisc arrangements these services are provided to 15 cou ties of less than 40,000 population.

The program promotes close cooperation and mutu assistance with many voluntary health organizatio and elements of the private health community, a propriate elements of the Department of Health, Ed cation, and Welfare, other federal agencies and loc official and nonofficial public health agencies in carr ing out its many responsibilities.

A. Family Health Services

Need

The health of California's citizens require that special groups of the population and selected disease entities be singled out for intensive preventive programs. Population groups at special risk include mothers, infants and children, the aged, and certain minorities, Indians or inhabitants of sparsely populated areas who have low incomes. By directing special health service to these groups, disease and disability can be prevented.

Heart disease, stroke, cancer, kidney disease, arthritis and others all cause their share of disability and death. In addition, individuals with those diseases require expensive medical care and are frequently unemployable. The result is hardship for the individual, his family and society. Judiciously applied measures can prevent or ameliorate the effects of chronic disease.

Objective

The objectives of this element are: (1) To assist local agencies in developing and maintaining health programs to prevent or ameliorate the effects of disease and injury on the total population and in various target groups; (2) To measure the effects of various conditions in the population so that successful disease control activities can be applied with the maximum efficiency.

Description

The family health services element is composed of components which are responsible for organized programs of health services for specific groups of the population with the objectives of safeguarding health and preventing and controlling the effects of disease. It accomplishes its objectives by working with local agencies to assist in the establishment of programs, subvention of local activities with state or federal funds, setting standards for services and monitoring the quality of services. In addition, epidemiologic activities are carried out to identify population groups at risk and elucidate any casual relationship between factors in the environment and the outbreaks or continued prevalence of morbidity and mortality in the population in order to obtain the maximum benefit from disease control activities.

1. Dental Health

The dental health staff evaluate the state's dent health needs; promote the development of preventi programs in schools and industry and evaluate the cost effectiveness; provide public and profession education directed toward prevention of dental di ease and the proper utilization of existing resource provide direction and guidance for prevention pr grams in the other state departments and agencie develop and promote the establishment of new or in proved programs of prevention aimed at reducing tl cost of care; administer the state's topical fluori program for schoolchildren; provide consultation an workshops for personnel in local programs; and pr vide consultation to other programs and agencies o dental subjects.

2. Maternal and Child Health

This component assists California children an their mothers in achieving good health, developmenta potential and avoidance of disabilities that can occu during critical life periods, which could also produc a disability in later years. The component assists th economically, geographically and culturally deprive to obtain adequate health care services. Public an private agencies are encouraged to provide direc health services to mothers and children and receiv funds for their programs through this unit. The com ponent provides technical assistance to local agencie in program development and maintenance. In th provision of funds to local agencies, contract agree ments specify standards to be maintained and th contractors are monitored for performance by th staff of the component. Such efforts have a great ef fect in improving and maintaining the quality o services rendered. The unit has three activities:

(a) *Maternal Health and Family Planning*

These activities include maternal death surveillance education of the public, funding of clinical service through local health service agencies, evaluation o maternity and infant care projects, evaluation of th experience under the California abortion law an studies to promote better prenatal nutrition practices Coordination and assistance to over 100 local famil planning projects is provided to allow as many wome of childbearing age as possible to plan their preg

nancies for optimal health of mother, child and family.

(b) *Infant Health*

Activities include promotion; improvement and consolidation and better utilization of newborn intensive care units; development of transportation systems to bring sick infants safely and quickly to these specialty units; special studies to develop methods of preventing premature delivery; research in the prevention of infant health problems resulting from blood type (Rh differences), maternal, rubella infections and metabolic problems; and wide distribution of information on newborn screening procedures. As a result of these activities, the overall infant death rate is declining.

(c) *Children and Youth*

Activities include preschool work directed to the development and implementation of health aspects of education and child care programs, including hearing and vision screening. well-child clinics and immunization programs, and investigation of significant special problems, such as sickle cell anemia. School age activities include hearing testing, health education and coordination with the State Department of Education and exploration of new sources of allied health manpower, such as the extended role of the nurse in pediatrics. Youth and young adult activities include counseling teenagers and the funding of direct service programs to very young mothers.

3. Target Populations

This component provides technical assistance and funds to promote health services for various groups of the population who have been shown to be at greater risk of disability due to diseases of all types. Included in this component are activities for rural health, Indian health and aged health.

(a) *Rural Health*

Activities are directed toward the 9 percent of the population residing in rural areas. This population has a slightly higher proportion of individuals over 16 years of age and under 18 years of age than is true for the state, as well as a greater number of individuals living at incomes below poverty level than is true for the state as a whole. The three groups of the rural population are considered to be at special risk and in need of organized services. This includes the migrant farm worker, the older population and the individuals who live at the lower income levels. These groups have special needs because of the distances that have to be traveled for health care services and the fact that there is a lack of adequate services in many of the rural areas of California.

(b) *Indian Health*

Activities are directed to the special needs of the Indian population of California. While a proportion of this population lives in rural areas, the majority are now in urban and metropolitan areas and are unable to take advantage of the services offered by the health delivery system without special assistance.

This component is engaged in measuring the need for services in the low income population of rural areas, generally, and in developing methods of uniform distribution of health services to this particular group.

4. Chronic Disease Control

This component provides technical assistance in planning, developing and operating local adult health programs; participates in departmental evaluation of local proposals for the use of subvention contracts and project monies; processes the development of new or improved and less costly methods of delivering health care; insures that the quality of care provided by health services meets departmental standards and monitors subvention funds and contracts; and promotes the better utilization of medical, paramedic and allied manpower through training, demonstration and expermentation. In addition, the work of the component includes specific programs in cancer control, cardiovascular disease and kidney disease control areas.

5. Epidemiology

The epidemiology component maintains continuing surveillance over materials and infant mortality, fertility, abortion practices, family formation and dissolution and analyzes factors in the environment or in population groups which may be contributing to morbidity and morality. The availability of statewide birth and death records and the use of the computer provide for obtaining information on a current basis and for using that information to determine appropriate control measures. The data obtained is used for comprehensive health planning in this field.

One part of epidemiology component is the resource for cancer epidemiology which carries out studies directed at determining the relationship between the various types of cancer and environmental and cultural influences on the prevalence of that disease. It offers the opportunity for the collection of collateral data from laboratory studies of viral, genetic and psychologic nature in the search for clues to the causes of cancer and for relating these clues to the population groups involved. The objective of the resource for cancer epidemiology is to identify points at which cancer control measures may be effectively applied. It includes the California Tumor Registry which, over a span of 25 years, has collected information concerning over 400,000 cases of cancer in California. It maintains a cancer incidence reporting system based on the five bay area counties and measures whether or not the incidence of cancer is increasing or decreasing.

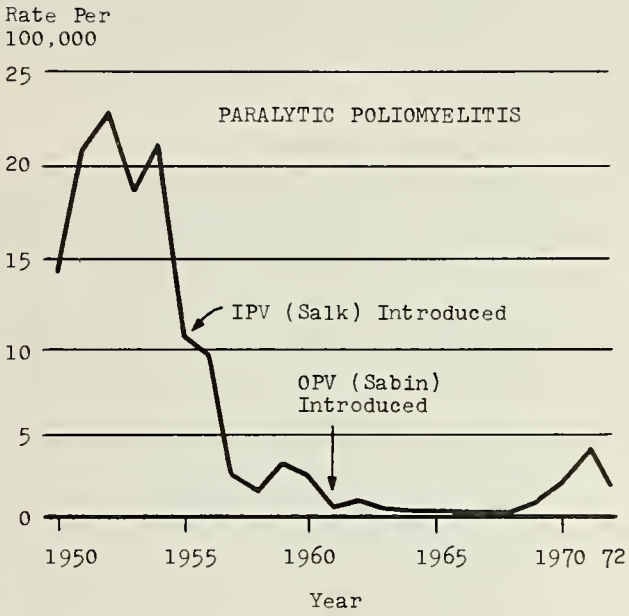
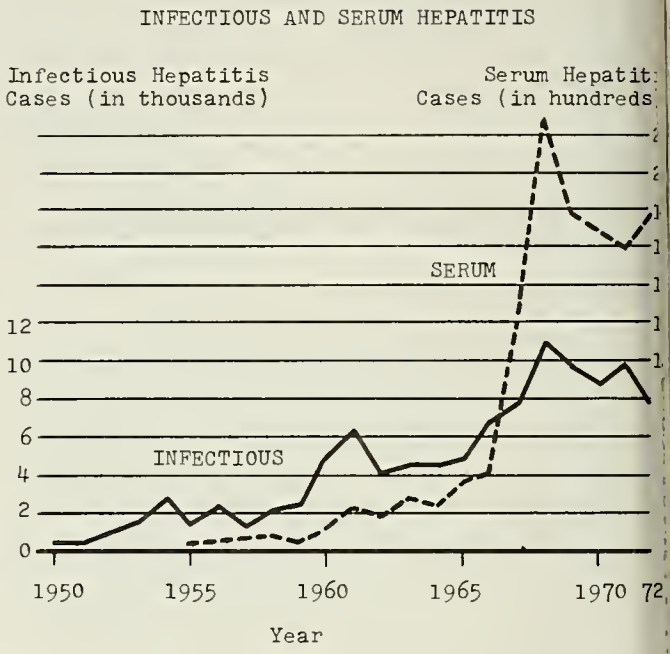
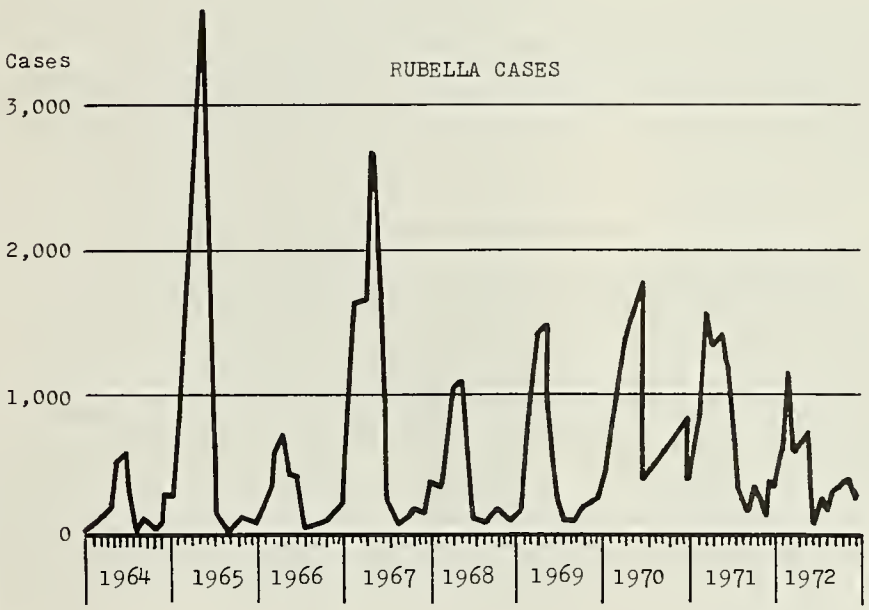
IX. PREVENTIVE MEDICAL SERVICES PROGRAM—Continued

A. Family Health Services—Continued

SOME COMMUNICABLE DISEASES IN CALIFORNIA
ARE DECREASING WHILE OTHERS ARE INCREASING







Combined federal and state funds are being used in an intensive statewide immunization campaign to prevent rubella and the resulting congenital malformations which are now the fourth leading cause of death in children aged 1-14.

DEPARTMENT OF HEALTH—Continued

Health Protection Systems—Continued

IX. PREVENTIVE MEDICAL SERVICES PROGRAM—Continued

B. Infectious Disease

Need

Infectious diseases affect every Californian and are a major cause of time lost from work, school, and play. More than 180,000 cases are reported annually, yet those reported constitute only a small fraction of illnesses experienced. Deaths in California from infectious diseases number over 9,000 each year.

While some infectious diseases such as poliomyelitis, tetanus, and diptheria, are well controlled, continuing surveillance and application of proven control measures are necessary to prevent resurgence of these diseases. For other infectious diseases such as mumps, rubella, influenza and mosquito-borne encephalitis, effective control measures are available, but a major need exists to extend their application and to refine control programs to reach susceptible and unprotected segments of the population. While no immunization is yet available for either gonorrhea or syphilis, effective and rapid treatment is available. It is estimated that there may be as many as one-half million cases of venereal diseases in California every year.

Effective control measures for many infectious diseases such as the common cold and hepatitis are not currently available. For these diseases a need exists to monitor their occurrence and further define causative agents and factors as the basis for developing controls, and for a rational application and evaluation of control efforts.

Objective

The objective of this element is to identify and define the occurrence of infectious diseases in California and to direct efforts to prevent or minimize their harmful effects.

General Description

The infectious disease control activity is responsible for the surveillance, investigation, and control of over 75 different communicable diseases which occur in California including some 50 diseases for which reporting or control measures are stipulated by law or regulation.

The incidence of many communicable diseases varies sharply, often unpredictably, from year to year. The activity, therefore, must be able to alter priorities and shift efforts rapidly to meet emerging disease problems. Since infectious disease control activities are implemented in large measure by local health departments, program staff work closely with local personnel to advise, assist, and support local disease control activities—and foster cooperation with other health and medical agencies and individual physicians.

Infectious disease control is highly dependent on laboratory services and support provided by the department's microbial diseases and viral and rickettsial disease laboratories and by local health laboratories. Major activities include:

(a) *Surveillance of Communicable Disease Incidence*

Reports of infectious disease occurrence throughout the state are compiled and analyzed for dissemination to physicians and local health departments to describe trends in the epidemiology of these diseases and to aid in the development and direction of communicable disease control programs. Special intensive surveillance systems are in effect for such diseases as influenza, measles, rubella, tuberculosis, and mosquito-borne viral encephalitis which includes Venezuelan equine encephalitis.

(b) *Infectious Disease Investigation and Consultation*

State epidemiologists experienced in infectious disease control have to be always available to investigate and to help control unusual infectious disease situations and large-scale outbreaks which can potentially affect thousands of persons. In addition, since many infectious diseases are either no longer present in California or occur in very small numbers, program staff need to provide expert information on the diagnosis and management of these infectious disease problems.

(c) *Immunization Programs*

Continuing surveillance will be carried out to identify cases of diseases preventable by vaccines in order to pinpoint deficiencies in immunization programs. A major effort is directed to planning, assisting and implementing rubella immunizations as well as recommending necessary ancillary and followup services for other immunizing agents.

(d) *Tuberculosis Control*

As thousands of new cases still occur every year in California, continuing efforts are directed at developing and promoting more effective early casefinding methods; providing uninterrupted treatment of cases; and prevention of disease by close follow-up of case contacts and prophylactic treatment of those at high risk. Component staff members administer the state subvention to counties for hospital care of tuberculosis patients and provide consultation to local health departments on their tuberculosis programs.

IX. PREVENTIVE MEDICAL SERVICES PROGRAM—Continued

B. Infectious Disease—Continued

(e) *Venereal Disease Control*

The efforts of this component are directed toward the elimination of the reservoir of locally acquired diseases and to stop the spread of these diseases acquired by Californians outside the state. Reported cases of venereal diseases are interviewed for their contacts who then are brought to examination and treatment. Cultures for gonorrhea are provided for asymptomatic females of child-bearing age as part of routine pelvic examinations given for reasons other than venereal disease. Education programs are implemented in schools, community, and professional groups to make the public aware of the venereal diseases as to their causes, treatment, and prevention.

Output	1972–73	1973–74	1974–75
Communicable Disease Control			
Infectious diseases reported —summary data only	198,000	200,000	200,000
Infectious diseases reported —individual case data	38,000	40,000	40,000
Technical consultation (letter, telephone)	2,000	2,000	2,000
Number of doses of vaccine provided	1,297,000	760,000	760,000
Number of laboratory reports and death reports reviewed	6,000	6,000	6,000
Number of epidemiologic reports distributed	100	100	100
Number of field investigations performed	60	60	60

Cases interviewed	45,170	60,000	60,000
Contacts examined	25,847	30,000	30,000
New cases identified			
Syphilis	1,395	1,500	1,500
Gonorrhea	7,861	9,000	9,000

C. Emergency Medical Services

Need

Nationally, each year more than 52 million U.S. citizens are injured, over 100,000 subsequently die, over 400,000 suffer lasting disability; at a cost of nearly three billion dollars in medical fees and hospital expenses, and seven billion dollars in lost wages. California carries its proportionate share of this tragic burden. Approximately 5,000,000 people in California, because of unforeseen accidents or illness, will use emergency medical services this year. About one-fourth of California's geographic area is over 30 minutes from the nearest ground ambulance and some areas lack adequate 24 hour emergency medical services. Hospital facilities and professional staff available for the provision of emergency medical care vary greatly in scope and quality, and the public is not always directed to the most appropriate facility.

Objective

To ensure the establishment of a statewide emergency medical service system that will reduce the response time to the scene of an emergency and provide readily available professional care services of uniform high quality, by the upgrading of emergency personnel, facilities and equipment, and the organizing of areawide response systems.

General Description

Emergency medical services are those services required in the event of an unforeseen illness or accident occurring to persons outside of a hospital and for whom it is necessary to provide prompt evaluation, transportation and care. Such services include identification of the incident, communications with ambulance and emergency department resources, the provision of first aid, transportation of the ill or injured, and diagnosis and treatment in the emergency room. Death and disability can be prevented when well-planned, comprehensive emergency medical services that are capable of coping with all types and magnitudes of medical and health emergencies, are available throughout the state.

Improvement of patient care services is dependent upon the upgrading of skills and knowledge of all levels of emergency personnel. Training standards for ambulance personnel, public safety personnel, nurses and physicians are being established. Training programs must be continuously evaluated to ensure their effectiveness in preparing health professionals and paraprofessionals to deliver quality emergency medical care to citizens throughout the state. The department, in cooperation with local jurisdictions, is committed to planning, coordination and evaluation of statewide emergency medical services. Also, in cooperation with the state's Office of Emergency Services, other state and federal agencies, the department is participating in a program to ensure that disaster planning and response will be in conformity with California's program for day-to-day emergency medical care and service systems. Emergency medical supplies and equipment such as packaged disaster hospitals and first aid stations assigned to local jurisdictions and custodians are monitored and inspected. In order to assist local governments in maintaining medical disaster readiness, participation with them in disaster training exercises is required.

Health Protection Systems—Continued

IX. PREVENTIVE MEDICAL SERVICES PROGRAM—Continued

D. Contract Counties Health Services

Need

Fifteen California counties with less than 40,000 population require special administrative and fiscal arrangements to provide minimum basic public health services. These small counties have many inherent geographic, demographic and economic barriers, and a scarcity of health resources, which hinder the maintenance and operation of successful full-time health departments. Because these counties are major recreational areas, they must be safe for vacationers as well as the permanent residents.

Objectives

To plan, organize, equip and operate in cooperation with each county's board of supervisors, a preventive environmental and personal health and disease control program to those counties which enter into contracts with the department. To assure the development of programs to meet community needs within legal requirements for state and federal funding.

General Description

The state function is to provide minimal basic pu lic health services to counties that enter into contrac with the department. The scope of these services defined in Section 1276 (a) through (k), Title 17, the California Administrative Code. These services a provided by public health nurses and sanitarians wh are required to reside in the contracting counties. Pr fessional supervision and coordination are provide by the department. A local health officer (part-tim and county-appointed) is responsible for the day-t day activities of the local staff and serves as the leg health authority in each county. Thus, local healt services are provided in close cooperation with count government and program emphasis can vary som what between counties in accordance with local need facilities and interests.

X. SOCIAL SERVICES PROGRAM

The basic mission of the Department of Health's Social Services Program is to provide timely and appropriate services to the needy, aged, blind, or disabled individuals; families with dependent children; and children in need of protection against neglect, abuse, or exploitation in accord with federal and state regulations to help them achieve self-support or self-care and to strengthen family life; and to assure the delivery of appropriate adoption services through agencies licensed by the state and certain state-administered programs.

X. SOCIAL SERVICES PROGRAM—Continued

Need

Problems derived from poverty, unemployment, advanced age, disability, and family disruption make two million persons dependent on public assistance. In the absence of compensating personal and private resources, public social services are essential to these individuals and families regularly or episodically to enable them to cope with hazards of economic deprivation, isolation, neglect, abuse, exploitation, illness, chronic unemployment, or incapacity to work.

Objectives

Programs are directed to restoration of families and individuals to self-support, independent living, competence in management of family and self; protection of children, handicapped, and elderly public assistance recipients and persons otherwise unable to secure basic services.

Authority

Social Security Act Titles I, IV-A and B, IX, X, XIV, XVI, XIX.
Federal Register Title 45, Parts 220–222.
Welfare and Institutions Code Sections 600, 10000–10965, 11000–18909.
Health and Safety Code Sections 270, 1310–1347.
Civil Code Sections 221–239.
California Administrative Code, Title 22, Division 2, Chapter 3.
U.S. PL 89–236, 92–603.
State Welfare Regulations, Divisions 30 and 40.

General Description

Through functions of three elements, services management, services operations, and adoption services, the social services program assures delivery of timely and appropriate services to persons dependent on public welfare and to dependent children who need a permanent home.

In the main, the program functions as a state supervised/county administered services delivery system. Counties provide services directly to clients, or through contract, purchase the services provided to clients. Certain adoption services are provided directly by state staff of the social services program. Staff of other departments provide services through interagency agreements.

To carry out its responsibilities, the social services program develops, promulgates, and enforces program regulations and standards; develops the use of services management information; provides program consultation to service agents and monitors programs. Through these mechanisms, the program supervises both direct state services, contract service agents, and county services programs and provides an accounting for program activities.

DEPARTMENT OF HEALTH—Continued

Health Protection Systems—Continued

X. SOCIAL SERVICES PROGRAM—Continued

A. Services Management

Need

The social services program in the 58 county welfare departments, several state agencies, and numerous private vendor agencies, which aim to help dependent and disadvantaged families and individuals achieve greater self-support or self-sufficiency, have become enormously complex and expensive. The state has a need on its own behalf, and a responsibility to the federal government which supplies most of the funding, to develop an overall plan for the most effective utilization of social service funds and resources, and to know exactly how and with what effect funds are being spent for social services.

Objectives

The goals of this element are: (1) to provide systems and controls which make possible effective management by the state of the social service delivery systems in California; (2) to safeguard and assure proper utilization of state and federal funds expended in these programs; in terms of maximum efficiency and maximum effectiveness; (3) to insure that the direction of all social service delivery systems is toward helping dependent persons become more self-supporting or self-sufficient, as appropriate; (4) to establish and maintain a current data base which accurately reflects what services are given to whom, for what purposes, in what quantity, at what costs and with what results.

General Description

Services management is a blending of social services and other technical staff charged with the responsibility to plan, develop, and maintain the basic framework, planning and controls under which social services are to be provided.

The operation of this element will be realized by (1) finalizing the design and implementation of a case information and cost reporting system accounting for all state, county and private social services provided through the use of social services funds; (2) maintaining and implementing purchase of services' contracting guidelines to be utilized by all services agencies and monitoring these contracts; (3) developing and negotiating contracts with other state agencies providing social services; (4) developing a system for monitoring county welfare departments and contracting state agencies' compliance with contractual terms; (5) administering the social services projects program; and (6) developing a planned welfare response in the event of natural or wartime disaster.

Output	1973–74	1974–75
1. Performance evaluation	–	–
Counties	58	58
Subcontractors	750	750
Primary contractors	17	17
2. Management of state and county service delivery pilot projects	14	14
3. Analysis and recommendations related to all state and federal legislation related to social service funding	20	15
4. Negotiate and develop contracts for social service purchases and sales	40	20
5. Provide liaison between contractors and departmental program and operational units and attend liaison meetings	126	126

B. Services Operations

Need

Public assistance recipients and persons formerly or potentially in need of welfare assistance require a variety of social services: to restore them to self-support or to sustain their capacities for self-maintenance in their own homes or with substitute care; to protect them against deprivations of neglect, abuse, or exploitation, thus avoiding the increased public burden of providing more costly modes of care and rehabilitation which follow if people are allowed to experience more serious debilitation, severe neglect and abuse, illness, or extended and deepened dependency.

Objectives

To assure that needy and dependent adults and children receive authorized social services through the public welfare program; to help county welfare departments and other agents to provide the services in a timely, efficient, and effective manner so that the period or degree of dependency is minimal and the capacity for self-support or caring for oneself is effectively enhanced.

General Description

Activities within the services operations element include: child and adult protection and out-of-home

DEPARTMENT OF HEALTH—Continued

Health Protection Systems—Continued

X. SOCIAL SERVICES PROGRAM—Continued

B. Services Operations—Continued

services; homemaker and chore services; specialized child protective services guarding against neglect and abuse; money management; services to assure access to necessary medical care; services emphasizing the prevention of institutionalization; use of volunteers and case aides in delivery of services; services to assist in securing employment or training for employment, day care to enable parents to secure training and employment and for children with special needs, and family planning services; Cuban refugee and repatriated American programs.

The delivery of services is facilitated by the following functions: Participation in the development of policy, regulations, procedures, administrative directives required for compliance with federal and state laws to meet the welfare-related needs of current, former, and potential recipients; onsite visi for program review and consultation; the use of ma agement data to measure program operation again program standards and to assist making program a justments based on findings; expeditious coordinatic between the various state agencies to assure effecti and orderly delivery of services and to avoid ove lapping functions; analysis of legislative proposa relative to program and cost impact; assessment program components of county plans and state an county contracts for delivery of services.

Output	1973–74	1974–7
Program consultation to counties	7,260	7,9
Program evaluation visits to counties	247	3
Coordination of state/county training program	75	
Contract analysis	750	7

C. Adoptions Services

Need

Children permanently separated from their natural parents and family require legal and social services to safeguard their well-being and to assure appropriate planning. Many of these children can benefit from adoption planning which provides the children with security and care in a home of their own, and reduces the need for long-term foster care.

Objectives

To bring together, under circumstances which protect the interests of all concerned, children needing permanent homes and people desiring to adopt; to safeguard children when adoptions are made through private arrangements; to protect the legal and social interests of children, natural parents, and adopting parents; and to provide a central resource for information and control of all California adoptions.

General Description

The department establishes program standards and regulations governing licensed adoption agencies; reimburses counties for the cost of establishing and op erating public adoption agencies; operates one re linquishment agency (covering five counties); di rectly administers the intercounty adoption program directly or through public agencies studies all inde pendent adoption placements and reports to the court and operates a mandatory interagency exchange pro gram to bring together children and families from al parts of the state. All infant release forms from hos pitals and all relinquishments for adoption are re viewed by state staff to assure legality; all petition to adopt (independent and stepparent) clear through the department for assignment to the proper agency and basic records on all adoptions in California are maintained.

Output	1973–74	1974–75
Total Children Adopted:		
Relinquished	3,480	3,480
Independent adoption court reports completed	2,160	2,160
Intercountry adoptions	105	115
Children under study or supervision	6,000	6,000

Health Quality Systems

All health care delivered by or through the department whether privately or publicly funded, must be adequate in amount, properly planned, and delivered at reasonable cost. All activities within the Health Quality Systems are geared to assuring the best quality of care for all segments of the population.

Five programs comprise the Health Quality Systems;

1. Licensing and Certification
2. Comprehensive Health Planning
3. Surveillance
4. Standards, Evaluation, and Research
5. Disability Evaluation

These programs are designed to teach providers what quality care is and how to maintain it. Health care providers and related community care services are licensed, and those participating in publicly funded programs are certified. Inspection of facilities, compliance audits of providers and community care services, and investigations are conducted.

Under contract with the Social Security Administration, a disability evaluation program for applicants for social security disability insurance and supplemental security income.

DEPARTMENT OF HEALTH—Continued

Health Quality Systems—Continued

XI. LICENSING AND CERTIFICATION PROGRAM

The licensing and certification program enforces standards for structural and seismic safety in health facilities and for quality of care in health and community care facilities.

Need

Buildings housing health and community care facilities should be designed for maximum efficiency of operation, and built to provide structural safety. Facilities should be monitored periodically to assure that standards of health and safety are maintained, and that substandard areas of care are discovered and corrected.

Objectives

(1) To assure that all plans for new or remodeled health facilities meet high structural standards, including seismic safety standards for all health facilities. (2) To promote the development of needed health facilities. (3) To bring all health and community care facilities into full compliance with licensing standards. (4) To assure that the care provided meets the standards and the needs of the community. (5) To encourage the improvement of care and development of new methods.

Authority

Health and Safety Code, Chapters 1, 3, and 4 of Part 1 of, and Part 1.5 of, Division 1; Chapters 1, 2, 2.3, 2.4, 3, and 8 of Division 2, and Chapter 1, of Division 12.5.

Welfare and Institutions Code, Article 3, of Chapter 7, of Part 3, of Division 9.

Insurance Code, Chapter 11A, of Part 2, of Division 2.

California Administrative Code, Titles 17, 22, and 24.

Federal Social Security Act, Titles XVIII and XIX.

Federal Public Health Service Act, Title VI.

Federal Housing Act, Title II.

General Description

The Licensing and Certification Program activities are performed by three major elements:

(1) The Facilities Construction element assures that health facilities meet structural and seismic safety standards, and promotes the development of these facilities through: review and approval of health facility plans and specifications for new construction and remodeling; inspection of construction phases to assure conformity to plans and specifications; review and inspection of structures to assure conformity with seismic safety standards; management of the Hill-Burton construction financing program and state and federal mortgage insurance programs; consultation with interested parties concerning the construction of health facilities; approval of construction for federally financed health facility projects; and processing of applications for HUD and state construction loan insurance programs.

(2) The Facilities Licensing element works to bring all health and community care facilities into full compliance through: review and approval of applications for licensure and renewal for health and community care facilities; review and approval of participation agreements for licensed facilities in Medicare and Medi-Cal; periodic unannounced onsite inspections of facilities to assure compliance with established standards and agreements; accreditation of county welfare departments to license community care facilities and to conduct quality control inspections; investigation of complaints and allegations of noncompliance; and remedial action to assure conformity with established standards and procedures.

DEPARTMENT OF HEALTH—Continued

Health Quality Systems—Continued

XI. LICENSING AND CERTIFICATION PROGRAM—Continued

(3) The Services Approval element assures that the care provided meets prescribed standards and that upgrading of care and development of new methods of care are encouraged through: approval of special services in licensed facilities to meet with community needs; approval of services for participation in and reimbursement by publicly funded programs; consultation with health and community care facilities staff to upgrade patient and resident care and evaluation; development and testing of new and improved methods for providing health care and community care.

A. Facilities Construction

Need

Provision of high quality at the lowest cost requires an adequate number of facilities that are efficient and structurally safe. Modernization of old and inefficient health facilities, and construction of outpatient facilities can reduce the need for inpatient service.

Objectives

(1) To help construct, modernize, replace, and expand health facilities where necessary. (2) To provide financial assistance for construction of health facilities as needed. (3) To assist planning agencies in control of health facility construction and to reduce unnecessary construction. (4) To insure that health facility construction is safe and is functionally adequate. (5) To protect private property against unnecessary hospital expansion. (6) To assure that facilities receiving financial assistance provide a reasonable volume of free services for those unable to pay.

General Description

Existing facilities are evaluated for structural stability, safety, adequacy, and functional capabilities, to determine if a need exists for modernization or replacement. Applications for financial assistance are solicited, evaluated, and reviewed in terms of need, cost estimates, and conformance with established criteria and program requirements. Approved projects are monitored for conformance with construction requirements and cash flow. The staff evaluates each report of action taken by voluntary health facility planning agencies for compliance with applicable statutes and regional health facilities for conformity with building and safety codes and seismic safety. Consultation is provided to architects and sponsors in the areas of cost effectiveness, design and lay out. Assistance is provided to state boards in developing appropriate regulations governing structural safety. The staff responds to requests for proceedings in the expansion of health facilities and the acquisition of private property. Proposals for expanding hospital functions are analyzed for need and public benefit.

Output	1973–74	1974–75
Architectural plans reviewed	2,620	3,000
Architectural plans approved	2,300	2,700
Grants-in-aid projects	26	30
Mortgage insurance committed	8	20
Financial evaluations for "free care"	150	300
Review of regional plans	12	12

B. Facilities Licensing

Need

Delivery of high quality, comprehensive services in health and community care facilities to ill, disabled, or otherwise dependent adults and children, with the most efficient, effective use of the state's resources.

Objectives

(1) To have enforceable standards for basic services provided by health and community care facilities, consistent with the cost to the provider and the rate the state is able to pay.

(2) To guarantee competent total services for all persons in any health or community care facility.

(3) To secure full compliance with state law and standards, adopted as regulations by the Department of Health for all health and community care facilities.

General Description

This element is organized into two primary components, policy, and field services. The policy component coordinates, develops and maintains enforceable regulations. Based on analyses of staff field reports, legislation, and problems identified small working groups of experts and representatives of concerned interests are established. The field services component conducts inspections and evaluations through onsite visits of all facilities throughout the state and evaluates county performance where contracts exist. These staff are located in district offices and make unannounced onsite facility visits four days a week, including visits after hours and on weekends to selected facilities. All facilities are evaluated for quality of care, and the poorest quality facilities are identified and administratively evaluated twice a month. Services approval consultants are referred to these facilities in order to secure significant improvement of their quality of care. The staff of this component also review for Medi-Cal care standards and compliance, and recommend certification.

DEPARTMENT OF HEALTH—Continued

Health Quality Systems—Continued

XI. LICENSING AND CERTIFICATION PROGRAM—Continued

C. Services Approval

Need

Health and community care facilities providing specialized services must adhere to acceptable practices and meet quality standards of care. Consultations are needed by providers to assure that quality care is provided to patients and residents of licensed facilities

Objectives

To upgrade quality of services in health facilities throughout the state by inspection, approval, and issuance of permits authorizing facilities to offer those services; to upgrade the quality of care in licensed facilities through requested consultation, and respond to complaints regarding quality and adequacy of care.

General Description

This element consists of two components, services approval, and consultation. Initial priority for the services approval component is the development of quality regulations. Staff work with provider groups, and other medical and nonmedical groups concerned with providing quality care. The emphasis is on securing outside input and commitments prior to regulatory hearings. Because of the constant advances and changes in specialized health services and community care programs, the monitoring and assessment of standards are an ongoing activity. The staff develops contracts with counties, groups and associations and is responsible for periodically monitoring the contracts. Teams of physicians, nurses, and other appropriate members inspect specialized health services and community care programs. Unannounced followup visits are planned to ensure the maintenance of quality care. These specialists work with facilities to assist them in correcting deficiencies.

The consultation component provides consultation, including postsurvey visits, participation in surveys, followup telephone calls and correspondence, and group consultations. The types of deficiencies most frequently noted by Department of Health surveyors are monitored and consultations initiated where appropriate. Facilities are advised of findings through timely followup visits and reports so that deficiencies can be corrected in time to renew their agreements. The response of the facility to consultation is closely monitored by documenting its efforts to correct existing deficiencies. The consultative process is complimented and assisted by use of background research from facilities licensing file sources. When possible, the survey teams and consultants coordinate their onsite visits.

XII. COMPREHENSIVE HEALTH PLANNING PROGRAM

The comprehensive health planning program conducts both long- and short-range planning concerned with the entire field of health. It develops and maintains models of health care system which produce quantitative estimates of personal health care service needs with requisite resources. It also provides surveillance, coordination, and program evaluation to the 12 areawide health planning agencies in the state. This program develops and updates functional health plans which relate to the overall state plan for health, and coordinates planning for health manpower development and departmental programs.

DEPARTMENT OF HEALTH—Continued

Health Quality Systems—Continued

XII. COMPREHENSIVE HEALTH PLANNING PROGRAM—Continued

A. Comprehensive Health Planning

Need

An inventory of needed health services equated with available resources to meet those needs is essential to plan and coordinate health programs. Ideally such studies should be ongoing in both the public and private sectors at all geographic levels: local, regional, state, and national. Problems include fragmented programs, unnecessary duplication, unmet health needs, constantly rising costs, and maldistribution, misappropriate utilization, or shortages of health manpower.

Objectives

To organize and maintain continuous, integrated, and meaningful health planning designed to assure adequate physical and environmental health services at the lowest cost consistent with community concerns and sound management practice.

Authority

Part 1.5 of the Health and Safety Code, Sections 437 through 438.5 and the designation of the State Department of Health by the Governor as the State Agency for Comprehensive Health Planning under Public Law 89-749 and the state agency for implementing Section 1122 of PL 92-603. Chapter 2.5, Health and Safety Code, Sections 429.65 through 429.67, Sections 429.70 through 429.80.

General Description

The program conducts both long- and short-range planning concerned with the entire field of health. The comprehensive health planning element carries out the mandates of the "partnership for health" act, conducting specialized analyses of the health care system, coordinating health planning on a statewide basis, and producing functional health plans for facilities and services. The manpower development section is concerned with the special planning activities concerned with all aspects of health manpower utilization, distribution, and supply.

The element is concerned with maintaining ar updating the California State Plan for Health. Tl State Plan for Health, approved by the Adviso Health Council, identifies major barriers to tl achievement of adequate physical health and enviro mental protection and suggests directions and mec anisms for overcoming these barriers. The plan al provides a foundation for statewide comprehensi health planning and serves as the framework f areawide health plans which deal with specific pro lems of the area. As a planning tool, the state pla provides information which can be used by publ and private agencies in allocating resources and d veloping programs in a rational manner. The eleme also develops and maintains functional health plar such as the California State Plan for Hospitals an Related Facilities, the Mental Health Facilities an Services Plan, and the Unified Statewide Health Car Facilities and Services Plan.

Part of the continuing program of comprehensiv health planning is to develop specific approaches b which accepted health planning recommendations i the state plan can be implemented. This requires in volvement of and coordination with public and pri vate providers of health services and with th consumers of such services. Models of the health car system are developed to produce quantitative esti mates of personal health care services needs and th resources necessary to provide them. These model form a basis for evaluating current health system and measuring the effect of change in technology, law finance, and populations upon the operations of en vironmental and personal health service systems.

This element is also charged with coordinating health planning on a statewide basis. The state office maintains a close working relationship with the area-wide comprehensive health planning agencies and provides technical assistance to, and program assessment of these organizations.

B. Manpower Development

The manpower development element develops experimental projects related to the number, type, and utilization of health personnel. From these projects and through interrelationships with health professional organizations, the section develops an action policy for the Department of Health.

Need

Provision for the health needs of the people of California requires health manpower to best maintain optimum health levels, increase potential for prevention of illness and heal and rehabilitate those stricken by injury and disease. Presently health manpower needs are

DEPARTMENT OF HEALTH—Continued

Health Quality Systems—Continued

XII. COMPREHENSIVE HEALTH PLANNING PROGRAM—Continued

B. Manpower Development—Continued

incompletely identified and cannot be accurately projected. Supply is uneven or maldistributed, recruitment and training programs have come about through inadequate and uncoordinated planning. Health manpower must be sufficient in numbers, efficiently and productively utilized and deployed, with a level of skill that will continue to improve the quality of health care and its availability for all Californians.

Objectives

Develop and advance a health manpower action policy and program for the department based on priorities and alternatives formulated in the State Plan for Health and designed to insure California health manpower sufficient in numbers, distribution, and proficiency.

General Description

In cooperation with the Comprehensive Health Planning Program, health manpower reports, surveys, compilations, and reference materials are collected, ordered, analyzed, interrelated, and continuously updated so as to provide available and useful information on health manpower needs, demand, supply, and utilization, currently operating and planned programs of health manpower development and education. Information gaps are identified and appropriate special studies are undertaken or arranged. Information is made available to other units of the department and to the general public. Utilizing information and counsel of appropriate professional and community organizations and agencies, standards and procedures for development, approval, monitoring, and evaluation of community projects for innovative training and use of health manpower throughout the state are planned and implemented. Site visits, conferences, and meetings are employed. Recommendations for departmental action, new legislation or modifications of existing laws and regulations are developed.

XIII. SURVEILLANCE PROGRAM

The Surveillance Program investigates alleged violation of laws or regulations within the Department of Health's areas of responsibility; determines the qualifications of medical providers; to participate in the Medi-Cal program; conducts medical reviews to evaluate the quality of care being rendered by various providers of medical services; and investigates fraud by both providers and beneficiaries in Medi-Cal.

PROGRAM REQUIREMENTS	72–73	73–74	74–75	1972–73	1973–74	1974–75
Totals, Surveillance Program	–	173.2	225.5	–	$3,124,437	$4,008,338

Program Elements:						
A. Investigation	–	125.2	159.5	–	2,255,844	2,833,895
B. Provider participation	–	22	29	–	396,803	517,076
C. Quality evaluation	–	26	37	–	471,790	657,367
D. Administration	–	(63)	(111)	–	(1,137,295)	(1,972,102)

Need

Health care is paid for by both private and public funds and provided by private and public agencies and facilities. However, the individual consumer has little or no control over the quality and cost of services delivered. This program provides a needed enforcement body to assure services meet standards of quality.

Objectives

(1) To eliminate fraud and abuse of the Medi-Cal program benefits. (2) To detect incompetence among providers under the Medi-Cal program.

Authority

Welfare and Institutions Code, Sections 14000–14184; California Administrative Code, Title 22, Sec-

DEPARTMENT OF HEALTH—Continued

Health Quality Systems—Continued

XIII. SURVEILLANCE PROGRAM—Continued

tions 51200–51215; Government Code, Section 11180; Business and Professions Code, Health and Safety Code, and Titles XVIII and XIX of the Federal Social Security Act.

General Description

The surveillance program focuses on alleged abuses or fraud in the Medi-Cal program by providers. This program also screens applications for participation in the Medi-Cal program to assure professional conduc It performs medical audits to insure that quality ca is provided by various health care providers. The audits are also part of the review performed wh negotiating and renewing prepaid health plan co tracts. The activities of the program are organiz into three elements: Investigation, Provider Partic pation, and Quality Evaluation.

A. Investigation

Need

The department maintains continuing surveillance over the programs it administers to assure that health services are provided, proper and reasonable. Through this surveillance activity and through communications from the public, the department learns of suspected fraud as well as allegations of violations to program regulations. Most frequently these violations involve beneficiaries who fraudulently apply for and receive health care services to which they are not entitled, or providers who bill and receive payment for services that were not rendered.

Objectives

(1) To eliminate the incidence of crime and abuse by providers and beneficiaries of programs administered by the department. (a) To identify specific violations and prosecute violators to preclude their further abuse through proper enforcement sanctions. (b) To publicize enforcement to deter potential violators from such practices. To identifying improper payments to instigate recovery and gain restitution of state funds. (2) To assure the integrity of prepaid health plan applicants and other contractors through background checks that provide management with appropriate data upon which to make awards.

General Description

The investigations element conducts investigations of allegations which involve possible violations of laws and regulations. This includes allegations of fraud or possible abuse of program benefits by providers of health or dependency care services, public or private, as well as allegations of incompetence against any individual licensed or certified to provide health c dependency care services. As allegations are receive they are assigned to one of six district offices throug out the state. The district office screens the complair to determine if it has jurisdiction; if appropriate th district supervisor declares the complaint to be a ca and assigns it to an investigtaor. The investigat gathers all pertinent facts concerning the subject an prepares a confidential report. Allegations substa tiated by investigation are referred to county distri attorneys, state attorney generals, federal attorney or to appropriate licensing boards for prosecution o other disciplinary action.

Output	1973–74	1974–
Cases Closed—Allegation Unsubstantiated:		
Beneficiary	1,021	1,072

Dollars of overpayment identified	$712,000	$712,000

B. Provider Participation

Need

Provisions of Title 22, California Administrative Code and Titles XVIII and XIX of the Social Security Act require that all providers of medical and related services meet specific standards for participation under the California Medical Assistance Program. Institutional providers must be certified and, in case of skilled nursing and intermediate care facilities, time-limited participation agreements are required.

DEPARTMENT OF HEALTH—Continued

Health Quality Systems—Continued

XIII. SURVEILLANCE PROGRAM—Continued

B. Provider Participation—Continued

Objective

To upgrade the quality of medical services rendered by providers, especially skilled nursing facilities, intermediate care facilities, hospitals, and outpatient rehabilitation centers currently participating under the Medi-Cal program, so that providers can be certified for annual participation agreements, rather than agreements for lesser periods.

General Description

This element certifies institutional providers participating in the Medi-Cal program. The activities of the element are accomplished through critical review of facility inspection reports, nursing quality care reports from medical-social review groups, life safety code inspection reports from the State Fire Marshal's staff, information from the State Board of Examiners of Nursing Home Administrators, and in liaison with other governmental and nongovernmental groups.

Output	1973–74	1974–75
Agreement Periods		
Certification of Skilled Nursing Facilities:		
12 Months	840	900
6 Months	300	240
Other	60	60
Certification of hospitals	360	400
Certification of rehabilitation centers	172	172

C. Quality Evaluation Section

Need

It is vital that the department assure the quality and adequacy of publicly funded health care services by conducting medical reviews of prepaid health plans under contract with the Medi-Cal program at least twice annually (as required by Section 51826, Title 22). It is also necessary to conduct medical reviews of health clinics proposed for inclusion in prepaid health plan contracts to assure their capacity to provide adequate health care services. Finally, it is important to identify providers of care who may be violating provisions of the Medi-Cal program relating to quality of care and fraudulant activities.

Objective

(1) To identify problems in the quality and adequacy of publicly funded health care services, including local mental health programs. (2) To obtain action by provider organizations, prepaid health plans, local mental health programs, and appropriate Department of Health sections to alleviate the problems.

General Description

The quality evaluation element provides professional staff support to assist other units of the department in the determination of the quality and propriety of health care which is paid from state funds. Development and utilization of peer review activities to improve the quality of publicly funded health care services are accomplished by direct, continuing work with the appropriate provider organizations. Periodic medical reviews of prepaid health plans are accomplished through the use of medical, dental, and pharmaceutical consultants and field representatives. Review of facilities (primarily clinics) proposed for inclusion in prepaid health plan contracts to assess capacity to provide adequate services is accomplished by field representatives under supervision of a physician with support by a dentist or pharmacist as required. Both functions require refinement of review criteria and procedures since no standards exist for clinic operations. Review of Medi-Cal program provider records at the Medi-Cal fiscal intermediaries for providers desiring to participate in prepaid health plans, and to identify potential cases of program overutilization or fraud, conducted by field representatives stationed at the fiscal intermediaries.

XIV. STANDARDS EVALUATION AND RESEARCH PROGRAM

The standards evaluation and research program coordinates, generates and proposes adoption of standards which specify the suitable quality, level, and quantity of services to be provided by facilities, group and individual providers of health and health-related care in California. The program provides manpower capability for immediate response to unique management needs, ranks program research needs, reviews grant proposals to assure relevance and priority, and recommends continuation of research and implementation of findings. The program also provides for assessment of the quality, effectiveness, and efficiency of the department's programs and services.

DEPARTMENT OF HEALTH—Continued

D. Administration	–	(57)	(62)	–	(1,306,517)	(1,358,922)

Need

Adequate quality standards for medical care must be developed for evaluation of existing programs or services, and to encourage the development of new and innovative approaches to the delivery of health care.

Objectives

(1) To develop a continuous, integrated and meaningful program that will search for new ways of meeting the health needs of all individuals. (2) To develop quality standards for existing programs. (3) To evaluate the effectiveness and efficiency of all programs.

Authority

Health and Safety Code, Sections 1250–1318, 1400–1439, 1500–1565.

Government Code, Sections 11, 371.

General Description

This program includes three elements: Standard Development, Outcome Measurement, and Proje Management and Research. The Standards Develo ment element acts as a clearinghouse for all standar currently being applied in the department and d velops standards for all facets of health care deliver tems. The Outcome Measurement element develop tests, and implements methods to be used in th evaluation of systems used in this delivery of healt care. The Project Management and Research eleme provides manpower to staff task forces and speci projects to accomplish management projects. This se tion also coordinates research activities being carrie out by the department.

A. Standards Development

Need

Before quality health services can be promoted on an organized statewide basis, quality must be identified, defined and standards established.

Objective

(1) To improve the quality of health services provided by organizing, coordinating, and establishing standards for health services. (2) To utilize, in these standards, economic and other incentives to encourage voluntary upgrading of health services.

General Description

This element's multidisciplinary professional per sonnel are organized into ad hoc task forces assigne to the development of standards for specific high pri ority health services. For example, aged in nursing homes, community care for mentally ill and develop mentally disabled, drug abuse treatment. The effec tiveness and productivity of the task forces are mul tiplied by utilizing part-time expert consultants and advisory panels of providers and consumers. The ele ment is also setting up a "clearinghouse" for all types of standards for health services.

DEPARTMENT OF HEALTH—Continued

Health Quality Systems—Continued

XIV. STANDARDS EVALUATION AND RESEARCH PROGRAM—Continued

B. Outcome Measurement

Need

Both taxpayers and recipients of health care services provided by or through the state have the right to expect that cost-effective methods are utilized. Better alternatives to operational programs may be identified, to change or redirect existing programs through new evaluative techniques and methodologies to assure the most responsive programs for the lowest cost.

Objective

(1) To develop methods for the evaluation of the effectiveness of the various state funded health care programs. (2) To apply these evaluative methods to ongoing programs.

General Description

In developing evaluation systems the Outcome Measurement element uses a variety of techniques to collect demographic and patient impairment data, observe existing programs, implement patient tracking systems, collect provider and service information, undertake peer review and management appraisal, and survey patients. The component utilizes the following indices in developing new evaluative techniques and methodologies: program objectives and standards; the level of accomplishments in fulfilling the objectives and standards; allocation of available resources; program efficiency and cost-effectiveness; and the quality of the services provided.

C. Project Management and Research

Need

Manpower capability is necessary for immediate response to unique management projects with minimum disruption to departmental operations. Health related research is vital for producing knowledge about (a) control and cure of disease and disorders, and (b) more effective ways to manage health resources. As funds and other resources are limited, priorities for research must be established to insure that the most essential research in support of departmental goals is implemented.

Objective

(1) To enable the department to appropriately respond to issues and problems during the year with minimum disruption of ongoing services. To minimize costly duplication of research effort. To assure continuity of department research policy by analysis and study of research completed and ongoing research and proposals for prospective research projects.

General Description

This element provides a multidisciplinary staff to organize, select and direct, or serve as a member of a team or task force assigned to accomplish management projects. The element has the capability of immediate response to unique management needs with minimum disruption of ongoing operations. It serves as a clearinghouse for health-related research conducted by or affiliated with the Department of Health. In this capacity, the element ranks research needs, reviews grant proposals to assure relevance and priority, evaluates progress and results of research efforts and makes recommendations regarding continuation of research and implementation of findings. Grant applications are promoted in under-served areas, and suitable projects are selected for funding from administrative grant support funds which are authorized for research purposes.

XV. DISABILITY EVALUATION PROGRAM

The disability determination program of the Department of Rehabilitation and the disability review function of the Department of Social Welfare were placed in the Department of Health on October 1, 1973. These functions are operated as a single program, which has responsibility for determination of whether or not an individual qualifies for either social security disability insurance or supplemental security income benefits.

DEPARTMENT OF HEALTH—Continued

Health Quality Systems—Continued

XV. DISABILITY EVALUATION PROGRAM—Continued

PROGRAM REQUIREMENTS	72–73	73–74	74–75	1972–73	1973–74	1974–75

Federal funds				–	*16,056.442*	*23,504,591*
Reimbursements:						
Federal				–	–	–
Other				–	–	–
Program Elements:						
A. Headquarters operations	–	13	13	–	165,346	235,046
B. Regional operations	–	1,054.2	1,054.2	–	16,369,250	23,269,545
C. Administration	–	(31)	(31)	–	(661,383)	(940,184)

Need

Many persons of employable age cannot work because of serious disability. Recent wage earners need a replacement of wages which is supplied by the disability provisions under social security disability insurance, Title II of the Social Security Act. Those who are not recent wage earners may receive supplemental security income benefits which, under Title XVI of the amended Social Security Act, replace the state welfare program for aid to the blind or aid to the disabled with a federal program.

Objective

To assess whether or not an individual is disabled and therefore entitled to receive either Social Security Disability Insurance Benefits or Supplemental Security Income Benefits. Upon determination of eligibility an individual is referred for rehabilitation services.

Authority

Social Security Act, as amended by Public Law 92-603 (1972).

General Description

The disability evaluation program of the Department of Rehabilitation and the disability review function of the Department of Social Welfare were placed in the Department of Health by AB 425 (Chapter 1002/73). All functions became the responsibility of the Department of Health on October 1, 1973. A single program entitled the Disability Evaluation Program assumed all functions related to disability determination or review.

Under contract with the Social Security Administration, the Disability Evaluation Program makes disability determinations on applications for benefits under Social Security Disability Insurance, Title II, or Supplemental Security Income Benefits, Title XVI. Disabled persons file claims for Social Security Insurance Benefits, Aid to the Blind or Aid to the Disabled at Social Security district offices. Federal claim representatives and services representatives interview applicants, gather basic information and forward the applications to Disability Evaluation offices. Teams made up of physicians and disability determination counselors adjudicate the claims. Approximately 18 percent of the applications for Social Security Disability Insurance will require the purchase of special medical examinations, whereas, about 36 percent of applications for Aid to the Disabled or Aid to the Blind may require the purchase of medical examinations from community physicians.

A return to work or an improvement in the disabled person's medical condition may result in a termination of benefits under either the Social Security Disability Insurance Program or the Supplemental Security Income Program. In the case of Aid to the Disabled and Aid to the Blind, earnings from employment may result in a reduction of benefits and if such earnings exceed a maximum monthly amount allowed, benefits may be suspended. If such substantial earnings continue for nine months, Supplemental Security Income benefits are ceased. In some cases, Social Security disability beneficiaries are permitted a trial work period during which they can continue receiving benefits in spite of earnings, provided their return to employment is not the result of an improvement in their medical condition. The physicians and disability determination counselors of the disability evaluation program determine whether benefits should be continued or terminated, whenever the issue arises. Most individuals allowed benefits under either program will be referred to the department's Rehabilitation of the Disabled program to be considered for vocational rehabilitation services.

Headquarters

To assure accurate and timely determinations of eligibility the program services applicants in five regional operations within the state. A headquarters staff, in Sacramento, coordinates the regional activities. Headquarters staff coordinates training, data processing, medical services, and general office procedures that effect the regions.

DEPARTMENT OF HEALTH—Continued

Health Quality Systems—Continued

XV. DISABILITY EVALUATION PROGRAM—Continued

Regional Operations

Regional operations are located in Sacramento, Fresno, Oakland, San Diego, and Los Angeles. Each region has two basic functions. The regions gather and evaluate information necessary to make elegibility determinations. In addition, a program analysis unit maintains the high standards and uniformity required.

The regional staff has the multidisciplinary skills necessary to gather, analyze, and make medical-legal determinations of an applicant's overall ability to engage in sustained, gainful employment. Medical, vocational, and personal information may be obtained from physicians, institutions, lawyers, other state, county, and federal agencies, as well as other interested parties. The program maintains a panel of independent physicians who perform consultative examinations as needed. Assessment of current functional capabilities can be obtained through independent workshop evaluations. Staff also has the responsibility of making appropriate referrals after an assessment of an applicant's potential for vocational rehabilitation services.

The program analysis units have the responsibility of maintaining quality, uniformity and integrity of state agency operations for the Social Security Administration. The units monitor day to day review of all operational and procedural aspects of claims processing through a sample review of cases. They gather, compile, analyze, and display data about case development practices, workload management, training, use of staff, and other pertinent operational procedures. Staff members analyze findings, clarify and interpret existing as well as new state and federal policies and procedures, and make written and oral recommendations to administration for improved operational techniques.

Health Administrative Systems

The health administrative system provides the state's health program with the centralized services required for logistic support and management control. The administrative services provided by this program include Financial Management Services and Personnel Management, Training, Computer and Statistical Collection Services.

XVI. ADMINISTRATION

PROGRAM REQUIREMENTS	72–73	73–74	74–75	1972–73	1973–74	1974–75

(undistributed)	–	–	–	–	$16,743,808	$22,369,786
Reimbursements:						
Federal				–	*13,256,759*	*18,717,761*
Other				–	*3,487,049*	*3,652,025*

Need

Effective analysis and allocation of manpower is prerequisite to implementing the health program. Current statistics must be maintained for determination of funds allocation. Information storage, retrieval, and records must accompany large management operations for efficiency. Management functions performed by these systems release program staff for full-time attention to their programs. Efficient fund management promotes compliance to legal authorities while permitting maximum program flexibility.

DEPARTMENT OF HEALTH—Continued

Health Administrative Systems—Continued

XVI. ADMINISTRATION—Continued

Objectives

(1) To plan, organize and control the disbursement of the public funds allocated to the department.

(2) To provide qualified personnel and consultation to all levels of the department.

(3) To explore and develop manpower resources and provide necessary training and education to program staff as well as to the staff in the local programs.

(4) To provide support to all programs within the department including management studies.

(5) Design and implementation of both data processing and manual systems.

(6) Statistical and collection services.

Authority

Chapter 4, Statutes of 1965, second extraordinary session. Article XXIV of the State Constitution, California Health and Safety Code Division 7, Part 1, Chapters 1–5 and Part 2, Chapter 1 and Division 9 Chapters 1–14. Welfare and Institutions Code, Sections 5717, 11004(F), 11150–11158, 14006, 14009, 14014, 14117, 10020 and 10024. Title XIX, Section 1902(a) (25) and (a) (30) California Probate Code, Sections 707.5(e) and 950(3).

Financial Management Services

Consists of four sections:

(1) Accounting Section provides for the orderly and systematic reporting and recording of the expenditures by the department.

(2) Budget Section prepares the department's budget for presentation to the Legislature and provides management with the necessary information for prudent and rational decisionmaking.

(3) Business Services Section provides the department with a centralized unit by which all business services, facilities planning and building management requirements are performed so that program managers are free to devote their full attention to their program goals. This section also provides facilities security and support services to the department's field locations.

(4) Fiscal Analysis and Accounting Systems Section manages and operates the Community Mental Health Cost Reporting/Data Collection System, the State Hospital Cost Reporting System and assists in solving accounting problems of the department.

Personnel and Training Services

Consists of three sections:

(1) General Personnel Services Section develops and directs the department personnel operations. This includes recruitment, placement, employee-employer relations, career opportunity development, affirmative action on ethnic balance and in addition manages the Health and Safety Program of the department .

(2) Manpower Development and Training Section provides continuous assessment of present and future needs of the health delivery system for new man power. Initiates and directs training and manpower development programs within the department as well as in the local communities.

(3) Office Services Section provides and maintains a centralized filing system, correspondence control internal and external mail service, reproduction services, messenger service and mailing lists, in addition to public information telephone service for the department.

Management Systems and Computer Services

Consists of four sections:

(1) Management Consultation Section provides consultation to solve administration problems, improve management procedures, install specific management tools or techniques, and assist with the installation of improved work methods and procedures.

(2) Systems Analysis Section provides expertise in systems design and implementation as well as continuing support for existing manual and computer-based systems.

(3) Data Processing Services Section develops and implements automated systems to meet the needs of specific programs, and provides data bases from which management information can be extracted and operates the computer program.

Statistics and Collection Services

Consists of four sections:

(1) Program Analysis and Statistics Section provides statistical support services to departmental administration and project staff by providing forecasts, developing health indicators, topical and standard reports, and technical staff assistance.

(2) Vital Statistics Section provides and maintains a statewide system for requisition and reporting of each birth, death, marriage and marriage dissolution occurring in California.

(3) Patients Benefits and Accounts Section maintains a billing and collection system to collect charges from all responsible sources for state hospitalization. Insures that each patient under the direct care of the department has his financial resources identified, protected and manged. Reviews each provider in community mental health services to assure that the uniform method of determining ability to pay and other reimbursement standards are being properly utilized to insure collection of maximum revenue in a uniform equitable and humane manner.

(4) Recovery Section is responsible for the collection due to the Medi-Cal program from providers, beneficiaries, and other sources such as beneficiary's estates, third party liability settlements where beneficiaries have been injured, audit settlements from institutions, and awards from court judgements.

DEPARTMENT OF HEALTH—Continued

Health Administrative Systems—Continued

DEPARTMENTAL ADMINISTRATION

The Director's Office

The departmental administration provides the state's health program with the leadership, direction, and supportive services necessary for effective use of the department's assigned resources to provide the highest quality health care. Overall responsibility resides with departmental administration for planning, coordinating, and implementing the goals of the department in conducting the health program.

Need

Effective leadership is essential to implement and give direction to health programs at all levels of government within the state. Complimentary to this task is the reception of consumer and provider testimony, necessitating an ongoing, working relationship with some 65 health advisory boards, the Legislature, and the public.

Objectives

(1) To identify the health needs of all Californians and develop programs to meet those needs, for protection of people and environment.

(2) To assure that adequate health care will be available to all Californians through both public and private health resources.

(3) To provide leadership and direction to the entire state health program.

(4) To coordinate and utilize the recommendations of health advisory boards and consultants.

(5) To maintain active communication with the Legislature, by conveying and receiving information on health related legislation.

(6) To keep the public informed of the goals and activities of the department.

(7) To provide skilled interpretation of the law as it relates to departmental operations.

Authority

California Health and Safety Code Section 101.

General Description

The director's office has overall responsibility for planning, coordinating, and implementing the goals of the department. These goals include the identification of the health needs of Californians, the development of programs to meet those needs, and the certainty that adequate health care will be available through both public and private health resources. Goals also include the protection of the general public health environment and an ongoing effort to promote a total environment that will contribute to human health and well-being.

The director's office avails itself of supportive Health Staff Services and the Office of Legal Affairs for assistance in specialized areas.

Health Staff Services

Health Staff Services maintain liaison between the director and health advisory boards, the Legislature, and the citizens of this state. Such intercommunication supplies current information enabling the state health program to respond to evolving, changing, or redirected health needs.

(1) *Office of Advisory Liaison*

Coordinates the efforts and impact of some 65 separate health advisory bodies, 24 of which are defined by statute, and an additional 160 consultants actively engaged in advising the department in matters of health services.

(2) *Office of Legislative Liaison*

Maintains an active, continuing working relationship with the Legislature by the communication and reception of data and ideas; by analysis of the bills affecting the department; and by personal contact with individual legislators and committees.

(3) *Office of Communications*

Disseminates information about department activities to the press, public, professionals, local agency officials, and employees, recognizing that control of California's major health problems requires the informed participation of its citizens. Fosters good public health attitudes and practices through direct interaction of health educators with community resources.

Office of Legal Affairs

The legal staff provides interpretation of the law as it affects both the planning and the day-to-day operations of the department, so that it operates within the constraints set by law. Its functions include giving legal advice to department officers and employees, working with the Attorney General on litigation involving the department, reviewing regulations, contracts, and legislation, and representing the department before state agencies. This office acts as attorney for the department in guardianship and conservatorship cases.

XVII. LEGISLATIVE MANDATES

PROGRAM REQUIREMENTS

	1972–73	1973–74	1974–75
Totals, Legislative Mandates	–	$392,900	$786,260
General Fund	–	*392,900*	*786,260*
Program Elements:			
A. Chapter 954/73 (X-rays)	–	9,900	20,000
B. Chapter 1061/73 (LPS)	–	383,000	766,260

1. General Description

Chapter 954, Statutes of 1973, attempts to insure that students giving X-rays are closely supervised by a licensed instructor or a licentiate of the healing arts by authorizing the Department of Health to give approval to licentiate of healing arts board to provide radiological technology on-the-job training.

Mandate

To have a radiation specialist, as defined, present in the same room when all but defined students in a school for radiological technologists administer diagnostic or therapeutic X-rays on a human being. This mandate impacts only upon two schools in the Los Angeles city school system and funds are provided on that assumption.

Fiscal Data

The unit: One hour of supervision by a radiation specialist.
Unit cost: $8.
Total cost: $20,000.

2. General Description

Chapter 1061, Statutes of 1973, revises provisions for review and submission of county Short-Doyle plans, makes changes to timing of submissions, adds language providing for certain pre-care and after-care services, provides that no expenditures reimbursed by the federal government shall be included in the Short-Doyle plan, provides that no administrative duties in local mental health services which serve a population in excess of 100,000 shall be carried out by a physician, psychiatrist, psychologist, or clinical social worker who is also performing in clinical program areas, and provides that the Department of Health shall submit a five-year plan for local mental health services by October 1 of each year.

Mandate

This mandate impacts only upon counties in the following manner:

(1) Include a quality control system, a placement directory and training program in each county Short-Doyle plan.

(2) Perform administrative and supportive functions in local mental health services with staff skilled in those functions.

Fiscal Data

The unit:

(1) (a) The county share of one month of service in compliance with Section 5661.5 (a), (b) or (c) by a local mental health agency employee.

(b) The county share of one month of expenses incurred through contracts let in compliance with Section 5661.5 of the Welfare and Institutions Code.

(2) The county share of one month of service by an employee of a local mental health agency in compliance with Section 5751.2 of the Welfare and Institutions Code.

Unit cost:

(1) (a) $121

(b) $250

(2) $180

Total cost: $766,260

MAJOR CONSTRUCTION PROGRAM STATEMENT

1974–75—1978–79

The Department of Health operates facilities for the care and treatment of the mentally disordered and the developmentally disabled. The capacity throughout the state on June 30, 1973 was 19,789. These facilities include: two hospitals for the mentally disordered, four hospitals for both the mentally disordered and developmentally disabled, and five hospitals exclusively for the developmentally disabled. Two neuropsychiatric institutes operated in conjunction with the University of California were transferred to the University effective July 1, 1973.

INTRODUCTION

Program Summary and Analysis

The projected population for the Department of Health's state facilities for the mentally disordered has been reduced due to the increase in variety and number of community-based services. With the increase of community-based services, the character of the centralized services offered by the state hospitals will be in a constant state of change. The state hospital's mission, as a part of the balanced treatment system, will be to treat a concentrated population of severely disturbed and damaged individuals. The hospitals will also serve special need groups for whom the community resources are either unavailable or economically unfeasible. Adequate capital outlay funding will be required for the hospitals to meet the special needs of this mixed clientele.

Eight major projects, in the total amount of $4,708,500 are requested for the 1974–75 fiscal year. The department's five-year major capital outlay program in the amount of $12.3 million is proposed for the 1974–75—1978–79 fiscal years. The program is comprised of projects in the amount of $2.6 million at hospitals for the mentally disordered, $4.5 million at hospitals for the mentally disordered and developmentally disabled, and $5.0 million at hospitals for the developmentally disabled.

RECAPITULATION OF PROGRAM CATEGORY

Five-Year Program	Amount	Percent of total
Ward remodeling and air conditioning	$5.1 million	41.2
Fire and life safety	2.5 million	21
Utilities, services, and ancillary facilities	4.0 million	32.9
Master planning, project planning, and services	0.6 million	4.9
Totals	$12.2 million	100

[1] The last four years of the five-year building program are the agency's estimate of need and do not represent a program approved by the administration.

DEPARTMENT OF HEALTH—Capital Outlay—Continued

SUMMARY[1]	Actual 1972–73	Estimated 1973–74	Proposed 1974–75	Projected 1975–76	Projected 1976–77	Projected 1977–78	Projected 1978–79	Total Five-Year Program

GENERAL PROGRAM ANALYSIS

Hospitals caring for and treating the mentally disordered are projected to have a population of 6,050 on June 30, 1974 and 5,030 on June 30, 1975. While the decline is at a slow rate, there nevertheless is a marked reduction from the total of 36,319 on June 30, 1957. This impressive decline in the number of patients in treatment can be attributed to several factors, among which are the greater use of short-term intensive care, the application of advances in chemotherapy, and since 1969, the effective implementation of the Lanterman-Petris-Short legislation.

The population of the developmentally disabled in the state hospitals is projected to be 10,219 on June 30, 1974 and 10,316 on June 30, 1975. This relatively static figure is attributable to maintaining the population close to the rated capacity of the facilities caring for and treating the developmentally disabled. This is possible because the regional centers are placing the less severely developmentally disabled in appropriate community facilities. Available state hospitals for the mentally disordered have been able to meet the needs of clients requiring state hospital services and still remain within rated capacity.

On June 30, 1968 the rated bed capacity was 20,136 for the mentally disordered and 10,478 for the developmentally disabled. The rated bed capacity on June 30, 1973 was 8,986 for the mentally disordered and 10,803 for the developmentally disabled. The change in capacities was brought about by an increase from an average of 55 square feet to 70 square feet of bedspace per patient authorized in the 1968–69 fiscal year, the abandonment of inadequate buildings, the conversion of ward units for the mentally disordered to ward units for the developmentally disabled, and remodeliing.

The following table outlines the changes in the rated bed capacity made during the 1972–73 fiscal year.

Facilities for the Mentally Disordered

Decreases:	
a. Deactivate ward units	–416
b. Convert bed areas to other usage	–173
c. Loss due to resurvey	–92
d. Convert M.D. wards to D.D. wards	–181
Gross Decrease	–862
Increases:	
a. Activate ward units	+303
b. Convert other usage to bed area	+60
Gross Increase	+363
Net Decrease	–499

Facilities for the Developmentally Disabled

Decreases:	
a. Deactivate ward units	–136
b. Loss due to resurvey	–111
c. Convert bed areas to other usage	–112
d. Loss due to remodeling	–70
Gross Decrease	–429
Increases:	
a. Activate ward units	+341
Net Decrease	–88

It is Department of Health policy that as beds become vacant, wards will be consolidated where appropriate and vacant buildings will be deactivated with the intent to maintain a capacity approximately 10 percent above population requirements. This allows for flexibility of operation and offers vacant buildings in which ward remodeling and renovation projects can be conducted without interruption.

[1] The last four years of the five-year building program are the agency's estimate of need and do not represent a program approved by the administration.

STATE BUILDING PROGRAM EXPENDITURES	Actual 1972–73	Estimated 1973–74	Proposed 1974–75	Projected 1975–76	Projected 1976–77	Projected 1977–78	Projected 1978–79
Hospitals for the Mentally Disordered							
ATASCADERO STATE HOSPITAL							
Atascadero admits judicially committed mentally disordered patients from counties north of the Tehachapis. Also accepted from other hospitals are Lanterman-Petris-Short patients needing a secure treatment facility and transfers from the Departments of Youth Authority and Corrections for psychiatric treatment. Rated capacity was 1,275 as of June 30, 1973.							
MAJOR PROJECTS							
Improvements to sanitary sewage plant and system	–	$107,200 [C]	–				
Improve primary electrical system	–	–	$276,100 [C]				
Modernize and extend security monitor system	–	–	–	$470,000 [C]			
Eliminate cause of electrolysis—repair and/or replace damaged sections of potable water distribution system	–	–	–	–	–	$100,000 [C]	
Additions and alterations to administration building	–	–	–	–	–	–	$100,000 [C] 2,000 [E]
Totals, Major Projects, Atascadero State Hospital	–	$107,200	$276,100	$470,000	–	$100,000	$102,000
MINOR PROJECTS							
Projects of $20,000 and under	$24,171 [C]	$28,789 [C]					
(Number of projects by fiscal year)	(2)	(2)					
Totals, Minor Projects, Atascadero State Hospital	$24,171	$28,789					
Totals, Capital Outlay, Atascadero State Hospital *(General Fund)*	$24,171	$135,989	$276,100	$470,000	–	$100,000	$102,000
CAMARILLO STATE HOSPITAL							
Camarillo treats and cares for the mentally disordered and developmentally disabled. It is expected that a gradual decline in Lanterman-Petris-Short referrals will occur while an increase is anticipated in the developmentally disabled population. Rated capacity was 2,116 for the mentally disordered and 659 for the developmentally disabled as of June 30, 1973.							
MAJOR PROJECTS							
Install patient service elevators	–	–	–	–	–	–	$350,000 [C]
MINOR PROJECTS							
Fire safety corrections	$18,817 [C]						
Totals, Capital Outlay, Camarillo State Hospital *(General Fund)*	$18,817	–	–	–	–	–	$350,000
METROPOLITAN STATE HOSPITAL							
Metropolitan treats and cares for the mentally disordered. Population is expected to decline somewhat as Orange and Los Angeles Counties intend to decrease utilization of the hospital due to more services being offered within the respective counties. Rated capacity was 1,549 as of June 30, 1973.							
MAJOR PROJECTS							
Complete air conditioning of R.&T. building	–	–	–	$200,000 [C]			
Air condition C.T. buildings	–	–	–	–	$500,000 [C]		
Air condition 200 series wards	–	–	–	–	–	–	$500,000 [C]
Totals, Capital Outlay, Metropolitan State Hospital *(General Fund)*	–	–	–	$200,000	$500,000	–	$500,000

For the list of standard lettered capital outlay footnotes, see the end of this budget supplement.

STATE BUILDING PROGRAM EXPENDITURES	Actual 1972–73	Estimated 1973–74	Proposed 1974–75	Projected 1975–76	Projected 1976–77	Projected 1977–78	Projected 1978–79
NAPA STATE HOSPITAL							
Napa treats and cares for the mentally disordered and developmentally disabled. An increase in programming for the adolescent mentally disordered and a decrease in the number of programs for the adult mentally disordered is expected. The population of the developmentally disabled is anticipated to remain stable. Rated capacity was 1,985 for the mentally disordered and 382 for the developmentally disabled as of June 30, 1973.							
MAJOR PROJECTS							
Alterations to the electrical distribution system	–	–	$110,000 [C]				
Sewage interceptor	–	–	250,000 [C]				
Equip wards for mentally retarded patients	$3,250 [E]						
New steam plant	–	–	–	$845,000 [C]	$5,000 [E]		
Air condition R.&T.—Phase II	–	–	–	995,000 [C]	–		
Totals, Major Projects, Napa State Hospital	$3,250	–	$360,000	$1,840,000	$5,000		
MINOR PROJECTS							
Projects of $20,000 and under	$11,847						
(Number of projects by fiscal year)	(2)						
Totals, Minor Projects, Napa State Hospital	$11,847						
Totals, Capital Outlay, Napa State Hospital	$15,097	–	$360,000	$1,840,000	$5,000		
General Fund	*11,847*	–	*360,000*	*1,840,000*	*5,000*		
State Construction Program Fund	*3,250*						
PATTON STATE HOSPITAL							
Patton treats and cares for the mentally disordered and developmentally disabled. The Hospital no longer accepts Lanterman-Petris-Short patients and will transfer those patients which require further hospitalization to Camarillo and Metropolitan. Patton will accept judicially committed mentally disordered patients as well as developmentally disabled patients. Rated capacity was 1,076 for the mentally disordered and 408 for the developmentally disabled as of June 30, 1973. No projects are proposed for the 1974–75 fiscal year.							
STOCKTON STATE HOSPITAL							
Stockton treats and cares for the mentally disordered and developmentally disabled. The hospital no longer accepts Lanterman-Petris-Short patients and will transfer those mentally disordered patients who require further hospitalization to Napa except for 130 San Joaquin County patients. These patients will be treated and cared for under contract to the county as an adjunct of the local mental health program. An increase is anticipated in the developmentally disabled population. Rated capacity was 985 for the mentally disordered and 498 for the developmentally disabled as of June 30, 1973.							
MAJOR PROJECTS							
Modernize electrical distribution system—Phase II	–	–	$244,300 [C]				
Air condition ward buildings—Phase II	–	–	639,600 [C]				
Totals, Major Projects, Stockton State Hospital	–	–	$883,900				
MINOR PROJECTS							
Projects of $20,000 and under	$12,142 [C]						
(Number of projects by fiscal year)	(1)						
Totals, Minor Projects, Stockton State Hospital	$12,142						
Totals, Capital Outlay, Stockton State Hospital *(General Fund)*	$12,142	–	$883,900				

For the list of standard lettered capital outlay footnotes, see the end of this budget supplement.

Hospitals for the Developmentally Disabled							
AGNEWS STATE HOSPITAL							
Agnews treats and cares for the developmentally disabled. A gradual increase in the population is expected due to increased referrals from regional centers. Rated capacity was 901 as of June 30, 1973.							
MAJOR PROJECTS							
Air condition wards	–	$1,700,000 [c]					
Remodel wards	–$7,262						
Install ward service elevators in buildings 51 and 52	–	–	$383,200 [c]				
Totals, Major Projects, Agnews State Hospital	–$7,262	$1,700,000	$383,200

DEPARTMENT OF HEALTH—Capital Outlay—Continued

STATE BUILDING PROGRAM EXPENDITURES	Actual 1972–73	Estimated 1973–74	Proposed 1974–75	Projected 1975–76	Projected 1976–77	Projected 1977–78	Projected 1978–79
PORTERVILLE STATE HOSPITAL							
Porterville treats and cares for the developmentally disabled. Population is expected to drop slightly due to patient transfer with parental consent to a State Hospital nearer the patients' families. Rated capacity was 2,079 as of June 30, 1973.							
MAJOR PROJECTS							
Air condition wards, Phase II of II	–	$1,634,000 [C]					
Construct rehab therapies building	–	–	–	$450,000 [C]			
Construct canteen, beauty and barbershop buildings	–	–	–	–	$218,000 [C]		
Construct service building	–	–	–	–	–	$120,000 [C]	
						5,000 [E]	
Totals, Major Projects, Porterville State Hospital	–	$1,634,000	–	$450,000	$218,000	$125,000	
MINOR PROJECTS							
Projects of $20,000 or under	$20,574 [C]						
(Number of projects by fiscal year)	(4)						
Totals, Minor Projects, Porterville State Hospital	$20,574						
Totals, Capital Outlay, Porterville State Hospital *(General Fund)*	$20,574	$1,634,000	–	$450,000	$218,000	$125,000	
SONOMA STATE HOSPITAL							
Sonoma treats and cares for the developmentally disabled. A slight drop in population is expected as patients are transferred with parental consent to state hospitals closer to the patients' families. Rated capacity was 2,161 as of June 30, 1973.							
MAJOR PROJECTS							
Air condition wards	–	$5,500,000 [C]					
Environmental Ward Improvements:							
Phase II of IV	–	–	–	$500,000 [C]			
Phase III of IV	–	–	–	–	$500,000 [C]		
Phase IV of IV	–	–	–	–	–	$500,000 [C]	
Totals, Major Projects, Sonoma State Hospital	–	$5,500,000	–	$500,000	$500,000	$500,000	
MINOR PROJECTS							
Install ramps and exit doors	$16,498 [C]						
Projects of $20,000 and under	$21,479 [C]						
(Number of projects by fiscal year)	(1)						
Total Minor Projects, Sonoma State Hospital	$37,977						
Totals, Capital Outlay, Sonoma State Hospital *(General Fund)*	$37,977	$5,500,000	–	$500,000	$500,000	$500,000	

For the list of standard lettered capital outlay footnotes, see the end of this budget supplement.

DEPARTMENT OF HEALTH CARE SERVICES

The Department of Health Care Services is one of three major departments consolidated into the Department of Health effective July 1, 1973. The new department was proposed in a reorganization plan submitted to the Legislature March 4, 1970. It was formalized by Chapter 1593, Statutes of 1971. Detailed discussion of the management of the Medi-Cal program will be found in the Department of Health discussion. Reported in this presentation is the summary information of the department's operations in the 1972–73 fiscal year.

DEPARTMENT OF EMPLOYMENT DEVELOPMENT

The Health and Welfare Agency through the Employment Development Department provides comprehensive statewide and local manpower planning, improves the efficiency of and accountability for delivery systems for manpower programs, promptly places job-ready individuals in suitable jobs, provides qualified job applicants to employers, assists potentially employable individuals to become job ready, creates employment opportunities, and pays unemployment and disability insurance benefits.

The department's overall balanced program is designed to achieve its five essential, interrelated and interdependent goals, none of which is less important than the others. The fundamental goals are:

1. Provide job placements.
2. Furnish job placements and related services to poor clients.
3. Maintain an unemployment insurance and disability insurance benefit payment system.
4. Provide services to employers.
5. Place welfare recipients in jobs.

Employment Development offers a broad spectru of services to the employables and their potential er ployers, including current and localized labor mark information, instructions in job and employer requir ments, seek-work methods, training and education demand occupations, job development with employe and industries, placement services, and followup improve job retention.

Prior to fiscal year 1974–75 employer and employ contributions to the Unemployment and Disability I surance Funds were collected and benefits were pa by Employment Development. In addition, Emplo ment Development, acting as agent of the Franchi Tax Board, collected state income taxes. The accoun ing, tax collection and auditing functions will be pe formed in fiscal year 1974–75 by the Department Benefit Payments.

I. EMPLOYMENT SERVICE PROGRAM

Need

The citizens of the State of California benefit from having a stabilized and growing economy. There are fluctuations in the economy caused by many employer job openings remaining unfilled with a loss in production of goods and services. Yet at the same time large numbers of potential job applicants are unable to find employment. Many of these potential job applicants become dependent on welfare.

Objective

To provide a labor exchange for employers and job-ready applicants thereby reducing the period of time employers' jobs go unfilled and job-ready applicants are unemployed.

To ready marginal workers for employment and subsequent self sufficiency at the earliest possible opportunity, thereby reducing the number who must rel on welfare.

Authority

Federal: Wagner-Peyser Act; Manpower Develop ment and Training Act; Social Security Act; Presi dential Executive Order 11422, August 15, 1968; Fed eral Interagency Cooperative Issuance 72-2; Economi Opportunity Act.

State: Division I, Part 1, Chapters 1, 9 and 9.5 Divisions 2, 3 and 4 of the Unemployment Insurance Code; Employment Development Act of 1973.

General Description

The public employment offices offer to workers and employers the advantages of a central point in all major communities at which workers seeking employment

DEPARTMENT OF EMPLOYMENT DEVELOPMENT—Continued

I. EMPLOYMENT SERVICE PROGRAM—Continued

can file an application for work and employers seeking workers can have a ready access to the community's largest and most centralized labor supply and, as needed, to the labor supply of other communities. In order to make the basic placement service fully effective in meeting the workers' and employers' needs these additional services are given: employment counseling to assist veterans, inexperienced workers, older workers, the physically handicapped, and related groups to select a suitable vocational field or to make job adjustments necessitated by industrial changes, age, or physical condition; special services to veterans to insure that all statutory obligations relating to employment facilities for exservicemen are carried out; technical assistance to employers, on invitation, in the solution of inplant manpower problems related to the selection and assignment of workers; the collection and dissemination of labor market information useful to individual employers and workers as well as to agencies and organizations concerned with employment; and the stimulation of community action to solve problems which prevent the achievement of maximum and stable employment in the community.

For those job seekers that do not have a salable skill, the department offers training programs in which a job skill may be learned in order to become competitors in the labor market.

A. Applicant Assessment

General Description

Applicant assessment is used to determine applicant needs and capability. Determining individual need and capability is necessary if the department is to provide a labor market exchange for job-ready applicants; and to assist marginally skilled workers obtain economic self-sufficiency through employment.

Assessment is accomplished through a variety of procedures such as completion of a work application, analysis of work history, education, individual skills, knowledge, and abilities; and, by testing and indepth interviews. Employment counseling will be provided applicants with problems of job choice, change, or adjustment. Referral to other agencies is a part of assessment and may be affected by manpower revenue-sharing programs. (See manpower development element).

Output	1972–73	1973–74	1974–75
Individuals assessed	1,734,000	1,558,000	1,682,000
Input	**1972–73**	**1973–74**	**1974–75**
Expenditures (support)	$19,111,922	$19,410,632	$20,646,536
Personnel man-years	1,256.9	1,127.4	1,163.2
Expenditures (program services)	376,621	–	–

B. Manpower Planning

General Description

An annual statewide manpower plan will be developed which provides for the effective use of MDTA, EOA and other available manpower training funds to meet the training needs of California's unemployed and underemployed workforce, in accordance with program emphasis and priorities established for the program year, and in consideration of the needs of the employer community and the availability of training resources. The statewide manpower plan will be developed by the California Manpower Planning Council, reflecting the local plans of 22 local manpower area planning councils and ancillary manpower planning boards, in coordination with all federal and state agencies and departments with manpower training components. The use of these monies must be coordinated statewide to ensure that the most effective use of local, state and federal resources is realized. This coordination encompasses 54 local planning areas, all state agencies with manpower development programs, all federal agencies with manpower-related programs, local government, private and public educational and vocational training institutions.

Input	1972–73	1973–74	1974–75
Expenditures	$224,946	$303,833	$440,733
Personnel man-years	13.3	13.5	22.5

DEPARTMENT OF EMPLOYMENT DEVELOPMENT—Continued

I. EMPLOYMENT SERVICE PROGRAM—Continued

C. Manpower Development

General Description

The department is directly responsible for training programs funded under the Manpower Development and Training Act (MDTA) and the Work Incentive Program (WIN). In addition, while not directly or fully responsible, the department assists in such training programs as Job Corps, National Alliance of Businessmen (NAB-JOBS), Concentrated Employment Program (CEP), Public Employment Program (PEP), and Jobs Optional Program (JOP).

The specific functions of the department in manpower programs generally include making labor market surveys, selection and referral of trainees, payment of allowances to trainees in Manpower Development and Training Act institutional projects and placement of trainees in jobs.

New manpower legislation following the revenu sharing concept may be enacted by Congress durin fiscal year 1973–74. If this occurs, the extent of th department's role in manpower programs may chang However, at this time, there is no way of accuratel predicting the impact of any new legislation on th manpower activities of the department.

Output	1972–73	1973–74	1974–75
Individuals placed in training	31,396	30,372	27,9
Input			
Expenditures—support	$4,678,762	$3,721,610	$3,594,3

Expenditures reported in other budgets	(8,929,600)	(12,954,450)	(12,954,45

D. Job Placement

General Description

Applicants will be selected and referred to job openings received from both non-ag and agricultural employers by matching applicant qualifications and job descriptions. Employers will be contacted to develop job openings for applicants for whom no suitable openings currently exist in the files.

Output	1972–73	1973–74	1974–75
Individuals Placed:			
Total non-ag	267,160	356,200	391,840

Expenditures—program services	2,781,611	3,500,011	2,764,65

E. Indirect Services

General Description

Responsibility has been assigned to all field offices of the department (except disability insurance and tax offices), to collect, coordinate, maintain, and disseminate occupational data and labor market information.

To strengthen the job placement operation, services to employers and unions are provided through field offices. These services include the provision of available applicant supply information, anticipated changes in the local economy and assistance in applicant recruitment.

To further strengthen the placement services, field office staff works with chambers of commerce, local office advisory committees, civic groups, and governmental agencies to stimulate community action to solve manpower problems hindering maximum development and use of human resources.

In the area of management and supervision, effor will be maintained to insure that the responsibilitie and goals of the department will be met and to tak corrective actions to reduce deficiencies and deviation from goals.

Career development training will be provided in field offices. Training will be directed toward activities such as assessment, order taking, selection and referral to insure an effective placement process. At the same time opportunities for career development of individual staff members through both in-service and out-service training, and rotational assignments will be sought.

There is no quantifiable output for this element. The indirect services described in this element contribute to the output of other elements in this program.

Input	1972–73	1973–74	1974–75
Expenditures	$27,014,281	$26,681,255	$27,918,624
Personnel man-years	1,776.6	1,549.7	1,572.9

DEPARTMENT OF EMPLOYMENT DEVELOPMENT—Continued

II. UNEMPLOYMENT INSURANCE PROGRAM

Need

Workers cannot anticipate layoffs caused by changes in technology, programs, improved work methods, or other factors present in various occupational fields. Unemployment insurance is needed to maintain a subsistence level for the worker while he is unable to find employment.

Each year one out of eight protected persons finds that he must use this insurance. Approximately 7 out of 10 persons in the labor force are covered by state unemployment insurance. Those generally not protected are comprised of new entrants into the labor force, the self-employed, state and local government employees, domestic employees and farmworkers. Unemployed federal government employees and ex-servicemen are covered.

Objectives

To provide a system of income maintenance based on insurance principles: to promptly pay benefits to eligible persons; to assist the unemployed insurance claimant to become reemployed; to maintain records of subject employers and appropriate contribution rates; to promptly collect all taxes due; to pay incentive payments, training related expenses and relocation expenses to WIN participants; to process and pay MDTA allowances; and to provide fair and impartial hearings on issues involving unemployment and disability insurance benefits, determination of employer tax liability, etc.

Authority

Federal—Title III of the Social Security Act and Chapter 85, Title V, U.S. Code.

State—Division 1, Parts 1, 3, and 4, Sections 101, 3501, and 4001 of the Unemployment Insurance Code.

General Description

Subject employers must be identified, registered and tax rates determined. Unemployment insurance tax collections must be made, and wage records maintained to establish the monetary eligibility of claimants to unemployment insurance compensation. Benefits must be paid promptly when it is determined that claimants meet eligibility requirements.

Assistance to the unemployment insurance claimant which results in the claimant becoming reemployed assists the employer by reducing charges to his tax rate; enables the claimant to earn more than unemployment insurance benefit payments provided; reduces the drain on the unemployment insurance tax fund; and improves the general economic condition by making increased purchasing power available.

[a] The accounts and tax collections and auditing functions of the Department of Employment Development (including the personal income tax withholding responsibility delegated by the Franchise Tax Board) are transferred to the Department of Benefit Payments, established by AB 1950. Program costs will be reimbursed for the DBP under contract with the Employment Development Department for accounting, tax collection and auditing functions.

DEPARTMENT OF EMPLOYMENT DEVELOPMENT—Continued

II. UNEMPLOYMENT INSURANCE PROGRAM—Continued

A. Unemployment Insurance Benefit Functions

General Description

Field offices process claims, determine eligibility, and make payments varying from $25–$90 per week depending on a claimant's earnings in covered California employment during a prior one-year period which is the base period. In addition, in cooperation with all other states, the District of Columbia, Puerto Rico, the Virgin Islands and Canada, the department administers an interstate unemployment insurance program.

Output	1972–73	1973–74	1974–7
Number of benefit weeks claimed	10,460,000	10,050,000	11,641,5
Averaged covered employment	6,069,000	6,258,000	6,440,0
Input			
Expenditures (support)	$31,874,156	$30,123,213	$35,324,3
Expenditures (benefits)	$673,515,433	$678,735,000	$785,800,0
Personnel man-years	2,085.3	1,847.3	1,862

B. Unemployment Insurance Accounts and Tax Collections Functions

General Description

Each employer pays at a contribution rate which is determined by his employment experience and by the financial condition of the Unemployment Insurance Fund. The condition of the fund determines whether employers are taxed on a "high" schedule, which ranges from 0.7 percent to 3.1 percent or on a "low" schedule which ranges from 0 percent to 3.1 percent. In addition to the normal tax rate, all employers pay an additional tax for the balancing account, which ranges from a minimum of 0.1 percent to a maximum of 1 percent and is determined by the relationship of the charges and the credits to the balancing account. Contributions credited to the balancing account are used to pay extended duratio benefits to unemployed workers and to offset employ er's negative reserve balances and nonchargeable ben efit payments. The increase in the number of em ployers reflected for 1974–75 shows an increase les than normal due to the projected economic down swing.

Output	1972–73	1973–74	1974–75
Number of subject employers at midyear	375,294	382,900	384,700
Tax Revenue	$735,338,000	$804,700,000	$846,000,000
Input			
Expenditures	$8,749,227	$11,949,464	$9,466,18
Personnel man-years	572.4	732.8	-

[a] See footnote a on page 145.

C. Classified School Employee

General Description

Classified School Employees were extended unemployment insurance coverage effective January 1, 1972 at which time liability for collections commenced. Initial benefit payments were made, through the Employment Development Department as of August 6, 1972 as a result of accumulated wage credits for the first calendar quarter. School employers contribute to the Classified School Employee Fund to reimburse the Unemployment Fund on a dollar-for-dollar basis for unemployment insurance benefits paid out to eligible classified school employees and to pay the administrative cost of operating this special fund by the Employment Development Department, which include costs EDD is required to reimburse the Superintend ent of Public Instruction and/or his designated rep resentatives to carry out their legal responsibilities.

Output	1972–73	1973–74	1974–75
Number of subject school districts at midyear	1,197	1,200	1,200
Number of covered classified school employees	112,000	112,000	112,000
Revenue	$11,671,982	$5,252,853	$5,650,000
Input			
Expenditures (support)	$141,559	$307,595	$316,555
Expenditures (benefits)	$1,041,307	$2,172,000	$2,344,000
Personnel man-years	6.9	18	-

[a] See footnote a on page 145.

D. Unemployment Insurance Support

General Description

The unemployment insurance support element is critical to a viable quality program. Careful utilization of management and technical resources have, over the years, resulted in California being rated as one of the low cost states in overall unemployment insurance operations, being ranked the fourth lowest state in unit cost of initial claims and weeks claimed, and 14th lowest in nonmonetary determinations. A study of the period 1967–71 found that California, overall, was the eighth least costly state. There is no indication of a change since that period. The economy of the program being commensurate with high quality, is attributable to effective management and supervision and maximum utilization of staff technical services.

The primary mission of supportive services is to improve field office procedures to the extent that they can deliver high quality, efficient service to the workers of the state and to provide the field staff with the direction and technical resources to improve functions.

Implementation of the embossed card payment system is expected during fiscal year 1974–75. This procedure will reflect a wide departure from present methods of paying claims. This system will be highly automated and will provide one method of payment in

DEPARTMENT OF EMPLOYMENT DEVELOPMENT—Continued

II. UNEMPLOYMENT INSURANCE PROGRAM—Continued

lieu of the three existing methods. This should result in better service and more effective controls. The embossed card payment system will be field tested, debugged and monitored prior to statewide application. The system will produce a data base which, with development, could improve nonmonetary determination and initial claims reporting.

The unemployment insurance cost model implemented in fiscal year 1973–74 will produce a significant change in the method of unemployment insurance budget allocation as it is expected to be the basis for the federal budget request for 1974–75.

Approximately 125 pieces of state and federal legislation affecting the unemployment services function of the department will be reviewed and:

a. Necessary regulations and procedures will be written and implemented for new laws and precedent court decisions.
b. Monitoring and coordinating federal legislation and regulations and litigation affecting unemployment insurance programs will be a continuous endeavor.

Input	1972–73	1973–74	1974–75
Expenditures	$7,590,612	$7,781,451	$9,347,943
Personnel man-years	496.6	477.2	459.9

E. Unemployment Insurance Processing Allowance Payments

General Description

Approximately 65,800 WIN participants will be eligible for incentive allowances and/or training related expenses to enable them to progress towards employment in 1974–75. An estimated 300 will need to be relocated to enter a labor market compatible with their skills and therefore will become eligible for relocation allowances.

Allowance payments are made from central office and field office locations and although the WIN and MDTA functions are not Unemployment Insurance oriented, the payment of applicable allowances is considered a part of the unemployment insurance system.

The Manpower Revenue Sharing Act will involve private or public entities outside of the department in allocation of training resources. In some instances, training activities may be subcontracted back to EDD —in all instances, EDD will make the allowance payments commensurate with such MDTA training.

Output	1972–73 *	1973–74	1974–75
WIN participants	17,348	55,200	65,800
Manpower Development and Training:			
MDTA Workload [1]	14,858	9,500	9,500
MDTA Payments [2]	110,331	52,698	52,679
Input			
Expenditures, support—WIN	$472,906	$1,182,688	$1,221,859
Personnel man-years—WIN	29.2	57.4	57.4
Expenditures—benefit payments—WIN	$3,481,024	$10,890,000	$12,235,000
Expenditures, support—MDTA	$1,177,772	$816,884	$907,934
Personnel man-years—MDTA	73.6	50.5	50.5
Expenditures—allowance—MDTA	$5,847,518	$2,793,000	$2,792,000

* WIN training related expense payments were transferred from the Department of Social Welfare to the Employment Development Department, with full workload impact being realized in 1973–74.

F. Appeals Process

General Description

The Division of Appeals is administered by the California Unemployment Insurance Appeals Board. The board consists of five members, appointed by the Governor, for four-year terms.

Ten regional referee offices receive and dispose of appeals filed at the first or lower authority level. Hearings are held in these offices as well as local offices of the department. Second or higher authority appeals are filed at the office of the appeals board in Sacramento.

The appeals board has adopted rules, which set forth the rights and obligations of parties. These rules are published in subdivision 2, Title 22, California Administrative Code. Parties are also informed of their rights on all forms used by the appeals division.

The state and federal programs in which an appeal or petition may be filed are: unemployment insurance benefit, including benefits claimed by federal and state employees, exservicemen, and individuals pursuing retraining courses; unemployment benefit hearings for persons living in California but claiming from another state; benefit adjudication for individuals who had their hearing outside California but are claiming benefits based on California wages; unemployment disability insurance appeals, including claims against voluntary plan carriers; and determination of tax liability of employers, e.g., transfers of reserve accounts, claims for refunds, and assessments.

[1] Indicates the number of participants with a sharp decline in the current year also projected into the budget year, due to federal cutbacks in allocations for MDTA training.
[2] Indicates number of payments made—not dollars, as payments are variable among participants as well as among categories (i.e.) initial training, direct training, subsistence and transportation. The unemployment insurance system receives staff reimbursement for this function based upon the number of payments made.

DEPARTMENT OF EMPLOYMENT DEVELOPMENT—Continued

II. UNEMPLOYMENT INSURANCE PROGRAM—Continued

F. Appeals Process—Continued

A claimant or interested employer may appeal a determination to a referee (lower authority), and an employer may file a petition to a referee (lower authority) from an assessment, denial of a claim for refund, or protest to charges to the employer's reserve account, or a transfer of a reserve account. The referee's decision may be appealed by the interested parties, including the department, to the appeals board itself (higher authority).

Output	1972–73	1973–74	1974–7
Unemployment Insurance:			
Ruling appeals (lower authority)	1,598	1,650	1,7
Ruling appeals (higher authority)	112	125	1
Total benefit appeals (lower authority)	51,978	57,450	54,6
Total benefit appeals (higher authority)	8,095	9,357	8,6
Disability Insurance Appeals Disposals:

Lower level	2,636	2,775	2,8
Higher level	334	355	3
Input			
Expenditures	$6,139,985	$5,929,776	$6,210,7
Personnel man-years	401.1	361	345

III. DISABILITY INSURANCE PROGRAM

Need

Many workers do not have sufficient resources to protect themselves against the hazards of short-term nonoccupational injury or illness. A system of temporary disability indemnity and hospital benefits based on insurance principles is also needed to offset at least a portion of the wage loss suffered by workers due to nonoccupational disability.

Objectives

To provide efficient and effective service to all insured persons by promptly paying eligible disabled workers disability insurance benefits; to promptly collect employee contributions when due; to perform delinquency enforcement through an effective field audit program; and to ensure that all voluntary plan contracts conform to provisions of law and regulations.

Authority

Division I, Chapter 4, Article 3, Section 984 of the California Unemployment Insurance Code.

General Description

The Legislature, in 1946, established a system o wage loss indemnification for disabled workers. Whe hospitalized, additional costs accrue to the worker. T help him defray these costs an additional benefit provided. In order to provide prompt and efficien service, the program is administered through decen tralized field offices established to process claims, com pute entitlement, maintain accounting records, mak claims payments, and provide informational service

In addition to the state disability insurance plan employers may substitute a voluntary plan providin at least equal benefits are payable at a cost that doe not exceed the state plan. There are provisions fo elective coverage for employers, self-employed person and family employees.

PROGRAM REQUIREMENTS	72–73	73–74	74–75	1972–73	1973–74	1974–75

DEPARTMENT OF EMPLOYMENT DEVELOPMENT—Continued

III. DISABILITY INSURANCE PROGRAM—Continued

A. Disability Insurance Tax Collections

General Description

All subject employers are required by law to submit quarterly tax returns to the department stating the wages paid to each worker for employment insured under disability insurance provisions. When monthly contributions exceed $50, returns are made monthly. The cost to the worker is 1 percent of the first $9,000 of wages paid each calendar year. For employers and self-insured individuals who elect disability insurance coverage, the annual cost is 1.25 percent of $9,000. Contributions are used for payment of benefits to disabled workers. The projected growth of subject employers and revenues reflect extended worker coverage and normal economic increases.

Output	1972–73	1973–74	1974–75
Number of subject employers at midyear (joint UI and DI)	444,036	452,000	456,000
Number of subject employers at midyear (DI only)	68,742	70,000	71,300
Tax revenue (thousands) (worker contributions)	$365,815	$398,241	$415,506
Input			
Expenditures	$2,064,576	$2,652,722	$2,221,962
Personnel man-years	138.8	164.8	–[a]

B. Voluntary Plan Review

General Description

The Unemployment Insurance Code permits employers to substitute private plans in lieu of state plan coverage, provided that the cost to the employee does not exceed the cost of the state plan. A voluntary plan may be either insured by an admitted disability insurer, or it may be self-insured. The insurance policy in the case of an insured plan constitutes the plan. The text submitted by an employer constitutes the plan for a self-insured option. Self-insured plans require that the employers deposit security as determined by the department to guarantee compliance with the terms of the plan. Employees are relieved of statutory contributions to the State Disability Fund while covered under an approved voluntary plan and are ineligible for state plan benefits for any disability which commenced while they were covered under the voluntary plan. Voluntary plans must bear the additional costs incurred to the disability fund as a result of voluntary plan activities. Such costs are assessed annually.

Output	1972–73	1973–74	1974–75
Average covered employment	397,000	397,000	404,000
Voluntary plan notices of first claims received	43,511	45,700	48,200
Input			
Expenditures	$257,277	$305,854	$305,441
Personnel man-years	17.3	19	18.3

C. Disability Insurance Benefit Payments

General Description

When disabled for nonoccupational injuries, the eligible worker receives a weekly benefit amount. This statutory weekly benefit of from $25 to $119 is based on wages paid during a base period. Maximum benefits payable during a period of disability are 26 times the weekly benefit amount or one-half the base period earnings, whichever is smaller. Hospital benefits are payable at the rate of $12 a day for a maximum of 20 days of confinement in a hospital or certain nursing homes.

Disability insurance coverage includes (a) most persons protected by unemployment insurance, (b) agricultural workers, (c) employees of district hospitals, and (d) employers, self-employed persons and family employees, if they elect the coverage. To receive disability insurance a person must (1) file a claim in accordance with regulations; (2) serve a noncompensable seven-day waiting period, except that the waiting period is waived from the date of confinement in a hospital; (3) have sufficient wage credits to establish an award; (4) submit to a reasonable examination when required by the department; and (5) file a certificate of disability signed by a duly authorized doctor of medicine, osteopath, chiropractor, dentist, optometrist, podiatrist, government medical officer, or religion practitioner.

Disability insurance benefit payments are administered through decentralized field offices where claims are processed promptly, entitlements are computed, records are maintained, and prompt payments are made.

Output	1972–73	1973–74	1974–75
Number of benefit payments	2,634,468	2,721,300	2,855,500
Average covered employment	5,546,000	5,709,000	5,931,000
Input			
Expenditures (support)	$11,588,559	$14,047,393	$14,978,302
Personnel man-years	779.1	872.7	897.4
Expenditures (benefits)	$344,463,083	$375,005,000	$404,881,000

[a] See footnote on page 145.

DEPARTMENT OF EMPLOYMENT DEVELOPMENT—Continued

IV. PERSONAL INCOME TAX PROGRAM

Need

The use of a withholding-at-source method of collection is equitable to taxpayers, provides revenue receipts to the state evenly distributed throughout the tax year as well as maximum interest to the state, and is needed to assist in meeting California's budget commitments.

Objectives

To equitably and promptly collect deductions from workers' wages from all employers in the state, to inform employers of their responsibilities and to insure compliance with legal provisions of the program.

Authority

Section 1032 of the Unemployment Insurance Code. Section 15702.1 of the Government Code. Regulation 17002.5, Title 18, of the California Administrative Code and, Sections 18806 and 18826 of the Revenu and Taxation Code.

General Description

All employers are required by law to deduct, r port and pay personal income tax through the En ployment Development Department acting as an ager for the State of California. Tax schedules are pr pared by the Franchise Tax Board. Contributions ar collected in accordance with these schedules by En ployment Development Department. Revenues co lected are transferred to the State's General Fund.

Output	1972–73	1973–74	1974–75
Number of subject employers at midyear	450,000	455,000	456,00
Tax revenue (thousands)	$1,393,802	$1,500,000	$1,600,00

V. MIGRANT SERVICES PROGRAM

Need

Thousands of people, consisting largely of families, follow the farm labor market annually. The people, being borderline poverty cases, usually have more than one family member working in the fields. The mothers must stay with the younger children or take them to the field so the mothers can contribute to the family income.

Farms usually do not provide housing facilities for a migrating labor force but rely on the migrant farm worker to fulfill the work force requirements.

Objective

The major objective is to provide housing for temporary occupancy and other work-related services at reasonable costs for migrant farmworkers and their families during peak harvest seasons. Migrant Services Program will provide services to 3,100 families, a work force of 7,750.

Providing a controlled environment for the young children contributes to an orderly childhood development, and frees the mothers for their contribution to the family income. Migrant working mothers contrib ute more than $8 million annually to family income

Authority

Section 7100 of Division 7, Title 1, Governmen Code, as amended by Chapter 1460, Statutes of 1968

General Description

The Migrant Services Program will provide reason able cost housing and off-season maintenance for loca housing projects. With local agency participatio (housing authority or board of supervisors) Migran Services issues grants secured from federal sources t secure and manage this low-cost housing.

The Migrant Services Program provides for da care and day care facilities to accommodate childre up to six years old.

In addition, education, social service, and healt service programs are offered at migrant housing projects.

DEPARTMENT OF EMPLOYMENT DEVELOPMENT—Continued

V. MIGRANT SERVICES PROGRAM—Continued

A. Migrant Administration

General Description

Migrant services section administers the California Migrant Master Plan. The elements under direct control of the section include housing operation and housing maintenance. These functions are carried out by contracting with agencies of local government to manage programs. Other programs are developed and delivered by other state and local agencies by interagency agreement between the Departments of Employment Development and Education.

Input	1972–73	1973–74	1974–75
Expenditures	$217,392	$222,891	$195,685
Personnel man-years	10	9	9

B. Housing Construction

General Description

Construction of housing units has been accomplished by contracting with local agencies. The projects range in size from 50 units to 125 units per site. The houses contain approximately 450 square feet of floor space, contain kitchen, bathroom, bedrooms and living room. All necessary furniture is provided by the program from federal excess property sources. There will be no additional construction during 1974–75 since the major needs of most areas have been met.

Output	1972–73	1973–74	1974–75
Houses operated	2,172	2,136	2,136
Input			
Expenditures	$188,610	$285,586	–

C. Housing Management

General Description

Administration of the housing management element is conducted primarily by the migrant section of EDD. Direct administration and supervision of the migrant projects is provided by city and county housing authorities and boards of supervisors under contract with the state. Funds required for payment of off-season maintenance are derived from rental income in the amount of $123,000. Direct administration and supervision of the migrant projects is provided by city and county housing authorities and boards of supervisors under contract with the state. Rental income funds in the amount of $395,245 will be expended in 1973–74 for this purpose. The housing project operation costs during the 1974–75 harvest will be funded entirely with federal funds.

Output	1972–73	1973–74	1974–75
Number of families served	3,000	3,100	3,100
Input			
Expenditures	$931,411	$1,246,013	$1,290,820

D. Day Care

General Description

At the time housing projects were constructed, a day care building was also built. The physical facilities are designed to accommodate all children age 2 to 6.

Children are taken to the center at 5 a.m. and kept until 5 p.m. During this period of time they are fed, participate in education programs, rest and play. All care is provided by duly qualified teachers and day care aides. This program has been funded by General Fund, Title IVA Social Security, and Title I Migrant Amendment Funds. Prior to 1968–69, the U.S. Office of Economic Opportunity funded this element. In 1973–74, day care services were provided by an interagency agreement with the Departments of Employment Development, Education, and Benefit Payments. State funds in the amount of $409,298 were used to match federal funds through the Department of Benefit Payments to provide day care services. The balance of day care services relating to education was financed by the Department of Education from Title I, Elementary and Secondary Education Act migrant amendment funds.

Output	1972–73	1973–74	1974–75
Number of children served	2,100	2,100	2,100
Input			
Expenditures	$409,298	$409,298	$409,298
Expenditures reported in other budgets	1,614,012	1,227,894	1,120,500

V. MIGRANT SERVICES PROGRAM—Continued

E. Education and Training

General Description

Production Training Corporation functioned as an independent corporation with all of the production purchased by and delivered to housing projects in local areas of need. The Board of Directors of Production Trainiug Corporation were responsible for establishing general policy decisions. The Employment Development Department was responsible fo determining the time schedule for production an delivery of housiug units.

Input		
Expenditures	$248,393	–

VI. OFFICE OF ECONOMIC OPPORTUNITY

Need

Experience indicates that major weaknesses exist with the community actiou agencies program management and fiscal accounting functious. In program development, a major weakness exists in defining specific performance objectives aud work procedures to reach each objective. After objectives are decided, the funding source and priorities must be established.

Some counties and cities are considering using general revenue sharing funds to continue selected OEO programs. The Government Code does not give all cities and counties the authority to use general revenue shariug funds to continue OEO programs. These problems dictate the need for legal assistance to improve the poverty situatious of the communities.

Objective

To analyze antipoverty programs and determine alternate sources of funds, and to provide more technical assistance on management, fiscal accountiug, and program planning; to increase the performance and accountability of community action programs via effective technical assistance; to assist cities and counties that want to use general revenue sharing funds to continue selected OEO programs; to develop better local standards for evaluating the effectiveness of community action programs.

Authority

Section 301.5, 328(b)(c)(d) of the Unemployment Insurance Code in accordance with the Governor's executive order issued in September 1964, and Sections 231 aud 242 of the Economic Opportunity Act of 1964 as amended.

General Description

The state OEO will advise and assist the Governor in carrying out the provisions of Section 242 of the Economic Opportunity Act concerning the Governor's authority to approve or disapprove OEO grants and contracts of assistance, and his authority to consent to or request termination of assignments of VISTA volunteers. State OEO will place major emphasis on monitoring and evaluating federally funded programs subject to Section 242 of the Economic Opportunit Act.

SOEO will provide special technical assistanc where needed to community action agencies, local gov ernment, or potential grantees in developing, conduct ing, and administering programs. Technical assistanc requests will be converted into work task assignment and assigned to a technical assistance specialist wit expertise necessary to perform the task. In some case where highly technical assistance is needed, a con sultant may be retained. In all cases, existing stat or federal department services will be used, if avail able.

The state OEO will provide a written analysis t the Governor highlighting the principal problems an causes of poverty, and the poteutial breaches in con tinuity of service that may be created over the uncer tain future of OEO. The analysis will include rec ommended priorities, types of programs, possible resources, and a proposed grant fund delivery syster to meet those problems. The state OEO personnel wil involve the CAL-CAP Director's Association, com munity-based programs, cities, counties, and stat agencies in the collection and categorization of data to make a reasonably accurate analysis.

The state OEO will continue to provide technical assistance and monitoring activities of OEO funded legal service programs. The legal services division shall continue to provide technical assistance planning, and monitoring. In compliance with the Economic Opportunity Act mandates, the legal services division will continue its efforts to increase the effectiveness of legal services for the state's low-income citizens by urging increased participation of members of, and the delivery of legal services by the private bar associations. Efforts will also be maintained to assist in the development of new approaches and methods in delivering legal services.

State OEO will give priority to planning, developing, and implementing research and demonstration programs designed to bring about meaningful changes in state, local, and federal government-operated services.

A. Technical Assistance

General Description

Approximately 25 percent of all multiprogram agencies and 10 percent of all single program (limited purpose) agencies are field-reviewed annually. Programs not field reviewed are reviewed in the office by analysis of written material submitted.

Each review and evaluation will consist of an assessment of the grantee's work performance, achievement of goals and objectives, fiscal management and accounting systems, adherence to the work programs and budgets, internal management and controls, and the composition and effectiveness of the board of directors.

The legal division will continue the assistance and monitoring activities of OEO programs. The division will research the possibility of increasing the delivery of legal services by use of certified paraprofessionals. The legal division will continue to make recommendations to the Governor on legal services programs and the state Office of Economic Opportunity will continue to mobilize state and local resources to assist these programs.

The state OEO will assist state and local governments to make their activities more responsive to the unique problems of people of low incomes.

Output	1972–73	1973–74	1974–75
Number of grants reviewed	380	350	350

B. Special Technical Assistance

General Description

The Special Technical Assistance Program is restricted by grant condition to work only with rural programs. The state Office of Economic Opportunity will contact all rural community action agencies (CAA's) and local purpose agencies (LPA's) to collect data on causes of poverty and potential breaches in continuity of programs. Technical assistance will be provided on internal management, fiscal control, program planning, and record system problems for five rural Community Action Programs (CAP's) and five rural LPA's. Also, technical assistance will be provided on local and state resource mobilization for 12 rural CAP's and 10 rural LPA's with priority on health and nutrition, economic development, housing, and manpower programs.

Output	1972–73	1973–74	1974–75

Input			
Expenditures	$80,484	$78,655	$86,294
Personnel man-years	4.4	4	4

C. Housing Intern

General Description

The housing intern element is a pilot program which is designed to research, test, evaluate, and then demonstrate methods whereby state and federal agencies may increase housing, procurement, and services for low-income families. The project will determine how local communities with the assistance of the state can augment the work of the federal, state, and private sector by creating new paraprofessional job opportunities as well as increase the number of housing loans for low-income families. The project will also develop and demonstrate how state agencies can substantially increase the number of contracts and purchase orders placed with minority-owned businesses with a minimal default rate by using minority paraprofessionals and eliminating barriers that keep minority-owned small businesses from doing business with the state without increased cost.

Input	1972–73	1973–74	1974–75
Expenditures	–	$226,540	$75,513
Personnel man-years	–	22	8

DEPARTMENT OF EMPLOYMENT DEVELOPMENT—Continued

VII. CALIFORNIA JOB CREATION PROGRAM

Need

Potential small businessmen in disadvantaged areas have difficulty obtaining credit to support their business proposals. Whether it is because the person does not have the equity capital necessary to satisfy federal small business requirements, or because lenders are reluctant to risk loans to businesses in disadvantaged areas, these potential employers find that credit is unavailable.

The small, job-producing businesses in economically disadvantaged areas try to secure a profit with little or no assistance. These small businesses have a high failure rate because of a lack of skill, capital and access to markets. With assistance, training, or credit, the marginal business becomes competitive, contributing towards a successful economy in the disadvantaged areas.

Objective

The objective is to create employment for youth, disabled, minority and other unemployed and disadvantaged persons residing in the economically depressed areas of the state through the promotion of economic expansion of small businesses by stimulating the flow of public and private capital and providing management and technical assistance.

Authority

Part 5 (commencing with Section 14000) of Division 3 of Title 1 of the California Corporations Code.

General Description

The California Job Creation Program will enco- age and assist the private sector in establishing gional job creation corporations organized to prov e financial assistance to small businesses. Cal-Jobs v l disburse funds from the state Job Creation Lo Guarantee Fund to the regional job creation corpo- tions to cover loan guarantees and administrat costs. Contracts will be secured with qualified priv consulting agencies to provide management and te nical assistance to small business enterprises. A de- onstration project will be contracted to a consulti firm to study the feasibility of transferring availa but unused technology into small businesses, and stitutions of higher learning will be assisted in t development of technological transfer courses.

The Office of Minority Business Enterprises w assist minority businesses in obtaining an equita share of procurement contracts. Educational insti tions will be assisted in developing programs for m nority businesses.

Governmental agencies will be assisted in develo ing programs to increase the economic opportuni for minority-owned businesses.

In essence, the programs will be structured to su stantially expand the State of California's capaci to stimulate and aid in the creation and expansion small businesses which will result in the creation jobs for the unemployed with particular emphasis the economically disadvantaged, disabled and yout

A. Cal-Jobs

General Description:

The Cal-Jobs element guarantees loans that provide small businesses with enough capital for economic development. Through transfer of technological advances to small businesses, their capacity to become competitive will increase, therefore creating jobs.

Small business loans will be made to businesses that have gross receipts of not more than one million dollars per year. Employment incentive loans will be provided businesses to attract new business or expand an existing business which will result in the employment of at least 15 persons who are either persons residing in economically disadvantaged areas or youths residing in areas of high youth unemployment and high youth delinquency.

Cal-Jobs will secure membership agreements between corporations and any financial institution, nonprofit organization, or other business, which will agre to lend funds, or to make available other resources t the corporation.

A technological transfer activity will be performe in order to demonstrate and evaluate the feasibilit of transferring available but unused technology int small businesses.

VII. CALIFORNIA JOB CREATION PROGRAM—Continued

B. Office of Minority Business Enterprise

General Description:

The Office of Minority Business Enterprise (OMBE) is charged with the responsibility to (a) obtain an equitable amount of state procurement contracts for minority owned businesses (b) work with the college and university systems to encourage and assist in the development of business education and training programs for minority owned businesses and (c) assist state agencies to redirect existing programs and develop new programs to increase opportunities for minority-owned businesses. These activities will provide more opportunities for the minority-owned business to compete in the economic mainstream.

Procurement contracts	–	100	115
Input			
Expenditures	–	$104,112	$120,000
Personnel man-years	–	5.7	5.7

VIII. LEGISLATIVE MANDATES

Unemployment benefits for eligible individuals was increased to $90 from $75. At present, the only employees of any local governmental entity compulsorily participating in unemployment insurance are regularly employed classified school employees. Therefore, any classified school employee earning $2,340 in any quarter in his base period would receive an additional $15 if otherwise eligible for unemployment benefits.

School employers contribute to the Classified School Employee Fund to reimburse the Unemployment Fund on a dollar-for-dollar basis for unemployment insurance benefits paid out to eligible classified school employees and to pay the administrative cost of operating this special fund by the Employment Development Department. The program covers 1,200 school district employers and 112,000 classified school employees.

	1972–73	1973–74	1974–75
State legislative mandates *(General Fund)*	–	$78,000	$156,000

IX. ADMINISTRATIVE, STAFF AND TECHNICAL SERVICES PROGRAM

The Administrative, Staff and Technical Services Program, under the direction of the director, formulates departmental goals and policies and provides administrative and management services for the eight departmental programs. The following areas of essential support are provided to the department—executive, legal, budget planning and analysis, fiscal management, training, personnel management, automatic data processing, reports and analysis, information and public relations, building maintenance, duplicating, office services, etc.

Department of Employment Development—Capital Outlay

SUMMARY—CAPITAL OUTLAY

	1972–73	1973–74	1974–75
Recovery of capital expenditures—Contingent Fund	−$146,523	−$130,791	−$114,240
Recovery of capital expenditures—Unemployment Fund Reed Act	−850,483	−	−429,517
Totals, Recovery of Capital Expenditures	−$997,006	−$130,791	−$543,757

GENERAL ANALYSIS

The Employment Development Department did not include a capital outlay request in either the 1971–72, 1972–73 or 1973–74 fiscal year budget and no new request is included in the 1974–75 fiscal year.

The department is pursuing the policy of recovering the cost of the construction of buildings and building additions through rental amortization which results in restoring money to the funds from which the cap ital expenditures were made.

In 1974–75 the Employment Development Depart ment Contingent Fund will recover $114,240 and th Unemployment Insurance Trust Fund $429,517 for total $543,757.

APPROPRIATIONS

	1972–73	1973–74	1974–75
Recovery of capital expenditures *(Contingency Fund)*	−$146,523	−$130,791	−$114,240
Recovery of capital expenditures *(Unemployment Fund Reed Act)*	−850,483	−	−429,517
Totals, Recovery of Capital Expenditures	−$997,006	−$130,791	−$543,757

[1] Chapter 1603, Statutes of 1951 authorized $9,500,000; Chapter 1776, Statutes of 1953 authorized $950,000 including $600,000 fo parking area, headquarters, Sacramento.

[2] Chapter 16, Statutes of 1954 authorized $2,750,000 Branch Office Building, Los Angeles.

[a] Positions are effective for one year from October 1, 1973.

DEPARTMENT OF REHABILITATION

The purpose of the Health and Welfare Agency, Department of Rehabilitation, is to help handicapped persons increase their social and economic independence. To this end, by far the most important purpose of the department is that of providing services which help handicapped persons to secure or maintain gainful employment. As part of this vocational rehabilitation program the department administers several facilities and programs which provide direct prevocational. orientation or occupational training services to clients. Public and private nonprofit rehabilitation facilities, which also provide vocational evaluation and training services, receive encouragement and support from the department for the improvement and expansion of services that realistically meet the needs of handicapped persons. A business enterprise program, administered by the department, trains blind persons to operate vending stands, snack bars and cafeterias in public and private buildings and provides technical and management services to blind operators of such enterprises. Other rehabilitation services provided by the department, not primarily vocational in nature, include a program that trains blind individuals who do not have vocational potential to live more independently, a program of reader services for the blind, and a program that provides minor medical services to the disadvantaged who are trainees under the Manpower Development and Training Act.

SUMMARY OF PROGRAM REQUIREMENTS	MAN-YEARS 72–73	73–74	74–75	ACTUAL 1972–73	ESTIMATED 1973–74	PROPOSED 1974–75

I. REHABILITATION OF THE DISABLED

Need

U.S. census and health surveys for California provide the basis for an estimate that for fiscal year 1974–75, a total of 485,600 disabled persons of working age could benefit from vocational rehabilitation services. Without special assistance, many disabled persons cannot secure or maintain employment. The state of economic dependency that results threatens the disabled person's sense of worth and places serious stress upon his family. thus compounding the loss of productive capacity to society. By providing disabled persons with a means of self-support and economic independence, the rehabilitation program produces significant benefits in terms of human dignity and economic benefits in terms of increased tax revenues and public assistance savings.

Objectives

The primary objective of the department is to provide vocational rehabilitation services that would help handicapped persons who both need and can benefit from such services to obtain or maintain gainful employment. To assure the best possible use of resources to that end, the department, through a system of continuous management information and program evaluation. assures appropriate balance in the delivery of services to all parts of the state and to all disability groups, including the severely handicapped and disabled welfare recipients. The department attempts to maximize the efficient use of all state resources available to the disabled by developing its public relations program and negotiating active agreements with other state and local agencies providing services needed by the handicapped.

Output

Success in terms of the objectives of the department is measured by the number of handicapped persons who, as the result of services provided, have obtained or retained employment and have demonstrated that they can continue in employment. Some of the accomplishments for fiscal year 1972–73, estimated objectives for fiscal year 1973–74 and projections for 1974–75 are presented in the following table:

Program Changes

On July 1, 1973 the Alcoholism Rehabilitation Program was transferred to the Office of Alcohol Program Management, Health and Welfare Agency. Under a contractual arrangement with the Office of Alcohol Program Management, vocational rehabilitation counselors in the department field offices provide vocational rehabilitation services to alcoholics. This program was formerly operated separately from the normal line administration and counselors worked in county clinic settings, providing primarily treatment services to alcoholics. Under the present program counselors are working only with those alcoholics who require vocational counseling and rehabilitation services as distinct from treatment services.

Since 1966 the department has administered a special program that is 100 percent federally funded for the purpose of rehabilitating social security disability insurance beneficiaries. For fiscal year 1973–74 increased funding for the program is being made available from the social security trust fund program. The impact of the expansion will begin to be realized for budget year 1974–75. Since the program serves all disability groups, its impact will be reflected in varying degrees in all components of the basic vocational rehabilitation element of the rehabilitation of the disabled program.

The present state welfare programs for aid to aged, blind, and the totally disabled will be replac by the new supplemental security income progra authorized by Title XVI of the Social Security A In addition, 100 percent federal funds have been thorized to the states for the purpose of providi vocational rehabilitation services to the blind a totally disabled. In California this will result in substantial increase in services to the totally disab and blind individuals, who are welfare recipients. T department anticipates receiving some 12,000 referr per year. Like the social security trust fund progra this program serves all disability groups and affe all components of the basic vocational rehabilitati element. It is estimated that some 400 disabled in viduals will be rehabilitated in 1974–75. Because the length of time required to rehabilitate th severely disabled persons, the impact of this n program will not begin to be seen until 1975–76.

DEPARTMENT OF REHABILITATION—Continued

I. REHABILITATION OF THE DISABLED—Continued

Basic Vocational Rehabilitation Element

The department provides services to disabled people of or near working age, whose disability interferes with their obtaining or keeping employment. Rehabilitation counselors and other case-carrying personnel evaluate each individual who applies for services to determine whether the applicant meets the legal requirements for eligibility for services and would be likely to benefit from such services.

The counselor purchases diagnostic and evaluation services to assess the individual's capacities and limitations. Individual plans are developed jointly by the counselor and the disabled person, identifying specific services needed to enable the disabled person to reach a preestablished job objective. The counselor either develops such services through community resources or purchases them from the community.

The department delivers rehabilitation services through district and branch offices throughout the state, including vocational rehabilitation units in HRD service centers in disadvantaged areas. The department has also entered into a number of cooperative agreements with state and local agencies (correctional agencies, educational institutions, hospitals or mental health treatment facilities) assuring specialized services to particular target groups of the disabled population.

Table 2 shows the number of clients rehabilitated in 1972–73, the kinds of services provided and the types of disabilities represented by clients who received those services.

TABLE 2

Services Provided to Disabled Persons Rehabilitated in 1972–73

Type of disability	Number of people served and rehabilitated	Total services provided	Number of rehabilitation clients receiving service [1]

East Fresno	417	64
All Service Centers Projections:		
Fiscal year 1973–74	6,600	930
Fiscal year 1974–75	6,600	930

[1] Clients funded through service centers only.

The nature and severity of the disability of the handicapped person can influence the period of time required for rehabilitation. As demonstrated by Table 5, the average time from referral to rehabilitation ranges between 8.6 to 30.3 months for various disability groups, while the overall average period of time required is 16.6 months.

TABLE 5

Total and Average Number of Months From Referral to Rehabilitation for Persons Rehabilitated in 1972–73

Type of disability	Number of clients	Total months	Average num of months
Totals, All Clients	15,058	250,592	16.6

Mental retardation	997	23,252	23.3
Psychoses and neuroses	1,619	24,192	14.9

Most handicapped persons rehabilitated becor self-sustaining through employment in the competiti labor market. Others who are unable to compete the open labor market, are rehabilitated into no competitive employment: employment in a shelter setting, as an unpaid family worker or as a hon maker. Such noncompetitive work activity often fre a family member to engage in competitive emplo ment or eliminates the need for institutional or a tendant care or other services. The number of co petitive employment rehabilitations increased, wher as noncompetitive rehabilitations decreased duri 1972–73. Table 6 shows the type of employme achieved by disabled persons as a result of rehabilit tion services during 1972–73.

TABLE 6

Work Status of Persons Rehabilitated in 1972–73

Basic Vocational Rehabilitation Element—Continued

TABLE 7

Increased Average [1] Weekly Earnings as the Result of Rehabilitation for Persons Rehabilitated in 1972–73

Type of disability	Increases in average weekly earnings	Average weekly earnings Before rehabilitation	After rehabilitation
Totals, All Clients	$93.13	$18.63	$111.76
Legally blind	65.63	5.79	71.42
Other visual	93.50	11.38	104.88
Deaf	96.10	9.39	105.49
Other hearing	85.59	19.74	105.33
Physical disorders	105.62	7.95	113.57
Alcoholism	63.28	76.08	139.36
Drug	114.55	6.38	120.93
Behavior disorders	105.08	8.65	113.73
Mental retardation	67.09	1.49	68.58
Psychoses and neuroses	93.96	4.70	98.66

[1] Averages include 12,746 persons with no earnings before rehabilitation and 1,091 unpaid family workers and homemakers with no earnings after rehabilitation.

A major goal of the department's effort is to reduce or eliminate the disabled person's need for public support. Rehabilitation counselors develop close working relationships with the staff of county welfare departments in order to locate and serve welfare recipients who can benefit from rehabilitation services. The number and percentage of public assistance recipients served and rehabilitated during 1972–73 is shown in the following table. An increase of 28 percent over 1971–72 reflects the results of the department's policy to increase vocational rehabilitation services to welfare recipients.

TABLE 8

Distribution of Welfare Cases by Disability Groups—1972–73

Type of disability	Open caseload on June 30, 1973 Number	Percent	Rehabilitations Number	Percent
All Welfare Cases	17,547	100.0	4,486	100.0
Legally blind	892	5.1	264	5.9
Other visual	492	2.8	154	3.4
Deaf	336	1.9	126	2.8
Other hearing	175	1.0	47	1.0

a. *Physically Disabled*

The largest disability group, the physically disabled includes all individual except the mentally ill and those with visual or hearing disabilities, who have functional limitations as a result of injury or illness. Among this group are orthopedic impairments, amputations, respiratory diseases, cardiovascular and circulatory diseases and internal disorders. Individuals with catastrophic disabilities receive specialized services from counselors who have access to special consultation in the development of assistive devices required to compensate for the functional loss resulting from some severe disabilities.

Output	1972–73	1973–74	1974–75
Persons rehabilitated	6,188	7,940	8,400
Persons served	45,924	56,400	59,550
Input	**1972–73**	**1973–74**	**1974–75**
Expenditures	$20,085,593	$26,199,586	$28,298,045
Personnel man-years	548.8	784.9	784.9

b. *Psychoses and Neuroses*

Individuals who are vocationally handicapped as a result of psychotic or neurotic conditions are served primarily through cooperative agreements with community mental health programs. In areas where no cooperative programs exist the mentally ill are served through the department's field offices.

[a] Total annual benefits divided by fiscal year costs.

DEPARTMENT OF REHABILITATION—Continued

I. REHABILITATION OF THE DISABLED—Continued

Basic Vocational Rehabilitation Element—Continued

Output	1972–73	1973–74	1974–75
Persons rehabilitated	1,619	1,950	2,070
Persons served	13,928	14,400	15,000
Input			
Expenditures	$6,040,411	$7,878,922	$8,509,980
Personnel man-years	165	236	236

c. *Alcoholics*

Vocational rehabilitation services for alcoholics are provided primarily through a contractual agreement between the department and the Office of Alcohol Program Management, described under the cooperative rehabilitation services component. The program is explained in more detail under the cooperative rehabilitation services component.

Output	1972–73	1973–74	1974–75
Persons rehabilitated	2,467	1,000	1,100
Persons served	18,132	7,000	7,700
Input			
Expenditures	$7,317,245	$3,329,744	$3,437,610
Personnel man-years	199.9	95.4	95.4

d. *Mentally Retarded*

Mentally retarded individuals with vocational potential are served throughout the state regardless of referral source. Most of the mentally retarded are being served and rehabilitated through cooperative programs with school districts and with regional diagnostic centers for the developmentally disabled. The agreements with regional centers have been developed over the past year in response to the trend shifting responsibility for treatment of the mentally retarded from the state hospitals to the regional centers. Wherever cooperative agreements do not exist, the mentally retarded are served through the department's field offices.

Output	1972–73	1973–74	1974–75
Persons rehabilitated	997	1,150	1,220
Persons served	6,822	8,100	8,500
Input			
Expenditures	$2,897,433	$3,779,252	$4,081,947
Personnel man-years	79.2	113.2	113.2

e. *Behavioral Disorders*

Services to persons with behavioral (personality) disorders are provided through field offices statewide, rehabilitation units at HRD centers, youth and adult correctional facilities and parole and probation offices. The greatest number of clients are served through cooperative programs with the Department of Youth Authority and the Department of Corrections as well as with certain county probation departments.

Output	1972–73	1973–74	1974–
Persons rehabilitated	1,767	1,650	1,7
Persons served	10,338	10,000	10,3
Input			
Expenditures	$6,482,392	$8,455,569	$9,132,3
Personnel man-years	177.1	253.2	25

f. *Sensory Disabilities*

1. Hearing Impairments

Individuals with significant hearing impairmen receive services through field offices and cooperati program units throughout the state. Specialized cou selors who serve the deaf and the severely hard hearing are trained in the sign-language communic tion techniques required to counsel and plan with t deaf. The department has a program manager to rect services to the deaf and severely hard of heari and to provide consultation to communities and fie offices on ways to meet the unique needs of this d ability group.

Output (Deaf)	1972–73	1973–74	1974–7
Persons rehabilitated	441	550	5
Persons served	2,573	3,200	3,4
Input

2. Visual Impairments

Specialized counselors provide services through fiel offices throughout the state to the blind and other in dividuals with significant uncorrectable visual im pairments. The department also operates the Orienta tion Center for the Blind in Albany. This residentia program is described under the direct rehabilitatio services element. Some of the department's coopera tive programs with school districts and privatel operated community facilities also provide services t the blind and visually impaired. Counselor-teacher provide direct services to the blind and visually im paired in their homes and in the community, prepar ing them to enter a vocational rehabilitation progran later on or to function in a working role at home. A program manager for the blind coordinates service throughout the state and is developing policies tha will encourage the rehabilitation of blind and visuall impaired individuals into a wide variety of occupa tions.

g. *Cooperative Rehabilitation Services*

Under cooperative agreements the department operates vocational rehabilitation units in conjunction with a considerable variety of state and local agencies, including correctional programs in institutions. community mental health programs, and school and college districts. Usually such cooperative programs emphasize service to a particular disability group: the mentally ill, the mentally retarded, those with sensory disabilities, those with behavioral disorders, alcoholics or drug abusers. Nevertheless these programs also serve some individuals from other disability groups, including the physically handicapped.

The combined cooperative programs accounted for 21 percent of the department's 15,058 rehabilitations during fiscal year 1972–73. Table 10 shows the distribution of individuals served and rehabilitated among the various types of cooperative programs.

TABLE 10
Clients Served and Rehabilitated in Cooperative Programs during Fiscal Year 1972–73 with Projections for Fiscal Years 1973–74 and 1974–75

Type of cooperative program	Clients served	Clients rehabilitated
Fiscal Year 1972–73		
All cooperative programs	38.192	5.537
Alcoholism programs	17.422	2,365
Drug programs	253	12
Mentally ill programs	5.174	821
School programs	6.749	857
Public offender programs	7,659	1,337
Other cooperative programs	935	145
All Cooperative Programs' Projections:[1]		
Fiscal year 1973–74	27,665	4,215
Fiscal year 1974–75	30.300	4,680

[1] Heavy decline in cooperative program projections mostly due to reduction in the size of the cooperative alcoholism programs.

1. *Cooperative School Programs*

The department has cooperative agreements with four types of school systems: high schools, adult schools, community colleges, and schools serving the deaf. A majority of clients in high school programs are mentally retarded, although all types of disabilities are served.

Through high school programs the department is able to reach handicapped persons at a young age and provide services which enable them to enter employment upon graduation. Through adult education programs rehabilitation services are provided onsite at centrally located vocational training centers. Handicapped students attending junior colleges throughout the state are served by rehabilitation counselors under cooperative agreements with junior college districts. At the School for the Deaf in Berkeley, the Downey Unified School District and the California State University at Northridge the department has cooperative programs emphasizing services to the deaf and hard of hearing.

Output	1972–73	1973–74	1974–75
Persons rehabilitated	857	920	960
Persons served	6,749	7,000	7,350
Input	**1972–73**	**1973–74**	**1974–75**
Expenditures	($2,253,935)	($2,774,787)	($2,864,675)
Personnel man-years	(72.2)	(79.5)	(79.5)

2. *Cooperative Programs for the Psychotic and Neurotic*

The department's cooperative programs with community mental health agencies account for most of the services provided to the mentally ill. This cooperative effort started some five years ago with state institutions for the mentally ill and has been shifting in recent years to community agencies, following the increased emphasis on treatment of mental illness in the local community.

Output	1972–73	1973–74	1974–75
Persons rehabilitated	821	800	800
Persons served	5,174	5,000	5,000
Input	**1972–73**	**1973–74**	**1974–75**
Expenditures	($3,000,870)	($4,047,436)	($4,180.270)
Personnel man-years	(79)	(128.2)	(128.2)

3. *Cooperative Programs for Alcoholics*

Since July 1, 1973 the department has been providing vocational rehabilitation services to alcoholics directly through its field offices rather than out of clinic settings in the community. Funding for these programs is generated by contract with the Office of Alcohol Program Management, Department of Health, Health and Welfare Agency. Under the contract, local written agreements between departmental field administrators and county program coordinators specify how vocational rehabilitation services are to be coordinated with other treatment and adjunctive services in the community. In accordance with the county alcoholism plan, these services provide a comprehensive program and plan of services for the individual handicapped by alcoholism. The department through its rehabilitation counselors concentrates on the vocational needs of the alcoholic. The output for this program will be lower than previous years because part of the program has been transferred to the Office of Alcohol Program Management and the treatment services have been taken over by the counties. The output will be a more accurate reflection, however, of the results of vocational rehabilitation services in contributing to the overall rehabilitation of the alcoholic.

DEPARTMENT OF REHABILITATION—Continued

I. REHABILITATION OF THE DISABLED—Continued

Basic Vocational Rehabilitation Element—Continued

Output	1972–73	1973–74	1974–75

Expenditures	($7,091,975)	($2,733,948)	($2,741,138)
Personnel man-years	(80.6)	(70.7)	(70.7)

4. *Cooperative Programs for Public Offenders*

Under cooperative agreement with the Departments of Youth Authority and Corrections, the department provides rehabilitation services both in correctional institutions and to recent parolees in the community. Many public offenders are served on the basis of behavioral disorders, but the department gives higher priority for services to those public offenders who have either physical or psychiatric disabilities representing a significant handicap to employment. The department has a program manager who coordinates services provided within the institutions with those provided in the field. Some public offenders are served through cooperative agreements with county probation departments.

Output	1972–73	1973–74	1974–75
Persons rehabilitated	1,337	1,400	1,550
Persons served	7,659	7,700	8,525

Direct Rehabilitation Services

Orientation Center

The vocational counseling, training and job placement services provided through the basic vocational rehabilitation element are supplemented by the Orientation Center for the Blind in Albany. This residential program provides orientation services to the newly blind and teaches them skills in activities of daily living, mobility and special communications skills required for them to be able to function independently in their homes, in the community and on a job.

Input	1972–73	1973–74	1974–75
Expenditures	$558,249	$641,645	$652,011
Personnel man-years	39.4	39.9	39.9

Counselor-teachers

Counselor-teachers evaluate the needs of blind persons in the community; help them through counseling and guidance toward psychological, physical and pre-vocational adjustment; teach them skills such a braille, typing, mobility, grooming and homemaking and arrange for medical and other needed service The purpose of these services is to help the blind t deal effectively with their environment and prepar them to become more active in the home and engag in vocational training and ultimately in employment Blind persons whose potential is limited to that o homemaker or other noncompetitive employment ma receive direct training and counseling from coun selor-teachers. Others with potential for competitiv employment may be served jointly by counselor-teach ers and rehabilitation counselors.

Output	1972–73	1973–74	1974–75
Persons rehabilitated	203	210	217
Persons served	561	580	60

Input	1972–73	1973–74	1974–75

Personnel man-years	14.5	14.7	14.8

DEPARTMENT OF REHABILITATION—Continued

I. REHABILITATION OF THE DISABLED—Continued

Other Rehabilitation Services

Training Center for the Handicapped

The training center for the handicapped develops specialized vocational training programs for the blind, visually handicapped and severely disabled. The center offers instruction in small engine technology and garment construction and alterations. Graduates from training receive from the center assistance in obtaining employment either in competitive industry or in the establishment of a self-employment venture. The center also provides intensive followup to resolve initial employment problems. With instruction provided on a one-to-one basis, trainees are permitted to progress at their own pace. If needed, special technical equipment is developed to enable the trainee to learn skills and perform job requirements of industry at the same quality and quantity levels as those required of nondisabled persons.

Output	1972–73	1973–74	1974–75
Persons placed into employment	10	15	16
Persons trained	41	42	43
Input	**1972–73**	**1973–74**	**1974–75**
Expenditures	$141,434	$170,781	$173,041
Personnel man-years	6.1	6.7	6.7

Daily Living

Counselor-teachers not only provide vocational services to the blind who have some vocational potential, but they also serve those among the blind and deaf-blind who have no vocational potential but do have a need for skills that allow for more independent living. Such services are given in the home, in hospitals and in institutions. Training includes communication skills, independent travel, personal grooming and home care. Such training, supported by counseling, enables the disabled person to adjust to the effects of his disability.

Whereas counselor-teacher services to severely visually disabled adults with vocational potential is sustained by state-federal vocational rehabilitation funds, this daily-living component of counselor-teacher services to those without vocational potential is supported through a contract with the Department of Social Welfare.

Output	1972–73	1973–74	1974–75
Persons served	1,460	1,520	1,580
Input	**1972–73**	**1973–74**	**1974–75**
Expenditures	$303,853	$335,910	$336,388
Personnel man-years	15.6	14.4	14.3

Services to Nondepartmental Clients

Whenever enrollees in manpower development and training act programs encounter health problems that interfere with their participation in the training program, rehabilitation counselors provide minor medical services. These individuals are not departmental clients, but if the severity of the medical problem is great enough, the MDTA enrollee may be evaluated and be provided vocational rehabilitation services under the basic vocational rehabilitation element.

Output	1972–73	1973–74	1974–75
Persons served	2,051	2,880	2,995
Input	**1972–73**	**1973–74**	**1974–75**
Expenditures	$125,166	$244,816	$254,608

Another group of nondepartmental clients who receive services through the department are blind individuals who need reader services to participate in college programs. Such individuals may not have vocational goals in mind, but are attempting to further their education. Rehabilitation counselors authorize the reader services.

Input	1972–73	1973–74	1974–75
Expenditures	$62,233	$92,555	$96,257

II. NONREHABILITATIVE SERVICES

Need

In addition to the training and placement into remunerative employment of the blind and severely visually handicapped, the department also provides training to blind persons leading to self-employment and the operation of vending stands and food service facilities established in private and public buildings.

Business Enterprise Element

Objective

The department's business enterprise program for the blind provides comprehensive training and supervision in the operation of vending stands, snackbars and cafeterias in public and private buildings.

The staff of the program promotes and develops new locations for vending and food service operations. Services include the design and installation for new operations, remodeling of older facilities, ongoing supervision of operators, sanitation inspection, guidance to operators on costs and prices, general business services and coordination of the placement of blind operators and disabled employees of operators.

Blind persons who have been trained by the department are selected on a competitive basis to operate the enterprises. They retain their net income, except for a percentage prescribed by law, which is returned to set-aside funds for the establishment of new enterprises and the maintenance of equipment in existing enterprises.

An important part of the program is the supervision of training for potential operators. During 1972–73 the department improved coordination b tween the business enterprise program and field op ations of the vocational rehabilitation program respect to the certification, selection and placeme of operator trainees.

Business enterprise program staff are supported state and federal funds. The cost of maintenance a establishment of locations is funded through the bu ness enterprise program set-aside funds.

Output	1972–73	1973–74	1974–7
Food service locations (June 30th)	306	325	3

Personnel man-years	30.9	32.5	32

III. DEVELOPMENT OF PRIVATE SECTOR REHABILITATION RESOURCES

Need

Most services required to rehabilitate disabled individuals are purchased by the department from providers and vendors of rehabilitation services within the community. Many of the basic rehabilitation services which are necessary to evaluate a physically or mentally impaired person's vocational handicap or to help him reduce that handicap are provided by public and private nonprofit community rehabilitation facilities. Many of the problems that interfere with a handicapped person's ability to prepare for employment can be treated only in a comprehensive rehabilitation facility or rehabilitation workshop which has highly trained staff and specialized facilities.

Objectives

Through this program, the department inventories the rehabilitation facility services available throughout the state and publishes the *California State Plan for Rehabilitation Facilities.* This plan provides the framework for the department's Rehabilitation Fa cilities Development Section to work cooperativel with local government and charitable organization toward the development and improvement of rehabili tation facility services where they are needed to serv clients of the department and other handicapped peo ple at the local community level. The department als sets standards for service provided by such facilities inspects and certifies programs which meet standards and assists all agencies of state government in estab lishing fee schedules for service purchased from reha bilitation facilities.

Authority

Federal—Rehabilitation Act of 1973 (Public Law 93-112).

Technical Consultation to Rehabilitation Facilities

The department's Rehabilitation Facilities Development Section, through its staff of rehabilitation facilities specialists and technical consultants provides assistance to local community rehabilitation facilities including workshops. The section provides assistance in the areas of general management, program planning, industrial engineering, accounting, and various other technical areas. This technical consultation enables local program administrators to integrate what is essentially a rehabilitation service program with a production manufacturing operation to create a setting in which realistic evaluation, work adjustment, and vocational training of disabled people can take place. The majority of this technical consultation staff have also prepared instructional publications in the areas of workshop accounting, safety, production methods, facility planning, contract bidding and costing, and public relations which are widely used by community rehabilitation facilities. This consultation has enabled 108 relatively small organizations to provide a high level of service to a substantial number of handicapped persons throughout the state and to increase their programs substantially over the past year. The major effort during the coming year will be to maintain this same high level of service and to help community rehabilitation facilities prepare for substantial program changes that will be caused by the federalization of the aid to the blind and aid to the disabled programs and by the department's intensified effort to serve more severely disabled individuals.

Output	1972–73	1973–74	1974–75
Average daily caseload in workshops	9,414	10,000	11,000
Input	**1972–73**	**1973–74**	**1974–75**
Expenditures	$297,809	$355,113	$369,764
Personnel man-years	13.2	15.9	15.9

Grant Administration

The department administers a federally funded establishment grant program for community rehabilitation facilities and also coordinates federal grant programs in the area of facility construction, improvement, training, and related areas. These grants are administered within the framework of the *California State Plan for Rehabilitation Facilities*. Most of the grant programs are administered on the basis of reimbursement for each individual expenditure made by the facility under an authorized project budget. This type of detailed grant administration requires substantial assistance from the department's Facilities Development Section.

Output	1972–73	1973–74	1974–75
Number of grants awarded by department	52	55	60

Personnel man-years	3.3	4	4

* Includes grants awarded by the department plus federal grants administered by the department but not included in the state budget.

Vocational Training Facilities Development

On both the state and regional levels the department provides staff members to develop information for the use of field office staff regarding community training facilities and labor market demands. Better informed counselors are able to provide better counseling services which are more likely to lead to rehabilitation of the disabled person. The department is developing a system for more adequately evaluating the results obtained from services purchased from various vocational training facilities in order to assure the most effective use of departmental resources.

Input	1972–73	1973–74	1974–75

DEPARTMENT OF REHABILITATION—Continued

IV. DISABILITY DETERMINATION PROGRAM

Need

Many persons of employable age cannot work because of serious disability. Those who are recent wage earners need a replacement of wages which is supplied by the disability provisions under Title II of the Social Security Act. Those who are not recent wage earners may receive supplemental security income benefits which, under Title XVI of the amended Social Security Act, replace the state welfare program for aid to the blind, aid to the disabled and old age security with a federal program.

Objectives

The purpose of the disability determination program is to adjudicate whether or not a person is disabled, as defined by law, for the purpose of receiving either social security disability insurance benefits or supplemental security income benefits (only for the disabled, not the aged). The program refers the majority of individuals determined to be disabled to the rehabilitation of the disabled program to be considered for rehabilitation services. On October 1, 1973, this program was transferred to the Health and Welfare Agency, Department of Health.

Output	1972–73	1973–74 First quarter	1974–75

Authority

Social Security Act, as amended by Public Law 92-603 (1972).

General Provisions

Disabled persons file claims for social security i surance benefits, aid to the blind or aid to the disabl at social security district offices. Federal claims rep sentatives and service representatives interview a plicants, gather basic information and forward t applications to disability determination offices. Tea made up of physicians and disability determinati counselors adjudicate the claims. It is estimated th approximately 18 percent of the applications f social security disability insurance will require pu chase of special medical examinations, whereas abo 36 percent of applications for aid to the disabled aid to the blind may require the purchase of medic examinations from community physicians.

A return to work or an improvement in the disable person's medical condition may result in a terminati of benefits under either the social security disabili insurance program or the supplemental security i come program. In the case of aid to the disabled an aid to the blind, earnings from employment may r sult in a reduction of benefits and if such earnin exceed a maximum monthly amount allowed, benefi may be suspended. If such substantial earnings co tinue for nine months, supplemental security incon benefits are ceased. In some cases, social security di ability beneficiaries are permitted a trial work perio during which they can continue receiving benefits i spite of earnings, provided their return to employme is not the result of an improvement in their medic condition. The physicians and disability determinatio counselors of the disability determination program d termine whether benefits should be continued o terminated, whenever the issue arises. Most individu als allowed benefits under either program will b referred to the department's rehabilitation of the di abled program to be considered for vocational reha bilitation services.

V. DEPARTMENTAL ADMINISTRATION

The purpose of the departmental administration program is to provide executive direction, research, management information, planning, program evaluation, policy determination and management and staff services for the operation of all department programs.

Executive Office

The executive office includes the director, the chie deputy director and four staff assistants; a lega counsel, administrative assistant, assistant director fo communications and the information officer.

DEPARTMENT OF REHABILITATION—Continued

V. DEPARTMENTAL ADMINISTRATION—Continued

Input	1972–73	1973–74	1974–75
Expenditures	$163,312	$306,893	$269,898
Personnel man-years	6.2	10.5	10.5

Management Services

General administrative services are provided to furnish the necessary logistical support and funds to permit operating units to function effectively, under the direction of the deputy director, management services. Such support includes an administrative services unit responsible for budget preparation and control, accounting, management analysis and departmental business services; a personnel unit providing personnel management services, including recruitment, placement and classification of staff; a data processing unit furnishing automated data processing services to other departmental programs; auditing; the department's affirmative action program; a staff development unit; and supervision of the business enterprise program, which is discussed in Program II.

Input	1972–73	1973–74	1974–75
Expenditures	$1,762,428	$2,223,902	$2,195,471
Personnel man-years	121.5	131.5	131.5

Field Support Services

The deputy director, field support services, directs this unit in providing the research, consultation, and statistical data required by operating units and program planners and evaluators in reviewing programs and planning program development.

Staff is also provided to plan for the development of a comprehensive vocational rehabilitation program including orderly development of services (public or private) to make vocational rehabilitation services available to more handicapped individuals. A formal planning system is being developed by the department in order to better assess present and projected vocational rehabilitation needs in the community, clarify departmental objectives and priorities in respect to the meeting of those needs, develop and implement both short- and long-term plans to meet objectives and exercise a leadership role that will impact federal planning for rehabilitation.

A Program Standards, Evaluation and Consultation Section continuously analyzes implemented programs, comparing achievements with previously set objectives as a basis for program planning and management decisions. Program analysis, in ongoing programs, is designed to evaluate the effectiveness of each program relative to projected output and cost and to determine ways of improving the delivery of services to disabled people. In addition, special studies are conducted in problem areas designated by administration. Program analysis is also evaluating alternative methods for meeting identifiable program needs and recommends the most effective alternative.

Program review reports enable departmental administration to identify the need for program development or modifications, policy or procedural changes and staff development.

Input	1972–73	1973–74	1974–75
Expenditures	$907,548	$1,043,020	$1,072,728
Personnel man-years	51.5	58.8	58.7

Field Services

The line administration for all operating programs in the department is exercised under the direction of the deputy director, field services, his assistant, and four regional administrators. Included in this element are program managers with staff responsibility for special programs to specific disability groups or programs based upon cooperative agreements with third parties or other agencies. During the 1972–73 fiscal year program managers for both the blind and the deaf were added for field services.

Input	1972–73	1973–74	1974–75
Expenditures	$704,186	$1,110,220	$1,150,610
Personnel man-years	36.2	56.9	56.9

DEPARTMENT OF BENEFIT PAYMENTS

Departmental Objectives

In fiscal year 1973–74, a plan was submitted to the California Legislature for the reorganization of the Health and Welfare Agency's functions which related to the collection and disbursement of money and the related auditing functions. This plan provided for the consolidation of these functions residing in three major departments—Social Welfare, Human Resources Development, and Health—into a single Department of Benefit Payments. In addition, it provided for the welfare payment program, previously administered by the Department of Social Welfare, to be placed in this new department.

Enactment of Assembly Bill 1950 (Chapter 1212, Statutes of 1973) authorized the establishment of the Department of Benefit Payments effective July 1, 1974. The intent of the legislation in forming this new department was to consolidate fiscal control functions into the Department of Benefit Payments with program control and the authority for policy decisions remaining with the resident program department. These program departments will concentrate on program planning and execution while the Department of Benefit Payments, with the exception of the welfare payment program, will give primary attention to financial matters, thus enabling its staff to better specialize in collection, accounting and accounting systems, auditing, claims payment, and payment systems evaluation functions. The goals of the new department are to:

1. Provide faster payments with fewer errors to the unemployed, the disabled, welfare recipients, health care providers and other vendors of benefits under health and welfare programs.
2. Improve the economy and efficiency of the state's collection of taxes, and recovery of amounts due, owing or collectible as the result of the foregoing payments.
3. Improve the state's ability to detect and prevent fraud and administrative error in benefit payment program delivery systems.
4. Improve checks and balances within the payment programs presently administered by the Health and Welfare Agency.

The major responsibilities of the Department of Benefit Payments are:

1. Audit and collection of program funds.
2. Administration of the welfare payment program.
3. Review and evaluation of payment delivery systems.
4. Payment and accounting of program funds.

In forming the new department, all the function positions and funds associated with the State Department of Social Welfare have been assigned to the State Department of Benefit Payments and will serve as its nucleus. Combined with this base component will be a Department of Health component and a Employment Development Department, formerly Human Resources Development, component. The audit, collection, and claims payment activities of the three components will be consolidated into unified work units. In addition, the administrative functions that support these activities will be consolidated for greater efficiency and program control.

The department will be organized into six primary units: audits and collections will administer the audit and collection activities for most of the agency's programs; operations review will provide top management with an objective and responsive review of agency payment systems, departmental organizational development and internal controls; welfare program operations will be charged with administering the welfare payment systems and program evaluation; administrative and financial services will administer the department's claims audit and control program and provide the necessary support to departmental staff and operations; government and community relations will administer the department's government and community relations efforts and represent the department before the legislative, government and public bodies; legal affairs will have the responsibility for the conduct of fair hearings and will assure the department's programs and activities are consistent with state and federal law, and the department's interests are properly represented before the courts.

As experience is gathered during the first year of operation of the Department of Benefit Payments there will be a continuing review performed which will lead to further consolidation or restructuring of functions with the goal of maximum effectiveness and efficiency of operations. The chief aim of the new department is to provide the Health and Welfare Agency with a single unified organization, with money management as its theme of operation.

Highlights of Major Program Changes

This new department will be organized during fiscal year 1973–74. By July 1, 1974, it is planned that an Employment Development Department, formerly Department of Human Resources Development, component (1,483.3 man-years) will be transferred to the new department along with a Department of Health component (164 man-years; $2,025,764 General Fund). In addition to the positions identified for transfer from the Department of Health component, two and a half positions are requested for the house counsel to perform legal activities associated with a growing backlog of audit appeals received from Medi-Cal providers.

The budget impact of PL 92-603 (HRI) and PL 93-66 (effective 1-1-74) covering over 500,000 recipients eligible under the Old Age Security, Aid to the Blind and Aid to the Totally Disabled is reflected in these programs of both the 1973–74 (6 months) and 1974–75 fiscal years.

On January 1, 1974, the new Federal Adult Program under Title XVI of the Social Security Act became effective as a result of the enactment of Public Law 92-603 (HR-1). In anticipation of this new program, the Legislature enacted AB 425 (Chapter 1002, Statutes of 1973) which results in the transfer of the disability review function from the Department of

DEPARTMENT OF BENEFIT PAYMENTS—Continued

Highlights of Major Program Changes—Continued

Benefit Payments to the Department of Health (64 man-years; $646,391 General Fund). In addition, the department will phase out 35 permanent positions and delete contract funds equivalent to 78 temporary help positions in anticipation of reduced adult related efforts and appeals levels. 18 of 22 other positions were reassigned to the quality control function to assist in implementing federal HEW Program Instruction 74-6 relating to federal regulations parts 205, 206, and 233; two were reassigned within the budget and controls branch to monitor (county) fiscal error rates, and one each to child support and food stamp management (outreach) efforts. Other adult aids related positions will be needed to administer and monitor the State-supported Supplemental Program (SSP) required under HR-1.

In addition, AB 134 (Chapter 1216, Statutes of 1973) established a state administered responsible relative program. Under this program certain relatives of adult recipients who meet specified income standards are required to make payments to the state to offset grants to their relatives. Nineteen new positions are requested to operate and administer this state responsible relative program.

A "second step" of welfare reform was initiated in fiscal year 1973–74. This "second step" will deal with food stamp abuse, require AFDC recipients to file greatly simplified but more frequent reports on income, and increase efforts to obtain child support from absent parents. Four new positions are requested to further implement this "second step" of welfare reform in the Food Stamp Program. The positions will permit food stamp management to respond to the critical need for Food Stamp Program simplification and a comprehensive review of food stamp county operations.

I. PAYMENTS SYSTEMS EVALUATION

Need

The separation of program services and payment delivery resulting from the creation of the new Department of Benefit Payments affords an opportunity to review existing payment systems to determine if they are error free or as fast and efficient as they might be. An objective review and evaluation of these systems is needed.

Objectives

To determine the adequacy and effectiveness of the payment systems under the control of the new department.

To determine whether the payment systems are consistent and compatible.

To determine if adequate fiscal accountability exists.

Authority

Welfare and Institutions Code, Section 10552.5.

General Description

During the departmental reviews conducted in anticipation of the creation of the new Department of Benefit Payments, it was ascertained that the exploration of closer relationships between existing benefit payment systems could (1) minimize any duplication of effort which might exist between the separate payment systems, (2) enhance the state's ability to effectively control and account for the expenditure of program benefit and subvention funds, and (3) increase the level of service to the recipients and beneficiaries of the benefit programs. It was also recognized that the Department of Benefit Payments should have a strong role in assuring the adequacy, effectiveness and efficiency of the internal systems and procedures of the program departments as they relate to the various benefit payment activities.

A payment systems evaluation unit has been established within the Department of Benefit Payments

DEPARTMENT OF BENEFIT PAYMENTS—Continued

I. PAYMENTS SYSTEMS EVALUATION—Continued

to achieve these objectives. The unit will conduct studies of the payment systems on an on-going basis. These studies will involve an indepth review of the entire payment process from the time eligibility is determined, through the actual payment, to the final audit of expenditures. Upon completion of each study, payment systems evaluation will submit a written report of findings and recommendations to progra management. Program managers will assist the pa ment systems evaluation unit during the conduct these studies and shall report courses of action a progress made in implementing any changes resulti from the study.

Payment Systems Evaluation	–	–	5	–	–	$86,511
General Fund				–	–	49,389
Federal funds				–	–	–
Reimbursements				–	–	37,122

II. AUDITS AND COLLECTIONS

Need

The Health and Welfare Agency is responsible for providing the residents of California a wide variety of services. These service programs are funded through a mixture of federal, state, local and private sources. In order to assure that the service programs are on a sound financial basis, it is necessary to audit, collect, and account for the funds that support the program. Without such an ability, the programs could be subject to financial abuse. The Department of Benefit Payments conducts audits and collections for the following programs: Disability Insurance, Unemployment Insurance, Classified School Employees Trust Fund, Personal Income Tax Withholding (PIT), and various health programs.

Objectives

To assure that all programs whose audit and collection functions are performed by the Department of Benefit Payments are on a sound financial basis.

To review, and when feasible, consolidate audit, collection, and support activities within the audits and collection division of this department.

Authority

Welfare and Institutions Code, Sections 1410 5712.

Social Security Act Sections 1814(b), 1851(u).

Health and Welfare Code, Sections 3279, 3287.

Unemployment and Insurance Code, Sections 108 1092.

Regulation 17002.5, Title 18 of California Admi istrative Code.

General Description

The Department of Benefit Payments is charge with the responsibility of conducting highly difficul and complex audits and collection activities. The de partment has focused this activity within its audit and collection division. Most audit and collection ac tivities are performed in field offices. Employment ta operations are conducted from four regional and 3 district offices; health and welfare operations are con ducted from one headquarters and two regional offices. All support activities and some audit and collectio activities are centralized in the headquarters office.

Employment Development Component

Disability Insurance

General Description

All employers subject to this program are required by law to submit quarterly tax returns stating the wages paid to each worker for employment insured under disability insurance provisions. When monthly contributions exceed $50, returns are submitted monthly. The cost to the worker is one percent of the first $9,000 of wages paid each calendar year. For employers and self-insured individuals who elect disability insurance coverage, the annual cost is 1.25

DEPARTMENT OF BENEFIT PAYMENTS—Continued

II. AUDITS AND COLLECTIONS—Continued

Employment Development Component—Continued

percent of $9,000. Contributions are used for payment of benefits to disabled workers. The primary activities of the Department of Benefit Payments (DBP) in the program are audits and collections, accounting relative to such collections and enforcement of delinquent accounts. Payment of Disability Insurance (DI) benefits will be made by the Employment Development Department.

Output	1972–73	1973–74	1974–75
Number of subject employers at midyear (joint UI and DI)	444,036	452,000	456,000
Number of subject employers at midyear (DI only)	68,742	70,000	71,300
Tax revenue (thousands)	$384,000	$419,000	$440,000

Unemployment Insurance

General Description

Each employer pays an unemployment insurance (UI) contribution on the first $4,200 of wages per employee. The contribution rate is determined by his employment experience and by the financial condition of the Unemployment Insurance Fund. The condition of the fund determines whether employers are taxed on a "high" schedule, which ranges from 0.7 percent to 3.1 percent or on a "low" schedule which ranges from 0 percent to 3.1 percent. In addition to the normal tax rate, all employers pay an additional tax for the balancing account, which ranges from a minimum of 0.1 percent to a maximum of 1 percent and is determined by the relationship of the charges and the credits to the balancing account. Contributions credited to the balancing account are used to pay extended duration benefits to unemployed workers and to offset employer's negative reserve balances and nonchargeable benefit payments. The primary activities of the Department of Benefit Payments (DBP) in this program are audit, tax collection, accounting relative to such collection, and enforcement of delinquent accounts. Payment of Unemployment Insurance (UI) benefits will be made by the Employment Development Department.

Output	1972–73	1973–74	1974–75
Number of subject employers at midyear	375,294	382,900	384,700
Tax revenue (thousands)	$735,338	$804,700	$846,000

Classified School Employees Trust Fund

General Description

Classified school employees were extended unemployment insurance coverage effective January 1, 1972 at which time liability for collections commenced. Initial benefit payments were made through the Employment Development Department as of August 6, 1972 as a result of accumulated wage credits for the first calendar quarter. School employers contribute to the Classified School Employee Fund to reimburse the Unemployment Fund on a dollar-for-dollar basis for unemployment insurance benefits paid out to eligible classified school employees. In addition, contributions are made to pay the administrative cost of operating this special fund which includes costs required to reimburse the Superintendent of Public Instruction and/or his designed representatives to carry out their legal responsibilities. The primary activities of the Department of Benefit Payments in this program are audit and collection, accounting relative to such collections, enforcement of delinquent accounts, and reimbursement of the Unemployment Fund. Payment of unemployment insurance (UI) benefits to individual school employees will be made by the Employment Development Department.

Output	1972–73	1973–74	1974–75
Number of subject school districts at midyear	1,197	1,200	1,200
Number of covered classified school employees	112,000	112,000	112,000
Revenue	$11,671,982	$5,252,853	$5,650,000

Personal Income Tax Withholding (PIT)

All employers subject to this program are required by law to withhold from their employees, report and pay personal income taxes to the State of California. Returns are filed monthly when the monthly withholding is over $100.

Tax schedules are prepared by the Franchise Tax Board. Contributions are collected by Benefit Payments in accordance with these schedules. Revenues collected are transferred to the State's General Fund.

Output	1972–73	1973–74	1974–75
Number of subject employers at midyear	450,000	455,000	462,000
Tax revenue (thousands)	$1,393,802	$1,500,000	$1,600,000

Health Component

Health Payments and Collections

The Department of Benefit Payments has the responsibility for the fiscal audits of Medi-Cal, Short-Doyle and all health subvention programs. The programs are also evaluated in terms of compliance with state laws and regulations. Audit reports are issued and are the basis of final settlements. The following agencies accept and rely upon the audit report: State Controller; Department of Finance; Office of the Auditor General; Federal Regional Auditor; U.S. Department of Health, Education, and Welfare; county or city auditors; and hospital administrators.

Besides the normal collection activity associated with these audits, the Department of Benefit Payments is responsible for identifying and collecting revenue due the Medi-Cal and Welfare Payment programs via third party liability, health insurance coverage, estate probate settlements, and from eligible beneficiaries.

Output

Actual accomplishments for 1972–73 fiscal ye were as follows:

III. WELFARE PROGRAM OPERATIONS

Need

Many California residents are too young, too old, or too disabled to support themselves and their subsistence needs cannot be fully met by their families. Without the money available through the welfare payment program, these persons would be forced to live under conditions hazardous to themselves and of grave concern to their communities.

Authority

Welfare and Institutions Code, Division 9, "Public Social Services", Parts 1, 2, 3, 4, and 6.

Objectives

To provide on behalf of the general public and within the limits of public resources, reasonable financial assistance to eligible needy and dependent families, the blind, the disabled, and the aged, and to help able recipients become self-supporting.

General Description

On January 1, 1974, the statewide welfare payment program will experience two federally required changes having major impact on California: First, the new federally administered adult program under Title XVI of the Social Security Act becomes effective as a result of the enactment of PL 92-603 (HR-1). This program replaces the Old Age Security (OAS), Aid to the Blind (AB), and Aid to the Permanentl and Totally Disabled (ATD) programs; and secon there will be a joint effort to reduce the error ra in AFDC grant and eligibility determinations und the terms of federal HEW Program Instruction 74 (Fed. Regulations Part 205, 206 and 233).

Under the terms of HR-1, the adult program wi consist of an SSI (federally funded) and an SS (state funded) component. The state has chosen t contract with the federal government to administe the state supplementary payment (SSP). The pay ment level in the SSP program will be in accordanc with AB 134 (Chapter 1216, Statutes of 1973).

Under the terms of this contract, recipients will re ceive one check from the federal government whic will include both the federal social security increme and a clearly identified state supplementary payme The state will monitor the federal payment operatio to determine whether, under the supplemental pr gram, state moneys are accurately and properly ex pended and recipients' payments are promptl received.

The payment to children (AFDC) and food stam elements of the welfare payment program will con tinue to be administered by each county in accord ance with regulations, standards, and procedures se by the department as authorized by law. In th counties, eligibility workers accept applications, in vestigate and establish whether eligibility exists, com

* Includes request for 2.5 man-years ($30,050 General Fund, $18,418 federal funds) for Medi-Cal recovery. Does not include 23 man-years ($283,986 General Fund, $126,473 reimbursement) allocated to the Claims Audit and Control Program and 4 man-years ($49,389 General Fund, $21,994 reimbursement) allocated to the Payment Systems Evaluation Program.

DEPARTMENT OF BENEFIT PAYMENTS—Continued

III. WELFARE PROGRAM OPERATIONS—Continued

pute the amount to which eligible persons and families are entitled by law, and authorize payments to be issued. The county submits to the department monthly and quarterly reports of caseload activity; it also claims reimbursement for the cost of assistance from matching state and federal funds.

Within Welfare Program Operations, increasing attention will focus on the "second step" of welfare reform and upon the program evaluation components of the county-administered payment to children (AFDC) and food stamp program elements. The "second step" in the reform program will seek means to curb food stamp abuses, require AFDC recipients to file more frequent but simplified reports on income, and increase efforts to obtain child support from absent parents. Emphasis in the AFDC program evaluation component is especially necessary because, as of January 1, 1974, federal participation in aid payments will be reduced if error rates exceed federally specified statewide tolerance levels. The state will similarly assess the federal program administration of the state supplementary payment for adults.

Major Activities Within Welfare Program Operations

Fair Hearings

In order to insure due process of law, the department provides an administrative means for redress of grievances. A fair hearing will be scheduled for any applicant or recipient filing a request in the proper manner. Typically a fair hearing is requested when an application for financial or medical assistance is denied or not acted upon with reasonable promptness, or when county action results in the suspension, reduction or termination of assistance or services. Fair hearings are mandated by Federal Regulation 45 CFR 205.10 and Welfare and Institutions Code Division 9, Chapter 7, Sections 10950 through 10965.

Prompt and adequate fair hearings require the coordinated efforts of three different divisions of the department. Requests for fair hearings are received by the department's mail control unit within Business Services. Requests containing issues which can be resolved without a hearing are referred to Public Inquiry and Response for action. In all other cases and where an attempt at resolution by Public Inquiry and Response fails a copy of the request is forwarded to three other organizational units. The Business Services' case processing section establishes a case file, begins the collection of appropriate data for inclusion, and routes the case to Computer Services for calendaring. The Office of the Chief Referee begins the scheduling process by assigning the case to a referee. For each case which can be closed without a hearing, case processing sends out all appropriate notifications and forwards the case record to records management section for filing. Hearings are conducted by departmental referees or referees of the Office of Administrative Hearings.

After the hearing the referee drafts a proposed decision. In the majority of AFDC, food stamp and Medi-Cal cases, decisions are individually prepared since the scope of the hearing and breadth of the issues are such as to prevent the use of "worksheet" decisions such as are utilized in responsible relative cases. The draft of the proposed decision is typed by Business Services' specialized office services section, reviewed by supervisory and review staff within the Office of the Chief Referee, and forwarded to the director for review and adoption. Notices of adopted decisions are sent to the recipient or applicant, the county, and other appropriate agencies. At this point, Public Inquiry and Response reviews each case to assure compliance. Final processing is completed within the Office of the Chief Referee, Computer Services and the case processing section, and the case records are forwarded to records management for filing.

Program or Workload Changes

During fiscal year 1973–74, the department completed the application of electronic data processing to major elements of the fair hearings process (case calendaring, status trace of requests, referee achievement standards, and performance reporting). Continued refinement will enable the department to effectively respond to all but the widest fluctuations in monthly caseload input and to strive for increased referee production.

During fiscal year 1974–75, the department anticipates 45,500 filings, which will require the efforts of 65 referee units. The department proposes to field 38 referee units from its own staff and 23 referees from the Office of Administrative Hearings. Peak or excess filings will be handled by up to four other referee units obtained through the use of contract funds. This constitutes a reduction of 13 departmental referees and their support and a reduction in contract funds equivalent to 26 units.

Funding and personnel requirements for the fair hearings program are based on a formula. The amounts for fiscal year 1974–75 are shown in Table I.

Communications	780
Rents	2,925
Totals, Operating Expense	5,594
Equipment	3,130
Totals, Operating Cost Per Unit	$48,052

Total fair hearings program costs for 1974–75 are projected at $3,235,571 (65 units). Personnel requirements total 201.5 man-years, including blanket positions (61 departmental and OAH units at 3.1 man-years per unit). Program expenditures are projected as follows:

	Units	Man-years	Costs
Department units	38	118.1	$1,825,976
Contract with OAH at 1.7 man-years, $38,112 per unit		39.4	876,576
Departmental clerical and admin. support for OAH units at 1.4 man-years, $14,818 per unit	23	32.5	340,811
Funds for additional contract units	4	11.5	192,208
Totals	65	201.5	$3,235,571

Quality Control

Code of Federal Regulations, Section 205.40, mandates a quality control system in all states and Welfare and Institutions Code, Section 10603, provides for state supervision of the administration of state aid.

In keeping within the above regulations, Quality Control within Welfare Program Evaluation has as its major responsibility the identification, on a continuous basis, of the extent, reasons and cost of errors associated with county personnel activity relating to the determination of eligibility and the proper grant to be awarded to those persons requesting aid under the AFDC program.

In six-month intervals, a statistically reliable, statewide sample of approximately 1,200 active AFDC cases is picked for review. The review encompasses an analysis of the case record and a full field investigation consisting of personal interview with t recipient and collateral contacts or third party ver fication. Conclusive factual information must obtained to support the review decision; state polic must be applied to the facts obtained; the basis f the decision must be recorded; and the correctness the eligibility and payment status of the case mu be determined as of the review date.

Data from all sample cases is compiled and used compute the overpayment, underpayment and inelig bility error rates. In addition, the data is analyzed determine frequency of error types and causes. Thes findings are reported to the Federal Department Health, Education and Welfare (HEW), state an to county managers in a report which include recommendations of corrective action to be taken an what results are expected to accrue.

New federal quality control regulations, HEW Program Instruction 74-2 relating to Federal Regu lations Parts 205, 206 and 233, are scheduled to be come effective January 1, 1974. These regulation require that the state develop a comprehensive quality control plan to assure more reliable identification an elimination of erroneous payments, and to establis specific target goals for eliminating errors. The regu lations further provide that, effective January 1, 1974 the extent of federal financial participation will re late to the degree to which the state has met its targe goals. The overall objective of the federal government is to achieve by January 1, 1975, a 3 percent tol erance level on incorrect eligibility decisions and a 5 percent tolerance level on overpayments to eligible recipients.

In order to meet the requirements of the regulations and avoid fiscal sanction, the Department has placed increased emphasis on the quality control program.

Program and Workload Changes

During fiscal year 1973–74, 18 positions were reassigned from the adult program and established in Quality Control. These 18 positions will permit the department to expand the federally mandated sample; obtain statistically valid data on a county by county basis; and conduct quality control on AFDC cases not mandated by the federal government and on non-assistance food stamp cases. The result of these efforts is to isolate individual county errors in order to bring state error rates in the assistance program within federal tolerance levels.

Payments to Adults

Pursuant to PL 92-603 (HR-1) and PL 93-66, over 500,000 recipients, eligible under the Old Age Security, Aid to the Blind, and the Aid to the Totally Disabled programs, will receive income support through the Supplemental Security Income (SSI) and the State Supplementary Payments (SSP) programs commencing January 1, 1974. In addition to the SSI, consisting wholly of federal moneys, over 420 million California dollars for the SSP will be administered through the Federal Social Security Administration in accordance with the SSP payment level delineated in AB 134, Chapter 1216, Statutes of 1973. The maximum federal grant payable for persons living in their own homes during fiscal year 1974–75 will be $140 per month.

This combined payment is intended to cover the recipients' basic needs for food, clothing, transportation, recreation, housing and utilities. An allowance for special needs may be provided to persons who require specialized services or goods as a result of conditions peculiar to the individual. Medi-Cal benefits are also provided to SSI/SSP recipients.

Approximately 90 percent of the recipients in the SSI/SSP program live in their own homes. To permit certain of these persons to live in their own homes, allowances for attendant care may be included in their grants. Persons not living in their own homes may be provided with board and room or nonmedical board and care, depending upon the supervision and care needs of the individual. Persons requiring nursing supervision and care as provided by licensed intermediate care facilities, and persons in licensed nursing homes are granted an incidental allowance of up to $15 per month through the SSI/SSP program in addition to the payments made directly to the facilities through the Medi-Cal program.

The detail supporting the cash grant portion of this program element is carried in the subventio section of this budget.

Program or Workload Changes

The 1973–74 budget provided for an Adult Systen Management Bureau to include staff responsible fo administering the adult aid program. Example o activities concentrated on in fiscal year 1973–74 are

Completing conversion of the adult aid caseload t the federal payment system.

Monitoring the eligibility and grant determinatio funetions at the SSA district offices to ensure contro over state funds.

Implementing and evaluating an effective respons ble relative program.

Reviewing state and federal legislation to determin the impact on the payment to adults element.

During fiscal year 1973–74, 29 permanent position were reassigned from the OAS, AB and ATD pro grams to administer and monitor the state-supporte supplemental program (SSP) required by Publi Law 92-603 and Public Law 93-66.

In addition, AB 134 (Chapter 1216, Statutes o 1973) established a state-administered responsible rela tive program. Under this program certain relatives o adult recipients who meet specified income standard are required to make payments to the state to offse grants to their relatives. Nineteen new positions ar requested to operate and administer this state respon sible relative program.

In 1974–75 the experience and information gained during fiscal year 1973–74 will be utilized to improve the department's monitoring of the State Supplemen tary Payments (SSP) Program.

DEPARTMENT OF BENEFIT PAYMENTS—Continued

III. WELFARE PROGRAM OPERATIONS—Continued

Payments to Children

This payment operation provides financial assistance to eligible needy dependent children and the parents or other relatives with whom they live.

This program element is divided into three major subelements: aid to family groups, aid to families with unemployed parents, and aid to children in boarding homes and children's institutions.

The detail supporting the cash grant portion of this program is carried in the subvention section of this budget.

Family Groups (AFDC-FG)

Cash grants are provided to children and their caretakers who are so needy that they require public aid for their daily subsistence. Eligibility for a cash grant is limited to those needy families in which the children are deprived of one or both parents due to death, divorce, or other continuing absence. In a majority of AFDC-FG cases, the mother is the head of the family, and the child is eligible for assistance because of the absence of the father. Eligibility for assistance is further based on statutory maximums related to the age of the children and the amount of income plus real and personal property available to meet basic needs.

The amount of aid is determined by the number of eligible needy persons in the family group. The basic grant standard consists of the sum of the "basic items" for individuals and the family allowances for housing and utilities. The cost of the basic grant is shared by the federal, state and county government and may not exceed the maximum aid amounts set forth in state law. A family also may receive an allowance for recurring special needs, such as special medical diets and medical transportation, as well as an allowance for nonrecurring special needs caused by sudden and unusual circumstances beyond the control of the needy family.

Unemployed Parents (AFDC-U)

Cash grants are provided to families with dependent children if the value of their real and personal property does not exceed statutory limits, if the parent(s) are unable to enter the labor force or if income from other than full employment is below the AFDC standards.

The basic grant standard is developed in much the same manner as the aid to family groups program.

Boarding Homes and Children's Institutions (AFDC-BHI)

Children who cannot receive care in their own hom may be placed in foster homes or private institution Federal financial participation in the cost of foste care is available for some of these children. Thos not qualified for federal participation are paid fc through state and county funds. The state funds ar subject to a maximum rate set by the Welfare an Institutions Code.

Program and Workload Changes

The 1973–74 budget included 17 new positions fo AFDC Program Management Branch. Their firs priority has been to effect the implementation of th "second step" in the welfare reform program. Ex amples of this second step carried out in 1973–7 include:

1. Establishment of an alien verification system in tended to eliminate the payment of aid to illega aliens.
2. Increased absent parent support.
3. Revised Form WR-2, the welfare applicatio form, to improve county administrative efficiency.
4. Identification of county administrative expendi ture areas which will be targeted for joint state/ county reduction efforts during fiscal year 1974–75.
5. A new statewide income and eligibility reporting system designed to reduce erroneous grants due to recipients failure to report changes.

AFDC Program Management also established a day-to-day liaison with county welfare departments. This has made it possible for the department to provide program consultation and to develop joint corrective action plans to reduce grant and eligibility errors. During fiscal year 1973–74, one position will be reassigned from the adult program and established to strengthen the child support unit.

In 1974–75, the experience and information gained during 1973–74 fiscal year will be utilized to further implement the second step of welfare reform and to develop further improvements in the eligibility and grant determination process. Program Evaluation and AFDC Program Management produce findings regarding the quality of eligibility determinations, grant computations and major problem areas at the county level. These findings, along with issues at the state level, will generate corrective action through the management control function.

Food Stamps

The objective of this federally funded payment system is to raise levels of nutrition among welfare and other low-income households. This is accomplished through offering eligible households, the opportunity to purchase food stamps at a cost presently averaging 50 percent of their redemption value when used to buy food at local markets. Administration of the system is the responsibility of the U.S. Department of Agriculture, Food and Nutrition Service, which contracts with the Department of Benefit Payments to direct the operation of the system within the state. The department supervises participating counties in the investigation and certification of the eligibility of applicant households. The bonus value of the food stamps is borne entirely by the U.S. Department of Agriculture. The Federal Department of Health, Education, and Welfare reimburses the counties 50 percent of the administrative costs for certifying welfare households. U.S. Department of Agriculture reimburses the counties 62.5 percent of the cost for certifying nonwelfare households.

The department, through its Food Stamp Management, supervises the county administration of the program by providing consultation and technical assistance in implementing and operating the program on a local level. This unit is the prime intermediary between California counties participating in the Food Stamp Program and Food and Nutrition Service (FNS). As the single state agency, Benefit Payments is accountable to FNS for all food stamp program operations throughout the state, and it is the purpose of this bureau to assure that counties receive adequate and timely instruction and guidance as needed so that truly needy eligible households may be certified promptly and accurately to receive program benefits.

DEPARTMENT OF BENEFIT PAYMENTS—Continued

III. WELFARE PROGRAM OPERATIONS—Continued

Food Stamps—Continued

Program or Workload Changes

The first priority of food stamps management has been to implement the second step of welfare reform in the Food Stamp Program—reducing food stamp abuses.

Examples of activities carried out in 1973–74 include:

Implementation of a public assistance withholding program, a delivered meals program, and a variable purchase program.

Implementation of a program with the U.S. Postal Service for the issuance of food stamp coupons in order to make food stamp purchase even more accessible to all applicants.

Developmentation of a food stamp outreach amendment to the state plan of operations to inform potential recipients of the program.

Release of a quality control handbook and instructions so that larger counties would conduct their own reviews and DSW would conduct reviews in smaller counties.

Identification of major points of difference between food stamp and assistance payment program requirements and requested federal waivers in order to streamline eligibility determination.

During fiscal year 1973–14, one position will be r assigned from the adult program and established support the development of the outreach element.

In fiscal year 1974–75, second step welfare refor efforts affecting food stamps will continue and i crease in significance since all 58 counties are require to enter the Food Stamp Program pursuant to P.L 93-86. In order to continue reform efforts and at th same time meet increasing workload requirements, is proposed that four new positions be establishe One position will be used primarily to respond to th critical need for Food Stamp Program simplificatio Greater consistency between the welfare paymen program regulations and food stamp regulations ca reduce administrative costs to the counties and reduc error rates in both programs. The additional thre positions will be used to conduct comprehensive re views of food stamp counties. These reviews consist o audits, audit followups, and administrative reviews Counties new to the food stamp program should be re viewed within 90 days of entry into the program. Th review will also assist counties in obtaining closure o federal audits.

Output	1972–73	1973–74	1974–75

County Administration

The Welfare Reform Act of 1971 (Chapter 578, Statutes of 1971), included a provision which became effective July 1, 1972 and calls for the State General Fund to reimburse the counties for 50 percent of their nonfederal administrative costs of determining eligibility and grants for cash grant recipients. In addition, AB 134 (Chapter 1216, Statutes of 1973) provided that the state will assume the nonfederal share of the cost of administering the Food Stamp Program above the costs incurred by the counties in calendar year 1973.

Service, Demonstration and Regulatory

Enactment of AB 698 (Chapter 1593, Statutes of 1971) incorporated the Governor's Reorganization Plan No. 1 of 1970 into law. Accordingly, the State Department of Social Welfare, now the State Department of Benefit Payments, is designated as the single state agency with full powers to supervise the administration of welfare aid grants. The Department of Health is charged as the single state agency to supervise the administration of the service program. Effective July 1, 1973, services and related administrative support positions were transferred from Social Welfare to the Department of Health. Departmental programs transferred included adoptions and foster care, licensing, service centers and protective and supportive service programs.

County Service Programs

All of the elements of this program have been transferred to the Department of Health effective July 1, 1973, except those relating to the Cuban refugees and repatriated Americans which are 100 percent federally funded and the demonstration programs relating to cash eligibility.

Programs or Workload Changes

Through state demonstration projects, the state and counties have emphasized their effort to minimize recipient dependency and reduce administrative cost.

In fiscal year 1973–74 there were four active state demonstration projects: The Support Enforcement Incentive Fund project to test the dollar effect of increasing staff to collect child support payments from absent parents; the Napa/Ventura project to computerize the grant calculation process; the Riverside project to develop an automated information system; and the San Bernardino project to identify and eliminate barriers to recruitment and hiring of minorities. The Riverside project and the San Bernardino project will be continued into fiscal year 1974–75 and a new Marin project to evaluate their intake eligibility training is proposed for fiscal year 1974–75.

DEPARTMENT OF BENEFIT PAYMENTS—Continued

IV. CLAIMS AUDIT AND CONTROL

Need

Many health and welfare programs are sustained by state funds. The providers of service required to support some of these programs are reimbursed by submitting claims to the Department of Benefit Payments. In order to assure that these programs operate in a fiscally responsible and efficient manner, it is necessary that a desk audit be performed on these claims and that these claims are paid in a timely manner.

Objective

To provide that faster payments are made of verified claims with fewer errors. To establish and maintain a system of internal control within each claims processing system to ensure accurate information, to ensure compliance with applicable laws and regulations, to promote efficiency and economy, and to produce effective results.

Authority

Welfare and Institutions Code, Sections 1515 15154.

General Description

The claims audit and control section within the D partment of Benefit Payments, provides an ongoi office audit of all claims presented to the departme for payment.

The unit ensures that the claims are accurate a conform to sharing ratios, and federal and state rul and regulations. Claims are processed for the follo ing programs: welfare payment, welfare servic renal dialysis, crippled children services, family pla ning, TB sanitoria, county mental health, disabili determination, and county health department assis ance. Approved claims are forwarded to the Depar ment of Benefit Payments accounting section for pa ment.

V. ADMINISTRATION AT STATE LEVEL

Need

The administration of benefit payments requires the management, direction and logistics support necessary to assure that the programs are administered according to sound management principles, methods and techniques with the optimum of efficiency and economy. With the enactment of AB 1950 (Chapter 1212, Statutes of 1973) a new state department, the Department of Benefit Payments, was established effective July 1, 1974. The intent of the legislation in forming the new department was to consolidate fiscal control functions performed in the Health and Welfare Agency into the Department of Benefit Payments with program control, the authority for policy decision, remaining with the "program" department. The program departments will concentrate on progra planning and execution; The Department of Benefi Payments will give primary attention to financia matters. In forming the new department, the func tions, positions, and funds associated with the Stat Department of Social Welfare will serve as the initia base.

It is planned that this new department will b organized during fiscal year 1973–74 under the pro visions of Section 28, of the Budget Act of 1973.

Authority

Welfare and Institutions Code, Division 8, Part 2 Administration, Chapter II.

Special Projects in Administration

FPMIS

During the fiscal year 1973–74, the department implemented its automated Fiscal and Personnel Management Information System. This system replaces the former fiscal and personnel systems which were totally manual in nature, with all information maintained on bookkeeping machine ledgers and roster cards. By automating the systems, the department will be able to quickly respond to scheduled and unscheduled requests for data analysis such as: manpower utilization reports; payment authorization requests; estimated versus actual expenditures; federal expenditure reports; current funds available; total payroll expenses; current vacancy reports; and turnover rate by class, number of positions filled and vacant.

Program Cost Accounting System

The department, utilizing existing personnel and authorized funds, has begun development of a program cost accounting system. This accounting system will allow the department to effectively evaluate its programs on a cost basis, raising the quality of the program manager's decision making by having accurate and timely financial information available.

General Description

The Department of Benefit Payments is organized into six primary entities: Welfare Program Operations is charged with administering the welfare payment systems and program evaluation; Government and Community Relations administers the department's government and community relations programs and represents the department before legislative, government and public bodies; Audits and Collections administers audits and collections for most of the agency's programs; Legal Affairs has the responsibility for the conduct of fair hearings and will assure the department's programs and activities are consistent with state and federal law, and the department's interests are represented before the courts, local, state, and federal agencies; Administrative and Financial Services administers the department's claims audit and control program and provides the necessary support to departmental staff and operations; Operations Review provides top management with an objective and responsive capability to evaluate management decisions relating to policy formulation, organizational development, internal controls and evaluation, and payment system review.

Program or Workload Changes

On January 1, 1974, the new Federal Adult Program under Title XVI of the Social Security Act became effective as a result of the enactment of Public Law 92-603 (HR-1). In anticipation of this new program, the Legislature enacted AB 425 (Chapter 1002, Statutes of 1973) which results in the transfer of the Disability Review function from the Department of Benefit Payments to the Department of Health (64 man-years; $646,391 General Fund). In addition, the department, under the provisions of Section 28 of the Budget Act of 1973, proposed the following realignments of positions authorized to administer the OAS, AB and ATD programs replaced by the new Federal Adult Program Title XVI:

a. Twenty-nine permanent positions were reassigned to administer and monitor the state-supported supplemental program (SSP) required by HR-1.

b. Eighteen positions were reassigned to the quality control function to assist in implementing Federal HEW Program Instruction 74-6 relating to Federal Regulations parts 205, 206 and 233.

c. Four positions were reassigned as follows: two positions to fiscal planning for monitoring fiscal error rates; one position to child support; and one position to Food Stamp Management—outreach.

During fiscal year 1974–75, four new positions are requested for the Food Stamp Program to further implement the second step of welfare reform initiated in fiscal year 1973–74. The positions are to be used in food stamp management to respond to the critical need for Food Stamp Program simplification and for comprehensive review of food stamp county operations. Two and one-half positions are requested for house counsel to perform legal activities associated with a growing backlog of audit appeals received from Med-Cal providers. Nineteen new positions are requested to operate and administer the state responsible relative program mandated by AB 134 (Chapter 1216, Statutes of 1973).

In addition, 35 man-years and contract funds will be deleted. These reductions are due primarily to the elimination of 39 fair hearing units as a result of the federal administration of the new Title XVI (HR-1) Adult Program.

WELFARE PROGRAM OPERATIONS

The estimate of the grants to be paid under the welfare payments program reflects the effect of the passage of the Welfare Reform Act of 1971 (SB 796, Chapter 578, Statutes of 1971); the OASDI increase of October 1972 and the OASDI increase pass-on bill (AB 1204, Chapter 1022, Statutes of 1972); the OASDI increases of June 1974 and January 1975; SB 90 (Chapter 1406); and AB 2089 (Chapter 1371, Statutes of 1972) and AB 89 (Statutes of 1973) relating to BHI payment levels; and AB 1896 (Chapter 1386, Statutes of 1972) and SB 582 (Chapter 498, Statutes of 1973) which provide OAS, AB and ATD recipients a special need allowance for home property taxes. The homemaker services program is included in these estimates through June 30, 1974 and reflects the attendant care cases converted as of December 1, 1973. The fiscal year 1974–75 expenditure estimate for Homemaker/Chore Service is carried in the Department of Health budget.

Pursuant to the provisions of P.L. 92-603(HR-1) and P.L. 93-66, the OAS, AB and ATD programs will be converted to a new federal adult program (Title XVI) effective January 1, 1974. The supplemental security income (SSI) level is established by the federal Congress and paid wholly with federal funds. The state supplementary payment (SSP) level, supported by California dollars and administered through a contract with the Federal Social Security Administration, is included and reflects the effect of the passage of AB 134 (Chapter 1216, Statutes of 1973).

DEPARTMENT OF CORRECTIONS

Headquarters at Sacramento

Program Objectives

In any given year more than one million arrests are made in the State of California. Local communities handle 99 percent of these cases through jail sentences, probation, or a combination of dispositions. Society demands, however, that persons convicted of the more serious crimes be incarcerated in secure facilities for longer periods of time to protect the public and deter further criminal activity.

The Department of Corrections is designated by statute as the state agency responsible to:

1. Provide secure detention, humane support and corrective treatment for committed offenders;

2. Provide supervision and continued treatment for parolees and outpatients released to the community; and

3. Advise, assist, and coordinate with other governmental agencies and citizen groups in programs of crime prevention, criminal justice and rehabilitation.

The Department

The Department of Corrections, in fiscal year 1974–75, will be responsible for the control, training, treatment, and supervision of an average population of 43,700 men and women who have been convicted and sentenced for criminal offenses in California or who have been committed as nonfelon narcotic addicts. Of this total, approximately 22,200 felons will be in correctional institutions and camp, 1,900 civil addicts in rehabilitation centers, and 19,600 parolees and ex-addicts under supervision in communities throughout California.

To accomplish its objectives, the department, with its headquarters office in Sacramento, operates 12 major institutions, 18 conservation camps, 4 community correctional centers, and 60 field parole units.

The Inmates

The typical inmate committed to the department has average intelligence but scores only at the eighth grade achievement level. He usually does not possess a job skill and has experienced little success in earning a living through steady employment.

Most offenders have a background of family discord, poverty, juvenile delinquency, and emotional maladjustment. A succession of antisocial acts, sometimes over many years, has brought them to the offense which has resulted in their commitment to a state correctional institution.

The inmate population has a median age of 31 years. They possess the potential for change, self-improvement, and learning. One of the major tasks of the correctional system is to attempt to bring about beneficial changes before the offender is released to parole status.

The System

The Department of Corrections is primarily concerned with that element of the criminal justice system which deals with controlling and changing convicted felons committed to it by the courts.

The courts have other sentencing prerogatives, including the placement of a convicted offender in the county jail or under local probation. If an individual offender can continue living with and earning a livelihood for his family, there are both financial and sociological benefits in retaining him in the community. Incarceration often removes the only income of a family, leads to welfare dependency and opens gaps in family cohesiveness and relationships that sometimes are difficult or impossible to heal. The value of local probation has been recognized by the state through legislation and, in 1966, state subventions to counties were established for this purpose. Counties receive an annual subsidy based on the percentage reduction in the commitment rate to both the Departments of Corrections and the Youth Authority. The program, administered by the Youth Authority, assists counties in establishing improved probation services for convicted felons.

When the courts sentence offenders directly to state prison they are sent to a reception-guidance center. Here each individual undergoes diagnostic study to determine his educational, vocational, medical, psychological and custody needs. This diagnostic service is also available to the courts at their request to provide additional information before sentencing decisions are made.

Upon completion of the diagnostic study, the offender is moved to the particular institution where he can best begin his program. Inmates are encouraged to participate in educational, vocational, and other meaningful programs that will enhance their rehabilitative development.

California operates under an indeterminate sentence law. The courts, in the case of felons, prescribe sentences for an indeterminate period of time, such as six months to five years, 2 to 10 years, or five years to life. Independent paroling boards, appointed by the Governor, set specific terms and review individual cases periodically to decide when release shall take place and under what conditions. The Adult Authority has jurisdiction over male felons, the Women's Board of Terms and Parole, female felons and the Narcotic Addict Evaluation Authority, civilly committed narcotic addicts.

About 90 percent of the inmate population is released on parole status into the community to complete their sentences. While parole takes place in several forms its primary objective is to provide a means of gradual transition from confinement to full freedom. After release the parolee receives varying degrees of supervision by departmental personnel

DEPARTMENT OF CORRECTIONS—Continued

Program Objectives—Continued

while he is living and working in the community. Since he continues to serve his original sentence while on parole, the parolee may be returned to prison by the appropriate releasing authority for violating conditions of parole or committing new crimes. A parol receives a final discharge from departmental supe vision after he has completed the total term of h sentence, whether in an institution and/or on paro

I. RECEPTION AND DIAGNOSIS PROGRAM

Need

The individual treatment and custody requirements of newly committed offenders are generally unknown at the time they are received by the department. To determine an appropriate rehabilitation program for individuals these must be evaluated and diagnosed in a specially staffed and appropriately secure institution.

To better protect society as well as benefit the individual offender, the judges of California courts frequently require an in-depth diagnostic evaluation of convicted felons prior to sentencing in order to assist them in determining the most appropriate disposition.

Objectives

1. To receive newly committed inmates and expeditiously develop information for making decisions of inmate program requirements.

2. To provide a comprehensive diagnostic evaluation report to the courts on nonsentenced offenders temporarily placed in a department facility for this purpose.

Authority

Penal Code Sections 1203.03, 5068, 8079.

General Description

A systematic method of intake and diagnosis is an integral part of the California correctional program. Newly committed inmates undergo a processing period, lasting about six weeks, at "reception-guidance centers", where extensive diagnostic evaluations take place.

A complete personal history is compiled on eac inmate, incorporating information from sources suc as law enforcement agencies, courts, other correctiona programs, military authorities, family member friends and schools. Personality, aptitude, and intelli gence tests are administered during this processing There is a thorough review of the inmate's crimina history with special attention to potential for violenc or inclination toward escape.

The foregoing information is documented and becomes part of the individuals' cumulative case-summary file. In addition to this evaluative data, recommendations are made by the reception-guidance center staff on inmate treatment and rehabilitative needs in the areas of medical, vocational, educational, psychological and custody requirements.

It is only after this processing that the department has sufficient information to determine placement in the appropriate institution where the inmate's various program needs may best be met.

The information gained in the diagnostic process serves as a base for continuing evaluations of the individual's progress during the entire period he remains under jurisdiction of the Department of Corrections.

The cumulative case-summary file is used in making parole and term-setting decisions and in programming the inmate for parole.

Diagnostic evaluations are also provided to California courts at their request. The court may order a convicted offender placed temporarily for up to 90 days in a departmental diagnostic facility. A cumulative case-summary file and recommendations for judicial

[b] Expenditures not included in overall budget totals.

DEPARTMENT OF CORRECTIONS—Continued

I. RECEPTION AND DIAGNOSIS PROGRAM—Continued

disposition of the case are provided to the court with return of the prisoner for sentencing. This service is utilized when courts find the need for more complete information than is available through local probation services.

One reception-guidance center for newly committed male felons from the northern part of the state is operated at the California Medical Facility at Vacaville and another at the California Institution for Men at Chino for commitments from Southern California. Female felons and civil addict commitments are processed at the California Institution for Women at Frontera, and civilly committed male narcotic addicts at the California Rehabilitation Center at Corona. Some Youth Authority wards with superior court commitments and a number of younger newly committed male felons are processed at Deuel Vocational Institution at Tracy. Parole violators are sent to special units at San Quentin State Prison and the California Institution for Men.

Output	1972–73	1973–74	1974–75
Number of cases diagnosed for courts	4,260	4,100	4,700

Reception Guidance Centers develop information for making decisions on inmate program requirements and provide comprehensive diagnostic evaluations to the courts on nonsentenced offenders temporarily placed in departmental facilities. Due to the declining rate of increase of intake into the California Correctional System, the Chino Reception Guidance Center, a facility built for the Youth Authority but never opened, will instead, be used to house nonfelon women from the California Institution for Women. The Southern Reception Guidance Center is being expanded into portions of the existing California Institution for Men complex to handle the workload formerly scheduled for the Chino Reception Guidance Center.

II. INSTITUTION PROGRAM

Need

California law requires that courts deliver convicted felons to the Director of Corrections when the sentence is imprisonment in a state prison. Correctional facilities operated by the Department of Corrections provide the means for legally holding these individuals during the period of the sentence to protect society against further criminal acts.

In addition to secure custody requirements, the basic necessities of life must be provided the inmates. Recognizing that incarceration alone does not necessarily change behavior, corrective treatment is essential during imprisonment in an attempt to improve attitude and behavior patterns of inmates before they return to the community.

Objectives

To provide secure facilities for the control and support of inmates during their incarceration and to attempt to alter their past attitudes and behavior through corrective programs.

Authority

Penal Code, Part III, Titles 1, 2, 3, 5, 7; Welfare and Institutions Code, Division 3.

General Description

The 12 major institutions of the Department of Corrections are key components in the state correctional effort. The security level of each institution is determined by the particular types of offenders it must contain. The system is highly diversified with tightly controlled maximum security prisons as well as minimum security institutions without armed officers or high fences. It also operates medical-psychiatric facilities, conservation camps, a treatment center for narcotics addicts and community correctional centers.

Programs at each institution are designed to meet the requirements of inmates housed in them. Major programs and services include: psychiatric and counseling services; academic and vocational education; feeding, clothing and medical care; leisure time activities and employment in correctional industries, conservation camps and institution work assignments.

The institution population has fluctuated significantly in recent years from a high of 28,600 in 1968 to a low of 19,000 in 1972. It is now on an upswing trend and is expected to reach 24,815 on June 30, 1975. The profile of the institution inmate has also experienced drastic change. Today, he is less skilled

DEPARTMENT OF CORRECTIONS—Continued

II. INSTITUTION PROGRAM—Continued

and poorly motivated, and more prone to violent behavior. The larger number of this type of inmate requires tighter security facilities than are now available. As a result of changes in the composition of the inmate population, the department has had to realign some of its institutional programs in fiscal year 1973–74. The Chino Reception Guidance Center which was scheduled to open for the processing of presentenced diagnostic evaluation cases is now being used for housing female nonfelon narcotic addicts. The Southern Reception Guidance Center is being expanded into portions of the existing California Institution for Men complex to handle the workload formerly scheduled for the Chino Reception Guidance Center. A special security unit for female felons is also being established in the former Chino Reception Guidance Center.

Due to overall population increases within the department, the following facilities are being reopened during the 1973–74 fiscal year:

Correctional Training Facility—South with a capacity of 400 medium security beds; one 80-bed dormitory at the California Institution for Men and an additional 128 beds at San Quentin to handle maximum security cases; and four 60-bed dormitories f male nonfelon narcotic addicts at the California R habilitation Center. The remaining half of the Ca fornia Conservation Center at Susanville will be r opened to accommodate the expanding populati during the 1974–75 fiscal year. To provide the need bed capacity in 1973–74, the department is proposir special legislation to provide for a budget augment tion of $986,739.

The following table illustrates the population the general categories of offenders that are committe to department institutions:

Type of Offender	Average Daily Population * Actual 1972–73	Estimated 1973–74	Estimated 1974–75
Male felons	16,655	18,725	19,8
Female felons	513	635	71
Male civil narcotic addicts	1,819	1,885	1,91
Female civil narcotic addicts	207	295	36

G. Institution operations administration	317.6	322	325	7,162,237	7,624,471	8,102,996

In addition to the overall increase in population the proportion of inmates who have assaultive tendencies and are high escape risks is increasing.

Warkload Infarmatian

The need for additional maximum security housing was recognized in fiscal year 1973–74 with opening of the North Block Security Housing Unit at San Quentin and the Special Protective Custody Unit at Correctional Training Facility—Central.

A. Security

Society demands protection from the criminal acts of convicted felons during their incarceration by keeping them segregated from society. California law requires that convicted felons be imprisoned for the term of their sentence until released on parole. Secure physical facilities must be provided and all reasonable measures taken to carry out this responsibility. Also, it is essential to maintain a safe and orderly institution environment which is conducive to rehabilitation and training programs.

All inmates do not require the same degree of physical security or personnel supervision. Based upon evaluation and observation of their behavior, past and present, and estimates of their probable readiness for release, inmates are classified as to the degree of security and supervision they require.

The classification process permits the department to operate institutions with wide variations in physical security and staffing ranging from maximum custody at Folsom State Prison and San

DEPARTMENT OF CORRECTIONS—Continued

II. INSTITUTION PROGRAM—Continued

A. Security

Quentin Prison to minimum custody at the conservation camps. There are also graduated degrees of custody between these extremes.

While the physical features of an institution, such as locked cells and gates, and restricted areas, largely determine an institution's security status, the custody personnel are the key to the continued and effective control of the inmate population.

The prevention of escapes, arson, assault, contraband, and disturbances, is more beneficial to the system than applying solutions after trouble occurs. Procedures have been developed to handle events that may and do occur within an institution. Many of these procedures involve the manning of assigned posts where custodial personnel perform functions such as supervising housing units, dining rooms, work details, security gates and other critical areas.

In addition, custodial personnel are responsible for many functions that assure the safety of inmates and their property. These include receiving and release, the armory, mail services, inmate property storage, and key and tool control. Because institution disruptions are largely unpredictable custodial staff must be versatile and adapt to the varying situations that arise.

	Actual			Estimated	
	1970	1971	1972	1973	1974
Male Felons:					
Escapes from guarded perimeters of medium-maximum security institutions	5	3	10	4	4
Rate per 100 ADP	.03	.02	.05	.02	.02

Input	1972–73	1973–74	1974–75
Expenditures	$47,095,608	$53,986,577	$56,113,799
Personnel man-years	3,526.3	3,826	3,775

B. Inmate Support

Providing the basic rights and necessities of life to all people is a tenet of the American philosophy. This is evidenced by current political and social trends and recent court decisions. The California correctional system has adopted rules and regulations which specify that incarcerated individuals will receive humane treatment and adequate support services, such as food, clothing, housing and medical care.

Input	1972–73	1973–74	1974–75
Expenditures	$31,518,256	$36,771,990	$41,517,841
Personnel man-years	884.6	987	1,015

1. FEEDING

Three meals per day are served to the general institution population, prepared by inmates on work assignment or participating in vocational programs under supervision of civil service instructors. The menus are planned to provide a variety of entrees consisting of the basic food groups and comply with the nutritive standards established by the National Research Council. Those inmates in vocational programs, as well as those on work assignments, receive training from staff instructors in cooking, baking, meat cutting, storekeeping and many phases of food merchandising.

Each institution maintains communication with inmate representation groups regarding menu acceptability. Satisfying the inmate's appetite with food of high nutritional value is essential to the food service program. During the past year the department has experienced no major food strikes or disturbances because of poor quality of food. This has presented a significant challenge in view of food supply and cost problems during the year.

The department plans to enhance the culinary skills training program through the development of skill centers at several locations. The California Conservation Center at Susanville is undertaking such a pilot program during fiscal year 1973–74.

Output	1972–73	1973–74	1974–75
Meals served	21,949,275	24,686,775	26,394,975

Input	1972–73	1973–74	1974–75
Expenditures	$9,796,920	$10,478,869	$13,470,457
Personnel man-years	143.4	160	162

2. CLOTHING

Security considerations dictate that the inmates wear distinctive clothing for easy identification both within the institution and without in the event of escape. Since new commitments are not received with clothing suitable for incarceration and are not financially able to purchase the required items, the state must provide appropriate clothing.

The clothing function provides clean and suitable clothing for the inmates appropriate to the climate of the respective institution, and conducts vocational training in laundering and dry cleaning, sewing skills and clothing distribution. Most of the basic clothing is made by Correctional Industries.

Output	1972–73	1973–74	1974–75
Number of individuals outfitted	39,089	41,910	44,665

Input	1972–73	1973–74	1974–75
Expenditures	$2,107,802	$3,656,317	$4,003,098
Personnel man-years	19.2	23	26

3. MEDICAL-DENTAL SERVICES

The department maintains 609 medical-surgical beds for care and treatment of incapacitated inmates, and provides for outpatient and inpatient care of virtually any medical-dental problem arising in the inmate population. Not all services are offered at each facility, however, and specialized facilities, such as the major surgical hospital at San Quentin, have been established for departmentwide use. Outside medical facilities are sometimes utilized for the most complex cases such as brain and open-heart surgery.

DEPARTMENT OF CORRECTIONS—Continued

II. INSTITUTION PROGRAM—Continued

B. Inmate Support—Continued

In addition to full-time staff, the service is widely supplemented as necessary by consultants in the various medical specialties.

Although the primary function of medical and dental services is to prevent or treat illness and disease, the medical staff also has responsibility for sanitary standards within the institution. Rigid inspections are made to guard against health hazards accompanying mass housing. Medical and dental professional services are available to inmates without cost.

In fiscal year 1974–75, 12.2 medical technical assistants will be added at Deuel Vocational Institution, the California Medical Facility, the Correctional Training Facility, and the California Institution for Men. These additional staff will provide around-the-clock coverage and improve medical services.

Medical

Output	1972–73	1973–74	1974–75

Personnel man-years	422.8	466	491

4. HOUSEKEEPING AND MAINTENANCE

Housekeeping services keep the inmates' surroun ings in a clean and orderly condition and supply the with bedding, and personal care items. In additio promoting cleanliness helps instill generally accept personal habits that may have been lacking befo commitment.

Maintenance of the institution physical plants accomplished largely by inmate workers. Supervis by trades foremen or other staff, they gain experien in regular working schedules and receive skill trai ing for future use after release. Significant economi in institution operation are realized by the use inmate manpower for maintenance work.

The changing profile of the inmate population to tougher, more volatile individual, however, has drast cally reduced the number of available inmates f minimum custody assignments. Qualified inmate boi erroom operators are difficult to find due to the shor age of minimum custody inmates, fast turnover an lack of appropriate skills. In fiscal year 1973–74, 1 civil service boilerroom positions were established i recognition of this problem.

The success of the maintenance and plant oper tions is evidenced by the fact that no major problem have developed that are attributable to poor workin or living conditions, inadequate heating, lighting o power. Continued maintenance and operation of th institution physical plant with inmate workers a minimal cost is dependent on the availability of skille inmates.

Output	1972–73	1973–74	1974–75
Number of inmates supplied witb personal care items	39,089	41,910	44,66
Input			
Expenditures	$10,654,760	$12,863,513	$13,635,19
Personnel man-years	299.2	338	34

C. Treatment

Criminal behavior is rarely altered without some form of external individual or process intervention that can have a significant impact in changing value systems and goals. The confinement period provides an opportunity for attitude and behavior modification through the many rehabilitative programs offered to the inmates.

While the department believes that any staff-inmate interaction is potentially rehabilitative, more structured programs have been established to complement these casual relationships. Among the rehabilitative programs designed to meet individual inmate needs are psychiatric and counseling services, academic and vocational education, leisure-time activities and religion.

Programs are subject to constant evaluation to determine their effectiveness in meeting the needs of the inmate population and society. New training programs, for example, are established to provide up-to-date skills required for successful competition in gov ernment and private industry employment markets Training in trades that have a diminishing potentia for employment are discontinued.

Leisure-time activities enable the inmate to main tain contact with the community through involvement in programs provided by community based organiza tions. Much of the staff effort directed in these activi ties is provided voluntarily.

Input	1972–73	1973–74	1974–75
Expenditures	$15,307,269	$18,146,643	$19,630,771
Personnel man-years	811.4	940	964

1. PSYCHIATRIC SERVICES

Many inmates committed to the department suffer from serious emotional and mental problems which result in varying degrees of social disability. To aid in the correction of such conditions, institutions employ professional treatment staff and programs, in-

DEPARTMENT OF CORRECTIONS—Continued

II. INSTITUTION PROGRAM—Continued

C. Treatment—Continued

cluding a large number of psychiatric hospital beds designed to provide psychotherapy and clinical services to those with mental disorders.

The major psychiatric hospital is located at the California Medical Facility, Vacaville. It is staffed with clinical employees to treat varying kinds and levels of mental disorders. The California Mens Colony at San Luis Obispo is expanding its psychiatric program to care for an increased number of inmates in the system requiring treatment.

Other institutions are staffed with limited psychiatric and/or psychological staffs to provide diagnostic and emergency psychiatric treatment and to prepare reports to the paroling authorities. Group psychotherapy is a widely used technique to bring about personality changes in inmates with emotional disorders.

Output	1972–73	1973–74	1974–75
Psychiatric and psychological treatment cases	6,885	7,642	8,104
Psychiatric and psychological counseling contacts	13,642	15,143	16,098
Input			
Expenditures	$3,163,797	$3,456,384	$3,601,217
Personnel man-years	150	169	170

2. COUNSELING SERVICES

Counseling services provide information to the paroling authorities through progress reports and render casework assistance to inmates.

During confinement inmates are constantly evaluated by institution staff regarding their behavior, attitude and progress in various programs or assignments. Prior to appearance before a releasing authority, the inmate's counselor summarizes information from various sources into a formal progress report for the board's use. A personal interview is held to better interpret current progress and give the individual an opportunity to participate in planning his future program involvement and parole plans.

Once a release decision has been made additional efforts are made to prepare the individual for return to community life. Often this will involve assistance in finding employment, securing a drivers license and locating housing. Meetings are held with parole agents who outline parole rules and requirements, with people from the community who outline community expectations, and with employers who offer employment advice and other information.

All aspects of this conditional return to the community are defined and described to the individual with the object of providing a reasonable expectation for successful parole. The final responsibility of the counselor is to arrange for transportation to the parolees destination and provide him with release funds.

Intensified casework services are also provided to inmates assigned to various specialized units such as adjustment centers, stress assessment units, 90-day psychiatric observation units and narcotics treatment units.

Output	1972–73	1973–74	1974–75
Inmates in group counseling	4,067	4,800	5,000
Number of inmate cases prepared for release consideration	34,619	34,191	35,063
Input			
Expenditures	$5,348,173	$6,255,544	$6,698,505
Personnel man-years	404.7	463	476

3. ACADEMIC EDUCATION

The average inmate committed to the department has a tested grade placement slightly below the eighth grade level but many do not possess even basic literacy.

The potential for increased income is not the solution to every inmate's problems nor is it the only benefit to be derived from academic education. Other advantages to be gained are increased awareness and understanding of one's own responsibilities and opportunities.

Priority is given to eliminating illiteracy and achieving the eighth grade level. A well rounded academic program is carried on which provides library services, classroom instruction, correspondence courses, individual study, and physical education services leading to a high school diploma. College level courses are also available. Complete law libraries are provided at each institution, in compliance with the recent Gilmore decision.

Each institution employs full-time civil service teachers and instructors or contracts with local school districts for academic teachers.

Output	1972–73	1973–74	1974–75
Regular academic enrollment	5,492	5,964	6,288
Elementary diplomas	705	761	800
High school diplomas	998	1,058	1,111
A.A. degrees	12	13	15
College courses completed	1,114	1,169	1,205
Input			
Expenditures	$2,866,079	$3,412,240	$3,950,618
Personnel man-years	68.4	82	92

4. VOCATIONAL EDUCATION

Criminal acts and recidivism are often related to the inability of a person to support himself financially. In many cases a criminal record is less a barrier to employment after release than the individual's lack of work experience and vocational skills. Many inmates have unstable work records, few marketable skills and little knowledge of how to use the skills they possess.

To meet the need for vocational skills, training is conducted in 49 occupational areas, which provides approximately 3,000 work-training stations. Built into these broad courses of instruction are thousands of specific skills.

DEPARTMENT OF CORRECTIONS—Continued

II. INSTITUTION PROGRAM—Continued

C. Treatment—Continued

Most vocational programs also help to maintain the institution plant and feed the inmates. The vocational program affords many inmates their first opportunity to acquire good work habits and the discipline of working. Courses are accredited toward the fulfillment of high school graduation course requirements. Approximately 1,200 outside representatives of management and labor work with institutional staff as members of trade advisory committees to assure realistic and high quality training.

Output	1972–73	1973–74	1974–75
Average enrollment	3,589	4,200	4,300
Number of vocational training areas available	47	49	49
Vocational certificates of achievement issued	1,229	1,400	1,450
Input			
Expenditures	$2,826,691	$3,812,361	$4,127,307
Personnel man-years	132.8	170	170

5. LEISURE-TIME ACTIVITIES

Programs of physical fitness and leisure-time activities designed to improve an inmate's physical and emotional well-being are provided at all institutions. These programs occur mainly in the evenings, weekends and on holidays. All inmates are encouraged to participate either as active participants or spectators. These supervised activities stress fair play, good sportsmanship and the utilization of inmates as leaders and sports officials. An inmate lifting weights or playing baseball, for example, is much better off, than one engaged in negative activities or brooding in his cell. In addition, because the participating inmate is physically and emotionally healthier he is better prepared to cope with everyday problems.

Self-help activities in an institution are a means of helping inmates use leisure time constructively and beneficially and reducing idle time which can seriously affect an inmate's outlook and cause management problems. The inmate's involvement in self-he organizations will often continue after his release the community and provides meaningful activi while in confinement.

Approximately 60 different self-help groups off services to inmates. Although not all are active in ea institution, Alcoholics Anonymous is one progra established in all of the department's major facilitie Others are available according to inmates intere and needs.

Output	1972–73	1973–74	1974–7
Estimated number of inmates regularly participating in organized recreation	8,694	9,894	10,6
in organized recreation	8,694	9,894	10,6
Estimated number of inmates regularly participating in Unorganized recreation	8,880	9,005	9,2
Estimated number of inmate spectators annually	451,080	452,200	453,5
Input			
Expenditures	$482,918	$530,046	$546,9
Personnel man-years	24.5	24	

6. RELIGION

During incarceration about 20 percent of the priso population seek the services of the clergy for indiv dual counseling, prayer and instruction, conversio baptism, communion, confession, or to assist in r solving personal problems between the inmate an his family and/or friends. Marriage ceremonies ma be performed to legitimize relationships between in mates and their common law spouses.

Institution chaplains frequently enlist the service of visiting clergymen to serve inmates of differen faiths including the Jewish, Mormon, Christian Scien tist, Episcopalian, Lutheran, Jehovah's Witnesses Muslim, and Buddhist religions.

Input	1972–73	1973–74	1974–75
Expenditures	$619,611	$680,068	$706,12
Personnel man-years	31	32	3

D. Inmate Employment

One of the conditions that contributes to prison unrest and disturbance is undirected idle time.

A major objective of the California correctional system is the return of former offenders to the community better prepared to contend with the stresses of social living and to secure and maintain meaningful employment. An important element of this process is the inmate employment program, which contributes to the development of significant job skills and the formation of reliable work habits. The three major activities which employ a large number of inmates are correctional industries, conservation camp operations and institution work assignments. Inmates assigned t the latter two are paid from the General Fund.

Input	1972–73	1973–74	1974–75
Correctional Industries:			
Expenditures	$9,422,448	$12,949,903	$15,079,90
Personnel man-years	232.5	248.3	248.3
Work Projects—Cooperating Agencies:			
Expenditures	$3,709,033	$2,671,951	$2,840,57
Personnel man-years	186.9	142	141
Work Assignments—Support:			
Expenditures	$619,874	$651,571	$712,905
Personnel man-years	–	–	–
Element Totals:			
Expenditures	$13,751,355	$16,273,425	$18,633,378
Personnel man-years	419.4	390.3	389.3

DEPARTMENT OF CORRECTIONS—Continued

II. INSTITUTION PROGRAM—Continued

D. Inmate Employment—Continued

1. CORRECTIONAL INDUSTRIES

Correctional industries relieves idleness by providing industrial and agricultural work activities for approximately 2,000 inmates. Since many inmates come to prison with little or no work experience, there is a need to provide training for improvement of work skills and habits.

The objectives of correctional industries are to (1) provide constructive work for inmates to reduce idleness; (2) improve work habits and skills of inmates to better prepare them for employment after release; and (3) reduced cost of maintaining prison system through the sale of products and services.

There are 23 major industrial and 7 agricultural enterprises operating at 10 institutions throughout the state. Financial support is through the Correctional Industries Revolving Fund, which is maintained by revenues from the sale of products and services made to public agencies.

A Correctional Industries Commission representing organized labor, industry, agriculture and the general public is the policymaking body for this operation. It is empowered to recommend productive industrial and agricultural enterprises for the institutions, and to provide policy guidance to the director for the industrial programs. Enterprises for this activity are selected so that they contribute to the rehabilitation of inmates, but are in minimum competition with private industry and free labor. Such enterprises are also limited to those which can be economically operated at the least possible cost to the state, and are based on the needs of governmental entities since products and services of correctional industries can be sold only to public agencies.

Each enterprise is staffed with skilled industrial and related trade personnel with actual experience in a work production environment. Individual and group counseling is conducted by these staff members who also have custodial responsibilities. Formal apprenticeships, organized on-the-job training and related trade training classroom instruction are also offered. Many supervisors are qualified certified instructors and conduct training classes in their respective fields. Certificates of competence are issued to the inmates as the ultimate goal. The Division of Apprenticeship Standards and appropriate labor unions recognize the prescribed training levels which are transferable to private industry. Trade advisory committees composed of union and business representatives from local communities provide liaison with private enterprise. Employment interviews are conducted and personal vocational guidance is offered which provides an incentive for the inmate to develop his trade skills prior to his release from the institution and facilitates placement in jobs related to his institutional training.

The average employment during the 1972–73 fiscal year was 1,950 inmates who earned $440,000, or $225 per man. The quality of the training and of the products produced has been improved with closer relationships with the Vocational Education Program. Follow-up statistics on released inmates show 57 percent were placed in jobs related to their training in correctional industries.

Providing constructive work for inmates squarely meets the need for reducing idleness in the prison system. Work opportunities at all skill levels are available from the menial to the highly skilled, with on-the-job training programs to encourage advancement. Correctional industries operates at no cost to the General Fund and provides program that would otherwise cost the state as much as $6 million a year.

With an upturn in inmate population, additional programs must be provided. Correctional industries is expected to provide a share of the increase in program for inmates. Consequently, new enterprises will be proposed to the Correctional Industries Commission and existing enterprises will be worked to capacity to meet limited public agency markets. Correctional industries' increased programs will be directed to those institutions where the gain in population is expected.

Output	1972–73	1973–74	1974–75
Average inmate population	20,045	22,545	24,105
Average number of inmates employed	1,950	2,200	2,400
Percentage of total population	9.7%	9.8%	10%
Input	**1972–73**	**1973–74**	**1974–75**
Expenditures (Correctional Industries Revolving Fund)	$9,422,448	$12,949,903	$15,079,900
Personnel man-years	232.5	248.3	248.3

2. WORK PROJECTS—COOPERATING AGENCIES

Increasing public use of state and federal resources creates a demand for available inmate labor to maintain park facilities, to assist in fire suppression and to preserve and enhance natural resources. These work projects involve cooperation with state and federal forest services, the Department of Fish and Game, the Division of Highways and the Department of Parks and Recreation.

The conservation program consists of 17 Division of Forestry camps and one Division of Highways camp, with a total inmate manpower of 1,124 men. The camps are located throughout the state, primarily for forest fire suppression purposes and secondarily to perform allied forestry projects and to maintain and protect the natural resources of the state.

DEPARTMENT OF CORRECTIONS—Continued

II. INSTITUTION PROGRAM—Continued

D. Inmate Employment—Continued

With the reorganization of the camp program during 1973, all of the camps, except three, are administered by the Sierra Conservation Center. The three camps are operated by the California Conservation Center, the California Rehabilitation Center, and the California Men's Colony. This centralized administration has reduced costs and unified operating procedures.

Output	1972–73	1973–74	1974–75
Man-hours worked in fire suppression	228,665	450,084	480,000
Regular project assignment hours	2,710,724	3,618,084	4,490,329
In-camp assignment hours	978,550	1,306,176	1,624,872
Average number of inmates assigned	1,136	1,151	1,251
Input			
Expenditures (General Fund)	$3,709,033	$2,671,951	$2,840,573
Personnel man-years	186.9	146.4	141

3. WORK ASSIGNMENT—SUPPORT-

It is essential that men and women leaving corre tional institutions have constructive attitudes abo work as well as possession of skills or trades that wi enable them to assume their responsibilities in t community. Operation of the various institutions pr vide many meaningful work assignments for inmate Feeding, laundry, housekeeping, maintenance, ho pital, grounds care, and similar tasks are performe by inmate workers supervised by civil service em ployees.

Output	1972–73	1973–74	1974–75
Total number of inmates employed	1,200	12,000	12,0
Number of paid positions	5,704	5,704	5,7
Input			
Expenditures	$619,874	$651,571	$712,9
Personnel man-years	–	–	

E. Inmate Welfare Fund

The Inmate Welfare Fund was created in 1945 as a special trust fund for the benefit, education and welfare of the inmates. The fund is administered by the department and derives its income mainly from the profits of inmate canteens. Other sources of funds are sales from handicraft shops, interest on invested reserve monies of the fund itself and cash donations.

Income from this self-supporting fund is used for such inmate benefits as movies, recreational equipment, television sets and library books. Approximately $350,000 is spent annually for these purposes.

Handicraft activities are conducted at ten of the twelve institutions. Approximately 36 percent of the inmates participate in this program. Leather goods, jewelry and art work created by inmates are sold t the public at the institutions. A percentage of a item's selling price goes to the Inmate Welfare Fun and the remainder is credited to the inmate's accoun Purchases for materials are paid for by the inmat from his own funds. The program provides earning to inmates with no other source of income.

Output	1972–73	1973–74	1974–75
Purchase for inmate benefits	$343,837	$373,193	$357,32
Percent of inmates participating in handicraft	36%	36%	36%
Input			
Expenditures	$3,672,497	$4,142,413	$4,446,44
Personnel man-years	44.9	48	4
Resources	$3,775,948	$4,171,269	$4,506,85

F. Short-Term Treatment

Many parolees and outpatients beginning to demonstrate delinquent behavior can be returned to supervision in the community after a brief and practical reconfinement program in lieu of return to an institution for a longer period of incarceration.

Short-term return units provide continuity to an individual's parole process even when reinstitutionalization becomes necessary. Effort is made to place the individual in a unit near his residence, allowing visits with family and friends. Parole agent contact is retained allowing for a practical evaluation of the reasons for placement in the unit and cooperative development of the release program. Temporary releases for social or legal contact may be available as they would be for obtaining employment.

This program also offers significant cost advantages since the men remain in these units for an average of four to six months, as compared to 15 to 18 months that the average technical parole violator spends upon return to one of the major institutions.

Output	1972–73	1973–74	1974–75
Population beginning fiscal year	349	422	425
Total received	843	900	900
Total departures	770	897	900
Population end of fiscal year	422	425	425
Average daily population	386	424	425
Input	1972–73	1973–74	1974–75
Expenditures	$137,181	$141,882	$146,939
Personnel man-years	8.5	9	9

DEPARTMENT OF CORRECTIONS—Continued

II. INSTITUTION PROGRAM—Continued

G. Institution Operations-Administration

Effective leadership and guidance is necessary in the administration and coordination of all institutional activities and programs and is essential to assure the most desirable utilization of available resources.

One of the objectives of the California correctional system is the effective achievement of departmental goals at the most reasonable cost possible to the state.

Input	1972–73	1973–74	1974–75
Expenditures	$7,162,237	$7,624,471	$8,102,996
Personnel man-years	317.6	322	325

III. RELEASING AUTHORITIES

Need

The indeterminate sentence law of California provides that the length of combined time a convicted felon must serve in an institution or on parole will be determined by one of three independent releasing authorities established to administer to male felons, female felons or civilly committed narcotic addicts.

Term setting and parole granting/revocation decisions affecting male felons are determined by the Adult Authority. Women felons are handled by the Women's Board of Terms and Parole. The length of combined inpatient and outpatient treatment for civil narcotic addicts is determined by the Narcotic Addict Evaluation Authority.

Objectives

1. To ensure the safety and welfare of the public by making individual case determinations of the length of time an individual should spend in an institution before release to the community with a reasonable probability of successful adjustment as a responsible citizen.
2. To prevent individuals on parole from committing further violations of the law by returning them to an institution when their behavior warrants such action.
3. To recommend the granting or denial of pardons or commutations of sentences to the Governor's Office as the Governor's advisory pardon board.

Authority

Penal Code, Part III, Titles 1, 2, 3, 5, 7; Welfare and Institutions Code, Divisions 2.5 and 3.

General Description

Approximately 90 percent of the men and women released from correctional institutions return to the community under conditions of parole. The process begins with preparation of reports by institution professional staff for the appropriate releasing authority.

Such reports summarize the progress of the individual inmate while in the institution. Evaluations are made of the inmate's degree of change, modification of attitude and behavior, accomplishments in various programs and prognosis of future behavior. In special cases a psychiatric report may also be required.

When the releasing boards conduct hearings to consider release they utilize this information in addition to material developed by the reception and diagnosis program to determine the optimum time served in each case. This year the releasing authorities will hear approximately 65,000 cases in which they must consider release decisions and other actions.

The releasing authorities fix terms and grant paroles for all persons committed to the custody of the Director of Corrections. Inmates are scheduled for an initial appearance for release consideration prior to their minimum legal eligible parole date. Those persons not granted parole at their initial appearance are scheduled for subsequent board appearance and further parole consideration.

Most inmates are paroled for a specific period under conditions stipulated by their releasing authority.

Parolees are supervised by the Parole and Community Services Division. Serious parole violators, involved in criminal activity or considered a threat or danger to society or themselves, are reported to the releasing authority for suspension and possible revocation proceedings.

The releasing authorities usually conduct their business in panels which meet regularly to hold interviews of persons proposed for release or parole revocation.

The U.S. Supreme Court in *Morrissey* vs. *Brewer*, June 29, 1972, mandated that paroling authorities follow specified minimum due process and procedural requirements when ordering parolees back to prison. Included in these requirements are the prerevocation hearing and the revocation hearing. On May 14, 1973, the Supreme Court in *Gagnon* vs. *Scarpelli* also mandated that paroling authorities returning technical parole violators provide counsel for indigent parolees upon request. Funding the additional cost ($947.308) to meet requirements of *Gagnon* vs. *Scarpelli* in 1973–74 is being proposed through special legislation.

DEPARTMENT OF CORRECTIONS—Continued

III. RELEASING AUTHORITIES—Continued

PROGRAM REQUIREMENTS	72–73	73–74	74–75	1972–73	1973–74	1974–75
Continuing program costs	49.2	54	54	$1,123,231	$1,423,310	$1,463,220
Workload adjustments	–	7	9	–	401,022	445,174

C. Narcotic Addict Evaluation Authority	5	5	5	86,131	98,172	100,137

A. Adult Authority

The Adult Authority consists of nine members appointed by the Governor and confirmed by the Senate to serve overlapping terms. A panel, made up of a combination of at least two members or hearing representatives, meets regularly to hear cases. Inmates are generally scheduled for their first hearing about one month prior to their eligible parole date. A subsequent appearance is scheduled in the event a parole date is not established at that time.

The authority utilizes progress reports prepared by institution staff. These summaries are compiled throughout the inmate's length of confinement and includes evaluations of degree of attitude and behavior change, accomplishments in various programs and prognosis of future behavior.

Output	1972–73	1973–74	1974–75
Adult Authority:			
Institution cases heard	28,678	31,003	32,59
Revocation Hearings	(3,409)	(3,685)	(3,87

DEPARTMENT OF CORRECTIONS—Continued

IV. COMMUNITY CORRECTIONAL PROGRAM

Need

Public concern requires that there be surveillance and rehabilitation services for convicted offenders during that portion of their term served on parole in the community. Although men and women convicted as felons, or committed as narcotic addicts, are confined in state correctional facilities at the outset of their terms, most complete their sentences while on parole or outpatient status in the community. During this period, public protection is served through the control and case service activities of the community correctional program.

Objectives

To provide the fullest protection to the community by increasing successful parole completions and reducing new crimes and aggressive acts by parolees.

Authority

Penal Code, Part III, Titles 1 and 7, Part IV, Title 1; Welfare and Institutions Code, Section 3305.

General Description

The Community Correctional Program encompasses direct and supportive services to aid in the adjustment of the parolee in the community. Evaluation Research results reflect major reductions in the number of parolees returned to prison which means that parole successes have increased over the past several years.

The parole field operation is divided into five geographic regions consisting of 17 districts and 60 parole units, with support provided by psychiatric outpatient clinics in the north and south, four community correctional centers and an antinarcotic testing center in Los Angeles.

In addition to direct service provided by the field operation, a wide range of employment training and other case service resources from the private sector, social agencies and governmental jurisdictions (federal, state, and local) are used to the fullest advantage. Constant cooperation with local law enforcement agencies is carried on as part of supervising parolee activities.

PROGRAM REQUIREMENTS	72–73	73–74	74–75	1972–73	1973–74	1974–75
Continuing program costs	952.5	887.8	887.8	$18,499,730	$18,447,281	$18,780,677

Totals, Community Correctional Program	952.5	905	939	$18,499,730	$18,796,851	$19,801,710
General Fund				*16,669,798*	*18,001,734*	*19,006,593*
Reimbursements				*1,829,932*	*795,117*	*795,117*
Program Elements:						
A. Supervision—case services	798.1	783	817	15,164,228	15,440,569	16,211,927
B. Community correctional centers	35.1	38	38	809,384	960,660	941,042
C. Psychiatric outpatient services	29.7	31	31	635,245	720,026	733,660
D. Special narcotic services	12.2	11	11	581,110	665,394	870,775
E. Executive—administration	77.4	42	42	1,309,763	1,010,202	1,044,306

Workload Information

The parole system continues to receive and supervise a more antisocial, violence-prone and emotionally disturbed offender than ever before prompting the development of expanded treatment in the community.

Regular cases are supervised on a ratio of one parole agent to 59 parolees in "conventional" supervision and more difficult cases are supervised at a ratio of one parole agent to 33.3 parolees in "work unit" supervision.

The U.S. Supreme Court in *Morrissey* vs. *Brewer*, June 29, 1972 mandated that paroling authorities follow specified minimum due process and procedural requirements when ordering parolees back to prison. In addition to the requirements of the Morrissey decision *Gagnon* vs. *Scarpelli*, May 14, 1973, states that indigent parolees must be provided with counsel if the parolee so requests and certain other conditions exist. These and other recent court decisions have resulted in increasing workload necessitating a request for staffing adjustments in the 1974–75 budget. Funding the additional cost ($947,308) to meet requirements of *Gagnon* vs. *Scarpelli* in 1973–74 is being proposed through special legislation.

A. Supervision—Case Services

To achieve parole success requires that the parole staff be aware of individual parolee behavior, community influences and opportunities. The ultimate aim, which is prevention of serious criminal behavior, is realized through effective supervision and case services.

Parole preparation begins while the offender is still confined by developing effective release plans in the

DEPARTMENT OF CORRECTIONS—Continued

IV. COMMUNITY CORRECTIONAL PROGRAM—Continued

A. Supervision—Case Services—Continued

community. After release, parole work includes many activities falling within the three basic approaches of (1) case supervision and surveillance. (2) tangible and case relationship assistance, and (3) decision making at key points.

A variety of methods are used: individual and group counseling, job placement, family visiting and family counseling, scheduled and unscheduled field visits, collateral contacts including family and employer, community programs in academic and vocational training, referral to social service and mental hygiene facilities, liaison with law enforcement agencies and many others. The essentials involve constant evaluation of parolee community adjustment and application of case information to decision making. Delinquent and anti-social behavior must be investigated thoroughly and evaluated in terms of potential and actual harm to society.

Serious transgressions must be reported to the releasing authorities with recommendations as to disposition.

The U.S. Supreme Court in two decisions (Morrissey vs. Brewer, and Gagnon vs. Scarpelli) mandated that paroling authorities follow specified minimum due process and procedural requirements when ordering parolees back to prison. In addition to the previous process when ordering a parolee back to prison, the new requirements include proceedings for prerevocation hearing which creates an additional workload in the community correctional program.

The supervision-case services element is composed of six organizational components. They are: (1) conventional supervision for male and female felons with a current average of 59 cases per agent; (2) work unit supervision for male felons with an average of 33.3 cases per agent; (3) nonfelon supervision for male and female addicts averaging 32 cases per agent; (4) work furlough case supervision for inmates released shortly before established parole dates at a ratio of 35 cases to 1 agent; (5) interstate unit case supervision for other states' parolees in California and California parolees in other states; and (6) field administration unit supervision to provide administrative leadership, guidance, and supervision.

Input	1972–73	1973–74	1974–75
Expenditures	$15,164,228	$15,440,569	$16,211,927
Personnel man-years	798.1	783	817

1. Conventional Case Supervision

Approximately 60 percent of the male felon parole population is supervised within the conventional supervision component. Conventional supervision provides for a ratio of one casecarrying parole agent to 59 parolees. With the advent of enhanced community resources and improved training and administrative direction. there has been a reduction in the number of felons returned to prison for both technical parole violations and new felony commitments.

Output	Average Conventional Parole Population 1972–73	1973–74	1974–75
Male felons	7,795	6,690	6,845
Female felons	965	880	875
Preparolees	3,337	3,592	4,161
Input			
Expenditures	$2,889,064	$2,823,835	$3,056,1
Personnel man-years	135.7	123	

2. Work Unit Supervision

The work unit case supervision component w developed to increase the effectiveness of supervisi and to expand community resources as a means further assisting parolees. The system features a pr cedure of parolee classification based upon different supervision and casework requirements and provid case carrying parole agents on an average ratio 1 to 35. Special emphasis is placed upon maximu use of case management skills and community r sources, intervention where necessary and effecti decisionmaking. In fiscal year 1973–74 some 6,4 parolees were under supervision in this component 5,200 under support budget provisions, and 1,2(under additional parole agent positions funde federally through the California Council on Crimin Justice.

Output	Average Work Unit Parole Population 1972–73	1973–74	1974–7
Male felons	5,200	5,200	5,2(
Preparoles	2,730	2,938	3,4(
Input			
Expenditures	$3,550,068	$3,450,708	$3,555,6
Personnel man-years	151.5	151	1

3. Nonfelon Addict Case Supervision

This component provides outpatient communit supervision for those individuals civilly committed t the nonfelon addict program and offers the entir range of services. The supervision of individual case is carried out separately from the regular felo program.

Caseload size averages 32 cases per agent. Generall speaking, these caseloads are more difficult to manag because of the many special problems that addict present in the areas of employment, social adjustment necessity for frequent control, requirements for anti narcotic testing and general public attitudes.

Output	Average Nonfelon Addict Parole Populatio 1972–73	1973–74	1974–75
Nonfelon addicts	6,074	6,117	6,39
Number of releases	3,726	4,300	4,52
Input			
Expenditures	$3,950,422	$4,156,668	$4,376,48
Personnel man-years	185.4	188	19

4. Work Furlough Case Supervision

The work furlough program allows the inmate a less abrupt transition from incarceration to full parole status in the community. The inmate may participate in the program for up to four months prior to his established parole date. During this time he is permitted to hold full time employment provided he returns to the correctional facility after working hours and complies with other program requirements.

He is responsible for paying for room, board and case supervision at the facility, personal clothing, transportation and other essential work related costs from his earnings. In addition, because he is now a

DEPARTMENT OF CORRECTIONS—Continued

IV. COMMUNITY CORRECTIONAL PROGRAM—Continued

A. Supervision—Case Services—Continued

taxpayer. he will resume financial support of any dependents he may have.

Reimbursements made by those inmates on work furloughs to the correctional facility provide about one half of the necessary case supervision and operating expense of the program. A 35:1 ratio of work furloughs to parole agents is maintained.

Additional savings are realized as inmates require institutional accommodations for up to 120 days less than those released directly from institutions. Program evaluation indicates that work furlough participants are more successful on parole than those with regular releases.

Output	1972–73	1973–74	1974–75
Total earnings	$875,000	$900,000	$925,000
Institutional inmate days saved	99,000	99,000	99,000
Average time in program (days)	55	55	55
Average earnings by inmates	610	625	650
Total departures	1,500	1,500	1,575
Input			
Expenditures	$236,743	$244,924	$256,914
Personnel man-years	12.8	10	10

5. Interstate Unit Case Supervision

The interstate probation and parole compact, of which California is a member, provides the framework within which the states may function cooperatively in working with parolees and probationers from other states.

The interstate unit has responsibility for coordinating the supervision of adult parolees in California from other states and California parolees in other states.

Some functions of this component include:

1. Review and approval of parole requests from other states and authorization for California cases going to interstate placement.
2. Administrative control of California parolees in other states and functional control of cooperative cases in California.
3. Preparation of reports to paroling authorities, administrative control of deportation cases and preparation of extradition requests.

	Average Out-of-State Parole Population		
Output	1972–73	1973–74	1974–75
Number of interstate cases	2,098	2,200	2,320
Input			
Expenditures	$102,205	$120,016	$122,887
Personnel man-years	7	8	8

6. Field Administration/Unit Supervision

Administrative guidance, supervision and ancillary support is necessary for case-carrying parole agents and other treatment staff. Leadership is provided through five regional administrators, 17 district administrators and 60 unit supervisors.

This component also contains all the technical records staff and clerical support required for the administrative, supervisory and case-carrying positions.

Input	1972–73	1973–74	1974–75
Expenditures	$4,435,726	$4,644,418	$4,843,834
Personnel man-years	305.7	303	317

B. Community Correctional Centers

Parolees without adequate resources are prone to get into difficulty. This element of the program provides residential and other assistance in the community under parole management for a short period after release or in lieu of return to an institution. Community correctional centers are an extension of the treatment environment developed within the institution. Upon being released from an institution and assigned to a center the resident has support until he can get established in a job or training program. Residents may also participate in a variety of other treatment programs, such as group counseling and psychotherapy. Parole agents normally located at the facility provide ongoing supervision and assistance for the center residents.

The centers are also used in the work furlough program as a residence for those men and women still legally considered inmates who have earned the privilege of finding employment immediately prior to their release to parole. Selected men or women maintain this employment while living at the center as a means of earning money and preparing themselves for residence in the community.

DEPARTMENT OF CORRECTIONS—Continued

IV. COMMUNITY CORRECTIONAL PROGRAM—Continued

C. Psychiatric Outpatient Service

Following their institutional psychiatric treatment, inmates with a history of aggravated assaultive crimes and/or serious sex offenses are often required by the paroling authority to participate in followup psychotherapeutic services as a condition of parole. Over 95% of the parolees receiving attention in the program do so as a requirement of the releasing authority. Diagnostic as well as psychiatric treatment services are also necessary for parolees who experience serious emotional difficulties while in the community. Professional estimates indicate that about 10 percent of the parole population requires this diagnostic service.

Psychiatric outpatient clinics are operated in L Angeles and San Francisco, with services provided outlaying areas.

Output	1972–73	1973–74	1974–
Number of patients beginning of fiscal year	1,340	1,400	1,4
Number of parolees admitted to clinics	1,090	1,098	1,1
Number parolees terminated from program	1,030	998	1,0
Number of patients end of fiscal year	1,400	1,500	1,6
Input			
Expenditures	$635,245	$720,026	$733,6
Personnel man-years	29.7	31	

D. Special Narcotic Services

Relapse to drug use is common among herion addicts. Effective parole programming requires implementation of the most effective and economical techniques to prevent and/or detect the use of opiates and to avoid readdiction. Nalline testing, urinalyses, participation in methadone maintenance programs and routine examinations are utilized to deter and/or detect opiate usage.

The most recent attempt at controlling addiction is through a methadone maintenance program. The community correctional program recently began such a program serving approximately 200 parolees in Los Angeles, and has since been able to increase this participation by an additional 150 parolees as a result of a federally funded contract. Approximately another 600 parolees are involved in methadone maintenance programs conducted by other organizations.

Narcotic detoxification treatment, an alternative returning parolees to prison, is provided by contrac ing for such services with other public or priva agencies.

Output	1972–73	1973–74	1974–7
Number of addicts supervised	8,716	9,184	9,2
Number of nalline tests	4,022	4,022	4,0

Workload Information

The Department of Corrections in order to successfully achieve the responsibilities charged to it by California law, maintains an administrative organization consisting of office of the director, operating divisions and staff divisions.

The director and chief deputy director have overal administrative and program responsibility. The in spector general, concerned with departmental oper ational evaluation and review, and the administrativ aide, who coordinates the day-to-day operations of th office of the director, report directly to the Directo of Corrections.

DEPARTMENT OF CORRECTIONS—Continued

V. ADMINISTRATION—Continued

The operations division is responsible for all field operations including institutions, conservation camps, and parole functions and related program services.

The administration division is responsible for the business affairs of the department including budgeting, feeding, construction and maintenance, and grant management and advises the director on the status of fiscal affairs.

The program and policy division is responsible for evaluation, guidance and assistance in planning, development and operation of departmental programs.

The staff divisions include research, public information, legislative liaison, parole board liaison, medical services and personnel management and training. These divisions are responsible for providing advice and counsel to the director and line administrators.

VI. SPECIAL ITEM OF EXPENSE *

PROGRAM REQUIREMENTS	1972–73	1973–74	1974–75
Continuing program costs *(General Fund)*	$1,785,196	$1,786,311	–

Need

The law provides for reimbursement to local jurisdictions for expenditures incurred in providing services related to persons who have been committed to this department. Such expenditures are defined by statute.

Objective

To reimburse local agencies for added costs incurred in connection with persons committed to the Department of Corrections.

Authority

Penal Code, Sections 1389, 1549, 1557, 4700, 4700.5, 11190 et seq.; and 26749 of the Government Code.

General Description

Counties are entitled to reimbursement by the state for three principal types of expenditures: (1) Transportation of prisoners and parole violators; (2) court costs and county charges; and (3) returning fugitives from justice. Special appropriation items provide the funds.

Input	1972–73	1973–74	1974–75
Transportation of prisoners and parole violators	$171,168	$171,211	–
Returning fugitives from justice	562,376	563,448	–
Court costs and county charges	1,051,652	1,051,652	–
Totals *(General Fund)*	$1,785,196	$1,786,311	–*

* Special items of expense for 1974–75 fiscal year is reflected in local assistance.

GENERAL ANALYSIS

The facility needs of the Department of Corrections depend on two factors—the number of inmates in the system and the make-up of the institution populations in terms of security and treatment requirements.

During the past several years, the total institution populations have been declining. This has permitted the closure of two satellite units. In the current year this decline did a significant turn around and the department finds itself deficient in security facilities. In the current year an additional 800 beds will be activated by reopening 400 beds in the Correctional Training Facility, South Facility, and opening the 400-bed California Institution for Women, Chino Branch. One highway camp will be deactivated. The population composition has been changing rapidly. The number of more violent individuals has been increasing disproportionate to the total population. This has resulted in increasing attacks on both inmates and staff—a trend that seems to be nationwide in scope. The department is thus forced to look for solutions to this problem both in terms of safety for the staff and inmates and increased treatment for those amenable to psychiatric care.

The last four years of the five-year building program are the agency's current estimate of need and do not represent program approved by the administration.

California Conservation Center

The California Conservation Center is a skill training center. The facility is a permanent minimum security institution located on 1,095 acres in Lassen County about seven miles east of Susanville. The institution has 1,224 beds. One-half of the institution was closed on June 30, 1972; the remaining 676 beds inelude Camp Antelope with 60 camp inmates. It is planned to reactivate the closed portion July 1, 1974 to accommodate an additional 548 inmates.

Sierra Conservation Center

The Sierra Conservation Center is a permanent minimum security institution located nine miles southwest of Jamestown, California. The center has a capacity of 1,224 inmates, and administers 14 conservation camps located throughout California in the Sierra and Coast Ranges.

For the list of standard lettered capital outlay footnotes, see the end of this budget supplement.

Correctional Training Facility, Soledad							
The Correctional Training Facility is a medium-minimum security institution located on 911 acres in the Salinas Valley approximately four miles north of Soledad. Agricultural, industrial, academic and vocational training programs are emphasized at this institution. The central facility is of permanent reinforced construction with a capacity of 1,483. The north facility, also of permanent construction, has a capacity of 1,483. The south facility, constructed to house 400 minimum security inmates will be reactivated in 1973–74.							
Deuel Vocational Institution, Tracy							
This medium security institution is located on 783 acres in San Joaquin County, four miles east of Tracy and 15 miles south of Stockton. It is primarily an academic and vocational training institution for younger offenders with some industrial and farming activities also available. The institution has a capacity of 1,427 inmates including a reception-guidance center.							
California State Prison at Folsom							
The State Prison at Folsom is the second oldest facility in the state prison system, having been established in 1880. It is a maximum security institution which houses inmates serving long sentences and those who are habitual criminals, recidivists, or severe disciplinary problems. The institution is located on a 1,173-acre site, two miles northeast of the City of Folsom.							
MAJOR PROJECTS							
Improve sewage plant in cooperation with City of Folsom	$2,500 [c]	$182,500 [c]					
Construct new library	–	–	–	$340,950 [c]

California Medical Facility, Vacaville							
California Men's Colony, San Luis Obispo							
MAJOR PROJECTS							
Construct water system booster	–	–	$85,000 [C]				

The California Institution for Men was opened in 1941 and is located within the southern limits of the City of Chino, San Bernardino County. This is primarily a minimum security prison with an extensive agricultural and industrial program. The facility has a capacity of 2,247 inmates, including the southern reception-guidance center.

The medical facility is the primary psychiatric treatment center for the department and houses adult male felons who are mentally ill or have serious emotional or personality disorders. The facility is located in Solano County about two miles south of Vacaville, and consists of 899 acres of land. The institution is a permanent medium security facility constructed of reinforced concrete and has a capacity of 1,490 inmates. The adjoining reception-guidance center has a total capacity of 472 inmates. This reception-guidance center receives adult male felon commitments from the northern counties.

The California Men's Colony consists of the east and west facilities and is located on Highway 1 four miles west of the city of San Luis Obispo. The east facility is a medium security institution of reinforced concrete construction. The east facility, with a capacity of 2,409 inmates, is composed of four separate units of 600 capacity each. Housing, feeding, recreation, education and counseling activities are provided in each unit. A central facility for visiting, medical treatment and other services and supplies is used. The west facility is a minimum security institution which utilizes barracks-type wood buildings which were the hospital section of the army installation of Camp San Luis Obispo. The population has been phased out except for 285 inmates to man the camp and maintain the structures.

For the list of standard lettered capital outlay footnotes, see the end of this budget supplement.

San Quentin is the oldest prison in the California system and is located on 496 acres adjacent to the San Francisco Bay in Marin County, about three miles southwest of San Rafael. This is a close-medium security prison with extensive industrial, education and treatment programs. San Quentin's hospital is designated as the medical treatment center for major surgical and specialized medical treatment on a departmentwide basis. The prison has a capacity of 2,729. Structural and security modifications will be made in South Block in 1974–75.

For the list of standard lettered capital outlay footnotes, see the end of this budget supplement.

DEPARTMENT OF THE YOUTH AUTHORITY

Program Objectives

The Health and Welfare Agency includes among its components the Department of the Youth Authority and the Youth Authority Board, both of which were created in 1941 by the Youth Authority Act. The intent of the Legislature in creating the Youth Authority was "to protect society more effectively by substituting for retributive punishment methods of training and treatment directed toward the correction and rehabilitation of young persons found guilty of public offenses."

Mission It is the mission of the Department of the Youth Authority to protect society from criminal and delinquent behavior by children and youth.

Goals

Youth Development: *Increase opportunities for all children and youth* to participate as contributing members of society.

Crime Prevention: *Reduce probability of illegal behavior* by children and youth not yet involved in the justice system but who have exhibited antisocial characteristics.

Offender Rehabilitation: *Reduce continuing illegal behavior* by offenders.

Research: *Systematically develop knowledge* about crime prevention, youth development, and offender rehabilitation.

The department provides institution and parole correctional programs for the youth committed to it by the courts. The Youth Authority also stimulates programs for improved rehabilitative resources in the communities of California. In addition to standard setting, inspections, and technical assistance, help is also provided through funding of special probation supervision programs in the counties.

Assistance is provided to local governmental and private groups to aid them in organizing programs to reduce the causes of delinquency. Based on the premises that delinquency reduction is essentially a local responsibility and that local leadership is mandatory in attacking and solving problems peculiar to each community, the Youth Authority assists communities by providing technical assistance, information, training and guidance and financial support for demonstration projects.

In carrying out its objectives of prevention and correction, the department utilizes a series of premises which represent the conceptual framework and guide used for comprehensive program planning and administration.

1. The generally negative effect of the criminal justice system as it currently operates is such that every reasonable effort must be made to divert individuals or children at risk away from the system and into other resources for control, assistance or treatment.
2. Usually, the deeper an offender penetrates into the criminal justice system and the more times he is recycled through it, the greater is the probability that he will continue his criminal activity.
3. Systems or methods for classifying offenders in terms of their relative need for treatment and control must be continually refined and treatment programs provided.
4. Every effort should be made to make the offender's retraining or correctional experience as normal in terms of his relationship to society as time, resources and public attitude permit. Rehabilitation is enhanced if the youthful offender can be programmed near his home, family and community.
5. Each individual offender should be kept in the correctional system for the shortest period of time commensurate with his resolving his own problems and the protection of society.

DEPARTMENT OF THE YOUTH AUTHORITY—Continued

I. COMMUNITY SERVICES

Need

The most significant factor in the field of crime is the increase in the number of serious offenses committed by persons under the age of 18. That crime is a problem of youth is illustrated by the fact that over half of the offenses for which arrests are made are committed by persons in this age group. While the juvenile arrest total for all reported offenses is down, the juvenile arrest rate for crime of personal violence has increased 65 percent in the period from 1968 to 1972.

The crime problem in California may be attacked in several ways. Preventing delinquency before it occurs is a logical first emphasis. The most effective way to accomplish this goal is by the action of concerned citizens in private organizations and through local government. There are many potential resources available in the communities of California to meet this need but they must be effectively mobilized. The Youth Authority's role is providing assistance to local groups by information sharing, guidance, training, various kinds of technical assistance, and limited financial assistance.

Over 85 percent of the state's total correctional caseload is under probation or parole supervision in communities; another 6 percent is confined in county or city jails. The main question is not whether to handle offenders in the community but how to do so most safely and successfully. Clearly there is a need to incarcerate those criminals who are dangerous until they are no longer a threat. In respect to most offenders, particularly the youthful, the first, or the minor offender, institutional commitments often cause more problems than they solve. Institutions isolate offenders from society, both physically and psychologically, cutting them off from schools, jobs, families, and other supportive influences, increasing the probability that they will continue their criminal activity when placed back in the community.

One of the Youth Authority's responsibilities is assisting county correctional agencies to increase the effectiveness of their programs. This is done through standard setting and inspections, training, special studies, and various kinds of technical and financial assistance.

Objectives

1. Assist local governmental and private organizations and citizens in development and improvement of delinquency reduction programs.
2. Assist local government develop and improve its juvenile law enforcement and correctional systems.

Authority

Welfare and Institutions Code, Division 2.

General Description

In 1972 there was a decline in the gross number of cases processed officially through the probation system. Juvenile delinquency arrests decreased to 353,232, down 6.9 percent from 1971. Arrests for drug abuse decrease 7 percent from 1971 and 11.4 percent from 1970. Initial referrals to juvenile prol tion decreased 5.4 percent. Initial petitions filed juvenile court decreased 10.4 percent. Admissions delinquents to juvenile halls dropped to 139,841 1972, a 5.5 percent decrease. Total first commitmer of juveniles to the California Youth Authority we down approximately 12 percent.

The department believes that the problems of cri and delinquency can be successfully met only if pr grams are developed that elicit more effective coo eration and coordination among local, state and fe eral agencies responsible for providing services young people. Therefore, the department has e barked, with the cooperation and support of the C ifornia Council on Criminal Justice, Department Health, Education and Welfare and other appropria federal, state and local agencies, on a model buildi project which will continue for the next two to fo years. The department has established two of thr proposed prototype youth service delivery systen Toliver Community Center began operation in nort west Oakland, July 1, 1972. The La Colonia You Service Project formally began operation Septemb 1, 1973, in Oxnard. The department currently gathering data necessary for the selection of a thi site. The two existing models, as the third, will refle the unique characteristics of the separate communiti they serve. To encourage local participation, the d partment has entered a joint powers agreement wi the two participating counties by establishing a Joi Delinquency Prevention Board. The specific objecti of this program for the first year is a 5-percent r duction in the target areas in both crime and deli quency and in the four successive years, a 10-, 15-, 2 and 25-percent reduction. The Youth Authority participating in a community service program Los Angeles through the Sugar Ray Youth Found tion in fiscal year 1973–74. The $325,000 cost of th legislatively authorized program will be funde through urgency deficiency legislation to be intr duced early in the 1974 session.

The probation subsidy program will require $2 592,000 in 1974–75 or a decrease of $150,000 fro 1973–74 fiscal year. It is anticipated the 1974–75 ear ings and program costs will be approximately th same level as in 1973–74.

From the inception of the probation subsidy pr gram in 1966–67 through 1972–73 there has been reduction of 24,564 juvenile and adult commitmen by the courts to the state compared to the numbe which could potentially have been committed if pa rates had continued. In 1974–75, 47 of the 58 countie will participate in the program, which will includ counties accounting for 98 percent of the state population.

Since 1966–67, the probation subsidy program ha continued to grow in the number of counties partic pating as well as in reduced commitments to stat youth and adult correctional institutions. The follow ing table indicates the growth and impact of th probation subsidy program:

A. Services to Public and Private Agencies

Assisting local communities improve services for delinquency prevention, probation (adult and juvenile), and juvenile law enforcement is the main thrust of the community services program. The Youth Authority helps public and private agencies by providng training, standard setting, inspections, and technical assistance.

Output

The Youth Authority offers training courses to local probation and juvenile law enforcement agencies. Courses relating to law enforcement have been accredited by the Commission on Peace Officer Standards and Training.

Assistance is provided to local components of the criminal justice system by disseminating and explaining standards of performance, encouraging the development of delinquency prevention projects and assisting communities to develop new and improved correctional programs.

The department has statutory responsibility for developing juvenile hall standards and standards for jails which detain juveniles. The Youth Authority also develops and administers standards for the performance of probation duties and standards for other subsidized programs. The department has the responsibility of inspecting all its subsidized programs to be certain they are meeting minimum standards.

During the past fiscal year, 47 counties participated in the probation subsidy program. Staff inspected and evaluated all of the programs. All programs met or exceeded minimum standards. In addition, numerous nonmandatory recommendations were made to assist in improving program performance; most of these recommendations have been or are being implemented.

Input	1972–73	1973–74	1974–75
Expenditures	$707,941	$2,125,354	$1,537,932

Totals	30.3	62.2	64.5

B. Financial Assistance

Financial assistance programs provide part of the financing for the maintenance and operation and construction of juvenile homes, ranches, and camps, control of unescorted juveniles attempting to cross the international border into Mexico, special probation supervision programs, and delinquency prevention programs of public or private agencies. These programs are designed to reduce the occurrence of delinquency and/or to strengthen local community resources in such a way as to reduce the number of cases coming further into the criminal justice system. The end result is a significant reduction in commitments to state correctional facilities.

DEPARTMENT OF THE YOUTH AUTHORITY—Continued

I. COMMUNITY SERVICES—Continued

B. Financial Assistance—Continued

Output

1. *Construction and Maintenance of Juvenile Homes, Ranches, and Camps Subsidy*

The California Bureau of Criminal Statistics recently conducted a study of wards released from the programs in order to determine their success. A total of 4,765 camp departures were followed for a period of 18 months. The major finding of the study was that 66.6 percent of the camp departures studied were not involved in any serious law violations during the 18-month period following their institutional stay. Furthermore, among those youths who had successfully completed camp programs, 77.4 percent did not become involved in any further serious law violations.

	Actual	Estimated	Estimated
Juvenile homes, ranches, and camps provide institutional treatment at the local level for the following average daily population	2,612	2,837	3,129
Number of facilities	68	72	79
Juvenile camp construction subsidy funds—total capacity available	3,739	4,039	4,429

2. *Probation Subsidy*

The state pays only for services rendered in the form of reduced commitments to the state's correctional departments below a base commitment rate. Payment is by statutory formula and is on a reimbursement basis for recovery of funds actually spent by counties on intensive probation supervision. There are about 18,000 probationers in special supervision programs of a total probation caseload of about 197,800.

	Actual	Estimated	Estimated
Total reduction of commitments to the Department of the Youth Authority and Department of Corrections	5,449	5,800	5,800
Youth Authority	3,431	3,600	3,600
Corrections	2,018	2,200	2,200
Percent of state population represented by the counties	98	98	98

A limited research evaluation of the probation su
sidy program was commenced by the department
1970. Prior to that time, the subsidy program w
without a research component. The Youth Authori
contracts with the Department of Justice to meet t
data collection requirements for an on-going prot
tion population reporting system.

3. *Delinquency Prevention Subsidies*

Delinquency prevention subsidies are used to sub
dize up to $1,000 of the administrative expenses
each county delinquency prevention commission a
to provide some of the matching funds for demo
stration delinquency prevention projects sponsor
by local communities.

Some of the programs receiving financial assistan
are:

Los Angeles County Sheriff's Department—Proje
"Interface";

Alameda County Delinquency Prevention Comm
sion—Toliver Center; and

Ventura County Delinquency Prevention Commi
sion—LaColonia.

4. *San Diego Border Check Station*

The Youth Authority assists the City of San Die
financially in providing a border check station whe
juveniles attempting to cross the border witho
proper escort are refused entry into Mexico and the
parents are notified.

Output	1972–73	1973–74	1974–75
Number of juveniles interviewed at international border	25,284	26,000	26,0
Number of juveniles turned back	10,985	11,700	11,7

Input	1972–73	1973–74	1974–75
Expenditures	$24,531,619	$28,138,057	$28,302,6

C. Delinquency Prevention Assistance to Local Communities

Through this program the department:

1. Aids local citizens on request in the promotion of programs which reduce crime and delinquency.

2. Works with local agencies to help parents understand and exercise proper parental supervision and authority.

3. Assists organizations in enlisting and training volunteers to augment existing delinquency prevention and correctional programs.

4. Provides assistance to local communities i
mounting extensive campaigns to get jobs for pro
bationers and parolees and to obtain foster homes fo
children needing out-of-home care.

5. Conducts workshops and institutes to promot
leadership training.

Output

The department's efforts have resulted in increase
activities on the part of delinquency prevention com

DEPARTMENT OF THE YOUTH AUTHORITY—Continued

missions, juvenile justice commissions, and other citizen groups that have sponsored delinquency prevention projects funded through state, local, and federal funds. As a direct result of requests from a variety of community groups, the department conducted drug education, volunteer, delinquency prevention and diversion seminars throughout the state. Requests for additional information regarding the causation and solution to the problems of delinquency have resulted in the department publishing a monthly delinquency prevention bulletin and the reprinting for distribution of publications on delinquency prevention, volunteers in corrections, and drug abuse.

Input	1972–73	1973–74	1974–75

Totals	4.7	6.3	6.8

II. REHABILITATION SERVICES

Need

The juvenile and criminal courts will commit approximately 3,000 youth in 1974–75 to the California Youth Authority. These young people are committed to the care of the state because they have exhausted all of the rehabilitative resources available at the community level. The public is entitled to protection from the destructive behavior of these juvenile delinquents. Unless attitudinal and behavioral changes are brought about, these youth will continue to be a threat to themselves and to society.

Objectives

1. To determine by diagnosis which treatment program or combination of treatment programs offered by the department can best meet the needs of each ward committed to it.
2. To implement a sufficient variety of treatment programs to appropriately assist the wards.
3. To provide a secure and closed treatment setting for wards during the institution phase of their treatment program and supervision and supportive services within the community while they are on parole.

Authority

Welfare and Institutions Code.

General Description

The median age of wards first committed to the Youth Authority increased for the seventh consecutive year. Most younger juvenile court wards are retained by the counties for inclusion in special probation subsidy programs, thus resulting in a higher median age for those committed to the Youth Authority.

The department has continued to pursue the policy of removing its youthful offenders from Department of Corrections facilities. During 1974–75 there will be an average of approximately 25 Youth Authority wards housed in Corrections facilities. All juvenile court commitments have been transferred from Department of Corrections facilities to Youth Authority institutions.

Beginning August 1, 1972, the department embarked on the first year of a three-year federally funded project to develop a community-centered drug treatment system designed to make use of locally based drug treatment resources. During the project the department will (1) develop a treatment system of identifying and classifying drug-abusing wards, (2) identify and classify treatment resources, (3) utilize already available local resources to provide services to drug-abusing wards, and (4) stimulate the development of needed but lacking local drug abuse treatment activities. Specific program activities to be implemented to accomplish these program goals include specialized diagnostic and planning units at Youth Authority reception centers, an intensive prerelease reentry program for drug abusers, and specialized drug resource staff in each parole region to coordinate drug program efforts within the department, facilitate relations with and utilization of community treatment resources and provide evaluation of those community drug programs. The impact of the program will be measured by the extent of increased use of community drug treatment resources by Youth Authority wards and the degree of change in drug-associated recidivism rates.

The department is preparing a comprehensive drug program plan which will create a statewide framework for all drug program activities provided to its wards, whether state or federally funded.

The U.S. Supreme Court decisions in *Morrissey vs. Brewer* and *Gagnon vs. Scarpelli* required that new due-process procedures be established relative to parole revocation. Conforming to the standards set by the court has required that hearings be held in local detention facilities as well as in the state institutions. Investigating, documenting, and presenting alleged violations in these hearings has resulted in a substantial workload increase for Youth Authority Board, and parole and institution staff.

The Preston School of Industry continues its 50-bed family drug treatment program under state funding. This innovative program combines both institutional treatment, followup counseling and guidance after reentry into the community. Preliminary evaluation

DEPARTMENT OF THE YOUTH AUTHORITY—Continued

II. REHABILITATION SERVICES—Continued

findings indicate that for a matched sample of paroled family and comparison wards the violation rate within the first six months for family wards is one-half that of the comparisons.

Institution population, particularly female, declined in fiscal year 1971–72, and during fiscal year 1972–73, which necessitated the closing of the Los Guilucos School in June of 1973. Subsequently, an increase of male population has occurred. In order to provide for the increase, a 40-bed male living unit at the Fred C. Nelles School and a 50-bed male living unit at the youth training school were activated in the spring of 1973. A 50-bed living unit for males opened at the Ventura School in October 1973 and a 50-bed male living unit at the DeWitt Nelson Training Center in July of 1974. Population increases over current year projections will require $2,509,832 in additional funding during 1973–74 and will be included in urgency deficiency legislation to be introduced early in the 1974 session.

A contract with the Federal Bureau of Prisons provides for programming 50 young adult males from the federal system in treatment programs of the Youth Authority. The Federal Bureau of Prisons reimburses the state for the cost of care.

The Paso Robles School (closed in June 1972) will be maintained on a minimal standby basis at least through fiscal year 1974–75. Maintenance costs ($100,132) for fiscal year 1973–74 will be funded through urgency deficiency legislation to be introduced early in the 1974 session. The Los Guilucos School (closed in June 1973) will be maintained on a minimal basis during 1973–74 fiscal year.

Parole caseloads are expected to drop during the later half of 1973–74 and throughout 1974–75. As a result, parole staff requirements will be reduced by 39.5 professional positions and five clerical positions by June 30, 1975.

Trends—Youth Authority Population

1. Ethnic group composition of wards first committed to the Youth Authority has undergone a significant change in recent years. In 1962, minority group members constituted 44 percent of Youth Authority's commitments. In 1972, 51 percent of the total first commitments were from minority groups.

2. The prior offense records of youth currently being committed to the Youth Authority are more extensive than previously. For example, between 1962 and 1972 the proportion of wards with no prior record has decreased from 6.3 percent to 4 percent. Males in institutions with a first commitment offense in the category of "offenses against persons" now comprise 29.1 percent as compared to 18.5 percent of the total male commitments in 1962.

3. Since 1962, the juvenile court-criminal court "mix" of first commitments to the Youth Authority has shifted significantly. Criminal court commitmen have increased as a percentage of the total. The 19 ratio was 72 percent juvenile and 28 percent crimi court commitments. The 1972 ratio was 53.6 perce juvenile and 46.4 percent criminal court cases.

4. The age of youth first commitments to the You Authority is increasing. The median age of all war committed in 1962 was 16.9 years while in 1972 was 18 years. The median age of those housed Youth Authority facilities has changed dramatical The median age on June 30, 1962, was 17.8 while June 30, 1973, it was 18.9.

5. The extent to which youths committed to t California Youth Authority have increasingly beco involved with narcotics is alarming. In 1965, 12 p cent of the males and 26 percent of the girls had h some involvement with narcotics. By midyear 19 the percentages had increased to 48 percent of t males and 54 percent of the females. Further creases brought the 1971 proportions to 61 perce of the males and 66 percent of the girls. The You Authority is currently attempting to identify as dr abusers only those wards who have a record of serio habituation. It is expected that under this new ide tification system the percentages of identified war with heavy drug use will show a drastic reductic However, any such reduction would reflect a focusi on the most serious drug abusers rather than a ge eral decline in drug involvement among wards.

6. There has been a marked increase in violent b havior by Youth Authority wards in institutions. comparison of 1965–66 to 1972–73 shows attacks staff up from 24 to 147, and attacks on each oth up from 22 to 206.

7. First commitments to the Youth Authority ha decreased from 5,194 in 1962 to 2,728 in 1972. D to the screening process resulting from improv probation resources, the Youth Authority is receivi older, more criminally experienced, difficult you requiring longer periods of institution and par treatment and supervision. The Youth Authori Board has increased length of stay from an avera of 9.3 months in 1961 to 11.1 months in 1972.

In summary, the department is receiving old wards whose delinquent history is more extensive a serious and whose involvement with narcotics is co siderably more than it was 10 years ago. In additio a larger segment are minority youth. Increasingl the youth being received by the department refle and act out the current and complex problems of t society from which they are sent.

Youth Authority institution and parole populatio for 1972–73 through 1974–75 fiscal years are show in the table entitled Statement of Population—Inst tution and Parole.

A. Diagnosis

All wards received by the Youth Authority go through an intensive diagnostic process at one of three Youth Authority reception centers. During this period of clinical study, each youth undergoes psychological and educational testing, is interviewed, medically and dentally examined and observed in daily activities. All information derived from this period of testing, interviewing, and observation is used in formulating the final diagnosis and treatment recommendations.

If a youth is sent to an institution, his progress is reviewed at intervals of no more than every three (3) months during the institutional stay until a recommendation for parole to the Youth Authority Boa results in return to the community.

Input	1972–73	1973–74	1974–7

Workload adjustments	–	–3.1	–5
Totals	257.8	258.1	256

B. Care and Control

Providing adequate care, control, custody and surveillance for youth committed to the department, and thus protection of the public, is one of the major responsibilities of the Youth Authority and must be accomplished within an atmosphere that promotes progress towards individual rehabilitation goals.

Most custody staff are assigned to living units. The living units vary in design from open dormitories for 50 males to all single rooms. There are also more secure units for short-term disciplinary use and limited longer-term housing for the more serious behavior problems. Living unit staffing formulas have been developed for the various sizes and types of units. Most living units are for 50 wards with varied staffing patterns. The living units at all institutions have at least five-post staffing. This staffing pattern provides two staff members on duty at all times to work with 50 wards during their waking hours.

Other custodial personnel are available for specific areas or assignments outside the living units. Typical are assignments to dining room and educational buildings or areas, hospital, search and escort, movement, and the control center.

Custodial personnel have physical control and security as a primary responsibility. This responsibility is exercised in the living unit, through supervision of recreation activities and work details, movement within the institution, and a variety of other activities in which wards are involved. It is with this staff that inmates have their greatest contact and from this staff group a substantial contribution to positive change in behavior is expected. Custodial staff in the treatment program conduct group and individual counseling and casework. Prevention of riots and major disturbances is most effectively accomplished by the positive relationships custodial staff are able to develop with inmates through their participation in treatment program activities.

All the youth committed to the Youth Authority are eventually returned to the community under parole supervision. Supervision and control of the parolees' activities are supplemented by other casework services including individual and group counseling assistance in obtaining employment and school placeme when appropriate, foster home placement and oth supportive services. These are designed to achieve t objective of helping each of these young people su ceed on parole and become a more useful citize Fullest possible use is made of available communi resources.

The number of serious incidents occuring is or measure of the severity of the behavior problems the Youth Authority's institution population. Th change in the serious incidents occurring in Yout Authority institutions from 1970–71 through 1972–7 are shown in the following table:

Fiscal year	Assaults on staff	Assaults by wa on wards
1970–71	121	156
1971–72	59	215
1972–73	147	206

The parole agent is responsible for face-to-face co tact with youth assigned to his caseload as well as a contacts with private and public agencies and inte ested citizens with respect to them. The parole agent parolee supervision responsibilities include maintai ing controls over the parolee's activities in school, em ployment, and the community. Parole returns are a index to the relative effectiveness of parole supervi sion. The following table shows that the number o parolees returned to institutions compared to total o parole has decreased in recent years:

COMPARISON OF PAROLE VIOLATORS RETURNED TO INSTITUTIONS

	Total parolees returne Number
1971–72 (Act.)	1,915
1972–73 (Act.)	1,835
1973–74 (Est.)	1,700

DEPARTMENT OF THE YOUTH AUTHORITY—Continued

II. REHABILITATION SERVICES—Continued

C. Treatment

Each Youth Authority institution and parole unit provides a variety of counseling and other treatment services. These services include small group counseling and individual counseling, guided group interaction, activity groups and traditional, clinically oriented therapy.

Educational programs are provided in the institutions and in some of the special parole units. Depending upon the youths in the program, emphasis may be on academic education, vocational or prevocational training with individual tutoring in some cases. Each ward's progress is periodically evaluated and program changes are made when necessary. Each institution through its chaplains provides the opportunity for worship services, pastoral counseling and religious education.

Psychiatric evaluation, treatment and consultation are provided in each institution by either a full-time staff psychiatrist or a part-time psychiatric consultant. Consultation services are available in most parole units.

Treatment for a ward in the Youth Authority program is a combination of these components based on an individual plan developed to meet his needs. These plans are developed with the youth involved and require a full commitment on his part to achieve constructive changes in his life style.

At two of the institutions for males, O. H. Close and Karl Holton, experimental treatment techniques —transactional analysis and behavior modification— are being used. Research data has demonstrated the detention rate at both schools dropped more than 60 percent in two years; achievement test scores showed monthly gains to be nearly twice that ordinarily to be expected, and residents at both institutions made important positive behavior and attitudinal gains. Both programs have also had significant impact on recidivism rates. After 12 months on parole, only 32 percent of O. H. Close parolees and 32 percent of Karl Holton parolees had been removed from parole. These figures were significantly lower than the previous violation rates of 44 percent and 42 percent for the institutional parolees of the same age. Forty-six percent of wards of comparable age released from two other California Youth Authority institutions during the same time have been recommitted after a 12-month exposure period.

The preponderance of wards in institutions operated by the Department of the Youth Authority are between 16 and 20 years old. Their backgrounds frequently include a history of poor school experiences. Only 6.7 percent of first admissions in 1971 had no reported school misbehavior, and only 7.2 percent had achieved high school graduation. The reading and math achievement levels are severely depressed. Sixty-three percent of the wards had reading comprehension level three or more years below their age-grade expectancy, and 85 percent had math achievement levels three or more years behind their age-grade expectancies.

A survey of student attitudes at Preston School found that their understanding of the world of work was what one would expect from a 13-year-old. The employment record of these students is relatively poor. A survey of parole case loads found that approximately 40 percent of male and 60 percent of females "in the labor force" are unemployed at any point in time.

In response to the needs given above, the department conducts an academic and vocational program with a strong remedial emphasis. This includes ESEA-supported reading math labs, trade-oriented prevocational and vocational programs, and programs leading to high school graduation or GED's. This last year has seen the establishment of an individualized manpower training system (IMT) at four schools and a new U.S. history curriculum. The IMT system provides motivational and vocational exploratory activities, as well as instruction in reading and math. The revised history curriculum provides materials designed to reflect minority contributions.

Those students participating in remedial reading and math programs gain in reading and math at a rate twice as fast as would be expected on the basis of national averages and over five times as fast as they had in prior schooling. Approximately 1,500 releases from Youth Authority institutions had received some form of vocational training. Preliminary data from a pilot test of the new history curriculum indicate students feel that the new curriculum: (1) has improved their appreciation (respect) for other ethnic groups and (2) helped them to better understand the United States today.

A ward pay plan has been implemented to provide incentive for older and more sophisticated wards for work not directly related to training but necessary for the operation of the institution. The wards are paid on a sliding scale of $0.04 to $0.12 an hour, with an average rate of pay of $0.08 an hour.

PAROLE VIOLATION STATUS OF PAROLEES, 1968–71

Output

Year of release	Number released to California parole supervision	Revoked or discharged for violation within 15 months: Number	Percent

DEPARTMENT OF THE YOUTH AUTHORITY—Continued

III. RESEARCH

Need

The prevention, control and correction of crime and delinquency in California continues to be an unsolved, changing and complex problem demanding the development of increasing knowledge and new techniques through careful observation, experimentation and research.

The department attempts to meet the problems of juvenile delinquency through a complex system involving diagnostic centers, institution, parole supervision, subsidy programs to local counties, and in many additional ways. Program evaluation and feedback is mandatory so that determination can be made as to which programs are effective and should be continued, those that show promise and should be reinforced and those that should be discontinued.

Objectives

1. To provide planning to guide and help implement the long-range program.

2. To provide the department with an informati system as a basis for arriving at sound manageme decisions.

3. To provide the department with a research cap bility and a system for evaluating how well its pr gram objectives are being met.

Authority

Welfare and Institutions Code.

General Description

The Division of Research and Development ha three major areas of responsibility. One is the creatio and implementation of a coordinated system for lon range program planning and development. A secon is the operation of the departmental information sy tem, and a third is to provide research and evaluatio services to ongoing programs and to special demo stration projects.

PROGRAM REQUIREMENTS	72–73	73–74	74–75	1972–73	1973–74	1974–75

Research and evaluation	40.3	47.9	41.5	698,321	897,402	711,830

A. Information Systems

Information is collected at the principal points of decision in the movement of wards through the department's rehabilitation program—from the point of initial referral to final discharge. This section works closely with the department's budget and program administrators. Projections of future institutional and parole caseloads are made for budgeting and capital outlay planning.

Output

Output is measured qualitatively in terms of the timeliness, comprehensiveness, accuracy, and relevance of the data made available by this information system. The card-oriented system was transferred to a larger computer which should improve the timeliness and comprehensiveness of the data. Beginning in March 1972, the offender data file project, partially funded by a CCCJ grant, got underway to develop an improved information system. This project, which will be completed in February 1975, will incorporate new informational elements and capabilities into the system and will increase the information available to managers for improved decision making.

Input	1972–73	1973–74	1974–75
Expenditures	$552,769	$678,511	$501,80

Personnel man-years	29.6	29.6	29.7
Workload adjustments	–	5.7	1
Totals	29.6	35.3	30.7

B. Research and Evaluation

The research and evaluation program resource is the primary means whereby the department fulfills its commitment to careful, scientific evaluation of its programs in order to gain new knowledge as well as being sure its resources are being used most effectively. Research projects are financed in two ways: through outside support by grants or through state support. Over half of the research projects underway in 1973–74 were wholly or in part funded through outside funding sources.

DEPARTMENT OF THE YOUTH AUTHORITY—Continued

III. RESEARCH—Continued

B. Research and Evaluation—Continued

Output

Research findings have heavily influenced the development of the CYA program. For example, the community treatment project and the community parole center project which led toward an increasing community treatment orientation for offenders and opened the way for the probation subsidy program which has contributed to dramatically reduced commitments.

The cooperative behavior demonstration project is involving selected parole and probation units in the use of innovative behavior modification techniques in community treatment settings. Youth service bureaus, located in various communities across the state, have been studied to determine their effectiveness in diverting from the juvenile justice system and in reducing delinquency. Volunteer programs are also being studied. The community-centered drug abuse treatment project, which utilizes a wide range of community-based, drug abuse treatment resource agencies for CYA wards, is being evaluated in depth. Two community-based models aimed at providing comprehensive youth development and delinquency prevention services in two different areas of California are in the process of evaluation. Research on projects financed through the Federal Elementary and Secondary Education Act is providing objective evidence on the effectiveness of special educational programs in correctional institutions. A probation research unit is providing a comprehensive and ongoing evaluation of the impact of the probation subsidy program on the communities in which it operates. A special study of the effectiveness of probation subsidy programs is currently underway. In addition, evaluations are being undertaken on the Preston drug abuse project, ward grievance project, and on many additional programs.

Input	1972–73	1973–74	1974–75

Totals	40.3	47.9	41.5

IV. YOUTH AUTHORITY BOARD

Need

The Department of the Youth Authority currently has approximately 4,400 boys and girls in institutional programs and 10,500 parolees in various parole programs. During the 1974–75 fiscal year approximately 3,000 youth will be committed to the Youth Authority by juvenile and criminal courts.

The Youth Authority Board is mandated by statute to make objective decisions as to a ward's readiness for release on parole, his conduct while on parole, possible return to court, and readiness for discharge from the jurisdiction of the Youth Authority.

Objectives

1. To protect the public.
2. To assure the rehabilitation of the youthful offender.

Authority

Welfare and Institutions Code.

General Description

The Youth Authority Board has eight members, at least one of whom must be a woman. They are appointed by the Governor to serve four-year terms, with terms staggered so that two terms expire each year. Present board workload is being carried by eight members and eight board hearing representatives. The Director of the Youth Authority, by law, serves as chairman of the board.

The board meets monthly for formulation and discussion of board policy and to assist the director in meeting the overall goals of the department; namely, the protection of society through the rehabilitation of youthful law violators. The board has the responsibility of carrying out the following specific duties:

1. Recommending treatment programs for individual wards.
2. Determining the date of each youth's next appearance before the board.
3. Ordering release from institutions and establishing conditions of parole.
4. Return of wards to the court of commitment when unamenable or untrainable by Youth Authority programs.
5. Suspension or revocation of parole.
6. Return of nonresident persons to the state of legal residence.
7. Final discharge of commitment to the Youth Authority.

The board personally interviews and evaluates each youthful offender committed to the department. The board conducts approximately 36,000 case hearings per year. These meetings are conducted in the reception centers, institutions and parole offices. Within four weeks of date of acceptance, youths appear before the board for an initial hearing and decision as to training and treatment needs, and periodically they appear before the Board during institutional training programs for evaluation of progress and readiness for release back to the community.

In June of 1972 and May of 1973, the U.S. Supreme Court decided two cases, *Morrissey v. Brewer* and *Gagnon v. Scarpelli*, which placed a substantial workload increase on the Youth Authority Board. The *Morrissey v. Brewer* decision set down minimum requirements for due process procedures for the revo-

DEPARTMENT OF THE YOUTH AUTHORITY—Continued

IV. YOUTH AUTHORITY BOARD—Continued

cation of parole of any person. The *Gagnon v. Scarpelli* decision provided the right to request counsel and created an obligation upon the state to be sure counsel is provided under certain circumstances, for any person who was undergoing a violation or revocation parole process. Implementation of the *Gagnon* vs. *Scarpelli* mandate will require $525,556 for fiscal year 1973–74 to be funded through urgency deficiency legislation to be introduced early in the 1974 session.

In 1972, the Youth Authority Board designated 11.1 percent of the Youth Authority ward population as "full board" cases and 8.9 percent were designated "special service" cases. In 1973, the full board des nation had increased to 15.1 percent and the spec service classification to 9.7 percent.

The full board designation indicates a decision the board for the necessity of giving increased att tion to such cases. These cases usually require a long institutional stay, longer and more intense parole s pervision and, consequently, a greater amount of tention by the board before a decision to release i the community and, later, to discharge from You Authority jurisdiction.

PROGRAM REQUIREMENTS	72–73	73–74	74–75	1972–73	1973–74	1974–75
Continuing program costs	18.5	25.4	25.4	$473,675	$901,021	$908,003

Totals, Youth Authority Board *(General Fund)*	18.5	32.4	32.4	$473,675	$1,036,135	$1,043,117

V. ADMINISTRATION

Need

All of the department's operational and program areas require overall leadership, coordination, and administrative support to assist in reaching the department's objectives. The complexity of the department's operations is illustrated by the fact it operates five conservation camps, eight institutions, three reception centers and 50 parole offices. The Youth Authority has direct relationships with 58 counties operating 60 probation departments. The counties operate 72 homes, ranches and camps, and 123 special probation supervision units, all of which are partially supported by the state through the Youth Authority. In addition, the department works with the Departments of Corrections, Mental Hygiene and Rehabilitation cases committed to the Youth Authority. Also, c tractual relationships are maintained with Alas Nevada and Arizona for the care of wards from th states.

Objectives

1. Provide leadership and coordination for depa mental programs.
2. Insure the most efficient and effective use of t available manpower and resources.
3. Provide administrative, business and other se ices necessary for the efficient operation of the partment's programs.

A. Executive

The Director of the Youth Authority is the chief administrative officer of the department and chairman of the Youth Authority Board.

The office of the director, including the chief deputy director, combines with the deputy director of community services, deputy director of rehabilitation services, division chiefs and the administrative officer of the Youth Authority Board to constitute the central administrative core within which the responsibility for all major policy determinations, program planning, and evaluation is centered.

The director personally carries the responsibility for coordinating policy and procedure between the program operation arms of the department and t case decisionmaking authority of the Youth Authori Board. A mutually supportive relationship betwe these two entities is essential to the effective operati of both.

V. ADMINISTRATION—Continued

B. Support Services

General administrative services are provided to support the various program operations of the Youth Authority. Staff services for fiscal management, management analysis, data processing, facility construction and maintenance, and safety are provided by the Administrative Services Division. Staff services for personnel and training are provided by the Division of Personnel Management.

Input	1972–73	1973–74	1974–75
Expenditures	$2,402,721	$2,992,881	$2,998,724
Workload adjustments	–	144,019	156,461
Totals	$2,402,721	$3,136,900	$3,155,185
Personnel man-years	118.7	125.1	125.3
Workload adjustments	–	16.1	13.8
Totals	118.7	141.2	139.1

Output

All of the support services are performed at the request of managers involved in the program areas. There are few output measures other than the relationship of administrative costs compared to total program costs.

[1] The last four years of the five-year building program are the agency's current estimate of need and do not represent a program approved by the administration.

Program Summary

The construction program for the 1974–79 period, with a total estimated cost of $1,110,000, provides for construction of essential auxiliary facilities at existing institutions. The last four years of the five-year building program are the agency's current estimate of need and do not represent a program approved by the administration. Present total institution capacity is 5,183 beds plus 339 hospital and detention beds. This program will not increase this capacity.

Basic Factors Affecting Agency Program Population Estimates

Commitments are classified as juvenile court wards or as young persons convicted in the criminal courts, and include only persons who are at least eight years of age or less than 21 years of age at the time of the offense which results in commitment to the department.

Commitments during the next five fiscal years, 1974–75 to 1978–79, will be under previous estimates. This can be attributed to Probation Subsidy Program, the federal anti-poverty programs and various other social changes.

It is believed the ultimate effect of the Probation Subsidy Program will be to channel most of the potentially better risks into county programs, leaving the Youth Authority to deal with only the more difficult delinquents. This will probably result in a longer length of stay for youths who are committed to the Youth Authority. The lower commitments to the department may cause a reduction in capital outlay needs during the next five years if the results of probation subsidy and other community-based programs are encouraging. Recent population figures have indicated that the commitment rate to the Youth Authority had declined. While this is due in part to a number of socioeconomic factors, it is due in some measure to the effectiveness of these programs. While new facilities will eventually be needed as California's population continues to increase, the rate at which they will be needed should be much lower than has been true in the past.

The above-mentioned factors are reflected in the population estimates and bed needs projected for the five-year period from 1974–75 to 1978–79. Reception processing time is estimated to average four weeks for both boys and girls, which is shorter processing time made possible through an administrative reorganization of the reception centers. Average length of stay in institutions is estimated to average 11 months for boys and 10 months for girls. We anticipate that the lengths of stay will likely be longer as probation subsidy programs and community-based programs expand.

Another major factor affecting population estimates in reception centers is the increasing need for temporary detention, or, short-term confinement of wards who are on parole in lieu of revocation of parole. In addition, the apparent trend in court decisions concerning deprivation of freedom without "due process" has mandated the department to establish procedures to conduct revocation hearings for those wards alleged to be in violation of their conditions of parole. These revocation hearings are conducted in the reception centers and require the presence of the ward, resulting in the need for additional bedspace.

Totals	$1,110,000	100.0

Budget Proposals for 1974-75

The projects at the Preston School of Industry provides for offsite sewage disposal to the City of Ione, and planning funds for rehabilitation of the fire safety and industrial water system. Both projects are eligible for at least 80 percent funding by the Clean Water Act.

RECONCILIATION WITH APPROPRIATION

General Fund

APPROPRIATIONS			
Budget Act appropriation	$150,000	$102,200	$150,000
Less Allocations to:			
Preston School of Industry	−150,000	−102,200	−150,000
Total Expenditures *(General Fund)*	−	−	−

Northern California Reception Center—Clinic

The purpose of this facility is to centralize the intake, processing and transfer of all juvenile boys and girls committed from northern California to resident institutions. The center provides diagnostic studies and training recommendations on each case. Intensive medical, dental, psychological and psychiatric treatment is given both for newly received wards and serious medical and psychiatric cases developing in the Youth Authority's northern California institutions.

The institution, located on a 17-acre site approximately seven miles east of downtown Sacramento, has a total capacity of 304 living-unit beds plus 19 hospital beds.

There are no major projects proposed for 1974–75.

MAJOR PROJECTS

Air-condition education building	−	−	−	$90,000	
Total, Expenditures *(General Fund)*	−	−	−	$90,000	
TOTAL, FIVE-YEAR PROGRAM					$90,000

RECONCILIATION WITH APPROPRIATION

General Fund

Prior Year Balance Available:	
Budget Act of 1971, Item 298	$10,000
Total Available	$10,000
Transfer to Section 16409, Government Code	−10,000
TOTAL, EXPENDITURES *(General Fund)*	−

Southern California Reception Center—Clinic

This facility processes all boys committed from southern California. Diagnostic studies and training recommendations are supplied on each case. Intensive medical, dental, psychological, and psychiatric treatment is given for newly committed wards as well as for serious medical and psychiatric cases developing in the Youth Authority's southern California institutions.

The institution, located on a 34-acre site near Norwalk, has a present capacity of 335 dormitory beds and 28 hospital beds.

There are no major construction projects proposed for 1974–75.

MAJOR PROJECTS

Replace security sound system	−	−	−	$100,000	
TOTAL EXPENDITURES *(General Fund)*	−	−	−	$100,000	
TOTAL, FIVE-YEAR PROGRAM					$100,000

Youth Authority Conservation Camps

The camp program of the department is operated jointly by the Youth Authority and the Division of Forestry and serves in the rehabilitation of older youth through useful work in the suppression of forest fires, reforestation, road construction and general maintenance of the state's forests and recreational areas.

STATE BUILDING PROGRAM EXPENDITURES	Actual 1972–73	Estimated 1973–74	Proposed 1974–75	Projected 1975–76	Projected 1976–77	Projected 1977–78	Projected 1978–79

Youth Authority Conservation Camps—Continued

The camps are located at Pine Grove in Amador County, Mt. Bullion in Mariposa County, Ben Lomond in Santa Cruz County, Washington Ridge Camp in Nevada County, and Oak Glen, in San Bernardino County. Total capacity of these conservation camps is 400.

There are no major construction projects proposed for 1974–75.

Fred C. Nelles School for Boys

The Fred C. Nelles School for Boys, with a bed capacity of 560 plus 31 hospital and detention beds, is located on a 321-acre site in the center of a metropolitan area and within the city limits of the City of Whittier. This institution was originally constructed in 1890. Remodeling and rebuilding of this institution began in the 1959–1960 fiscal year and will be completed in future years.

There are no major construction projects proposed for 1974–75.

MAJOR PROJECTS

Renovate Hospital:							
Construction	–	–	–	–	$250,000		
Equipment	–	–	–	–	30,000		
TOTAL, EXPENDITURES *(General Fund)*	–	–	–	–	$280,000		
TOTAL, FIVE-YEAR PROGRAM							$280,000

Northern California Youth Center

The Northern California Youth Center is loeated on a 960-acre site near Stockton. It is the first of two youth centers in California which are planned to handle the departmcnt's future capacity requirements. While each 400-ward institution's treatment program will be complete and self-contained, the overall supervision, business services, maintenanee, feeding, and hospital care will be provided by the central unit. Thus the operational economies of a large institution will be accomplished with the program benefits of small, 400-ward units.

The first three institutions and the central hospital now provide a total capacity of 1,179 plus 44 detention beds and 33 hospital beds. The first two institutions have been open for several years. The third institution, the DeWitt Nelson Training Center was opened during the 1971–72 fiscal year, as a result of reducing the population at the Preston School of Industry.

There are no major eonstruction projects proposed in 1974–75.

Southern California Youth Center

The Southern California Youth Center is located in Chino. It is the second of two youth centers in California which was planned to handle the departments future capacity requirements. The first of these youth centers is the Northern California Youth Center located near Stockton.

Initially, the central administrative and service facilities for the operation and support of the first two institutions have been provided by expansion of the existing Youth Training School and construction of a portion of the central facilities master plan.

The first institution, the Youth Training School, provides a capacity of 1,200 living-unit beds, and 72 hospital and detention beds.

There are no major construction projects for 1974–75.

MAJOR PROJECTS

Youth Training School:							
Air-condition education offices and academic classrooms	–	–	–	$150,000			
TOTAL, EXPENDITURES *(General Fund)*	–	–	–	$150,000			
TOTAL, FIVE-YEAR PROGRAM							$150,000

Paso Robles School for Boys

The Paso Robles School for Boys is located near Paso Robles in San Luis Obispo County. The site covers 203 aeres and the institution occupies an area of approximately 40 acres. The facility has a capacity of 452 plus 38 hospital and detention beds. The school program was academic and prevocational in nature. All buildings are of single-story reinforced brick construction with radiant heating. Partially as a result of the Increased Parole Effectiveness Program, this school was closed on October 1, 1972.

Preston School of Industry

The Preston School of Industry has a program of academic and vocational education. The facility was constructed in 1894 near Ione in Amador County. This institution has a capacity of 590 living-unit beds plus 42 hospital and detention beds.

By the end of the 1971–72 fiscal year, the department reduced the average daily population at Preston to 390 by transferring 340 wards to the recently completed DeWitt Nelson Training Center near Stockton.

The major construction project proposed for 1974–75 provides for offsite sewage disposal by the City of Ione, and planning funds for the rehabilitation of the industrial water system, which includes a direct connection to the City of Sutter Creek effluent system. Both projects are eligible for 87½ percent financing by the Clean Water Act.

Los Guilucos School

Los Guilucos School is located near Santa Rosa, Sonoma County. The school property includes 420 acres of which the building area occupies approximately 40 acres. The total living capacity is 254 beds, plus 47 hospital and detention beds. This school is one of two coeducational institutions; it provided an academic, prevocational, work experience and college program for 85 boys and approximately 150 girls.

There are no major construction projects proposed for 1974–75. This institution was closed on June 30, 1973.

Ventura School

The Ventura School consists of a reception center and resident housing for delinquent girls and a program for 150 boys. The residential program consists of primary, junior and senior high school academic and remedial training plus a vocational training program.

The institution is located in Oxnard, Ventura County. All buildings are of single-story reinforced concrete and brick construction. The school has a capacity of 100 reception beds, plus 4 detention beds, 450 residential beds and 66 hospital and detention beds. Each living unit houses 50 wards in single rooms.

There are no major construction projects proposed for 1974–75.

CALIFORNIA HOSPITAL COMMISSION

Program Objectives

The goals of the California Hospital Commission are to (1) encourage economy and efficiency in the provisions of hospital services, (2) enable public agencies to make informed decisions in purchasing and administering publicly financed health care, (3) encourage organizations which provide hospital insurance to take into account financial information provided to the commission in establishing reimbursement rates, (4) assist in planning and designing improved means of providing health care, (5) stabilize hosp costs through the effects of public scrutiny of t factors, (6) eliminate or reduce budget crisis in pul programs by providing accurate information to prove budgetary planning, (7) identify and diss inate information regarding areas of economy in provision of health care consistent with quality f care, and (8) create a large body of reliable infor tion for research into the economics of health care.

I. UNIFORM HOSPITAL ACCOUNTING AND REPORTING

Need

Institutional costs and charges for providing patient care services in hospitals in California have been rising at such rates as to cause significant concern among governmental, insurance, institutional, and consumer groups throughout the state. Effective analysis and comparison of costs and charges in California hospitals have not been possible in the absence of uniform accounting and reporting procedures. Public agencies of the state purchasing health care services under publicly financed health care plans as well as private third party payors and the public recognized the need for uniform comparable data on which to base their rates of reimbursement. Competent health care planning has had to proceed, for the most part, in the absence of verifiable cost information with which it could judge the cost effectiveness of planning decisions with regard to the availability and distribution of health care facilities. The commission has been established to determine and administer requirements for uniform accounting and reporting systems in hospitals as well as to study and recommend improved methods of cost effectiveness in the provision of health care services in institutional settings.

Objective

The objective of the California Hospital Commission is to develop and administer the implementation of regulations requiring a uniform system of accounting and financial and statistical reporting for all of the hospitals in California. Secondary objectives include the analysis and publication of information collected under these regulations to provide governmental and private agencies and individuals with accurate cost information and furthermore to use this information as a basis for recommending methods for more efficient operation and provision of health care services. A newly enacted second major objective (AB 2123, Chapter 1072—1973) of the commission will be to prepare and submit to the Legislature, before July 1975, a hospital economic stabilization program for legislative consideration. Such a program will be signed to establish a system to retard inflationary h pital costs and price increases through an equita method of a prospective determination of rates f reimbursement.

Authority

Hospital Disclosure Act, Part 1.7 (commenc with Section 440), Division 1 of the Health and Saf Code.

General Description

The California Hospital Commission was crea in 1971 to establish an approved system of accounti and uniform reporting system for all hospitals, exc federal, within the State of California. On March 1973, as authorized by the Hospital Disclosure A the commission adopted rules and regulations (Ch ter 10 of Title 4 of the California Administrat Code) which prescribed the basic hospital accou ing and reporting system. The required accounti system becomes effective for hospitals for all fis years starting on or after July 1, 1974. To furth define the commission's accounting and reporting s tem, the commission contracted for the developm of an accounting and reporting manual. The man was developed by the contractor with close coope tion and active participation of the commission st California Hospital Association, and other interest organizations and individuals within the state.

Public hearings on the manual were held in late O tober and early November 1973, and the commissi formally adopted the manual on November 14, 19 A copy of the manual will be distributed to all h pitals in early January 1974.

Upon completing their fiscal years on or after Ju 30, 1975, all hospitals are required to submit p scribed annual financial and statistical reports to t commission. The reports will include a balance she a statement of income, expenses, and operating s plus or deficit; a statement of the source and app

CALIFORNIA HOSPITAL COMMISSION—Continued

I. UNIFORM HOSPITAL ACCOUNTING AND REPORTING—Continued

cation of funds; and a statistical report sufficiently detailed to identify costs related to categories, types, or units of hospital care services. The commission will prepare summaries, compilations, or supplementary reports which will be available to the public for inspection. The commission will also use the information submitted as a basis for doing long and short-range special studies with the purpose of recommending economies in the provision of health care services.

Section 442.2 of the Hospital Disclosure Act authorizes the commission to initiate and conduct such studies as will advance the purposes of the act. Specifically authorized by the act are studies of the practicability of various methods of implementing "cost-effectiveness programs" for the delivery of health care services. To implement this portion of the act, the commission's staff and advisory council studied and then recommended to the commission a list of considerations for special studies. The special study which was ranked at the top of the list was "shared services and facility mergers." On August 1, 1973, the commission authorized the staff to proceed with this study, and appointed a special project committee to work with the staff. The project committee included eight nonstaff members from the state at large and other state agencies who have expertise in the health care field. The staff and committee assignment is to refine existing methods and materials, and to come up with a strong set of guidelines and recommendations specific to California for voluntarily encouraging sharing and merging programs in hospitals.

With the enactment of Assembly Bill 2123, the hospital assessment date was changed from January 1 to July 1. This means that no hospital fees will be collected in January 1974 and hence no revenue for the commission during the current fiscal year (1973–74). However, this is not a problem as the California Hospital Commission Fund has an adequate balance for the current fiscal year operations. This resulted when a full assessment was made late in the 1971–72 fiscal year (the first year of the commission's existence), but less than $17,000 was expended. The estimated fund balance at the end of the current fiscal year ($190,000) will provide adequate working cash at the start of the 1974–75 fiscal year until the hospital assessment fees are collected in late July and early August 1974.

The commission established a senior data processing systems analyst position during the current year to begin development of a system for processing the hospital reports which will be submitted to the commission, as required by the commission regulations, starting in the fall of 1975. Although this is sometime away, it is necessary to begin developing the system in order that it will be ready when needed.

For the budget year, two additional positions are proposed, an associate research analyst and a senior health economist. The associate research analyst will work primarily with and under the direction of a senior research analyst in completing research projects and special studies. The number of research projects and special studies envisioned requires the additional position. The economist will be needed to provide required technical assistance to the commission in developing a hospital economic stabilization program proposal for presentation to the Legislature prior to July, 1975, as required by AB 2123, enacted during the 1973 session.

Output

During the 1974–75 fiscal year, the commission will administer the implementation of the approved accounting system for all hospitals in the state. The law allows hospitals 15 months in which to change to the new accounting system. The commission will explore possible cost-effective methods or changes which the hospitals can adopt which will result in lower operating costs and savings to the general public and taxpayers. The commission will develop and submit to the Legislature a proposal for a hospital economic stabilization program for California before July 1, 1975.

II. REVIEW OF EXCEPTION REQUESTS TO FEDERAL PRICE LIMITATIONS

Need

Under the President's Economic Stabilization Program, it was determined by the federal government that a state agency should be designated to determine needs for exception to the price limitations for health services and make recommendations to the Cost of Living Council.

Objective

The objective of the State Advisory Board is to analyze the financial data submitted by an institutional applicant for exception review and to acquire such additional information about that institution's operations and its role in the community so as to make intelligent recommendations with regard to the goals of the President's Economic Stabilization Program and health care needs of the people of California.

Authority

Hospital Disclosure Act, Part 1.7 (commencing with Section 440), Division 1 of the Health and Safety Code.

General Description

Under Phase II of the President's Economic Stabilization Program commencing November 15, 1971,

CALIFORNIA HOSPITAL COMMISSION—Continued

II. REVIEW OF EXCEPTION REQUESTS TO FEDERAL PRICE LIMITATIONS—Continued

wage-price stabilization guidelines were established for the health services industry. The governors of each state were requested to designate or establish an agency to review and make recommendations on health care institutional requests for exceptions to federal price increase limitations.

In January of 1972, the California Hospital Commission was designated to act as the State Advisory Board. The Cost of Living Council has established a 6-percent increase limitation on aggregate annual revenue and requires any institutional provider showing cost justification for increases in excess of 6 percent to file a request for exception with the State Advisory Board before proceeding to the Cost of Living Council. The State Advisory Board has 30 days within which to make its recommendations and it is expected that these recommendations will recognize local and regional variations in the costs and availability of personnel, services, and supplies in reaching a conclusion as to whether or not sufficient hardship exists for that institution to merit an exception.

During the 1973 session, the Legislature passed legislation (AB 2123) which gave the commission authority to act as the State Advisory Board to the Cost of Living Council. The legislation also authorized the commission to "take such action and perform such duties as may be conferred upon the states by the Cost of Living Council or by federal law or regu tion under the Federal Wage-Price Stabilization P gram with respect to rates charged by institution providers of health services. . . ." It seems likely th the Cost of Living Council will delegate to the sta by January 1974 authority to render decisions a orders on all price exception requests, reconsider tions, appeals, interpretations, advance rulings construction, and Medicare referrals. Total fundi from the federal government is expected to acco pany the delegated authority. However, there has be no definite decision at the time this is being writt as to when and under what conditions delegati would be conveyed to the state. Therefore, no fun or personnel have been included in this budget.

AB 2123, Chapter 1072, also requires the comm sion, no later than July 1, 1975, to "develop for su mission to the Legislature a proposal for a hospit economic stabilization program for establishment a system to retard inflationary increases in hospit costs and prices." This program is "intended to r place the Federal Wage-Price Stabilization Progra . . ."

Output	1972–73	1973–74	1974–7

EDUCATION

DEPARTMENT OF EDUCATION

Program Highlights

The Superintendent of Public Instruction established the matrix management organization for the Department of Education to give leadership and guidance to the largest public school system in the world in this era of change. The structure is intended to be people-oriented, flexible, and responsive to the educational needs of California and of the nation.

On July 1, 1973, the new matrix system of educational management was established to coordinate the efforts of the department, to assure accountability, and especially to make the child and his education the focal point of department operations. To support the matrix system, the department has consolidated its internal fiscal and administrative functions.

In 1974–75, the department will concentrate on comprehensive planning and the delivery of services to meet children's needs rather than on funding sources or program organization. The education program matrix groups the department's instruction program according to three age spans: early childhood, intermediate, and secondary/adult. In 1974–75, the coordination of planning and of consolidated funds applications will be a major departmental effort and regional assistance teams will work with local educational agencies to achieve these improvements.

There have been a number of significant achievements in educational programs and departmental operations as a result of the state board's and the superintendent's establishment of priorities and the support of governmental and lay groups. These are cited below.

One notable development was the 1973 launching of the early childhood education program. This comprehensive approach to restructuring primary education was enacted into law in December 1972. It emphasizes individualized instruction for all children up to and including those in the third grade. At present, approximately 1,000 schools participate, and more will be added in 1974–75.

Departmental attention is also focused on the intermediate age span, children between 9 and 13 years of age, to ensure that progress made in early childhood is continued and strengthened. Major 1974–75 attention will be directed toward development of an intermediate education master plan to address the unique educational needs of this age group.

Bilingual education, another 1974–75 priority program, received special impetus in 1973 with the implementation of the Bilingual Education Act (AB 2284, 1972). During the 1974 legislative session, the Governor will propose legislation to enhance the educational opportunities of students whose primary language is not English. This legislation will directly benefit 27% of the K-12 student enrollment. Four million dollars ($4,000,000) have been included in the 1974–75 budget to finance the anticipated legislation.

Along with the above, the department continues to give attention to the basic skills children must have to be successful in school and in life. The tasks forces in mathematics and in reading continue their mission of increasing the effectiveness of instruction in these subjects in all state schools.

The state testing program was changed significantly by the enactment of AB 665 (Chapter 930, Statutes of 1972). Instead of being tested at the end of grade one, all pupils now are given an entry level test at the beginning of first grade. For the spring tests given to pupils in grades 2, 3, 6, and 12, a new sampling system is used which does not require all students to take all test items. This innovation will result in time and money savings throughout the state.

Other 1974–75 priority instructional programs are: (1) drug abuse preventive education; (2) conservation education; (3) curriculum development; (4) textbook selection procedures; (5) career education, and (6) the master plan for special education.

In 1974–75, provided funds are matched by local community participation groups, $275,000 will be allocated from the California Environmental Protection Program Fund to local school districts for use in their conservation education programs.

In the field of special education, legislation will be introduced to expand the development center program by an additional 200 children in the 1973–74 fiscal year and the development centers' budget is increased in 1974–75 to provide for an additional 100 of these severely handicapped children. In 1973, the establishment of the Central Valley School for Neurologically Handicapped Children was authorized. The school is beginning operations in January, 1974, with a full program planned for 1974–75. Also, due to the vulnerability of the Berkeley schools for the deaf and blind to earthquake and fire, construction is scheduled to begin in 1974–75 on a new site in northern California. The new school will consolidate certain functions of both former schools to save tax funds with no decrease in services.

The report of the task force on the resolution of conflict was accepted by the State Board of Education in November 1973. Its recommendations, particularly those establishing an informational exchange about the causes and prevention of conflict and violence in high schools, will be implemented in 1974–75.

Improving guidance and counseling services and the evaluation of teachers continue to receive top priorities. The guidance task force will present its recommendations in early 1974.

The most dramatic change in school finance, a priority program for the department, results from Chapter 1406, the 1972 school finance and property tax relief measure. Throughout the state, property taxes are being reduced as an additional $561 million in state funds goes to school districts for tax reduction and program improvement. The $332 million available to districts for program improvement is the largest infusion of new money for educational programs in California and U.S. history. Additionally, for the first time in 1974–75, school districts will re-

DEPARTMENT OF EDUCATION—Continued

Program of Highlights—Continued

ceive a $60 per ADA statutory cost-of-living increase. These increases will continue in the future, to maintain an adequate level of educational services. As a result, State School Fund apportionments to K–12 are expected to increase by $113 million in 1974–75 over 1973–74. An additional $15 million in early childhood education apportionments provided by Ch. 1406/72 will bring the total increase in State School Fund apportionments to $128 million in 1974–75.

The department's administrative assistance to schools of the state is carried out through another priority program, the school district management assistance team, which conducts management studies in districts and recommends improvements in financial management.

I. INSTRUCTION

The California public education system is designed to ensure that each child has the opportunity to develop optimum potential. To develop fully and enter society as a participating, productive member who relates positively to himself and his environment, each child must gain command of the basic skills. The educational needs of children vary in relation to the circumstances under which each child lives, and instructional programs must be comprehensive and flexible enough to meet these varying needs. Congress and the Legislature have enacted numerous programs for these purposes. The State Department of Education provides the state level leadership and services required to solve the pressing problems of realizing education's highest goals.

The instruction program features a new organizational structure oriented to age-span groups, designed to meet each child's educational needs. The focal point of departmental operations is the child, not specific subject matters or educational programs. Three age groups serve as the spans within which five educational programs function to meet children's needs. Together, they form a matrix of educational management as shown in Figure 1.

Further, to serve the needs of over 4.5 million pupils attending classes in 1,054 school districts, the department is establishing a regional form of administration within its general education management unit.

The Education Code gives flexibility and autonomy to school districts in designing and executing educational programs. In the past 10 years, federal and state legislatures noting that various pupil subpopulations were not succeeding, have created a variety of categorical aid programs designed to help such pupils. However, these have been fragmented efforts often resulting in neither more efficiency nor effectiveness. Very often, these programs have not led to desirable changes.

The Department of Education now recognizes that if it is to ask school districts to integrate the various funds they receive into a unified school program, the departmental regulations, guidelines, and administration must be coordinated. School districts must design programs that blend funds with individual student needs; programs must focus on children and their needs rather than on funding sources. In response to this need and to give primary attention to the re

DEPARTMENT OF EDUCATION—Continued

DEPARTMENT OF EDUCATION—Continued

I. INSTRUCTION—Continued

A. Priority Programs in Instruction

Of the 16 program priorities selected for emphasis during 1974–75 by the State Board of Education, 10 fall within the instruction program of the department. These are: early childhood education, intermediate education, drug abuse preventive education, conservation education, curriculum development and textbook selection procedures, bilingual-crosscultural education, career education, mathematics, reading, and Master Plan for Special Education. Each is summarized below.

1. Early Childhood Education

In response to the need to revitalize education in California, the State Department of Education established, as of July 1, 1973, age-span programs encompassing all children within one of three inclusive age spans: early childhood, intermediate, and secondary/adult. The early childhood education program remains a State Board of Education priority program for 1974–75.

Recognizing that the weight of research supports the conclusion that the early years are the most important, the department embarked in 1971 on a comprehensive approach to restructuring primary education in California. The goal of the early childhood education program is to assure that each child, through a program of individualized instruction, will be enabled to make continuous progress in developing his or her maximum potential. Further, the program seeks to ensure that each child, when he completes grade three or its equivalent, will have attained basic skills, a positive self-image, and the social competencies needed for success throughout his educational experience.

Every child five years old and older has the right to attend a public school. In addition, under federal or state legislation, a significant percentage of younger children qualify for preschool services. Nonetheless, many children need more educational stimulation than they presently receive.

For children under five years of age, the availability of services is the most serious present problem. Needs range from day care by trained compassionate adults to special (and expensive) programs for exceptional children, many of whom could be integrated into regular kindergarten programs at the age of five or six if special services had been available to them at an earlier age.

For the five- to eight-year-olds, the primary need is one of a quality program. By law every pupil of these ages attends school at least 240 minutes a day (180 minutes for kindergarten) on at least 175 days a year. But in many cases no assurance exists that the child will receive individual attention.

Fiscal year 1973–74 saw the initial implementation of the early childhood education program, with approximately 1,000 schools in over 800 school districts throughout the state participating. These schools p sented plans to the Department of Education for structuring their programs in kindergarten a grades one through three and have been approved funding under Chapter 1147 of the 1972 sessi The Early Childhood Education Management Te was activated during 1973–74 (see program statem for this unit under I.I.2.) to provide administrat and assistance services to local educational agencie

In 1974–75 the early childhood education progr will be expanded to include approximately 250 ad tional schools. The additional grants will flow to lo educational agencies which have demonstrated succ in using funds, implementing their plan, and raisi students' achievement levels; demonstration of s cess by districts will be rewarded through increas program funding.

The early childhood education program is that p of the total department delivery system pertaining preschool and primary (K–3) school programs. seeks to integrate all department activities which a carried out on behalf of young children, most of th through the operating units: general education, s cial education, compensatory education, vocatio education, and child development. These activities a designed to achieve specific objectives in the supp unit, which in turn are based upon objectives of t age span.

The principal overall objectives for the early chil hood age span are to accomplish the following:

a. Restructure primary education in California meet the needs and abilities of individual childr more fully.

b. Articulate primary programs with all existi preschool, child care, and extended day care progra being offered.

c. Make efficient and effective use of all existi state and federal funds in the implementation of t program.

d. Ensure parent participation in the plannin implementation, evaluation, and revision of such pr grams.

e. Encourage community participation in all aspe of the program.

f. Ensure that school districts provide for extensi and comprehensive parent education.

g. Ensure that school districts provide for trainin of staff, parents, aides, and volunteers, including em phasis on attitudinal change.

h. Be able to measure the effect of instruction i kindergarten and grades one through three on rea ing, use of language and mathematics.

i. Provide for systematic monitoring and review t insure adherence to board policy, and for progra quality which meets established criteria.

j. Identify programs of outstanding merit to serv as models for dissemination and possible replication.

A. Priority Programs in Instruction—Continued

2. Intermediate Education

Intermediate education, one of the department's three age-span programs, concerns itself with all the elements of a quality educational program for children 9 through 13 years of age.

The major goal for intermediate education is to provide a process and structure for individualizing intermediate programs to ensure that each student, by the completion of the junior high (middle school) grades, will have had the opportunity to explore a variety of academic and career areas and will have developed basic skills, a positive self-image, and social competencies to prepare himself adequately for the secondary school program.

The intermediate education age span has been established to provide leadership and direction toward achieving this goal and to integrate the efforts of the general education, instruction for educationally disadvantaged students, special education, and occupational preparation elements on behalf of intermediate students. (See I.C. for the specific objectives for intermediate education.)

3. Drug Abuse Preventive Education

The misuse of drugs, narcotics, alcohol, and other restricted or dangerous substances continues to be among the most critical problems in California and the nation. A 1973 comprehensive county survey of student drug use indicated that the alcohol, tobacco, and marijuana usage rate continued to climb among students in grades 7 through 12. Barbiturates and amphetamines are apparently being used less frequently, while LSD and heroin seem to be at similar usage levels as in the previous years. Arrest records, morbidity reports, and drug counseling accounts confirm the presence of drug misuse in all segments of society. Some evidence has been presented which suggests this phenomenon is appearing at earlier age levels.

Preventive drug education, a priority program for the department in 1974–75, is a part of a comprehensive effort to meet the physical, emotional, and social health needs of children and youth through the health core of the reorganized General Education Management (GEM) unit (see I.E.2.). This consolidation of effort will enable the department to respond more effectively to the needs expressed by students, parents, and schools in this area of concern.

Ongoing work plan activities for 1973–74 and 1974–75 are as follows:

a. Provision of drug education and workshop opportunities at local, regional, and statewide levels.

b. Development of preservice programs in cooperation with teacher training institutions.

c. Development of training and evaluation models which may be used at all levels.

d. Provision of consultation and other forms of technical assistance.

e. Monitoring of pilot and demonstration projects with dissemination of information about promising programs and practices.

f. Coordination of drug education within the Health Core and GEM unit.

4. Conservation Education

Conservation and environmental education, formerly a part of the Health and Safety Unit, became an activity in the General Education High Visibility Core as of July 1, 1973. In 1974–75, $275,000 will be allocated from the California Environmental Protection Fund through the Department of Education to local school districts for use in their conservation education program, provided these funds are matched by local community participation groups.

A statewide survey conducted by the conservation education unit indicates that a limited number of local educational agencies have adequate programs planned or under way in this curricular area. However, the majority of those under way are limited to the science program and do not consider community problems or involve local resources. Although a great reservoir of materials, facilities, and expertise is available through various community agencies, these resources are not being used effectively. The conservation education effort is designed to make local educators aware of these resources and help them develop effective conservation and environmental education programs.

The Environmental Education Act of 1970, Sections 565–570.4 of the Education Code, authorized the establishment of a conservation education service in the Department of Education to provide program services to school and community agencies, make grants to local educational agencies, establish and maintain a conservation education library, operate a summer intern program, and perform other functions.

A related responsibility of the conservation education service is to provide liaison among California and other western states, to work together with state representatives in developing effective programs, and to obtain materials and information which can be of value to California. This is accomplished through the Western Regional Environmental Education Council, which was formed in 1970 by the California State Department of Education. Membership includes state educational agency and resource management personnel from 13 western states.

5. Curriculum Framework Development and Textbook Selection Procedures

The curriculum frameworks and instructional materials selection unit was formed in November, 1972. In 1973–74 it became a part of the General Education High Visibility Core (I.E.5.). Its major functions are to coordinate the activities of agencies responsible for the selection and adoption of instructional materials for public and nonpublic schools in California and to assist in the development of curriculum

DEPARTMENT OF EDUCATION—Continued

I. INSTRUCTION—Continued

A. Priority Programs in Instruction—Continued

frameworks and criteria for use by the State Board of Education in adopting instructional materials.

Legislation enacted in 1972 requires (1) that the process for selecting instructional materials be compressed from a four-to-six-year cycle to a two-year cycle; (2) that state-adopted instructional materials be reviewed biennially; and (3) that the Curriculum Development and Supplemental Materials Commission shall recommend curriculum frameworks to the State Board and develop criteria for evaluating instructional materials. The law also requires that a call for bids be issued each year, that instructional materials be distributed for review, and that contracts with publishers be agreed upon. For a discussion of the production and distribution of instructional materials under the new law, see program II.B.4, Textbook Distribution.

Beginning with the 1973–74 fiscal year, the Legal and Factual Analysis Committee, appointed by the Curriculum Development and Supplemental Materials Commission, has been assisting in the screening of materials to expedite the selection process.

Curriculum materials in the following subject areas are being prepared for adoption in July, 1974, for introduction in the classroom in September, 1975: reading, literature, English and related subjects; foreign languages, bilingual-multicultural education and English as a second language. The schedule for materials selection in mathematics, social science, science, health, and music will follow one year later.

During 1973–74 this unit has responsibility for revisions of frameworks in mathematics and science, the completion of the social science framework, and the evaluation of the science and music frameworks. Adoption criteria are being produced in five subject areas, and a call for bids will be issued. The adoption calendar for eight subjects will be completed through formal adoption by the State Board of Education.

In the 1974–75 budget year, two frameworks will be revised, and one framework will be evaluated and updated. Criteria will be developed in eight subject areas, and a call for bids will be issued. School district selection among materials will be completed for five new subjects.

The time line in Figure 3 illustrates the textbook and instructional materials schedule for 1972–73 through the first quarter of 1975–76.

A. Priority Programs in Instruction—Continued

6. Bilingual-Crosscultural Education

The Bilingual-Crosscultural Task Force was created in 1971 and is planned to continue as a task force for 1974–75. It became a part of the General Education High Visibility Core (I.E.5.) as of July 1, 1973. The Bilingual-Crosscultural Task Force comprises three major areas: (1) bilingual education; (2) Indian education; and (3) foreign language education.

The Bilingual-Crosscultural Task Force focuses on students from a variety of cultural backgrounds, including American Indian groups. The overriding responsibility of the task force is to ensure equal educational opportunity by providing instruction in the language the student knows best so that learning in other subjects will progress concurrently with second language development. A major focus of the task force is directed toward implementing the Bilingual Education Act of 1972 (Chapter 1258/72).

An examination of the student groups mentioned and their educational needs reveals a number of pertinent facts. For example, 27 percent of students in kindergarten and grades 1 through 12 come from cultural backgrounds which differ from the dominant culture. An estimated 500,000 students in preschool through grade 12 are considered non-English-speaking and limited-English-speaking, while perhaps an equal number of students in these grades live in an environment which is bilingual because a language other than English is spoken in the home. The dropout rate for these students is about 37 percent. In the lower grades this group makes up 19 percent of the student body, but in the state colleges and universities they comprise only 5 percent of the total enrollments. At present 28,209 (about 6 percent) of these students are provided learning experiences through programs in English as a second language or bilingual education. Figures pertaining to Indian needs are even more extreme. The Indian student population in California has a 75 percent dropout rate, as compared with a 16 percent dropout rate for the total student population. Indian representation at institutions of higher learning is practically nonexistent.

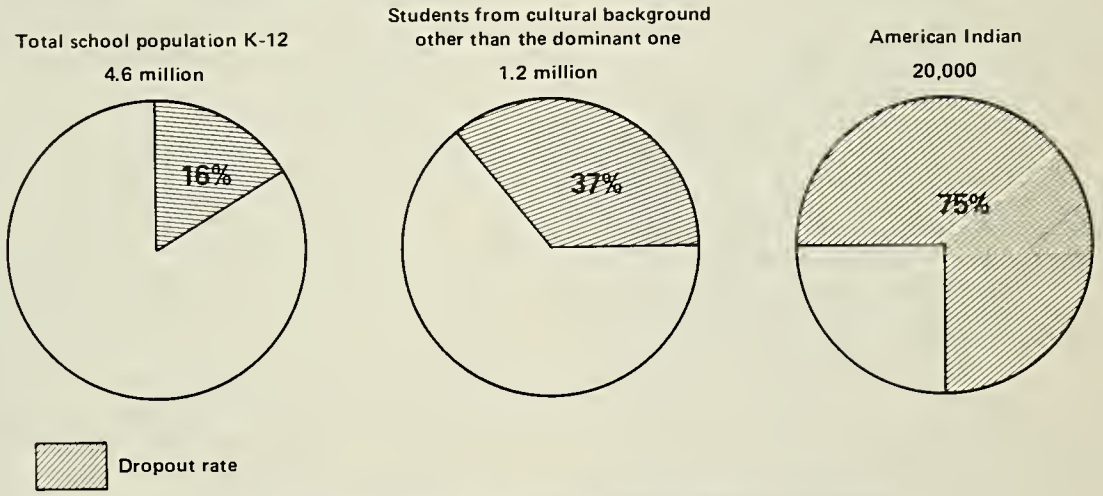

Fig. 4. Dropout rates for students of other cultures as compared with total California student population

Figure 4 compares the dropout rates for Indian students, students from cultures other than the dominant one, and the general student population in California.

Accomplishments in bilingual education during 1972–73 included the following: (1) identifying 139 school districts in need of bilingual education and granting 69 of the 139 districts planning and implementation funds; (2) identifying 45 Ch. 1406/72 and Ch. 1147/72 projects in need of bilingual programs; (3) conducting four needs-assessment workshops in which one-third of the 200 participating individuals were from school districts other than those sponsoring Ch. 1258/72 programs; (4) developing and disseminating guidelines and policies for bilingual-crosscultural education and Indian education; (5) rendering technical assistance to 58 districts in California receiving ESEA, Title VII, funds; (6) sponsoring a multilingual-multicultural conference attended by 6,500 persons; and (7) completing a language dominance survey.

Indian education activities for 1972–73 included development of a work plan relative to Ch. 1052/72, which appropriated state funds for Indian education. In the 1974–75 budget $341,705 are included to continue these worthwhile educational endeavors for Indian children.

DEPARTMENT OF EDUCATION—Continued

I. INSTRUCTION—Continued

A. Priority Programs in Instruction—Continued

Foreign language contributions of the Bilingual-Crosscultural Task Force consisted of six regional workshops to improve the instructional practices of approximately 3,000 teachers; assistance with the development of about 30 new foreign language programs; and the development of two bibliographies (Spanish and German), which were disseminated to about 18,000 California teachers.

Major work plan activities in 1973–74 are (1) implementing 127 projects (69 state and 58 federal) developed in response to Ch. 1258/72 and Title VII, ESEA; (2) reviewing Ch. 1406/72 and Ch. 1147/72 projects for inclusion of bilingual education where appropriate; (3) developing procedures to collect and analyze materials and instructional strategies declared useful for bilingual education; (4) completing and distributing bibliographies of instructional materials for other language groups; (5) implementing 10 pilot learning models for Indian early childhood education developed in response to Ch. 1052/72; and (6) providing on-site Indian education services to school districts which are not on reservations but which have concentrations of Indian students.

Work plan objectives for 1974–75 call for (1) expanding the needs assessments of the 69 school districts funded by Ch. 1258 in terms of career possibilities for bilingual-multicultural students; (2) refining bilingual curriculums in light of the needs assessment data; (3) identifying and validating programs developed with Title VII and Ch. 1258 funds so that other districts can build on these experiences; (4) assisting Ch. 1147 and Ch. 1406 schools and districts to develop and implement bilingual-crosscultural curriculums; (5) sponsoring a third annual national bilingual-crosscultural conference so that teaching strategies, instructional arrangements, and techniques for evaluation will be presented promptly to participating schools and districts; (6) developing an implementation plan for bilingual-crosscultural education, and (7) identifying, referencing and evaluating Indian educational resources and instructional strategies so that in-school experiences will be tied to the out-of-school demands facing Indian students upon the completion of their education.

7. Career Education

Career education will continue as a priority program through 1974–75. Effective July 1, 1973, career education became a part of the General Education High Visibility Core (I.E.5.).

The California State Board of Education has taken the position that ". . . too often many youth have received an education which has not provided them with proper career preparation nor the desire to obtain it. The role of education is to prepare each student for a career which is consistent with the individual's desires, abilities, and realistic expectations for career achievement."

Career education seeks to provide an opportunit for students to assess personal interests, aptitude and aspirations; to explore educational and occup tional opportunities; and to identify requirements f and experience success in pursuing goals of the choice. Students of different ethnic origin, sex, an socioeconomic levels can be provided equal opportun ties for successful achievement of these goals throug career education.

Under the Vocational Education Act, Parts C an D, $1.1 million was made available in 1972–73 t establish a California model for career education. Th same amount is being made available in 1973–74. Th major purpose of the 1974–75 work plan is to com plete research and development activities, refine th model development, and complete implementatio strategies.

The revised work plan for 1973–74, to be continue in 1974–75, calls for efforts in the following areas:

a. Provision of continued leadership for the re search and development sites.

b. Preparation and publication of administrativ and curriculum guides for career education.

c. Establishment of a selective information system

d. Design of an alternative model for disadvan taged students.

e. Establishment of preservice and inservice pro grams.

f. Provision of consultative services to intermedi ate and local educational agencies.

It is expected that during 1974–75 accurate data on student outcomes, implementation strategies, and cost of implementing career education at the local level will become available as a result of (1) the pilot activities carried on at the research and development sites; and (2) the provision of an evaluation design. The anticipated result is that career education activities will move from a research and demonstration phase to an operational phase. State leadership will be needed to provide technical assistance to the school districts introducing career education programs and to teacher training institutions in initiating professional development programs in career education.

A comprehensive program of career education is designed to enable each student to develop positive attitudes about himself and others, make sound decisions regarding alternative and changing careers, acquire skills leading to employment, and pursue a life style which provides self-fulfillment and contributes to the society in which the individual lives.

8. Mathematics

Statewide test results indicate a decrease in mathematics skill and understanding at the sixth- and twelfth-grade levels. (See Fig. 11 and Fig. 12 which accompany program I.J., results of statewide testing.) The average achievement of pupils in California schools should at least match that of examinees in the

DEPARTMENT OF EDUCATION—Continued

I. INSTRUCTION—Continued

A. Priority Programs in Instruction—Continued

normative reference groups of test publishers. The deficiencies shown by the testing should be characterized precisely, and measures to correct those deficiencies should be identified or devised.

The mathematics activity (expanded in 1973–74 and continued in 1974–75) will formulate guidelines useful as corrective measures in mathematics programs. Those guidelines and the services of the component will be made available to California school districts having substantial need for assistance in implementing corrective measures in their mathematics programs. When possible, the component will assist school districts and teachers to improve their mathematics program so that identified deficiencies are diminished or eliminated.

The Mathematics Task Force was established in 1971–72 as part of the reorganization effort of the Department of Education; in July, 1973, it became an activity within the General Education High Visibility Core. The task force was given responsibility for (1) assessing the status of mathematics achievement in California as related to the adopted framework for mathematics instruction in kindergarten and grades one through eight; and (2) identifying exemplary mathematics programs in California schools that might be useful in other school settings.

More recently, the charge to the Mathematics Task Force has focused on identifying characteristics of mathematics programs that culminate in improved pupil achievement and that can be transferred partially or completely to other settings where pupils are low achievers. Further, the mathematics component will develop guidelines for use by schools and districts in implementing corrective measures in their mathematics programs.

In 1972–73 the Mathematics Task Force, assisted by the Office of Program Evaluation and Research, completed a special study that (1) identified grade four as the level at which skill deficiencies in mathematics first occur; (2) indicated deficiencies in grades four through eight in computation, comprehension, and application; and (3) verified deficiencies found in results of statewide tests in mathematics.

For 1973–74 the work plan objectives of the mathematics activity are the following:

a. Identify a broad random sample of classes in California schools in grades three through nine and arrange for their participation in State of California Inventory of Mathematical Achievement (SCIMA) testing; and analyze and report the results of the SCIMA testing, contrasting the 1973 results with those of the two previous years.

b. Identify the salient characteristics of mathematics programs that contribute most to success or failure, using appropriate techniques.

c. Initiate communications with school districts to advise them of the efforts of the Department of Education to identify program characteristics that have had a positive impact on pupil achievement.

d. Contact colleges, universities, professional societies, offices of county superintendents of schools, and school districts to determine the time, location, focus, availability, and costs of in-service programs in mathematics and mathematics education for elementary school teachers, and distribute lists of programs offered.

e. Prepare criteria for screening mathematics textbooks for adoption, the criteria to reflect the specific skill deficiencies detected in special studies and in SCIMA testing.

The work plan objectives of the mathematics component for 1974–75 are the following:

a. Continue the testing program conducted during the previous year.

b. Complete the compilation and analysis of data on the salient, replicable features of mathematics programs, school/class organization patterns, and variables in teaching behavior that account for above average achievement in mathematics.

c. Prepare guidelines useful to school districts in designing program changes likely to produce improved mathematics learning and achievement among their pupils, the guidlines to be categorized by content.

d. Contact colleges, universities, professional societies, offices of county superintendents of schools, and school districts to update lists of in-service programs in mathematics education available for elementary school teachers.

e. Provide the Curriculum Development and Supplemental Materials Commission with the most current data on pupil achievement in California.

f. Summarize and review responses to the various responsibilities it has been entrusted with and develop recommendations for the department to consider in planning future programs in mathematics education.

9. Reading

Improving the reading performance of students in California was given reemphasis by the State Department of Education early in 1971 and continues as a departmental priority for 1974–75. Accordingly, the Reading Task Force was established in the Department in May, 1971, to serve as a catalyst for change which would help improve those California reading programs that were failing to meet the needs of students. The right-to-read unit was funded on April 1, 1972, and was made a part of the Reading Task Force. As of July 1, 1973, the task force became a part of the general education high visibility core.

The Reading Task Force identified those schools within the state which had the highest degrees of reading deficiencies. These schools became the task force's main objects of attention. At the end of the 1972–73 fiscal year, it had identified and demonstrated processes and approaches to improve reading programs in the target schools.

Other Reading Task Force activities in 1972–73 included coordinating departmental services related to reading instruction; and assisting two groups of low-achieving elementary schools by providing in-

DEPARTMENT OF EDUCATION—Continued

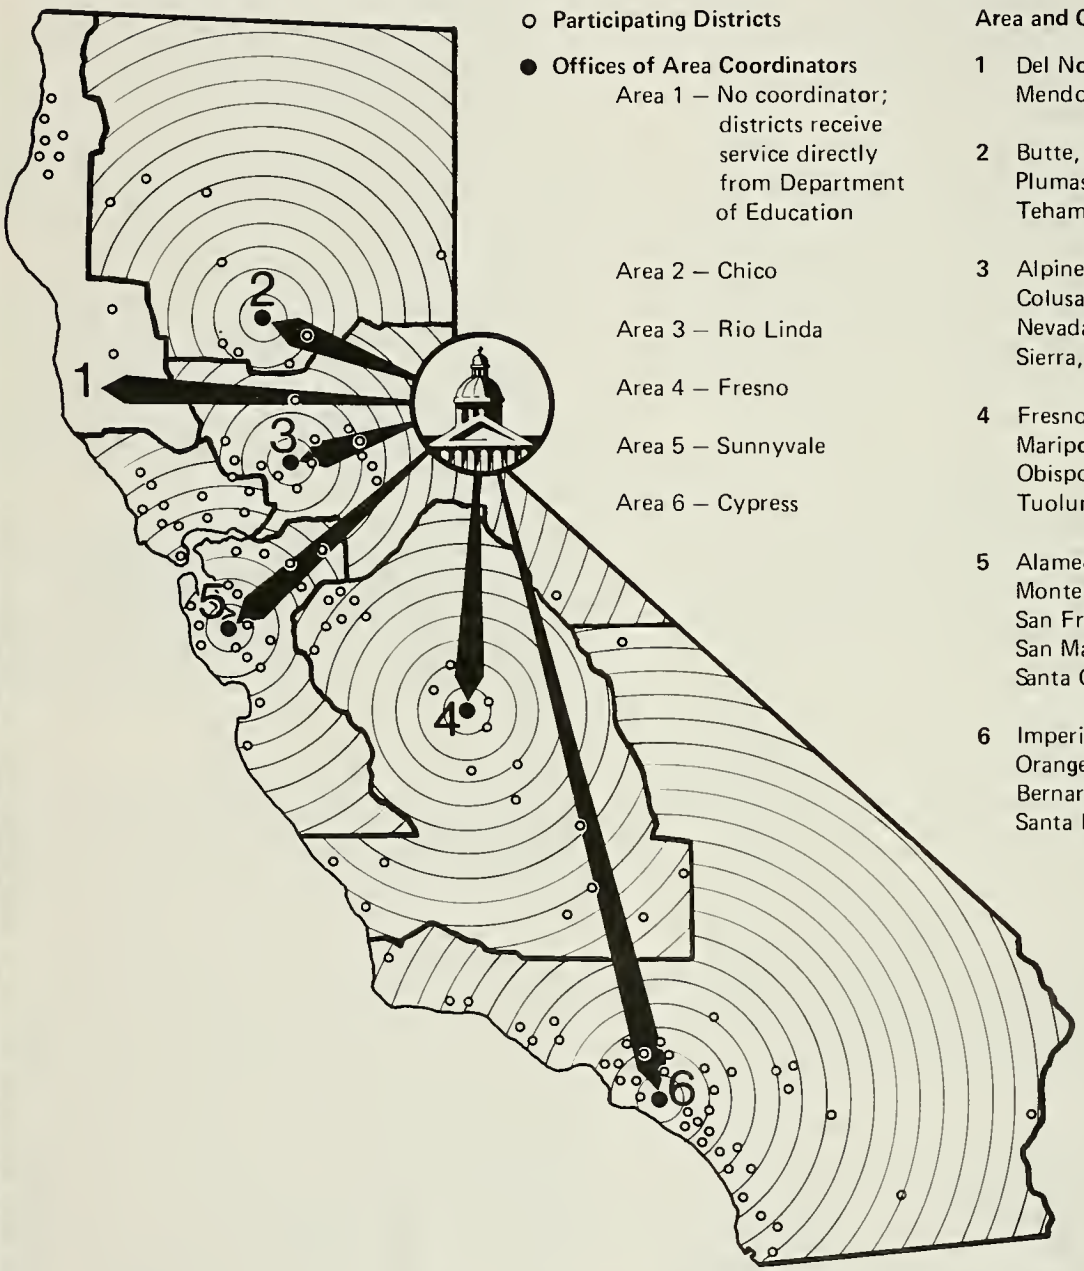
service training for improvement of reading instruction and recommending successful elementary reading programs for adaptation or replication by the participating schools.

The work plan objectives of the reading activity for 1973–74 and 1974–75 are the following:

a. Select for participation in the state right-to-read effort local educational agencies that are representative of the geographical location and the student popu lation of the state. Approximately 120 agencies ar being selected in 1973–74 and 150 in 1974–75. Th locations are shown in Figure 5.

b. Secure from each of the participating local edu cational agencies a formal agreement encompassin (1) appointment of a local right-to-read director wit authority to implement the local educational agenc



Area and Counties Included

A. Priority Programs in Instruction—Continued

plan of action; (2) adoption of a formal resolution by the local educational agency affirming reading as a priority; (3) consideration for the establishment of a local right-to-read council; (4) provision of time for the local right-to-read director to receive in-service training from the state reading component; and (5) development and implementation of a local educational agency plan of action congruent with the state right-to-read plan.

c. Select and prepare a team responsible for the preparation of the selected local educational agency right-to-read directors within the state.

d. Provide a minimum of 30 days of training for the selected local educational agency reading directors, to be provided throughout the duration of the grant period.

e. Assist the local right-to-read directors in implementing the process of change for reading improvement in the participating local educational agency.

f. See that a minimum of 3,000 adults will have completed 500 hours of instruction in an adult basic education reading program, utilizing the reading instructional materials and strategies developed by the adult basic education members of the reading component in 1971–72.

g. Work cooperatively with other units in the department to develop means of identifying exemplary reading programs in the state.

h. Participate fully in the national right-to-read seminars.

i. Use the services of the department's Office of Program Evaluation and Research to evaluate the effectiveness of the California right-to-read program. evaluation to be based on (1) the completion of objectives stated previously; (2) completion by 90 percent of 120 selected local educational agencies of the provisions of the local-state agency agreement; and (3) a gain, as measured by the state testing program, of at least one month for each month of instruction, by 70 percent of the students in the district involved.

j. Participate in that part of the new department delivery system which assists local educational agencies in the comprehensive program planning process.

In addition to the work plans cited for 1974–75, the regional right-to-read coordinators will provide follow-up assistance to those school districts they assisted in 1973–74.

10. Master Plan for Special Education

Late in 1973 the State Board of Education added the Master Plan for Special Education to its program priorities for 1974–75. The plan has been drafted but is still being refined and studied, as basic program and financial issues are involved. If the State Board of Education adopts a specific Master Plan for Special Education, every effort will be made by the Department of Education to draft and introduce enabling legislation during the 1974 legislative session.

DEPARTMENT OF EDUCATION—Continued

I. INSTRUCTION—Continued

B. Early Childhood Education

Effective July 1, 1973, the department reorganized its instruction program so that all pupils would be encompassed in one of three age spans: early childhood, intermediate, and secondary/adult. As described in I.A.1., the early childhood education program represents the department's effort on behalf of children between the ages of three and eight. The goal is that each child will be enabled to make continuous progress in developing his own maximum potential and that by the completion of grade three or its equivalent, each child will have attained basic skills, a positive self-image, and social competencies. The continuing emphasis is on individualized instruction.

With the enactment of Ch. 1147 in December 1972, the early childhood education age span had a vehicle to serve as the basis of its total program. Policies were prepared for board adoption, and briefings were provided to school districts throughout the state on eligibility and application procedures for Ch. 1147 funds. The early childhood education age-span manager and staff gave direction for these activities. In the spring of 1973, the early childhood education management team was established to administer the Ch. 1147 program in its initial years (see its program statement, I.I.2.). The early childhood education age-span manager is responsible for relating the work of the team to other department programs as they relate to early childhood education. The team reports to the age-span manager.

The work plan for 1972–73 was concerned principally with the initial implementation of Ch. 1147. Guidelines were prepared for and adopted by the State Board of Education. Policy determinations were made on eligibility for funds and the extent and deadline for the preparation of school level plans. Approximately 1,000 schools in 800 districts were approve for participation in the first year of the early chil hood education program, 1973–74.

The 1973–74 work plan emphasizes the coordina tion of activities across the education program matri as they relate to early childhood programs. A regula process of acquiring progress reports from prograi support units within the education program matri relating to their program objectives for early chil hood education will be instituted. The informatio will be analyzed and synthesized where possibl toward achievement of greater coordination an effectiveness.

In 1974–75 the work plan objectives for the earl childhood education age span are as follows:

a. Prepare a detailed proposal to the Legislatur for completing the restructuring of all primary pro grams in California by the end of the 1970's.

b. In cooperation with the intermediate educatio age-span manager, to prepare a plan for articulatio of the early childhood and intermediate age-spar programs.

c. Building on Ch. 1147 and Title I monitorin activities in 1973–74, to consolidate the monitorin and review process for all programs involving early childhood education.

d. Direct the addition of a promising practice dis semination and assistance effort in its delivery system for elementary schools.

e. Exercise full responsibility for coordinating all department activities in the early childhood age span.

f. Expand the program to include approximately 250 additional schools and provide complete funding for schools partially funded in the current year.

C. Intermediate Education

In fiscal year 1972–73 the State Department of Education established three major educational programs: early childhood education, intermediate education, and secondary/adult education. The intermediate age-span manager and staff were appointed that year to develop management strategies and program mechanisms for executing the divergent elements that comprised the total intermediate age-span program.

The need for leadership and direction in intermediate education on the part of the State Department of Education is imperative, and intermediate education has been declared a priority program (see I.A.2.). The intermediate age-span program is responsible for the development of educational programs that will identify and apply various resources from the support units to ensure that the diversified needs of the intermediate student are met.

One of the department's major objectives in 1973–74 and 1974–75 is the development and implementation of a State Master Plan for Intermediate School Education to ensure that the progress made in early childhood education is continued and strengthened. This master plan, being developed from data collected at statewide conferences and from questionnaires, will identify the legislation and resources needed for the restructuring of intermediate education programs to meet the educational needs of the intermediate student.

The other overall objectives for the intermediate age span are the following:

a. Assist school districts in providing individualized instruction in basic skills for students to ensure future educational success.

b. Encourage the development of crosscultural educational experiences that capitalize on cultural and linguistic differences and are relevant to the needs of all students.

c. Develop a plan for training teachers and paraprofessionals to enable them to respond to the diverse needs of this age group.

DEPARTMENT OF EDUCATION—Continued

I. INSTRUCTION—Continued

C. Intermediate Education—Continued

d. Promote the direct involvement of parents and community groups in the planning, implementation, and evaluation process at the school district level.

e. Promote research directed toward improving the quality of education while permitting greater flexibility and individualization of instruction to meet the needs of all students.

f. Establish communication, cooperation, and coordination with other age-span programs so that the development and implementation of sequentially articulated programs can be planned at all levels for all students.

D. Secondary/Adult Education

The secondary/adult education element provides the conceptual framework for integrating department activities in the various support programs serving secondary students and adults, which include general education, instruction for the educationally disadvantaged student, special education, and occupational preparation. It is one of three age-span programs initiated as part of the department's reorganization plan, which reflects the need for coordinated leadership to local educational agencies.

Secondary/adult education is involved in many of the department's priority programs for 1974–75; for example, career education, conservation education, drug abuse preventive education, bilingual-crosscultural education, reading, and mathematics.

The goal of secondary education is to assist the individual student to consolidate and broaden his educational foundations developed through previous learning experiences. Secondary education must help each student make important life-style and career development decisions by expanding general academic competencies and focusing attention on skills needed to select and enter a desired career. In particular, secondary/adult education emphasizes these elements: achievement of communication and computation skills; attainment of proficiency in critical and objective thinking; acquisition of occupational competence; achievement of a clear perception of the natural environment; development of economic understanding; and acceptance of responsibility for citizenship.

The department's secondary education program, in pursuing the above goals, will emphasize assistance to local educational agencies in four major undertakings: (1) comprehensive school planning that enhances individualized educational programs; (2) instructional strategies that promote appropriate learning alternatives and greater student involvement in decisionmaking processes and which utilize educational technology effectively; (3) instructional materials which incorporate new educational themes and which keep pace with rapidly changing instructional strategies; and (4) community involvement with schools that encourages parents and community participation in making education more relevant and learning more dynamic.

Adult education provides programs in 300 school districts. Major adult education efforts in 1974–75 will be directed toward (1) expanding support for adult education in California school districts to include program development for senior citizens; (2) seeking more effective methods to attract illiterate adults to basic education classes; (3) developing career education components; and (4) establishing close ties with early childhood education and ESEA, Title I, in providing parent education programs.

E. General Education Management (GEM)

The instructional programs managed by the general education unit were formerly assigned to the division of instruction and seven separate bureaus, each operating with a high degree of independence. The division of instruction has been reorganized into a coordinated management structure for the provision of general education services to local educational agencies.

The new General Education Management (GEM) unit, which went into effect on July 1, 1973, is designed to coordinate services and eliminate duplication in the administration of general education programs. Much of this effort will be accomplished through interface with the departmental delivery system. This will be particularly true with those programs having common planning, application for funding, and monitoring and review functions. The new organization features a move toward the generalist mode for consultants and the assignment of consultants by geographical area.

There are six major cores to which programs are assigned and through which consultants receive direction and deliver services, as follows: (1) federal core; (2) health core; (3) curriculum core; (4) physical education and safety core; (5) high visibility programs; and (6) adult education core.

The work plans for 1973–74 and 1974–75 are described in the statements within each of the GEM cores. The emphasis during 1973–74 is to deliver service on a geographic basis through core team organization. In 1974–75 the programs will continue to operate as cores, but the emphasis will swing to the organization of area service teams. Members of the area service teams will be assigned in geographic areas.

DEPARTMENT OF EDUCATION—Continued

I. INSTRUCTION—Continued

E. General Education Management (GEM)—Continued

General education management provides services and leadership to the state's local educational agencies to ensure compliance with the laws of the state, the rules and regulations of the State Board of Education, and the regulations related to federal funding. This service and leadership encompasses the mandated state programs; the National Defense Education Act, Title III; Elementary and Secondary Education Act, Titles II and III; the Adult Basic Education Act; and the objectives and tasks assigned to the Mathematics Task Force, the Reading Task Force, and the Guidance and Counseling Task Force. (See II.A.3. for the guidance program statement.) Under ideal circumstances which the GEM unit seeks to achieve, each district in the state would be aware of and qualify for all available federal, state, and local resources in such a way as to make optimum use of those resources.

During the 1973–74 and 1974–75 years, much of the effort carried out in delivering services from the GEM unit will be coordinated with the total effort of the matrix management team. In addition certain programs, both federal and state, will be carried out through the core structure of the general education management unit.

1. Federal Core

The federal core will provide coordinated services and information about the Elementary and Secondary Education Act, Titles II and III, and the National Defense Education Act. In addition, the guidance services programs (see II.A.3.) and adult education programs (see I.E.6.) which are federally funded also will provide coordinated assistance to local educational agencies applying for federal funds.

Local educational agencies and intermediate units seek to support educational programs through the effective utilization of all available funds. Federal resources for support are vitally important in the development of such programs. Most categorical programs financed by the federal government require the development of projects according to specified procedures and guidelines; some of the guidelines require competitively selected projects. Federal requirements are sufficiently complex so that districts need additional assistance.

The Elementary and Secondary Education Act, Title II and Title III, the National Defense Education Act, guidance services, and adult education were each administered by separate bureaus in 1972–73. During 1972–73 the program managers and consultants in these programs developed the concept and work plans for the integration and coordination of the programs. Services were delivered according to the work plans of these separate bureaus.

Work plans for 1973–74 and 1974–75 are included in the following section and in I.E.6. for adult basic education and II.A.3. for guidance services. During 1973–74 consultants will deliver services in a coordinated fashion for ESEA, Title II; ESEA, Title II and NDEA. Consultants who have in the past ha responsibilities for the federal portion of adult ed cation and guidance services will learn each other programs and deliver services for these programs a coordinated way.

By 1974–75 an effort will be made to integrate an coordinate ESEA, Title II; ESEA, Title III; NDEA the federal portion of guidances services; and adu basic education into a single program statement. Co sultants will deliver services in all five programs an potentially, one program manager will be assigned t give direction to all five programs.

a. Elementary and Secondary Education Act, Title II

The Elementary and Secondary Education Act (P 89-10) was passed by Congress in 1965. The purpos of Title II of this act is to strengthen the nation elementary and secondary schools by providing an in creased quantity of school library resources for th use of students and teachers in both public and pri vate elementary and secondary schools.

Local educational agencies require assistance in th preparation of ESEA, Title II, project application and in media program development, installation, an operation. Guidance is also required in the selection organization, and utilization of library media. Abou two million new items are acquired annually, man of them relating to department priority program such as reading, mathematics, career education, dru abuse preventive education, early childhood educa tion, bilingual-crosscultural education, and conserva tion education.

During 1972–73 workshops and regional meeting were conducted for the implementation of ESEA Title II. Over 1,000 public and private school appli cations for Title II, Phase I, funds were received, re viewed, and processed for approval. A total of 12 Title II, Phase II, projects were received, and 2 were submitted to the State Board of Education fo approval and funding. Technical assistance was pro vided in implementing these projects, as well as th 31 projects approved in 1971–72. Workshops on th utilization of school library resources were conducte for school administrators, library media personnel and classroom teachers.

The work plan for 1973–74 and 1974–75 provide for services to local educational agencies and non public schools for the implementation of the ESEA Title II, program. The staff will work with local edu cational agencies in library media program develop ment with a goal of achieving recognized standards

b. Elementary and Secondary Education Act, Title III

The Elementary and Secondary Education Act Title III, activity of the federal core component pro vides funding to projects in the school districts of th

state for experimentation with innovative solutions to instructional problems. Projects are submitted by local educational agencies and are funded on a competitive basis. The general procedure for determining which projects are to be funded involves review by a panel of experts from the field and subsequent approval by the Educational Innovation and Planning Commission. During the operation of the project, the management procedures and evaluation results are monitored by the staff from the federal core.

Projects can be funded in preschool through grade 12. Community colleges may apply for projects dealing with guidance and counseling. Fifty percent of the funds avalable must be allocated to projects dealing with mathematics and language, and 15 percent must be spent in special education, as specified by California Education Code Sections 578–580 and PL 91-230.

Title III seeks to encourage the development of programs in mathematics and reading by investing one-half of the available funds in these areas.

The objective is that projects tested will result in continuation by the grantee of those components of a strategy which successfully met the stated objectives and by the adoption of the strategy in other appropriate school environments.

During 1972–73 140 ESEA, Title III, projects were operational; all of them were visited at least once during the year. Thirty new projects were funded out of 177 reviewed.

The thrust of the Title III effort in 1973–74 and 1974–75 is to get validated projects installed in school districts. The individual projects will be directed toward the priorities established by the California State Board of Education.

c. National Defense Education Act, Title III

The purpose of the NDEA, Title III, activity in the federal core component is to strengthen instruction in basic academic skills through the acquisition by local educational agencies of laboratory and other special equipment, materials, and minor remodeling suitable for providing and improving instruction. The National Defense Education Act (PL 85-864) offers this assistance to local educational agencies through competitive matched-funding grants in the following subject areas: science, mathematics, foreign languages, English, reading, history, geography, civics, economics, industrial arts, the arts, and the humanities.

Personnel in the federal core are available to assist local educational agencies in securing resources for equipment, materials, and minor remodeling and in complying with the federal and state regulations governing them. The continuing work plan of this activity includes assisting local educational agencies in project development, approving and funding projects, monitoring and supervising project operation, administering management control procedures, and disseminating project results.

In 1972–73 a total of 505 projects with 917 components was received, processed, and evaluated; 67 programs were approved, implemented, monitored, and evaluated. It is anticipated that 550 projects with 1,000 components will be received in 1973–74 and that 600 projects with 1,150 components will be received in 1974–75.

2. Health Core

The goal of the health core component in general education management is to provide service and leadership to the local educational agencies of the state in promoting and implementing (1) a comprehensive health education program designed to foster physical, mental, emotional, and social well-being; and (2) a comprehensive health service program designed to meet the individual health needs of children and youth. There is a close relationship between this goal and the following department priorities: drug abuse preventive education, early childhood education, intermediate education, prevention of school violence, conservation education, reading, and mathematics. Drug abuse preventive education, which is a part of the health core, is described under Priority Programs, I.A.3. The health core also encompasses venereal disease education, alcohol education, and nutrition education.

A distinction is made in the health core between health education and school health services. The term health education is used to refer to health instruction in the classroom. The term school health services is used to refer to the health functions usually provided by the school nurse. School health services include all procedures provided within the school to determine the health status of individual pupils, to interpret health problems and needs to all concerned with the pupil, to motivate the correction of remediable conditions and the understanding of those which may not be remediable, and to cope with emergencies affecting health.

A study of the extent of health instruction in California's public schools was conducted by the department in early 1973 at the request of the California State Assembly. The results indicated that health instruction in both elementary and secondary schools is fragmented and districts tend to place emphasis on crisis areas.

The increasing concern for specific health problems in recent years resulted in the identification of drug abuse preventive education as a department priority program in 1974–75 and in a special department effort to meet the problem of venereal disease in 1972–73. Nutrition education is another area of particular emphasis within the department which is considered to be a part of the health area.

DEPARTMENT OF EDUCATION—Continued

I. INSTRUCTION—Continued

E. General Education Management (GEM)—Continued

The organization of the health core in July, 1973, provided an opportunity to begin to bring these components together and to include additional health components, and this continues to be a major effort of the department.

Objectives for 1974–75 are as follows: (1) 40 percent of district programs for elementary schools and 20 percent of district programs for secondary schools will have a comprehensive program of instruction in health education, which includes the 10 major content areas described in the framework for health instruction in California public schools and meets other department criteria; and (2) 20 percent of the school districts in California will provide a comprehensive health services program which meets department criteria.

In addition to coupleting the statewide survey referred to, personnel of the former Health and Safety Uuit carried out the following activities iu 1972–73:

a. Evaluated health education materials submitted for state adoptiou, and participated in revising a book ou sex education at the request of the State Board of Education.

b. Helped develop six, 30-minute television programs designed to implement the Framework for Health Instruction in California Public Schools, and provided current health educatiou informatiou to all local educatioual agencies.

c. Provided leadership for eight, two-day drug education workshops for school nurses.

d. Worked with members of a statewide committee to revise the Guide for Vision Screeuing in California Public Schools and to establish new standards for referral; collected data for the first annual report of vision screeuiug from all schools having grades oue through eight.

e. Conducted a survey of student attitudes toward smoking in four junior high schools and four senior high schools as part of a U.S. Public Health Service project.

f. Assisted the Commission ou Teacher Preparation and Licensing, at its request, in developing guidelines for certification in health education.

g. Participated as department liaison on the statewide committee appointed to develop health standards for preschool education programs.

h. Developed and distributed the audiovisual presentation "Education Code 8507—Disease, Not Sex," which clarifies the law relating to VD education.

i. Developed and distributed the curriculum guide entitled Suggestions for Instruction About Gonorrhea aud Syphilis and a teacher resource kit on VD. Conducted 27 entry level or orientation VD workshops and 62 teacher training workshops on VD. Collected and formed a depository of resource material in VD education.

j. Established an alcohol education project in cooperation with the State Office of Alcoholism.

Health core activities during 1973–74 iuclude co ducting workshops; preparing criteria, guideline and curricula; revising frameworks and recommen ing instructional materials; developing depositori of materials; disseminating resource materials; co ducting projects; and participating with local educ tional agencies in developing model programs. The activities eucompass health education and health ser ices, drug and alcohol education, VD educatiou, an nutritiou education.

The operation of the 1974–75 work plan will chang significantly from that of 1973–74. The latter wa desigued around unique program components such a drugs, alcohol, venereal disease, and nutrition, due t ongoing programs which had specific commitment and funding. The intent of the 1974–75 work plan i to reduce this fragmentation and make possible more comprehensive school health unit within Ge eral Education Managemeut.

3. Curriculum Core

The curriculum core component in General Educa tion Management is responsible for elementary an secondary education in English, fine arts and humani ties, industrial arts, science, and social sciences.

Through the curriculum core, the State Departmen of Education assists local educational agencies, inter mediate units, and teacher preparation institution in improving educational programs and exercise leadership in these areas. It ensures compliance wit Education Code requirements dealing with such mat ters as accreditation, advanced placement, certificate of completion, continuation education, correspondenc courses, county schools projects, courses of study re quirements, diplomas, innovative practices, the Octo ber report, graduation requirements, summer schools and pupil transcripts.

Some of the 1972–73 accomplishments of the Bu reau of Elementary and Secondary Education (pre decessor to the curriculum core) are as follows: (1) conducted program services in 97 school districts; (2) served on high school accreditation teams and on the Accreditation Commission for Secondary Schools; (3) participated in 72 statewide and regional curriculum meetings; (4) assisted industrial arts teacher educa tiou programs in 13 colleges and universities and coordinated the 1972 statewide Industrial Arts Expo sition and Award Program; (5) represented the department at 18 junior high school administrators' meetings; (6) coordinated a study and prepared basic material for the arts and humanities framework; (7) prepared materials on continuation education, including the Handbook on Continuation Education; (8) processed October report forms involving 58 counties, 358 unified and high school districts, and

1,677 schools, and revised the course description-coding catalog for publication; (9) took part in five regional social science meetings; (10) represented the Department on Moral Guidelines Committee; and (11) assisted in University of California Pilot Program for Student Teachers.

The activities described for 1972–73 are continued in the 1973–74 and 1974–75 work plans. In addition, it is anticipated that programs of a curricular nature which are tried and tested as activities in the high visibility core will be integrated into the curriculum core during 1974–75.

4. Physical Education and Safety Core

Physical education, traffic safety, and disaster preparedness are three areas which require the attention of California youth. The incidence of death and injury by traffic accidents, the hazards created by natural and man-made disasters, and the need to improve the level of youth physical fitness through exercise and sports exist as current mounting issues.

The physical education and safety core seeks to meet these needs through its six objectives: (1) to supervise and regulate school physical education and safety programs to ensure compliance with the law; (2) to provide students with knowledge, methods, and skills to survive in time of natural and man-made disasters; (3) to improve the quality of physical education programs that develop and maintain physical condition of children and adults at a level recommended by the President's Council on Physical Fitness and Sports; (4) to cooperate with educational, law enforcement, engineering, and licensing agencies in an attempt to reduce property damage, injuries, and deaths in traffic; (5) to increase the opportunity for participation by school-age youth and adults in programs of recreation, including sports and athletics; and (6) to develop an efficient administrative plan for operation of the physical education and safety core within general education management.

The three areas of responsibility for the physical education and safety core were a part of the former health and safety unit prior to the GEM organization, which became effective July 1, 1973. In 1972–73 the health and safety unit carried out the following activities which related to athletics and physical education, driver and traffic safety, and disaster preparedness education (other activities of the former health and safety unit are reported in the health core statement, I.E.2.):

a. Directed and administered 10 pilot programs with offices of county superintendents of schools to develop guidelines for coordinated statewide services in driver instruction and inservice workshops for 12 school districts; continued the parental involvement plan for driver instruction; and established a student research bank for 315,000 students in driver instruction.

b. Directed and assisted in 10 workshops with school districts involving the methods of administering the California physical performance test; conducted 15 inservice sessions with offices of county superintendents involving teachers for improvement of instruction in remedial physical education in local schools.

c. Directed and assisted in 45 one-day teacher training workshops in disaster preparedness and civil defense education for approximately 1,000 teachers.

d. Directed and assisted in 10 sectional meetings with section secretaries of the California Interscholastic Federation on control and regulation of public school athletics; provided inservice training for 2,000 teachers and coaches to improve teaching methods and increase participation by students.

The 1973–74 and 1974–75 work plans reflect a logical extension of the activities cited for 1972–73. The core will (1) administer federal, state, state board, and Department of Education rules and regulations to ensure compliance in these three disciplines; (2) continue to compile the driver education guidelines publication to coordinate statewide efforts in driver education, continue the student research bank, continue the Traffic Safety Education Project, and monitor these programs; (3) extend the teacher training workshops in disaster preparedness, develop the first draft of the state disaster education framework, and continue to monitor the local and county disaster plans; (4) provide leadership to carry out the state implementation plan for the physical education framework for California public schools, monitor remedial physical education classes and financing, and provide leadership for school athletic programs.

By 1974–75 it is anticipated that a complete retraining of professional staff will have taken place so that all staff members will serve as generalists in all of the disciplines that make up the physical education and safety core (athletics and physical education, driver and traffic education, and disaster preparedness education).

5. High Visibility Programs

The high visibility core component was developed within the new general education management element to include a variety of special programs which would operate separately and provide services throughout the state. The core is intended to administer programs originally designated as task forces and programs such as incentive grants and conservation education service, which were previously elements within established bureaus; and to provide a means by which programs can be developed and implemented on a trial basis or for a specified period of time. All programs in the high visibility core will be reviewed annually; following the review, programs may be retained in the core, transferred to some other core of the GEM unit, or dropped.

DEPARTMENT OF EDUCATION—Continued

I. INSTRUCTION—Continued

E. General Education Management (GEM)—Continued

One GEM program administrator has been assigned to supervise the programs assigned to the high visibility core. The Bilingual-Crosscultural Education Task Force is under the direction of the intermediate age-span manager, and the Career Education Task Force is under the direction of the secondary/adult age-span manager.

Statements for the high visibility programs follow. Items a. through f. are all described under I.A., Priority Programs.

a. Conservation education

b. Curriculum framework development and textbook selection procedures

c. Bilingual-crosscultural education

d. Career education

e. Mathematics

f. Reading

g. TEAM (Training for Expertise in Advanced Methodology)

The TEAM activity of the high visibility programs component had its roots in the NDEA, IIIb consultant program, which was in operation between 1960 and 1971. This program assisted school districts in securing the services of specialized consultants in conducting inservice workshops to identify for teachers new approaches to teaching and the latest research findings. The program was favorably accepted by the districts and the offices of county superintendents of schools. Upon the termination of this phase of the NDEA program, district, county, and department officials agreed on the desirability of continuing this type of consultant service.

The TEAM activity began on a pilot basis in the spring of 1973. Funds were combined from a variety of federal sources to provide the specialized consultant services required. Local educational agencies were informed of the proposed program, notified of the application procedure, and invited to submit projects representing their most critical curriculum needs. The State Department of Education's role involved (1) developing application procedures and forms; (2) distributing applications; (3) receiving and approving proposals; and (4) providing limited financial assistance in accordance with an established format. The funds for these purposes were made available from federal programs which had provisions for allocating funds to pay for specialized consultant services.

A total of 67 school districts and 28 offices of county superintendents of schools submitted proposals for TEAM services for the summer and fall of 1973. Twenty summer projects and 63 fall projects were approved, totaling 495 days of consultant services.

The 1973–74 work plan for TEAM includes carrying out the approved proposals; expanding the program to include adult education proposals elegible under PL 91-230; determining critical curriculum needs; and evaluating the TEAM approach.

The objective of the 1974–75 work plan is to pr vide those services justified by the 1973–74 evaluatio

h. Incentive Grant Projects

The purpose of the incentive grant projects of th high visibility core is to stimulate and promote loc expansion and adaption of ESEA, Title III, proje program components. (See I.E.1.b. for the ESE Title III, program statement.) Dissemination of i formation regarding programs funded by ESE Title III, grants has been a federal requirement sinc the inception of the act. In addition, Education Cod Sections 582 and 582.1 require the identification eac year of a maximum of 10 exemplary projects whic exhibited success in achieving these objectives and th dissemination of information concerning these proj ects to all school districts. An amount of not mor than 5 percent of the state's allocation of ESEA Title III, program funds is to be used for the expan sion and adaption/adoption of such projects.

After three years of field testing, nine incentiv grant projects were selected in 1972–73 as worthy o emulation: six in special education, one in drug mis use education, one in cross-age teaching, and one i teacher development in systems of individualized in struction.

Eight programs have been identified and funded for 1973–74; one in special education, five in early childhood education (individualized instruction, reading), one in preschool, and one in reading/social sciences. Eight or more workshop seminars are planned in conjunction with the Association of California School Administrators, county superintendents, and the California Teachers Association to create awareness of and stimulate interest in the program. Project directors are establishing the capability of receiving visitors and conducting demonstrations, conducting training seminars on request, and providing technical assistance. During the spring months of 1974, there will be an evaluation of 1973–74 general programs and a selection of the most successful ones for participation in the 1974–75 incentive grant projects.

The work plan for 1974–75 will be basically the same as for 1973–74, with some modification of workshop seminar procedures as a result of a review and evaluation of the 1973–74 efforts.

i. Local Comprehensive Program Planning Assistance

In January, 1973, the Department of Education decided to require school districts to use a single consolidated application form in applying for categorical funds. At the same time, guidelines were developed to assist districts in designing comprehensive programs utilizing all funding sources, which is a requirement for receiving early childhood education funds under the provisions of Senate Bill 1302 (Chapter 1147, Statutes of 1972). The local comprehensive program planning assistance activity was organized at the be-

ginning of 1973–74 to build on these initial experiences so that a new delivery system based on school-level comprehensive program planning could be instituted. Because of legislation and the departmental priority structure, the activity is devoted primarily to early childhood education. It provides full instructions and supportive packages along an adequate time line together with follow-up assistance for comprehensive program planning to those districts benefiting from its services.

The major emphasis of the activity is to promote the integrated use of multiple categorical aid grants. The overall goal is to design and implement instructional programs that accommodate the full spectrum of students on an individual basis. This goal presumes that such planning must be purposeful and inclusive and is undertaken with full participation by parents and community.

During the spring of 1973, six technical assistance teams (TAT) of department personnel associated with a number of categorical programs were assembled to provide coordinated briefings and follow-up assistance for districts in making program plans which could be translated into funding applications. These teams operated on a regional basis, with each school district relating to a single team throughout the planning activities. At the end of the fiscal year, plans were made to incorporate this intradepartmental team approach into the ongoing management structure of the education program matrix.

Fall 1973, activities for this project include (1) development of comprehensive program plans; (2) preparation of a complete set of consolidated program regulations for board adoption; and (3) development of the specific design of and training procedures for regional assistance teams. Activities which pertain to types of schools (elementary, intermediate, secondary, or adult) will be under the direction of the appropriate age-span managers.

During the spring of 1974, the teams will (1) provide briefings and follow-up assistance and interaction with districts concerning their program planning; and (2) offer to review completed program plans which will be the basis for preparing consolidated applications. (Team functions related to the applications themselves are described in the following section, Consolidated Applications.)

In 1974–75 the departmental delivery system will be developed more fully, particularly as to providing promising information to school districts affecting their program designs. The regional teams assisting in the planning process will thereby be enabled to call up additional help in content areas ranging, for example, from reading to guidance to career education. The regional teams will operate on the same basis and with the same time line as in 1973–74; heaviest activity will occur from January through March. The teams will continue to be under the direction of the education program administrator. Age-span managers will be responsible for planning considerations specific to different school levels. Although comprehensive program planning will be most complete and effective in elementary schools, particularly those receiving early childhood education funds (see I.I.2.), it is anticipated that increased attention can be given to intermediate and secondary schools in 1974–75.

j. Consolidated Applications

Prior to 1972–73 all federal programs of a categorical nature were administered by separate bureaus using separate application procedures and forms. To streamline this repetitive application procedure and to accommodate the requirements of recent legislation such as Ch. 1406/72 (School Finance, Disadvantaged Youth), Ch. 1147/72 (Early Childhood Education), and Ch. 1258/72 (Bilingual Education), the department has implemented the consolidated application procedure.

Organization and development of the consolidated application procedure, the accompanying guidelines, instructions for use of these guidelines, the application for funds, the review and selection of projects, and the writing of grant awards were planned and implemented between January and June, 1973. Over 1,000 districts applied for funds under the various categories, and the funds have been awarded for operation of programs in 1973–74.

The objectives of the consolidated application activity are to (1) provide clear and concise regulations and guidelines for the application and allocation of state and federal resources to local educational agencies and provide additional information and assistance to them in identifying all resources that are available for their use; (2) develop an effective, integrated grant administration process to ensure that the allocation of all state and federal resources is consistent with local programs and priorities; and (3) establish an orderly procedure for monitoring and auditing the use of all state and federal funds administered by the department in compliance with state and federal requirements and with the policies and regulations of the State Board of Education.

The federal and state regulations involved in the consolidated application procedure include the National Defense Educational Act; Elementary and Secondary Education Act, Title I, Title II, and Title VI; Ch. 1406; Ch. 1147; the Adult Basic Education Act; and the Vocational Education Act.

The major activities included in the 1973–74 work plan are as follows: (1) obtain review of procedures by intermediate units and local educational agencies; (2) review and revise application procedures and guidelines; (3) publish and distribute guidelines; (4) conduct required area workshops on guidelines; (5) establish application deadlines; (6) assist local educational agencies in program needs assessment and project planning; (7) receive, review, and process ap-

DEPARTMENT OF EDUCATION—Continued

I. INSTRUCTION—Continued

E. General Education Management (GEM)—Continued

plications; (8) amend applications and recommend funding to the State Board of Education; and (9) monitor funded applications.

The 1974–75 work plan will modify the 1973–74 plan to incorporate suggestions from local educational agencies and the results of the 1973–74 evaluation. Personnel assigned full time to the consolidated application unit will develop guidelines, manuals, and program support materials to be used by districts. Additional personnel will be assigned on a part-time basis to assist districts in their preparation of consolidated applications and in the review and approval process.

6. Adult Education Core

Sections of the Education Code, regulations of the State Board of Education, and policies of the State Department of Education require state review and approval for programs and classes for adults eligible for state apportionment. The department, through the adult education core, provides leadership for the improvement of the (1) instructional program; (2) schools and classes for adults maintained by high school districts or unified school districts; and (3) classes for adults in county jails. In 1974–75 one consultant will be provided to develop programs for senior citizens pursuant to Ch. 1604/73.

Of the 359 high school and unified school districts in California, 297 districts provide programs of instruction in adult education to meet the immediate and long-term educational needs of that portion of the adult population of approximately 14 million who require basic education, high school diploma training, vocational and occupational training, parent education, consumer education, civic education, and training in special fields. Technological advances and a constantly changing job market demand retraining opportunities and the complexities of society require an enlightened citizenry to cope with the problems of everyday living.

During 1972–73 the following adult education functions were performed: (1) review and approval for apportionment purposes of over 300 programs for adults by local educational agencies; (2) provision of service and leadership to adult education programs administered by local educational agencies; (3) expansion and improvement of interdepartmental co munications on state-supported adult education pr grams; (4) liaison with organized groups related adult education; (5) monitoring and evaluation adult school programs; (6) preparation and distrib tion of annual statistical summaries of California public school adult education programs; and (7) pre aration of manuscripts, manuals, guidelines, ar other material for use by public school adult educ tors.

The ongoing work plans for 1973–74 and 1974–7 continue the functions performed in 1972–73, with th following additions: (1) preparing and distributin descriptions of exemplary adult education progran and assisting in the development and implementatio of new programs; (2) providing assistance to th early childhood education management team (I.1.2. in developing mandated parent education programs and (3) providing orientation and training opportun ties for representatives of all cores in the general edu cation matrix.

The adult basic education activity within the adul education core was funded by Public Law 91-230 an came into being in 1965, initially as Title IIB of th Economic Opportunity Act of 1964. These federa funds, combined with existing state and local re sources, make a basic education program available fo adults in California who are functionally illiterate These are persons whose inability to speak, read, o write English constitutes a substantial impairment o their ability to function effectively in society. Instruc tion is given in English as a second language and reading. In 1972–73 the adult basic education pro gram provided leadership and monitoring services for 87 school district projects serving 75,000 adults.

During 1973–74 there are 82 school district proj ects serving 100,000 adults in the adult basic educa tion activity. Data on student achievement will be compiled in cooperation with local educational agencies. It is estimated that one grade-level achievement in reading will be attained per 100 instructional hours by the average student in the program.

The 1974–75 work plan will be a continuation of the 1973–74 program.

F. Instruction for Educationally Disadvantaged Students

The purpose of the Compensatory Education program support activity is to modify or augment the regular educational programs for students who are educationally disadvantaged, to provide them with the skills and knowledge they need to realize their own potential and to participate fully in American life. The department estimates that there are approximately 1.2 million educationally disadvantaged children in California who attend public and nonpublic schools, preschool through grade 12.

Two components have been established within the instruction for the educationally disadvantaged student element to help achieve this objective: (1) socioeconomically disadvantaged; and (2) migrant education. The state preschool program, formerly a component within this element, is described in Program I.I., child development.

Among the departmental priority programs which are directly applicable to the compensatory education support activity are bilingual-crosscultural education, early childhood education, intermediate education, and career education.

1. Socioeconomically Disadvantaged

The goal of programs for socioeconomically disadvantaged students is to raise the academic achievement of such students to a normal range and distribution in reading, mathematics, and other skill subjects. This goal can be accomplished by providing the population of disadvantaged students with services designed to alleviate academic deficiencies uncovered through a process of needs assessment. The department seeks to meet these needs through the following activities within this component: (a) compensatory education (ESEA, Title I); (b) educationally disadvantaged youth program; (c) California process model and technical assistance follow through; (d) Demonstration Programs in Reading and Mathematics; (e) Miller-Unruh reading; and (f) professional development.

a. Compensatory education (ESEA, Title I), and

b. Educationally disadvantaged youth program Ch. 1406

As the Department of Education moves to the adoption of a new delivery system emphasizing comprehensive program planning, it continues to fulfill its categorical aid responsibilities. The compensatory education program support unit provides a statewide reservoir of support for districts receiving categorical funds for disadvantaged youth, which is the largest categorical student population served by the department. In 1974–75 compensatory education staff will engage principally in cooperative work plans with other department units although certain special projects will be fully administered within the unit.

The major portion of assistance to districts in program planning will be through the department's technical assistance teams (see I.E.5.i. aud h.). These same regional (TAT) teams will provide assistauce for consolidated application preparation, and subsequently for department review and approval of the applications. In these team operations compensatory

DEPARTMENT OF EDUCATION—Continued

I. INSTRUCTION—Continued

F. Instruction for Educationally Disadvantaged Students—Continued

education consultants will give particular attention to district procedures in planning the services to be provided for eligible disadvantaged students.

Subsequent to the awarding of categorical funds, compensatory education staff will provide program compliance services as part of the department's continuing consolidated application management. Consultant services to schools serving disadvantaged youth will continue to be available on a request basis. Basic competence in reading and computation will continue to be emphasized. In some cases the department may help to arrange an educational audit for disadvantaged youth schools that are seeking to improve their program effectiveness.

The compensatory education program support unit in 1974–75 will continue essential monitoring and review activity in selected school districts to verify compliance with federal and state regulations in the use of categorical funds for disadvantaged youth.

An ongoing area of direct assistance will be in consulting with various parent groups in target schools. Parents in many cases can be helped to better understand program regulations and their rights and responsibilities in parent participation processes.

c. California Process Model and Technical Assistance Follow Through

The California follow through program was established to sustain and supplement in the early grades the gains made by children who had a year's experience in a head start or comparable preschool program. Six school districts operate California process follow through projects, and the department provides a full range of field services for each. Limited assistance is also offered to 17 districts which receive follow through grants for the purpose of upgrading their programs for kindergarten and grades one through three.

d. Demonstration Programs in Reading and Mathematics

These programs consist of a series of state-supported exemplary projects on various methods of more effectively teaching reading and mathematics at the junior high school level. Because the current average per student costs of the program are prohibitively high, the department has undertaken the task of redirecting the program effort in order to develop and fund only those programs which are replicable in other similar school districts at local expense pursuant to E.C. 6495.

e. Miller-Unruh Reading

The Miller-Unruh Basic Reading Act was passed in 1965 as an effort to upgrade the total reading effort for primary children in California. In the years from 1965 to 1972, scholarship grants were available to teachers for preparation to become special reading teachers. In addition, a stipend of $250 per year wa provided for each teacher. An additional stipend wa provided to librarians who served the primary read ing program. In 1972 the legislation was amended t redirect a portion of the Miller-Unruh reading alloca tion to provide additional state-level program service to districts. It is proposed that the Miller-Unruh pro gram be combined over the next five years with th early childhood education program in an effort t strengthen the total program package. A significantl expanded student population will be served by th combined program.

f. Professional Development

At several locations within the state there are fed erally-funded activities designed either to recruit per sons of low socio-economic status into the professio or to provide professional development activities fo staff in schools with disadvantaged youth. In addi tion, the state has for the last several years provided funding for both preservice and inservice trainin for teachers of disadvantaged youth through two pro grams: the Research and Teacher Education Progran (RATE), and the Professional Development Cente Program (PDC). The Department of Education i currently preparing legislation to integrate these tw programs and improve their cost effectiveness. It i anticipated that the proposed legislation will carry an appropriation to fund the redesigned program fo 1974–75.

g. Special Teacher Employment Program (STEP)

This compensatory program is directed at reducing the pupil-teacher ratio to 25 to 1 in primary school located in areas of poverty and social tension. Funds are allocated to school districts solely on the basis of an entitlement formula. School districts are not re quired to submit a district plan or project proposa to receive these funds.

Although the program received its original mandate from Chapter 106, Statutes of 1966 and has been sup ported at the $6.5 million level for the past severa years, there is no evidence that the program is suc cessful in raising student achievement in partici pating schools. Consequently, the program will not be continued in 1974–75.

2. Migrant Education

Beginning in 1967, ESEA, Title I, (PL 89-10) and the migrant amendment (PL 89-750) have provided for grants of federal funds to the State Department of Education to plan, organize, administer, and oper ate supplemental educational programs for migran children. It is the responsibility of the migrant edu cation component to carry out that work. The McAteer Act (Education Code Sections 6450–6498)

DEPARTMENT OF EDUCATION—Continued

I. INSTRUCTION—Continued

F. Instruction for Educationally Disadvantaged Students—Continued

authorizes the acceptance and use of these funds for the purpose of providing compensatory education programs for migrant children. Grants are made annually to finance the state's project.

Approximately 49,000 children of migrant agricultural workers were provided supplementary instruction and supportive services during 1972–73. The migrant education program was carried on in cooperation with six county superintendents of schools and with 224 school districts. During 1973–74 a larger number of children is being served. Additional school districts and a seventh county superintendent of schools are participating in the program.

The work plan objective of the migrant education component for 1974–75 will be to help migrant children in participating schools attain average achievement rates in reading and mathematics of 1.5 months for each month of enrollment, as measured by a standardized test. In addition, the component also will work toward making the average attendance rate of these children equal to that of resident children for each month of enrollment.

G. Instruction for Special Education Students

Educational programs for exceptional children in California focus on the needs of the mentally handicapped, physically handicapped, educationally handicapped, and mentally gifted. The goal of the special education program element is to ensure the provision of program opportunities designed to meet the needs of exceptional children in California, thereby enhancing the potential of the public education system to serve all children. This goal is consistent with priorities set by the State Board of Education, and it gives specific emphases to departmental reorganization, career education, school finance and efficiency, and early childhood education.

During 1972–73, the special education element, which became a support activity in the new departmental matrix organization on July 1, 1973, completed the initial draft of the Master Plan for Special Education. The master plan has been selected as a priority program for 1974–75 and is described in I.A.10. The plan reassesses current goals and priorities of special education to determine where emphasis should be placed; it also addresses the difficult problem of categorization of exceptional children.

Three components have been established in special education at the state level to help the department meet its responsibilities for the education of the exceptional child: (1) handicapped students; (2) gifted minors; and (3) special schools.

1. Handicapped Students

So that the range and complexity of needs presented by a population of handicapped children can be encompassed, a range of services must be made available by local educational agencies providing special education programs. Education Code Sections 264, 6759, 6803, 6803.1, 6907, and 6880.50 order the Department of Education to carry out supervisory and coordinative functions related to the education of handicapped children.

In 1972–73 the department gave priority to enrolling identified but unserved handicapped children and to extending special education programs and special services for the handicapped. Handicapped children must be identified and provided with services early in life so that the handicapping effect of their disability can be minimized. Such children must receive the special education needed to develop the skills prerequisite to learning in a school environment. Early intervention often averts the need for lifetime care.

A good example of early intervention is the development centers for handicapped children. The program for children in these centers emphasizes an individualized plan in the areas of expressive and receptive language skills, gross and fine motor skills, social and emotional development, self-care skills, academic readiness and therapy services. As a result of individualized services aimed at overall development, some 14 to 15 percent of the development center enrollment can be transferred to higher-level types of special education programs.

During the 1973–74 school year, 2,400 children are enrolled in development centers. Special legislation will be introduced during the 1974 legislative session to expand the program by an additional 200 children in the 1973–74 fiscal year. The 1974–75 development centers' budget is increased to allow 100 additional children to benefit from the services offered in the program. These expansions represent a total increase of $1,000,000 to provide much needed services to these severely handicapped special children. An additional $61,380 has been added to the development centers' budget for SB 426, Chapter 1106, Statutes of 1973,

DEPARTMENT OF EDUCATION—Continued

I. INSTRUCTION—Continued

G. Instruction for Special Education Students—Continued

in order to reimburse districts for the enrollment of out-of-district children.

During 1974–75, the Department of Education will make every effort to acquire federal matching funds so that handicapped minors in the state can benefit from the development centers program.

Career preparation for the handicapped is another need frequently unmet. Recent studies show that only a small minority of handicapped students leaving high school are adequately prepared for employment. Handicapped students need career preparation which is designed to help them apply and develop their skills and abilities toward meaningful and productive vocations. By means of joint planning with those responsible for the operation of regular career education programs, the utilization of these opportunities can be better coordinated.

The activities of the special education unit during 1972–73 were directed toward (1) improving the special education information system so that more accurate data are now available for use in reporting to program administrators and to the Legislature; (2) increasing the enrollment of children not now receiving services; (3) operating an onsite audit system for federally funded programs serving the handicapped and (4) the use of evaluation procedures for well-defined programs.

Activities during 1973–74 focus on providing services to local educational agencies, surveying the needs of unserved handicapped children, developing early childhood education programs for the handicapped, and continuing other 1972–73 activities such as personnel training.

The 1974–75 work plan objectives of the component for handicapped children follow:

a. Reduce the number of unserved handicapped children by (1) using the identification system and referral model developed in 1973–74 to enable 20 percent of the counties in California to determine the number and type of handicapped children currently unserved; and

b. Assist local educational agencies (LEA's) by (1) implementing a new system for processing requests for information; (2) ensuring that special education programs are maintained in compliance with rules, regulations, and guidelines; (3) encouraging innovative programs; (4) providing liaison with the Legislature, State Board of Education, and other units in the department to coordinate total educational efforts of the department in planning, budgeting, and evaluating programs; and (5) updating and publishing bulletins, brochures, guidelines, and the regulations adopted by the State Board of Education and disseminating this information to those responsible for special educational programs.

c. Continue to give priority to early childhood education for the handicapped by (1) demonstrating in five pilot programs the capability of LEAs to identify handicapped children below mandatory school age and to provide for them a full range of educational pr grams and services; (2) continuing to improve stat supported programs in special education for specifi handicapped children and to coordinate these effor with early childhood education programs; and (3 processing and funding 15 federal grant projects ar state experimental programs to serve 7,000 hand capped children below mandatory school age.

d. Facilitate career preparation for handicapp children through (1) assistance and funding f model programs in ten LEAs; (2) ten three-da workshops for professional staff; (3) cooperation wit the secondary/adult age span in developing eigh model programs; and (4) cooperation with vocation education in ten three-day workshops for combine professional staffs.

e. Evaluate programs for handicapped children b (1) implementing the education data processin system in cooperation with the office of progra evaluation and research; (2) developing guidelin and procedures whereby LEAs can evaluate their pr grams; (3) initiating in ten LEAs a research, in formation, and evaluation system; (4) conductin onsite program audits for at least 80 percent of th federally funded projects administered by special edu cation; and (5) selecting highest quality program for funding out of 200 competitive applications.

f. Continue personnel development by (1) conduc ing inservice training institutes for special educatio personnel; (2) helping develop criteria and guid lines for training resource specialists and others; an (3) working with teacher-training institutions whic prepare special education personnel.

2. Mentally Gifted

Approximately 156,000 pupils were enrolled in pro grams for the mentally gifted during 1972–73. It i the goal of this component to provide all gifted in dividuals with qualitatively different and uniquel appropriate educational opportunities. Special atten tion is directed toward the needs of culturally dis advantaged gifted pupils and those who reside in rura areas.

The mentally gifted minors program is authorize in Education Code Sections 6421–6434 and in othe sections. In 1972–73 qualitatively different program were established through a prior approval applicatio process that included the submittal of progra evaluations by school districts and the county superin tendents. Another 1972–73 activity was providin basic consultant services.

The technical assistance, supervisory, and coordina tive functions of the mentally gifted component ar being continued in 1973–74. Between 200 and 25 prior-approval program applications will be reviewed analyzed, and approved during the year. Additiona staff activities are focusing on career education fo gifted children, early childhood education program

for the gifted, and enrolling unserved gifted children in rural areas and among the culturally disadvantaged population.

Major work plan objectives for 1974–75 are as follows:

a. Provide referral, inservice training, and other forms of assistance to school districts and county superintendents' offices.

b. Strengthen the ability of the department to use evaluation data from LEAs so that an evaluation of the statewide mentally gifted program can be made.

c. Develop guidelines and policies to provide expanded opportunities for gifted students; hold five regional conferences to discuss new procedures for including talented pupils in programs; and continue to support the National Leadership Training Institute for the Gifted and Talented in its training efforts in California.

d. Provide required supervision and coordination of statewide programs for the mentally gifted, including (1) use of the school district and county application processes for prior approval to maintain programs; (2) development, interpretation, and enforcement of rules and regulations; (3) field visits to operating programs; and (4) other supervision as required to ensure high-quality programs.

e. Promote equal educational opportunity for all mentally gifted minors by expanding the program in 20 percent of the districts not now serving gifted pupils and by concentrating on gifted pupils who are culturally disadvantaged or who live in rural areas of the state.

f. Continue coordination efforts in early childhood education to achieve inclusion of mentally gifted minors in appropriate programs in kindergarten through grade three, levels at which gifted enrollments have been disproportionately low. (A significant number of gifted children are not identified and provided programs sufficiently early in life to develop their unique potential. Research points to the importance of early stimulation and early learning; without stimulation, children's creativity declines sharply at about the fourth grade.)

g. Continue cooperative efforts to enable mentally gifted minors to make appropriate career choices by providing them with career education and vocational training.

3. Special Schools

The state special schools for the handicapped include one residential school for the blind, two for the deaf, and three for the neurologically handicapped, including the new Central Valley Diagnostic School for Neurologically Handicapped Children.

Since 1860 California has provided special residential schools for handicapped children whose needs were not met by local public school programs. By statute these schools are under the jurisdiction of the Department of Education.

The California School for the Blind (in Berkeley) provides a comprehensive developmental and academic program for blind, multihandicappel blind, and deaf-blind children from throughout the state.

The California Schools for the Deaf (in Riverside and Berkeley) provide a comprehensive academic and vocational program for deaf and severely multihandicapped deaf children. The Riverside school serves 11 southern counties, and the Berkeley school serves 47 northern counties of the state. Both schools are organized into departments to provide an elementary, junior high school, and high school curriculum. The severely multihandicapped deaf program at the Riverside school is organized as a self-contained unit.

The Diagnostic Schools for Neurologically Handicapped Children (in Los Angeles and San Francisco) provide a two-phase program for neurologically handicapped and multihandicapped children designed to secure a comprehensive assessment of the child's developmental and learning potential and to develop a medical and educational program which will benefit the child and enable him to enter or return to a school district program. Passage of Ch. 634 in mid-1973 authorized the establishment of a third diagnostic school, the Central Valley Diagnostic School for Neurologically Handicapped Children, located in Fresno. The school is beginning limited operations in January 1974, with a full program planned for 1974–75.

During the 1972–73 school year, the state residential special schools for the deaf and blind provided individualized instruction for a full year for 145 blind, multihandicapped-blind, and deaf-blind pupils; 930 deaf pupils; and 93 severely multihandicapped-deaf pupils. In addition, 24 preschool deaf children in rural northern counties were provided with educational services through a project in parent education, and 27 assessments and program prescriptions were completed for referred deaf-blind children.

During the 1972–73 school year, the state schools for neurologically handicapped children provided individualized assessments and program prescriptions for 354 neurologically handicapped and multihandicapped pupils; enrolled 140 pupils in its residential program for extensive assessment and learning remediation; completed a learning assessment project for deaf-blind children; initiated planning for an assessment project for autistic children; and provided followup evaluation services to school districts for 153 children.

The state schools for the handicapped also provided teacher training and related practicum experience for 300 persons preparing to work with handicapped children.

As shown in the following table, projected enrollments in the special schools show a slight overall decrease from 1972–73 to 1974–75, except for the enrollment of neurologically handicapped pupils. This projected increase reflects the addition of the diagnostic school in the central valley.

In March 1973, facilities to house an additional 50 multihandicapped pupils were completed at the California School for the Deaf, Riverside. A study of the facilities of the school for the blind and the school for

DEPARTMENT OF EDUCATION—Continued

G. Instruction for Special Education Students—Continued

the deaf in Berkeley during 1972–73 recommended that both schools be relocated and rebuilt because of vulnerability to earthquake and fire. During 1974–75 construction will begin for a new school for the deaf to accommodate 400 pupils and a new school for the blind to accommodate 150 pupils. A teacher position has been established for 1973–74 at the school for the blind to develop new career education programs.

Other 1974–75 work plans for the special residenti schools include providing specialized instruction ar residential care for handicapped children as show in the preceding listing; providing training practicu for 300 persons preparing to work with handicappe pupils in professional and paraprofessional roles; ar developing and evaluating curriculum, instruction methods and materials, and pupil evaluation instr ments in special projects to improve programs f handicapped pupils.

Enrollment of Handicapped Children in the Special Schools of California

Enrollment by Fiscal Year

DEPARTMENT OF EDUCATION—Continued

I. Instruction—Continued

H. Occupational Preparation (Vocational Education)

California has an immediate and continuing need for occupational preparation to meet its labor force needs. Continuous upgrading and retraining programs are needed to keep pace with the technological change and population growth which are responsible for at least 4,000 new or changing jobs each week.

Special efforts are required to assist handicapped or socioeconomically disadvantaged students to overcome deficiencies that prevent them from enrolling or succeeding in occupational preparation programs. These students represent 10 percent of the total potential enrollment.

The vocational education program support activity has been established in the department to assist local educational agencies in providing occupational preparation programs that will meet their students' needs. Most of the professional staff members in this program element have subject-matter expertise in one of seven vocational areas: agricultural education, distributive education, education for health occupations, homemaking education, office education, technical education, and trade and industrial education. They are supported by individuals with evaluation, research, professional development, public information, fiscal, and managerial capabilities. They respond to various demands of local educational agencies as well as satisfy compliance requirements by providing assurance that all applicable federal and state regulations are being met.

Emphasis in this program element has shifted from categorical technical assistance to more broad programmatic types of services. Additionally, assistance has been expanded in the areas of evaluation, professional development, public information, research, and dissemination.

Major work plans for the vocational education element in 1974–75 are to assist local educational agencies accomplish the following:

a. Provide occupational education to prepare 200,000 youths and adults for immediate employment in the existing labor market.

b. Provide occupational education to upgrade the skills of 200,000 individuals already employed in specific occupations.

c. Provide specialized services and programs to counteract existing mental, physical, or socioeconomic handicaps.

d. Establish, maintain, and improve vocational youth organizations which provide leadership training for 30,000 youths and young adults.

In addition, the vocational education element will assist teacher training institutions or will conduct teacher training sessions to prepare or upgrade 6,500 vocational education instructors and administrators.

Four program components comprise the vocational education work plan: (1) training of personnel; (2) research, development, and evaluation; (3) program compliance; and (4) provision of services.

1. Training of Personnel

The goal of personnel training is to provide a cadre of trained vocational education teachers and administrators commensurate with indicated needs. An additional goal is to increase participation and to provide training in leadership for members of vocational education youth group organizations; e.g., Future Farmers of America, Future Homemakers of America, Future Business Leaders of America, Vocational Industrial Clubs of America, and Distributive Education Clubs of America.

Changing manpower demands of modern society require that the nation's schools respond rapidly and effectively to these changes. State vocational education staff consultants must keep abreast of the latest mandates and recommendations for revising vocational instruction. These, in turn, must be translated into forms suitable for use by teachers, administrators, and local consultants.

2. Research, Development, and Evaluation

The research, development, and evaluation component's goals are to (1) identify problems related to vocational education and apply resources toward solution; (2) identify exemplary programs, develop curriculum, and test methodologies for dissemination and replication; and (3) develop procedures which evaluate program effectiveness.

Occupational preparation in California encompasses more than 313 different training programs, with a wide range in the number of students participating.

3. Program Compliance

The program compliance component ensures compliance with applicable vocational standards and regulations.

The annual appropriation of federal funds for vocational education is approximately $53 million. Of this amount, $40 million is derived from PL 90-576, the vocational amendments of 1968; $500,000 from PL 90-35, the Education Professions Development Act; and $12.5 million from PL 87-415, the Manpower Development Training Act. The acceptance of these funds by California carries with it the requirement of assurance that federal regulations are compiled with and that federal reports are submitted in a timely manner.

DEPARTMENT OF EDUCATION—Continued

I. Instruction—Continued

H. Occupational Preparation (Vocational Education)—Continued

During the 1974–75 fiscal year, 24 high school districts will be audited to ensure fiscal and statistical compliance and to provide an indepth review of district operating procedures.

4. Provision of Services

The provision of services component provides technical assistance on vocational education to all high school, unified, and community college districts and offices of county superintendents of schools. This component also provides program coordination on an inter- and intra-agency basis and develops mandatory, developmental, and promotional manuscripts, brochures, or audiovisual aids. During 1972–73 all high school districts in the state received some for of curricular, managerial, or ancillary assistance fr this staff.

I. Child Development

Child development, a new budget element for the 1974–75 fiscal year, includes three components: (1) child care services; (2) early childhood education management team; and (3) state preschool program.

The child care services component was created to assume responsibility for a variety of preschool programs, day care facilities, and other forms of child care which were transferred to the Department of Education on January 1, 1973, under the provisions of the Child Development Act, Ch. 670/72.

The early childhood education management team was organized in early 1973 to implement Ch. 1147/72, the Early Childhood Education Act.

The state preschool program was established by legislative enactment in 1965 to provide compensatory preschool educational experiences for children from low-income families. It was formerly a component within instruction for the educationally disadvantaged student element.

The Child Development Act, Ch. 670/72, transferred responsibility for child care services, including those previously administered by the Department of Social Welfare, to the Department of Education on January 1, 1973. Services include preschool programs, day care for children of migrant families, children's centers, neighborhood day care facilities operated by school districts or other agencies, homemaker services involving child care to meet emergency conditions, experimental projects in child care, and related social and health services.

The Child Development Act charges the Department of Education with (1) formulating and promoting a child development program in all California communities where the need exists; (2) adopting rules, regulations, and standards for neighborhood family day care homes; (3) determining rules for eligibility and priority of service; (4) determining fee schedules; and (5) prescribing minimum educational standards.

In 1972–73 the various child development programs were consolidated into the child development unit under the administrative direction of the Department of Education. The department also assumed administrative authority over many programs and functio previously handled by the Department of Social We fare. The transition compelled the Department Education to become aware of and develop experti in each of the various types of child care program In addition, the department commenced to carry o its mandated function under Ch. 670/72, includin development of a comprehensive state plan for chil development programs and the restructuring an analysis of child development programs into a co comitant part of the education system.

In 1972–73 child development programs were co ducted by 114 agencies serving approximately 27,5(children and utilizing $33 million in state and feder moneys. Many programs were also supported by loc tax funds and parent fees. Various child care pr grams administered by county welfare departmen utilized an additional $12 million of state and feder moneys.

Professional staff from this component in the D partment of Education assisted the 114 agencies i adjusting to new state and federal rules, regulation and guides pertaining to child development program and social service activities. As programs wer analyzed for standardization to conform with ne regulations, program management changes and recom mendations were implemented. As particular issue such as capital outlay expenditure authorization were brought to the attention of the Department o Education, corrective action was initiated and imple mented by professional field service personnel t alleviate possible audit exceptions.

The work plan for 1973–74 utilizes the two-phas approach started in 1972–73: (1) field services t ongoing and newly established child development pro grams; and (2) indepth, long-range planning for th eventual implementation of a comprehensive statewid child development program plan.

The Department of Education is administering th various child development delivery systems throug interagency agreements involving the Department o Education, the Department of Social Welfare, an the Health and Welfare Agency. The various stipu

DEPARTMENT OF EDUCATION—Continued

I. INSTRUCTION—Continued

I. Child Development—Continued

lations and responsibilities contained in the interagency agreement adhere to existing state and federal rules, regulations, and guides.

During 1973–74 this component is utilizing the full range of staff available under the state personnel series for early childhood education, thereby providing the component with a differentiated staff for the purpose of meeting specific task assignments. The professional staff is responsible for the three distinct phases detailed in the entire work plan: (1) comprehensive planning and fiscal and social service compliance within a development and compliance section; (2) field services to existing, experienced agencies conducting child development programs; and (3) field services to new programs under inexperienced agencies venturing into the child development field.

In 1973–74 child development programs will expand to include more agencies and expenditure of more state and federal funds. Programs will be operated by at least 148 agencies and potentially all 58 county welfare departments. The programs will serve more than 50,000 children, with expenditures approximating $64 million in state and federal funds.

Activities to be conducted during 1974–75 will implement the comprehensive child development plan. The implementation of the plan may require a redirection of field service staff, depending on the quantity of changes imposed by federal law or regulations. The Department of Education will continue all functions delineated in the 1973–74 work plan into 1974–75.

The work plan for 1974–75 will conform to the maximum number of agencies, children served, and numbers of programs available within available fiscal resources.

The major work plan objectives of the child care services component in 1974–75 are the following:

a. Provide increased opportunities for parents to utilize available services within the maximum financial limits established by state and federal sources.

b. Standardize child development programs in conformity with state and federal rules, regulations, and guidelines regarding program components and the quality of various components.

c. Implement the comprehensive child development plan for statewide delivery of services.

d. Provide the family, both parent and child, with an improved quality of service in the component areas of child development, social services, health services, nutrition services, and supervision by professional and nonprofessional staff.

The attainment of these four objectives will enhance the eventual accomplishment of previously stated goals and address the issue of quality as well as quantity of service to the consumers of child development programs. The attainment of each objective will enable a family to receive social services and a child development component within a comprehensive family social service plan. See chart on page 337.

2. Early Childhood Education Management Team

In most elementary schools in California, childre are grouped into grade levels according to age an then divided into classes primarily to equalize teach load. The curriculum for each grade level is relativel uniform throughout the state. Most teachers expe each child in the classroom to master more or less th same curriculum as his peers and at the same rate c learning. In some cases adjustments are made t accommodate individual differences, but the genera basis for the system of instruction in California is th traditional grade level, the class, and the commo curriculum.

Optimal learning conditions for each child woul exist if each child's readiness to learn, his prio achievements, and his learning problems could b assessed and diagnosed regularly and prescription made for his next learning tasks. Only in this wa can specific adjustments be made for the variety o conditions that may exist for him. Such things a economic level, bilingualism, intelligence, or back ground of experience are factors which should b considered in designing an individual child's instruc tional program.

Research findings clearly indicate that learning i enhanced when the child's parents actively participat in his education. This principle has been amply dem onstrated in California by such programs as ESEA Title I, and follow through, which require parenta involvement and participation in the total educatio process.

There are many categorically funded programs— federal, state, and local—now operating in Califor nia's schools which are designed to meet special need of identified populations of children. These program often are operated in different ways, under various auspices, with wide-ranging results. They are no offered to all children equally, nor are they necessarily coordinated with each other or with the general edu cation program. The effect on the schools of participa tion in these programs, therefore, frequently has bee costly fragmentation of effort into categorical com

partments rather than a concentration on the needs of children as individuals.

In summary, a need exists (1) to restructure kindergarten-primary education to focus on the child rather than the class; (2) to involve parents and the community; and (3) to coordinate and bring together under one effort the multitude of separate resources and programs.

The early childhood education management team program became effective in March, 1973, to implement Ch. 1147/72. Since there was only very limited program activity before June 30, 1973, no work plan was drafted for 1972–73.

For the first year of the early childhood education program. 1973–74. about 1,000 schools in about 800 school districts submitted program plan proposals for funding to the Department of Education. The early childhood education management team approved acceptable school-level plans and provided intensive assistance to parents. community representatives. and school personnel during the summer of 1973 to bring most of the remaining plans to an approvable state.

During 1973–74 most of the schools implementing early childhood education programs are being monitored, especially those schools having the greatest need for plan improvements. Special efforts are also being made to identify schools where promising or successful practices are being utilized, and information about those practices is being prepared for dissemination.

Six regional workshops have been scheduled in preparation for 1974–75 plan development. The early childhood education management team staff has assisted in the development of individual school plans where there have been unusual problems or circumstances. In addition, the early childhood education management team has assisted the department's technical assistance team efforts, particularly in the development of school district-level master plans for early childhood education. (See I.E.5.i., Local Comprehensive Program Planning Assistance, and I.E.5.j., Consolidated Applications.)

Team members are visiting the early childhood educatiou schools between December, 1973, and April, 1974, to monitor and evaluate the implementation of their early childhood education plans and analyze in depth the outstanding programs so that information may be disseminated about these programs at a later date. School districts are to submit final evaluation reports on their 1973–74 early childhood education programs by August 1, 1974. These reports, as well as the preliminary evaluation report on program implementation, are to be used to formulate a final

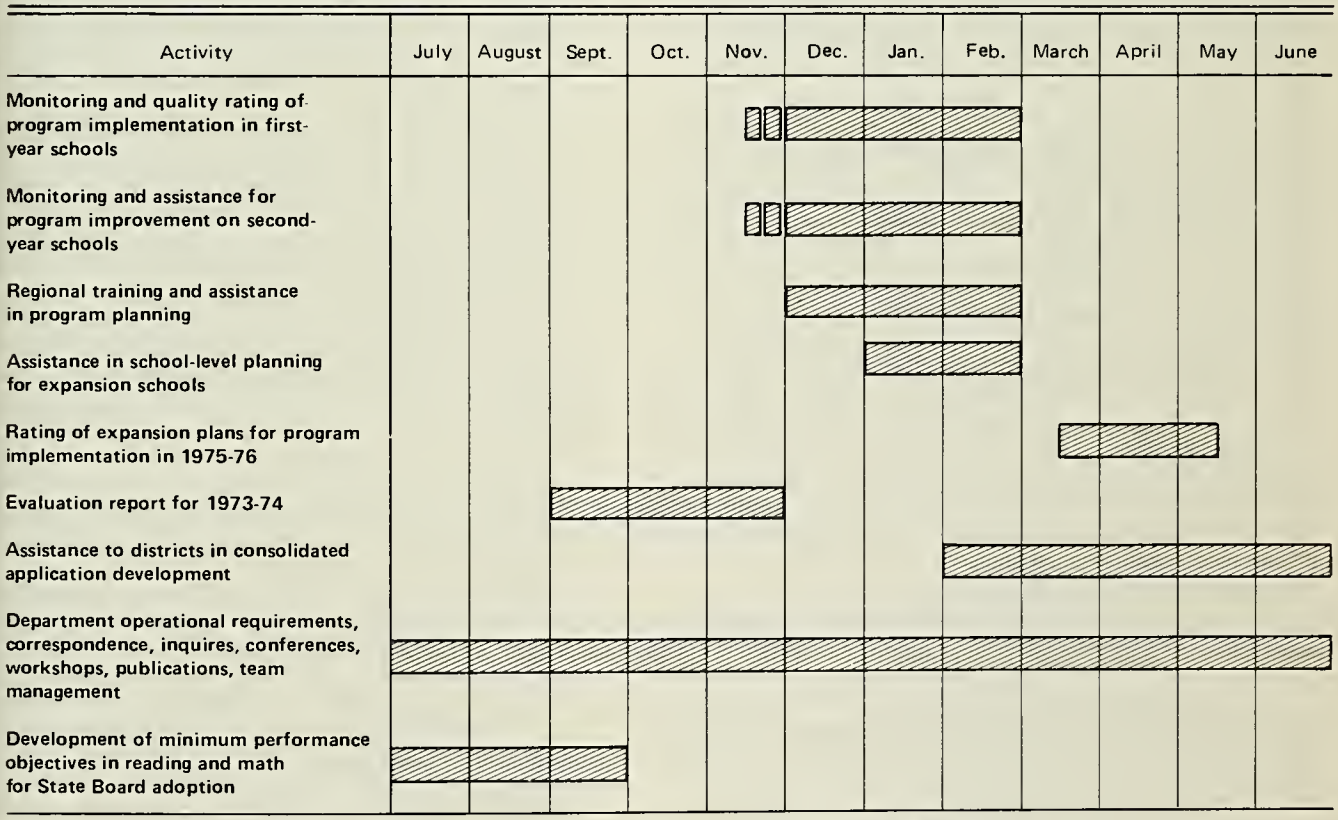

Fig. 7. Early Childhood Education Management Team, 1974-75 work schedule

DEPARTMENT OF EDUCATION—Continued

I. INSTRUCTION—Continued

I. Child Development—Continued

evaluation report to the State Board of Education and the Legislature in October, 1974.

It is expected that after one year's participation in the early childhood education program, 80 percent of the schools involved will meet their objectives, as described in their approved school-level plans. After two years of participation, the third-grade pupils in early childhood education schools should show significantly higher performance in the statewide testing program than third-grade pupils in similar schools not having early childhood education programs. The distribution of quality ratings of school plans for new early childhood education schools should exceed the comparable distribution of quality ratings from the prior year.

The work plan for 1974–75 is illustrated in Figure 7.

Schools in the second year of participation will vary in their degree of success in program implementation. In some schools major changes in program design or in assignment of key personnel will be made. Since schools must demonstrate successful program outcomes by the end of the third year of operation, it is essential that problems be corrected to the greatest extent possible during the second year.

The early childhood education management team will maintain a monitoring, review, and program redesign assistance capability for these schools. Since there is no prior history or experience with this program, it is estimated that at least 20 percent of all first-year schools will require such attention during 1974–75.

During the first full year of program implementation in a particular school, the school must receive onsite monitoring to develop a composite rating of the degree of school district success in implementation. This composite rating of district success in all of its early childhood education schools, according to Education Code Section 6445.8, becomes part of the criteria for approval of expansion plans for the next early childhood education school in the district.

Each school entering the early childhood education program for the first time in 1974–75 (about 250 schools) must be monitored to rate its implementation. Two members of the early childhood education management team must conduct a field review of the full school plan and compare the existing program to the approved plan. A quality rating will be assigned, and a new composite rating will be determined for the school district as a whole.

As the early childhood education program expands, persons unfamiliar with the program are faced with the responsibility for developing plans for individual schools. In the larger districts central office staff will generally be available to assist personnel in their individual schools. In the smaller districts the county superintendent's office personnel may assist. When no other assistance is available, the early childhood education management team will provide direct planni assistance to principals, teachers, parents, and co munity members. Activities of the early childh education management team during this process v include conducting planning workshops in each six regions of the state, followed up by assistance individual schools on request. Specific types of assi ance may include any of the items of emphasis in ea childhood education: parent and community advis group selection, plan development, selection of structional materials, development of procedures ensuring individual pupil progress, or selection testing and evaluation instruments. The assistan supplied will be that requested by the school and d trict.

Expansion plans will be submitted to the Depa ment of Education by May 1, 1975. Each one must reviewed and rated. The ratings of school plans w then be combined with overall implementation ratin for the school districts, and a composite statewi ranking will be derived for funding determinati

District advisory committees review proposals fr each school before transmittal to the Department Education. The early childhood education mana ment team will continue to assist in the local co prehensive program planning assistance effort of t Department of Education, particularly in developi and documenting school district master plans for ea childhood and ensuring parent and community i volvement. Information regarding promising progra practices and exemplary programs will be prepar and distributed.

The drafting of minimum performance objectiv in reading and mathematics, begun during 1973–7 will be completed by October 1, 1974. The objectiv must be presented to the State Board of Educati for adoption at the October meeting to allow scho districts to include such objectives in the plannir process for 1975–76 programs.

During 1974–75, approximately 1,600 new scho plans will be submitted for approval for 1975–76. (these 1,600 plans, approximately 70 percent are e pected to be complete and approvable, subject to t availability of funds. Of the remaining plans, 25 pe cent are not expected to be complete, and adden will be required before the plans can be reviewe The remaining 5 percent are not expected to be a provable and will require additional communicatio with local school personnel.

The effectiveness of team planning process assis ance can be assessed by comparing the ratings plans for schools participating in team-conducte training workshops with ratings of plans for schoo not participating. The assumption is that particip tion in training results in plan quality that is superi to a norm or standard, such as the statewide averag rating. Finally, it must be determined whether stat wide testing results can show that children's perfor

ance in basic skill areas is improved by participation in early childhood education programs compared to the statistical expectancy for similar schools without such programs.

3. State Preschool Program

The California State Preschool Program component was established by legislation enacted in 1965. The thrust of the legislation is to provide compensatory preschool educational experiences to children from low-income families. The involvement, participation, and education of parents is mandated by the legislation. The program was funded by a combination of California State General Fund money (25 percent) and Federal Title IV-A, Social Security Act funds (75 percent) until June 30, 1973. The entire program was subject to the rules and regulations pertaining to utilization of Federal Title IV-A funds, through an interagency agreement, annually negotiated, between the State Department of Education and the State Department of Social Welfare. The program is ineligible for federal funds as of November 1, 1973.

Since 1971 the Department of Education has set a high priority on early childhood education, with a goal of successful early intervention in the education of children. In concept, early childhood education includes preschool programs, and the critical nature of the desire for early intervention can be attributed to two research generalizations: (1) a significantly high degree of a child's total intellectual potential is developed prior to age eight; and (2) in the early years, even minor improvements in the learning environment make a big difference, with strong foundations during the early years providing the most promising bases for later growth and achievement.

In each school district which has a state preschool program, a concentrated effort is made to articulate the preschool program as an integral part of an overall early childhood education master plan.

Since World War II, many studies have confirmed a high relationship between poverty and low achievement in school and early termination of schooling. State and national test data indicate that children from low-income families enter kindergarten and first grade with an average of 50 percent lower achievement in language usage, in preceiving likenesses and differences among objects, in positive self-concept, and in positive feelings toward the world as measured by the preschool inventory published by educational testing services. Test data also indicate children with deficiences in these skills do not learn to read, write, speak, and do arithmetic up to the level of the average child in the primary grades. Such children account for an estimated 80 percent of all school dropouts.

Other studies have demonstrated that early involvement in educational programs positively contributes to the overall development of children from low-income families and helps them succeed in school. In addition, there have been demonstrated benefits to young children from the involvement of their parents in an early intervention education system.

The California State Preschool Program serves 19,400 children from low-income families in programs operated by 191 agencies in 47 counties. The state preschool program is supplemented in California by other educational programs for preschool-age children. These programs are funded by Federal Head Start, Title I of the ESEA, and educational disadvantaged youth sections of Ch. 1406/72; they serve approximately 20,000 children.

The three goals of the state preschool program are that (1) every child living in a family at or below the proverty level should have the opportunity of participating in a compensatory preschool educational program; (2) all disadvantaged children should enter kindergarten with a foundation of knowledge, concepts, and skills which will enable them to benefit from school attendance; and (3) all low-income parents should have the opportunity for participation, involvement, and education with their children in a preschool program.

The 1972–73 work plan was based on stipulations contained in the purchase of services agreement between the State Department of Education and the State Department of Social Welfare. The agreement stipulated joint as well as separate responsibilities for each agency. The responsibilities of the Department of Education can be categorized into the following areas: (1) basic management functions; (2) coordination with Department of Education activities; (3) improvement of program effectiveness; (4) technical assistance and inservice workshops; (5) preparation of application material; (6) application review and process; (7) fiscal support services related to accountability; (8) program audit teams (monitor and review); (9) program evaluation; and (10) coordination and dissemination clearinghouse.

The department's office of program evaluation and research issued a statement in June, 1973, detailing some conclusions it had reached after surveying evaluation results of the state preschool program:

a. The legislative, administrative, and philosophical intent of the state preschool program is clear and has been amply reflected in the program's three primary source documents: legislation, the Education Code, and the guidelines for compensatory preschool education programs.

b. The child population served by the state preschool program includes only those who received aid to families with dependent children (AFDC) benefits but were too young to participate in regular school programs augmented by ESEA, Title I.

c. The rapid expansion of involved districts and the growing numbers of children participating in preschool activities suggests that the program has met with increased acceptance throughout California.

d. The stated program goals which have evolved over the past several years suggest that the original

DEPARTMENT OF EDUCATION—Continued

I. INSTRUCTION—Continued

I. Child Development—Continued

intent of the law has been translated into practice. However, the only goal that has been systematically reported on is that relating to pupil performance on standardized achievement tests.

e. Available evidence regarding the ability of children served by the state preschool program to acquire school-related readiness skills, as determined by standardized tests, indicates that the preschool programs have had a positive impact on participating pupils.

Since 1965–66 the state preschool program has grown from a modest 25 districts serving 7,294 children to a program in which 191 districts provided services to 19,425 children in 1972–73. Currently the statewide preschool cost averages $1,201 per child per year. During 1973–74 the Department of Education, the Legislative Analyst and the Department of Finance will conduct a program evaluation and a fiscal and management audit. These indepth studies will be the basis for strengthening and improving the overall effectiveness of the state preschool program.

The Department of Education expects the same level of program participation in 1973–74 as in 1972–73, and the quality of program is expected to increase. The improvements in program quality will be as a result of the recommendations of the indepth program study.

Overall objectives for 1974–75 are as follows:

a. Disadvantaged children who have completed one school year of compensatory preschool education will enter kindergarten able to achieve as well as middle-class children.

b. Eighty percent of the parents of children who participate in a compensatory preschool educatio program will participate three or more times duri 1974–75 in parent participation activities.

c. Ninety percent of the children who are enroll for their first year of a compensatory preschool ed cational program will have completed health examir tions, and 90 percent of the identified health defe will be referred for treatment.

The 1974–75 program will be closely allied a articulated with the department's program of ear childhood education. The basic policies and practic of the early childhood education program will be c ordinated, articulated, and incorporated in the bas program for preschool. There will continue to be a proximately 190 agencies, serving a minimum 19,425 children, involved in preschool education. T positive results attained by children and their paren will be validated, and the expectation will continue be each participant child's successful matriculati into and through the education process equal to exceeding the general child population.

J. Results of Statewide Testing

For several years the California school testing program has consisted of reading tests administered to pupils each spring in grades one, two, and three; an intelligence test and achivement tests in reading, language, spelling, and arithmetic in grade six; and an intelligence test and achievement tests in reading, expression, spelling, and quantitative analysis in grade 12. The grades 6 and 12 tests are administered in the Fall.

The Miller-Unruh Basic Reading Act of 1965 specified that "uniform tests to determine achievement of basic reading fundamentals and skills shall be administered to all pupils who are completing the first . . . second [and third] grades." This testing program was initiated in grades one and two in May of 1966 and was expanded to include grade-three pupils in May, 1967. Originally, the Stanford Reading Test was administered to primary pupils each May. That test was replaced by the Cooperative Primary Reading Test in grade one in 1970, in grade two in 1971, and in grade three in 1972.

The results of testing for 1973 and all previous years are presented in Figures 8, 9, and 10. California pupils in grades one, two, and three scored below the publisher's "national" norms when the Stanford Reading Test was used. Each year, however, scores improve modestly but consistently at all three grade levels When the change was made to the Cooperative Pri mary Reading Test, California pupils scored ver close to publisher's norms and each year have con tinued to made modest gains. Achievement in all thre grades at the present time is slightly above the pub lisher's norms, and the 1973 test results have con tinued the upward trend.

Figures 11 and 12 present the results of the test ing in grades 6 and 12 from 1969–70 through 1972–73 Scores of sixth-grade pupils on the scholastic aptitud test continued to decline, as did achievement test score in spelling. Achievement test results in reading, lan guage, and mathematics, however, improved very slightly, reversing a three-year downward trend. Most raw score changes, either up or down, were very slight and did not affect the percentile ranks or grade equivalent scores.

In grade 12, pupil scores on scholastic aptitude tests and achievement tests were all below publishers' norms and continued to decrease slightly in all skill areas. In reading and language (expression), this decline was reflected in a decrease in the percentile ranks.

I. INSTRUCTION—Continued

J. Results of Statewide Testing—Continued

These test results are information sources which the department and local educational agencies use to establish priorities for their programs.

A major work plan for the office of program evaluation and research is carrying out the Legislature's mandate for changes in statewide testing to take effect by 1974–75. These changes, required by Chapter 930, Statutes of 1972, will eliminate the spring test for reading in grade one and will introduce an entry level test for all grade-one pupils during the first few weeks of the fall semester. The results of the entry level test, by law, may not be entered into the pupil's cumulative record. They are to be used as a baseline for school and district evaluation rather than for pupil assessment. The entry level test was developed by the office of program evaluation and research staff

and was first administered in October 1973. This information is expected to be used to identify schools and districts with special needs or unusually effective or ineffective programs.

A second major change to be implemented by 1974–75 is the use of sampling procedures for the tests in grades 2, 3, 6, and 12 so that all test items will not be administered to all students. This change will reduce testing time and school district costs. (For a more complete description of the work plans for the office of program evaluation and research, see VI.B.1.d.)

II. INSTRUCTIONAL SUPPORT

The educational environment in which the child learns comprises the Instructional Support Program. This program underlines the fact that the child's ability to learn and the teacher's ability to facilitate such learning are greatly influenced by factors other than the direct instructional program.

The Instructional Support Program, which takes into account the total needs of the child and the teacher, is composed of three elements: (a) priority programs; (b) direct instructional services; and (c) pupil services.

PROGRAM REQUIREMENTS	72–73	73–74	74–75	1972–73	1973–74	1974–75
Continuing program costs	310.3	373.8	365.2	$102,617,769	$124,556,703	$125,612,184

B. Direct instructional services	269.6	308.6	303.6	19,270,778	33,920,775	35,283,416
C. Pupil services	40.7	42.7	42.6	83,346,991	90,286,530	90,128,284

A. Priority Programs in Instructional Support

Three State Department of Education priority programs for 1974–75 fall within the Instructional Support Program, as follows: (1) programs to prevent conflicts on junior high school and high school campuses; (2) teacher evaluation; and (3) improvement of guidance and counseling services.

1. Programs to Prevent Conflicts on Junior High School and High School Campuses

The current state of conflict in the schools in its various forms (crimes against persons and property; intergroup tensions; conflicts between schools and their communities) indicates a need for leadership from the State Department of Education. Schools must be assisted in reducing conflict to a manageable level in order to accomplish educational missions.

The creation of the Task Force on the Resolution of Conflict was the outgrowth of a federally funded project conducted by the Bureau of Intergroup Relations in 1970–71. The task force was officially ap-

DEPARTMENT OF EDUCATION—Continued

II. INSTRUCTIONAL SUPPORT—Continued

A. Priority Programs in Instructional Support—Continued

proved during the 1971–72 school year by the Executive Cabinet; its charge was to study the causes and resolution of violence on high school campuses.

The recommendations of the task force have a correlation with at least five of the other top priorities of the State Department of Education as set up for 1974–75: curriculum framework development, preventive drug abuse programs, bilingual-crosscultural programs, teacher evaluation, and improvement of guidance and counseling services. Recommendations from the task force can provide input into the work of each of these priority endeavors.

Beginning in November, 1972, the Task Force on the Resolution of Conflict conducted a study to determine the causes and resolution of violence on campus. A report of the findings and recommendations was presented to the State Board of Education in November, 1973. The types of conflict covered by the repo include situational conflict, intergroup conflict, st dent activism, and crime in the schools.

The task force's findings included the followin

a. The most expensive form of violence is vand ism, which costs an average of more than $4,000 p school per year in California.

b. The problem of gangs is not widespread ge graphically and appears to be primarily a metropo tan phenomenon.

c. Factors such as poverty, racism, unemploymer poor housing, and inadequate health care are ass ciated with crime and violence in schools as well with poor achievement.

d. Violence is directly related to the size of th school; overcrowding frequently breeds antisocial b havior.

Response	Rank order, by type of person responding				
	Aggregate	Administrators	Teachers	Students	Parents
Isolate troublemakers.	1	1	1	1	1
Negotiate.	2	2	2	2	3
Use parents or community leaders.	3	5	6	3	2
Call in police.	4	3	4	4	–
Use electronic communications equipment.	5	4	5	–	–
Follow an emergency plan.	6	7	3	–	–
Get district personnel help.	7	6	7	–	4

Fig. 13. Suggestions given to the Task Force on the Resolution of Conflict for combating conflict and violence in high schools

e. More crime occurs in schools located in low socioeconomic areas.

f. School conflict is not associated with any single racial or ethnic group of students.

g. Disruptions on high school campuses stemming from student activism appear to have subsided in recent years.

The task force recommended strengthening the counseling function, improving classroom management skills, and encouraging greater sensitivity to ethnic and cultural differences on the part of teachers, counselors, and administrators.

Figure 13 categorizes suggestions given to the task force for combating conflict and violence in high schools. Figure 14 presents the responses received by the task force concerning the role of the counselor.

Activities for 1973–74 include the development of a Resource Index, a clearinghouse for matching dis-

Type of respondent	Number responding	Percent of response to statement

tricts with developing or potential problems with counterpart communities which have already experienced similar difficulties and have found ways to prevent conflict and violence.

In 1974–75 the study of gangs and school vandalism will be continued, and the recommendations of the task force, with goals and objectives revised in accordance with its findings, will be incorporated into the Bureau of Intergroup Relations Program structure (see II.B.2.c.).

2. Teacher Evaluation Project

Much concern has been expressed during the past several years regarding the evaluation of certificated personnel and teacher competency as they relate to the progress of individual students. In 1972, the one-year certificated personnel evaluation project was implemented for the purpose of providing assistance and direction on a statewide basis for the development of certificated personnel evaluation programs to implement the Stull Act, Ch. 361/71; provide liaison to the Joint Legislative Committee on Educational Goals and Evaluation; and provide assistance and direction in implementing new legislation or other projects relating to the evaluation of certificated personnel.

Passage of the Stull Act in 1971 affected laws relating to the dismissal of permanent certificated employees and the evaluation of all certificated employees. This legislation, which added Section 13485 to the Education Code, was designed to establish a uniform statewide evaluation system that would deal with the professional competency of the individual teacher as it relates to the progress of students. The progress of students was to be evaluated against course standards that were to be adopted by the Board of Education.

An additional bill (Ch. 1220/71, which became Education Code Section 161) was passed and required the State Board of Eductaion to develop guidelines districts could use in the development of the procedures pursuant to the Stull Act. The Department of Education administration chose to create an ad hoc committee to prepare the guidelines during fiscal year 1971–72. The department, having chosen teacher evaluation as a priority item for 1972–73, had already made plans for the establishment of the three-member task force to be charged with certificated personnel evaluation implementation and development.

In implementing the Stull Act, department personnel provided assistance to offices of county superintendents of schools and local educational agencies in the development of their implementation guidelines. Most of this assistance was in the form of group presentations to school district staffs or seminars conducted in cooperation with professional organizations and teacher training institutions.

Because there was considerable concern that the requirements of Ch. 361 would have a significant financial impact on schools, the California State Board of Education wanted to be able to provide the information relative to the cost of implementing the Stull Act statewide. The results of the study indicated that (1) districts are making a significant effort to implement the Stull Act, as evidenced by the number of man-hours reported; (2) that actual dollar expenditure to implement the act has been less than 0.1 percent of the total current expense of education in 1972–73; (3) the cost of developing, implementing, and maintaining the Stull Act will continue until "standards of expected pupil progress" are developed; and (4) the total statewide direct cost of implementing Ch. 361 during 1971–72 and 1972–73 was approximately $1.5 million.

Once the major impact of the Stull Act had been made in school districts and they had begun to implement their evaluation procedures, the department's role became less dominant. The guidelines prepared by the department and approved by the state board provided the basic information necessary for the districts to begin. Once it was determined that the critical element for implementation was the time necessary to develop the standards of expected student progress, it was decided that the operational phase of the department's participation should be accomplished through the management services component (III.B.2.). This participation would result in one man-year being provided to management services to provide technical assistance for districts that have not completed their implementation plan.

A major 1972–73 activity of the certificated personnel evaluation project was to give assistance to the Joint Legislative Committee on Educational Goals and Evaluation. The joint committee, in cooperation with the Department of Education, embarked on a goal-setting process within each local educational agency. The results of such a process will be the educational goals, subgoals, and priorities that form the basis for educational decision making at the local level. Upon completion of the goal-setting process, an evaluation design will be developed by the joint committee. The design will be one that will assist local educational agencies in determining the extent to which their educational goals have been met; thus, this activity becomes complementary with the implementation of the Stull Act. The certificated personnel evaluation project also cooperated with the Teacher Preparation and Licensing Commission Subcommittee dealing with evaluation.

3. Improvement of Guidance and Counseling Services

The improvement of guidance and counseling services continues as a State Board of Education priority item for 1974–75. The Superintendent of Public Instruction established the Guidance and Counseling Task Force in 1972–73. The task force now continues to operate within the general education federal core (see program statement I.E.1.).

DEPARTMENT OF EDUCATION—Continued

II. INSTRUCTIONAL SUPPORT—Continued

A. Priority Programs in Instructional Support—Continued

The charge to the task force was to develop a plan for the improvement of guidance and counseling services in California schools. To determine where changes were needed and to identify priorities, the task force conducted a statewide needs assessment during 1972–73, surveying 60,000 students and more than 2,000 adults. Data from the study indicate that more and better guidance and counseling are a priority need of students; this opinion was expressed by a significant number of the students surveyed and by almost all of the adults. Results show definitely that many students are alienated, confused, and anxious about their futures and that they are having problems at home and at school. Until these problems are dealt with, students cannot secure the greatest benefit from educational opportunities offered to them. Helping students cope with these problems is the particular concern of guidance personnel in the schools. The needs assessment data also indicated widespread dissatisfaction with traditional guidance programs. Change is indicated; leadership is needed for this change to occur.

The plan being developed by the Guidance and Counseling Task Force will be completed by Februar 1974, after which the implementation phase will begi

The work plan objectives for 1974–75 are as follow

a. Identify effective guidance practices for tl needs indicated by the needs assessment.

b. Encourage and assist local educational agenci to develop pilot programs in areas of need identifie by the needs assessment.

c. Establish cross-divisional teams within the D partment of Education to assist approximately 2(selected schools in introducing effective guidance an counseling practices measured by established criteri in the identified critical areas of need.

d. Test the efficiency of approaches to the improv ment of career guidance to students.

e. Assist local educational agencies with developin monitoring, and evaluating innovative projects funde under ESEA, Title III, that will reduce student nee in priority areas identified by a needs assessment.

Figure 15 shows the proposed distribution of pr fessional staff time required to accomplish the task listed for 1974–75.

B. Direct Instructional Services

This program element provides direct services to the instructional program of public and private schools in California. During 1974–75 these services will be accomplished through eight components: (1) school approvals; (2) intergroup relations; (3) Task Force on the Resolution of Conflict (also a priority program); (4) textbook distribution; (5) surplus property; (6) educational technology; (7) Year-Round Schools Task Force; and (8) teacher evaluation project (also a priority program).

1. School Approvals

The function of the school approvals component is to ensure that (1) all schools offering courses under Division 21, Education Code, and Title 38, United States Code, meet acceptable educational standards; (2) all salesmen who sell correspondence school courses are properly licensed; and (3) all adults have a reasonable opportunity to take the General Education Development (GED) tests under properly safeguarded conditions at locations throughout the state.

All schools offering courses to veterans under the provisions of Title 38, U.S. Code, and all those offering instruction to other adults in California under the provisions of Division 21 of the Education Code must meet acceptable educational standards in the categories of (1) course curriculum and instruction; (2) space, equipment, instructional materials, and size of instructional staff; (3) qualifications of directors, administrators, and instructors; (4) recordkeeping; (5) compliance with health and safety regulations; and (6) financial soundness.

All persons who seek training in a proprietary school should receive high-quality instruction for the money they spend. Assurance of high quality must come from a continuous evaluation and approval of new courses and the review and supervision of courses presently approved. The need to update and improve course offerings is an area of possible cooperation between the Department of Education and the schools it approves under federal (Title 38, U.S. Code) and state (Division 21, Education Code) law. There is a need for new courses in areas unknown a few years ago. The labor market is experiencing a shortage of workers in the technical backup and support areas. Aides and technicians who support professionals in the medical, engineering, and technological fields are in demand. To meet this demand, schools must provide up-to-date practical training for their students.

During 1974–75 it is estimated that the Bureau of School Approvals will receive 80 original requests for approval of courses for veterans under Title 38, U.S. Code. Each request requires review, assessment, and conferences with school staff. In addition, requests for revisions in school courses throughout the year will also require review and conferences before they are approved.

Under contract with the Veterans Administration, the bureau will review the approval of each of approximately 1,500 schools under Title 38, U.S. Code, every four months to make certain that the school is complying with federal and state regulations.

The Bureau of School Approvals estimates that it will receive 210 requests for state approval under Division 21, Education Code, during 1974–75. Approvals are granted for one calendar year. Each of the 1,700 private schools and colleges approved under Division 21 is inspected at least once each year; any deficiencies must be corrected before reapproval is recommended.

The Bureau of School Approvals annually reviews and approves or disallows the sales permits of all salesmen of correspondence courses in California according to criteria established by the bureau. More than 2,700 original or renewal applications are issued each year. The state's supervision of correspondence course instruction ensures that students who elect to pursue their education through study by correspondence receive an honest return from their money.

Adults having difficulty obtaining employment because they have no high school diploma can often overcome the handicap by passing the general educational development tests and applying to the State Department of Education for a California high school equivalency certificate. To provide reliable test scores and to protect the validity of the tests as required by

DEPARTMENT OF EDUCATION—Continued

II. INSTRUCTIONAL SUPPORT—Continued

B. Direct Instructional Services—Continued

the American Council on Education, the Bureau of School Approvals supervises the security of the tests in official testing centers throughout the state and maintains records of certificates issued. Statistics for the last few years indicate more and more persons are requesting the service. The State of California, through the Bureau of School Approvals, seeks to give all adults in the state a reasonable opportunity to take the tests under proper conditions.

The 250 approved and ongoing testing centers in California are inspected once each year to determine test security and ensure continued compliance with established policies.

In addition persons who cannot be moved from a state or county hospital or correctional agency to a test center to take the tests are given an opportunity to take the test by applying directly to the Bureau of School Approvals for a test to be sent to the institutions, administered by approved persons, and returned to the Bureau of School Approvals for scoring and reporting.

2. Intergroup Relations

The purpose of the Intergroup Relations Unit is to prevent and eliminate racial and ethnic segregation, conflict, and discriminatory practices affecting pupils and in certificated employment procedures and to improve relationships among racial and ethnic groups in California schools. These functions are carried out in four major areas, as follows:

a. Program for Desegregation and Solution to Problems Incident to Desegregation—This activity assists school districts in the preparation, adoption, and implementation of alternative pupil assignment plans and practices to alleviate problems associated with and attributed to racial and ethnic imbalance in pupil enrollment.

A major activity during 1973–74 and 1974–75 is the analysis, compilation, and preparation of reports on the ethnic distribution of pupils from the annual racial and ethnic survey involving 7,000 California public schools.

b. Program for Multicultural Learning and Staff Development—Education Code Section 13344, enacted in 1971, requires that schools with a substantial population of students of diverse ethnic backgrounds provide an inservice preparation program designed to prepare professional school service personnel to understand and effectively relate to the history, culture, and current problems of racial and ethnic minority students and their environments. Instruction in social sciences includes the early history of California and a study of the role and contributions of various ethnic groups to the economic, political, and social development of California and the United States.

In 1974–75, the bureau will obtain progress reports from more than 400 districts covered by the in-service requirements of Article 3.3 of the Education Code, analyze the results, and report them to the superintendent with appropriate recommendations. Other a tivities include assistance to districts; preparation descriptions of 50 model programs; approval of program plans and 50 revisions; organization workshops; and revision of the directory of resour and the list of approved courses.

c. Program for Prevention and Elimination of I tergroup Conflict and Discriminatory Practices—T Intergroup Relations Unit provides advice and a sistance to school districts in situations of int group conflict on secondary school campuses. Reque for such services have increased in recent years, wi a sharp rise in confrontations and other incide leading to violence or the threat of violence.

The Task Force on the Resolution of Conflict (s II.A.1.) was created in 1971–72 to make a comprehe sive assessment of the nature, extent, and causes school conflict situations and to develop recommend tions for prevention strategies. The operational a pects of resolving conflicts in districts requesting a sistance remained with the Intergroup Relatio Unit.

During the 1972–73 program year the bureau sta worked with 25 school districts which had request assistance in coping with problems of intergroup te sion and conflict.

The ongoing work plan for 1973–74 and 1974–7 calls for assisting districts in the prevention and res lution of intergroup conflict and in the resolution case problems involving discriminatory practices.

d. Program for Nondiscriminatory and Affirmati Action Certificated Employment Practices—The mo recent racial and ethnic survey of California publ schools (Fall, 1971) indicates that 10.6 percent of a professional staff positions are held by members racial and ethnic minority groups, while 29 percer of all students are members of those groups. Only 6. percent of all principals are minority group member There has been some improvement in the represent tion of minority groups in certificated positions, bu a great disparity still remains.

It is educationally valuable for minority student to benefit from the role model and positive image pr vided by the minority teacher, counselor, and admir istrator. It is also valuable for other students to bene fit from positive experiences with minority educators Learning will not be widely enhanced in this wa until a much larger number of certificated position are filled by members of minority groups with a mor general distribution of them throughout the publi school system.

In 1972–73 the bureau assisted 20 local educationa agencies to eliminate discriminatory employmen practices; it developed proposed affirmative actio guidelines for dissemination to all local educationa agencies.

The plan for 1973–74 is to assist 15 local educa tional agencies to eliminate discriminatory practice as a result of fact-finding and advice in response t allegations of discrimination; to undertake joint ef

DEPARTMENT OF EDUCATION—Continued

II. INSTRUCTIONAL SUPPORT—Continued

B. Direct Instructional Services—Continued

forts with 25 districts or offices of county superintendents of schools in developing and adopting affirmative action plans; to conduct four regional clinics or workshops based on the guidelines developed in 1972–73; to work cooperatively with state and federal agencies, as before, in resolving discrimination cases and other program problems; and to conduct a new racial and ethnic survey of public schools which will include a new count of certificated staff (the first since 1971–72).

No changes in the 1973–74 work plan are expected as projected for 1974–75.

3. Task Force on the Resolution of Conflict

(See II.A.1., programs to prevent conflict on junior high school and high school campuses.)

4. Textbook Distribution

For the department to implement such priority programs as reading, mathematics, drug abuse preventive education, bilingual-crosscultural education, and conservation education, as well as the regular instructional program, adopted instructional materials for the elementary schools must be procured from the Office of State Printing and commercial publishers and distributed to school districts in an efficient and timely manner. Instructional materials for the high school level are adopted by each school district and secured directly from the publishers.

The curriculum frameworks and instructional materials selection unit provides staff assistance to the State Board of Education and the Curriculum Development and Supplemental Materials Commission in the selection of materials (see the program statement for curriculum development and textbook selection procedures, I.A.5.). Once the textbooks and other instructional materials have been adopted for the elementary schools, it is the responsibility of the Textbook Distribution Office to have the materials produced and distributed to the schools.

So that the requirements of school districts can be met, teachers' editions of newly adopted textbooks should be delivered to the districts early in the semester preceding their introduction so that the textbooks can be used in in-service training sessions. All other instructional materials requisitioned by the districts should be delivered no later than August of the school year in which they are to be first used. This schedule was substantially met in 1971, 1972, and 1973.

Legislation adopted in 1972 replaced the four-to-six-year adoption cycle for textbooks in each subject with biennial adoptions of instructional materials for one-half of the subjects offered in the elementary grades. To fund the reading/language arts adoptions, the new legislation requires the State Controller to transfer to the State Instructional Materials Fund on July 1, 1974, $7 per unit of average daily attendance during 1973–74, plus an adjustment for inflation during calendar year 1973.

The move to biennial adoptions and other legislative changes affecting textbook selection have greatly increased the number of instructional materials in adoption: from 803 in 1972–73 to 1,349 in 1974–75. Formerly, annual adoptions were usually made in only a single subject on a six-year cycle, with two to four titles per pupil for most grades, together with varying numbers of supplementary titles and teachers' manuals.

Legislation effective in 1972 directs the State Board of Education to encumber part of the Instructional Materials Fund to pay for the cost of (1) royalties and warehouse and shipping costs for textbooks in the state warehouse as of July 1, 1973 and still on hand July 1, 1974); (2) instructional materials to be loaned to nonpublic school pupils; (3) braille and large-print textbooks; and (4) the warehousing and shipping of textbooks printed by the state after June 30, 1973.

The balance of the fund is to be encumbered to (1) establish a credit for each school district with which instructional materials adopted by the state board may be ordered; (2) establish a cash allotment for districts to use in purchasing adopted or nonadopted instructional materials or to purchase tests or inservice training materials; and (3) obtain instructional materials in subsequent fiscal years.

Beginning in 1972 the department was authorized to issue free state textbooks to qualifying nonpublic elementary schools. Nearly 900 schools applied for the first year, and 1.25 million textbooks were distributed for use of 260,000 pupils during 1972–73.

DEPARTMENT OF EDUCATION—Continued

II. INSTRUCTIONAL SUPPORT—Continued

B. Direct Instructional Services—Continued

Under the new biennial adoptions schedule, the new adoptions to be planned for during the 1974–75 budget year for introduction into the schools during the 1975–76 school year are reading, literature, English and related subjects, foreign languages, bilingual-bicultural education, and English as a second language. Current plans of the state board are to complete adoption action for these materials in July, 1974. Catalogs of instructional materials and order forms will then be prepared and mailed to the field after school begins in September, 1974. During the balance of the year, it will be necessary to tabulate orders received, arrange for state manufacture or purchase of instructional materials from publishers, and arrange for delivery to the schools by September, 1975. Figure 3, which accompanies program statement I.A.5., illustrates the work schedule of the textbook distribution component for 1972–73 through the first quarter of 1975–76.

The overall work plan for this component in 1974–75 will be to deliver $20 million worth of textbooks and other instructional materials in all subjects (including new adoptions) consisting of an estimated 1,800 titles (including 12 million books from the textbook warehouse) to 960 school districts and 1,140 nonpublic schools, by August, 1975; and to deliver 2,500 braille books and 8,000 large-print books by September, 1975.

Output Measurement	1972–73	1973–74	1974–75
Instructional materials in adoption	803	845	1,349
Number of school districts and nonpublic schools	1,920	2,000	2,100
Number of textbooks delivered to schools from state warehouse	17,000,000	12,000,000	15,000,000

5. Surplus Property

The function of the surplus property component is primarily to locate, examine, and acquire sufficient surplus property made available by the federal government to fill as many of the needs of eligible schools, health institutions, and civil defense agencies as possible. Secondly, this component's function is to order sufficient food and maintain an adequate inventory to meet the food needs of eligible school lunch programs, institutions serving needy persons, summer camp programs for children, and county welfare departments. Education Code Sections 451–457 authorize the Department of Education to cooperate with the federal government in performing this function.

The surplus property component has a central administrative office in Sacramento and distribution facilities in Sacramento, San Lorenzo, and Los Angeles. In cooperation with the other 13 western states, the department maintains a small office in San Francisco to assist in processing documents needed to secure surplus property through the U.S. Department of Health, Education, and Welfare.

Each of the three deputy chief surplus property officers in charge of the division warehouses is responsible for securing all desired available surpl equipment and supplies at federal installations with the area he serves. He scans all bulletins of exce federal property published by the General Servic Administration, both in-state and out-of-state, to d termine whether anything is needed in his region a attempts to obtain it if possible. He is also respons ble for submitting quarterly estimates of foods desir by eligible recipients within the counties to the Sacr mento administrative office, where they are reviewe consolidated, and forwarded to the San Francis regional office of the U.S. Department of Agricultur

During 1972–73 there was a decline in the avai ability of good usable property for the donation pr gram, causing the surplus property component meet only 66 percent of its objective to issue proper having an acquisition cost of $50 million. The pro erty that was issued was done so at a cost to recipien of only 5 percent of the acquisition cost of the pro erty, which was better than the projected cost of percent as stated in the 1972–73 statement of obje tives. The decline in property was due in part to th proliferation of eligible recipient organizations and i part to regulation changes which authorized the Ge eral Services Administration and the Department Defense to dispose of certain classes of property b exchange or sale rather than through the donatio program. These matters are the subject of curre task force studies and hearings before a subcommitt of the Committee on Government Operations.

Commodity distribution activities also experience a decline in the amount of donated foods distribute in 1972–73 in comparison with the two previous year During the year, 3,326,999 case units of food wer issued having a market value totaling $37,023,110 a a cost to recipients of 6.73 percent of the value of th foods distributed. Thus, the local educational agencie paid $2,493,328 for food having a market value o over $37 million.

The figures cited represent 74 percent of the 4. million case units and 67 percent of the $55 millio in market value of food which were the objectives o the Surplus Property Agency for the period. Th reduction in the amount of food distributed is th result of diminished food surpluses and a lessene need to stabilize prices with federal price suppor purchases.

In addition, the U.S. Department of Agricultur failed to receive reasonable responses to their offers t buy products for the School Lunch Program; there fore, kinds of foods made available in the past wer not purchased. Four county welfare departments i California serving approximately 55,000 person monthly transferred from the food distribution pro gram to the food stamp program, eliminating th need for food through this agency. This trend is ex pected to continue; in fiscal year 1974–75 couny wel fare departments are expected to operate food stam programs instead of food distribution programs thereby reducing the surplus property commodit distribution program by approximately 40 percent.

DEPARTMENT OF EDUCATION—Continued

II. INSTRUCTIONAL SUPPORT—Continued

B. Direct Instructional Services—Continued

These factors are reflected in the 1974–75 objectives for this component. The surplus property component expects to issue sprplus property having a federal acquisition cost of $45 million and distribute 3 million case units of food having a market value of $30 million to schools and other eligible organizations at a total cost of operation not to exceed 7 percent of the federal acquisition cost of the property issued and 7 percent of the market value of the food distributed.

6. Educational Technology

Growth in school population in California and major curriculum modifications in education have made functional changes necessary to meet today's educational problems. A great need exists for making effective use of the tools and approaches of technology to develop and implement curriculum change. The Department of Education must provide leadership in the assessment, planning, development, implementation, and evaluation of instructional experiences necessary in today's education and integrate the concept of educational technology into its total program.

The educational technology component was established in 1973. It is administered as an activity within the GEM high visibility core, I.E.5. When the Bureau of Audio-Visual and School Library Education was abolished, the educational technology component was established to (1) encourage the use of the systems approach to problem solving in education; (2) improve the utilization of instructional media (printed and nonprinted) by local educational agencies; and (3) administer the state's instructional television program under the provisions of the Farr-Quimby Act of 1963 (Education Code Sections 262, 263, 892.6, 6441–6443, and 18270).

In 1972–73 the now defunct Bureau of Audio-Visual and School Library Education provided service and leadership for general education programs mandated to local educational agencies; approved and funded numerous programs/projects; and monitored and supervised the operations of programs and projects.

The work plan for 1973–74 calls for submittal to the Legislature of a report dealing with (1) the present and potential uses of educational technology in the California schools; (2) the role of the department in the promotion of educational technology; and (3) the potential savings to result from the increased use of educational technology. In addition, during the current year the Department of Education will participate with the Department of Finance in redesigning the Instructional Television Program. The current structure has been unsuccessful in capitalizing on the economic and programmatic advantages available through instructional television.

During 1973–74 staff consultants are working in the following five major educational technology areas: (1) developing inservice training lessons on television use to prepare teachers to teach the metric system; (2) assisting producers to develop individualized packages to aid in teaching the metric system; (3) initiating a project to program continuous lessons into classrooms of schools connected to cable television; (4) surveying California schools regarding the use of computers for instruction, producing cost-savings information resulting from such use, and publishing a catalog of available computer programs; and (5) researching the possibilities of coordinating the purchase of various media adopted by the state board, thereby reducing pro rata costs for participants, giving full reproduction rights for various media.

Major activities of the 1973–74 year will be continued to completion in 1974–75. In addition, the educational technology component will begin workshops at offices of county superintendents of schools and selected local educational agencies to help them organize their own educational technology departments.

7. Year-Round Schools Task Force

The move by school districts to year-round school operations is based on evidence that these types of operations lead to less learning lag with shortened vacations; greater acceleration in learning; additional opportunities for remedial and enrichment work for special students; less truancy and fewer discipline problems; and less vandalism on school campuses.

Another important reason for initiating year-round school programs is the need for additional school facilities because of (1) increasing enrollments; (2) the need to replace obsolete buildings because of the 1975 deadline for pre-Field Act facilities; and (3) the existence of buildings that no longer can accommodate modern instructional activities.

Enabling legislation to conduct a year-round elementary school program was enacted by the Legislature in 1968. The provisions of this legislation (Education Code Section 7495) gave authority to proceed with an experimental program during the 1968–69 and 1969–70 school years. The Legislature in 1971 provided, through Education Code Section 7480, for the establishment of a five-year experimental program in a year-round school operated in two more school districts. With the addition to the Education Code in 1973 of Section 32100, authorization for year-round schools was extended to all school districts.

Additional impetus to the year-round school movement has been made by a report from the Department of Finance Audits Division dated January, 1973. The report recommends that the state provide continuing evaluation and leadership for year-round school programs.

Senate Bill 1107 (Chapter 1170, Statutes of 1973) allows a grant of up to $25,000 to each school district which establishes a continuous school program prior to July 1, 1979. The act appropriates $800,000 to the Department of Education to make these grants.

The Commission on California State Government Organization and Economy in a report dated June, 1973, recommended that, based on evaluation of operating year-round school programs, a uniform statewide program be developed and its use encouraged.

In 1972–73 a clearinghouse for information on various aspects of year-round schools was established. The

DEPARTMENT OF EDUCATION—Continued

II. INSTRUCTIONAL SUPPORT—Continued

B. Direct Instructional Services—Continued

following subjects were included: (1) evaluation of year-round school programs; (2) financing feasibility studies; (3) implementation plans; (4) State Teachers' Retirement System; (5) existing programs; (6) legal basis for operating year-round school programs; (7) attendance accounting in year-round school programs; (8) historical analysis of programs; and (9) a bibliography of year-round school materials.

Clearinghouse activities and assistance to school districts, the Legislature, and other interested groups are continuing in 1973–74. Regional meetings are scheduled to provide assistance and information about year-round school programs to offices of county superintendent of schools. Individual assistance is to be provided to school districts in planning evaluation designs. Exemplary year-round schools are being identified, their programs evaluated, and information about them disseminated. Also, a handbook is being prepared and distributed to provide information about the history of year-round schools, types of programs, and program implementation and evaluation.

Activities of 1973–74 will be continued in 1974–7 Additionally, year-round school programs will be su veyed to determine the need for change in regul tions. The handbook published in 1973–74 will be r vised and reissued.

C. Pupil Services

This program element provides state level administrative, supervisory, and fiscal support to the food services and guidance services portions of the Instructional Support program. (Guidance services is also a priority program.)

1. Food and Nutrition Services

The state provides administrative and supervisory direction to the National School Lunch Program through the Office of Food and Nutrition Services. The federal government participates in the financial support of the program in conjunction with schoo districts. The purpose of the National School Lunc Program is to assist schools in providing nutritiou meals to pupils, priority being given to providing fre or low-cost meals to children of low-income familie

The Office of Food and Nutrition Services becam operational in 1946. During the intervening years, variety of new food service programs have been adde and old programs expanded as a result of variou congressional actions. The funding of child nutritio programs in California is illustrated in Figure 1

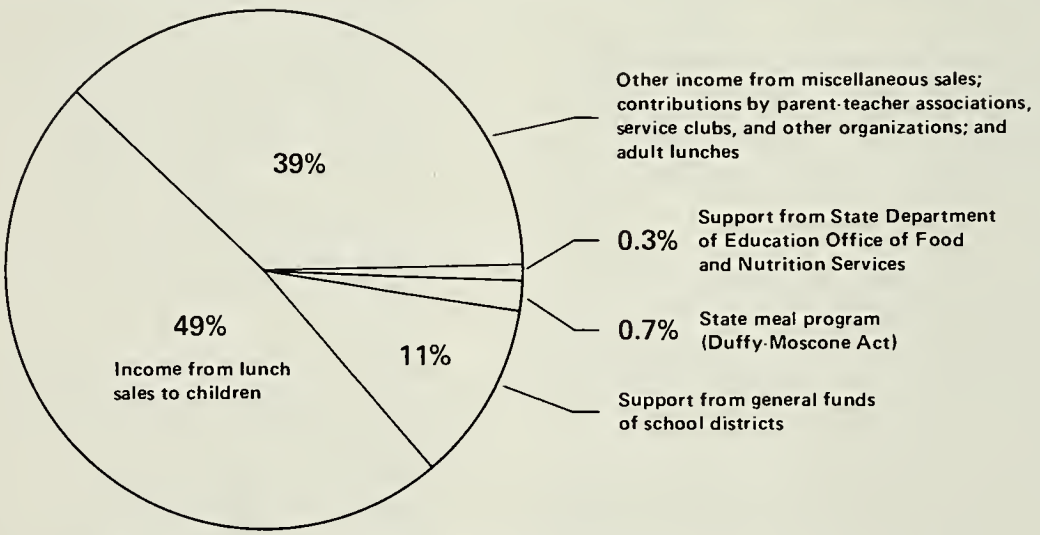

Fig. 16. Source of funding of child nutrition programs in California, 1972-73 (Total amount: $130.7 million)

DEPARTMENT OF EDUCATION—Continued

II. INSTRUCTIONAL SUPPORT—Continued

C. Pupil Services—Continued

For more than 25 years, the National School Lunch Program, best known as the Type A Lunch program (Child Nutrition Act of 1966 and Public Law 91-248), has been the major nutrition service with which the department has been associated. In the past few years, the special assistance program to provide free and reduced-price lunches for needy pupils has had dramatic growth. The school breakfast program, which increased twofold during 1972–73, will continue to expand because of new federal regulations that authorize open-ended appropriations and remove certain program entry requirements. The signing of PL 93-150 provides substantial increase in reimbursement for Type A lunches and breakfast programs and free and reduced price meals.

Year-round and summer school food service programs are institutionally oriented and provide meals and snacks for preschool programs, day care centers and camps, and settlement houses. In the summer of 1971, slightly less than $1 million was claimed by sponsors; during the summer of 1973, $4 million was committed to California for sponsored summer programs. The special milk program has been reinstated for the fiscal year 1973–74 at the prior year's level of $7.2 million.

This component will continue to give top priority to establishing food delivery systems in schools currently without any type of food services and to servicing institutions with large numbers of needy children.

The Office of Food and Nutrition Services currently has a professional staff of 13 persons. Since the inception of the program, child nutrition consultants have been a primary source of information to school districts. Through onsite field visits, correspondence, workshops, and publications, the office has provided information on federal and state regulations, nutritional requirements, reporting procedures, and desirable management practices.

Major new thrusts to be responded to in the 1974–75 year will be in the area of nutrition education as a result of the funding of projects under Section 6 and Section 10 of the Child Nutrition Act and state legislation. A 1973–74 nutrition education project was administered under the instructional program (general education health core) but implemented at the regional level by staff of the Office of Food and Nutrition Services.

The automation of claim processing and resultant data production and organization should bring about improvement in information recovery and transmittal in response to state and federal requirements for 1974–75.

Other major 1974–75 work plan objectives of the food and nutrition services component are the following:

a. Assist 6,000 schools to provide 1,500.000 lunches and assist 1,400 schools to provide 250,000 breakfasts. The lunches are to provide one-third of the daily nutritional needs of the children; the breakfast, one-fourth of their daily needs.

b. Provide assistance in kitchen design to districts requesting federal funds for equipment.

c. Provide leadership in upgrading the qualification of school nutrition personnel through college level courses, community college courses, and on-the-job training.

d. Provide food analysis and recipe development services to school districts.

e. Assist school kitchens to produce a minimum of 15 meals per hour of labor.

2. Guidance and Counseling Task Force

(See II.A.3., priority program, improvement of guidance and counseling services.)

Input	1972–73	1973–74	1974–75

III. SCHOOL ADMINISTRATION SUPPORT

The policymaking bodies for public education in California are the Legislature and the State Board of Education. The point at which state policy is brought to bear upon the pupils of the state is the school district. Policy may be expressed in the broad terms of legislative intent or in administrative details. Literally hundreds of such provisions exist in the Education Code and in the California Administrative Code, Title 5. The School Administration Support Program provides the expert knowledge, coordination, and communication needed to bring to the districts the requirements of the Legislature and to bring to the Legislature the needs and accomplishments of the districts.

The Department of Education provides administrative support for an educational system that serves over five million pupils in kindergarten through grade 12. The educational system is administered by approximately 1,100 school district and county administrative units, each having its own governing board.

Many school districts lack staff capability for adequate planning of needed school facilities and for selection of appropriate sites upon which to build schools. Many school districts also lack the capability of conducting long-range evaluation of school district facility needs. Facility planning expertise is thus made available to all districts so that the districts may expend public funds for school facilities more effectively.

DEPARTMENT OF EDUCATION—Continued

III. SCHOOL ADMINISTRATION SUPPORT—Continued

State financial assistance to school districts is based upon average daily attendance. School administrators often need assistance in making accurate, timely reports. Attendance accounting and reporting must be as accurate as possible because of the variety of public funds involved.

Compulsory education laws require that all pupils attend school, regardless of where they live. Therefore, pupil transportation systems have been established to transport pupils from home to school and back, and on educational excursions. The Legislature appropriates funds annually for the partial support of pupil transportation. These state funds must be apportioned to school districts accurately and equitably. Districts must be kept informed of changes procedures and statutes affecting pupil transpor tion, and they have a constant need for well-qualifi well-trained bus drivers to transport children safe Also, safety standards in the design of equipment a in the operation of buses must be improved. In t area certain mandates in laws or regulations requ providing school districts constant administrati support.

The School Administration Support Program carried out through two elements: (1) a priori program; and (2) administrative services to lo educational agencies.

PROGRAM REQUIREMENTS	72–73	73–74	74–75	1972–73	1973–74	1974–75

A. Priority Program in School Administration Support

School district management, review, and assistance, which is a component of the administrative service to Local Educational Agencies Program element, is one of the department's program priorities for 1974–75.

1. School District Management Assistance Team

A continuing review of annual school district audits, current and projected district budgets, and required reports submitted to the Department of Education indicates that a consistently large number of California's 1,054 public school districts (kindergarten through grade 12) are experiencing difficulty in maintaining educational and support programs in view of inflationary costs. The State Board of Education, recognizing the severity of problem, has again designated school district management review and assistance as an educational priority for 1974–75.

The school district management assistance team (originally titled school district management review and assistance task force) was organized in September, 1971, to respond to these needs. Since then teams have completed management studies in 55 school districts selected on the basis of the severity of their problems. A team of three to eight specialists assis individual school districts in introducing improve business practices, determining more efficient and ec nomical operational procedures, and ensuring that a available funding sources are utilized. The objectiv is to employ modern management techniques in orde to facilitate optimum learning by children. Cost sa ings resulting from management studies tend to offs inflation and limited income and can be redirecte to local programs which directly enhance children education.

A significant feature of the team's procedures i the evaluative followup review, which occurs approx mately six months after the management study ha been completed. These onsite reviews, conducted i 35 districts to date, indicate that approximately 9 percent of the recommendations contained in the orig inal management study reports had been accepte for implementation (396 accepted and 30 rejected)

The major categories of quantifiable benefits re sulting from the team's assistance are (1) reductio in personnel costs; (2) increased income from federa sources; (3) more accurate enrollment projections

DEPARTMENT OF EDUCATION—Continued

III. SCHOOL ADMINISTRATION SUPPORT—Continued

A. Priority Program in School Administration Support—Continued

(4) closing of surplus schools; and (5) overall improvements in financial management.

Demand for team services continues to be great. As of June 30, 1973, there were 157 requests on hand for management studies, seven studies in progress, and 20 followup reviews scheduled.

During 1973–74 the main objective of the school district management assistance team is to assist school administrators in 25 to 30 districts to improve their management skills. The team is conducting followup reviews in those districts in which management studies were completed in 1972–73. It is also participating in management studies within the Department of Education at the request of the department's Executive Cabinet.

During 1974–75 the principal objective of the team will be to assist school administrators in approximately 30 districts improve their management skills, as evidenced by reduction of costs; adoption of improved management techniques; elimination of incorrect reporting; and measurable increases in the efficiency and effectiveness of management operations. The team will conduct onsite reviews of management studies completed in 1973–74 to identify benefits achieved. It will continue to perform management reviews within Department of Education units as requested by the Executive Cabinet.

Activities of the team are illustrated in Figure 17.

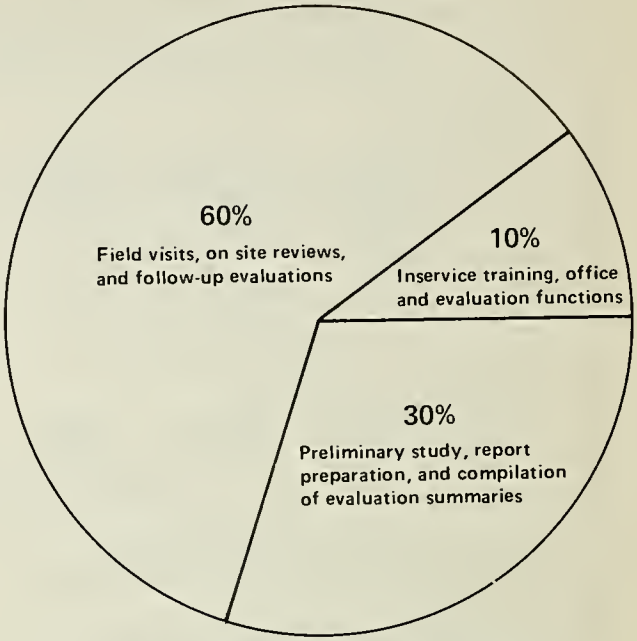

Fig. 17. Activities of the School District Management Assistance Team

B. Administrative Services to Local Educational Agencies

The responsibilities of this program element are accomplished through two components in addition to the school district management assistance team, which is described in the preceding section: (1) school facilities planning assistance; and (2) management services (which includes pupil transportation).

1. School Facilities Planning Assistance

Services of the Bureau of School Facilities Planning are provided for all school districts upon request and by legislative mandate for those districts not governed by city boards of education. The services consist primarily of providing assistance for school district long-range comprehensive master planning, selecting school sites, evaluating existing facilities, and translating district educational programs into building space and programs of capital outlay financing. There are eight program areas setting forth the need, objectives, work plan, and evaluation plan for the school year 1974–75. They are as follows:

a. Assisting school districts in the development of long-range comprehensive master plans.

b. Guiding and directing school district programs involving the rehabilitation or replacement of structurally unsafe buildings.

c. Providing planning services to school districts in translating educational program requirements into specific construction project drawings.

d. Assisting districts in selecting new school sites based upon their long-range comprehensive master plan.

e. Developing standards for school facilities based upon research projects in specific building design areas and educational programs as well as guiding field research projects which are exemplary of the latest educational program thinking and building construction technology.

f. Assisting districts in developing greater utilization of existing school facilities and designing facilities for continuous year-round school programs.

g. Administering capital outlay programs supported by the federal government in areas impacted by major disaster and/or federal activities.

h. Implementing a program of intradepartmental communications regarding school facilities planning in all areas of federally or state supported educational programs.

2. Management Services

The goals of the management services component, formerly administrative services, are in support of Department of Education priorities in the areas of effecting improvements in school district management, disseminating information on school finance, increasing efficiency in school district operations, and providing guidelines and assistance in teacher evaluation.

DEPARTMENT OF EDUCATION—Continued

III. SCHOOL ADMINISTRATION SUPPORT—Continued

B. Administrative Services to Local Educational Agencies—Continued

(See teacher evaluation project, II.A.2.) The management services component provides individual consultation to school districts on limited problems. The services of the school district management assistance team (III.A.1.), on the other hand, are always provided on a team basis and are directed toward overall district management.

The trend toward adoption of the year-round school concept and other innovative education programs, frequent legislative changes in the areas of school administration and finance, implementation of the Stull Bill (Chapter 361, Statutes of 1971, relating to certificated personnel evaluation), and a continuing turnover of school district business management officials create a need for better understanding at the school district level as to current legal requirements and desirable administrative procedures.

Management services activities are designed to ensure the highest possible quality in statewide school administration by effecting continuing improvement of management skills and knowledge at the district level.

Five new activities have been added to the work plan of the management services component for 1973–74 and 1974–75:

a. Provide administrative staff assistance to the statewide Educational Management and Evaluation Commission.

b. Provide statewide assistance and guidance in relation to certificated personnel evaluation (Stull Bill).

c. Provide statewide assistance and guidance relation to school district organization and reorgai zation.

d. Provide an active member to serve on the D partment of Education Master Planning Committe

e. Participate in the planning, organization, a conduct of inservice training programs to orie school district and county personnel to the content the 1973 edition of the *California School Accounti Manual.*

A previously federally funded program, providi for the coordination of local schoolbus driver traini programs, including the certification of schoolb driver training instructors, will be continued at Ge eral Fund expense in 1974–75.

Input	1972–73	1973–74	1974–7

IV. SCHOOL FINANCE AND ADMINISTRATIVE RESEARCH

School districts and offices of county superintendents of schools do not have sufficient local resources to finance fully an educational foundation program for all pupils. Therefore, to bring financial support up to the standards of the foundation program, the California Legislature appropriates funds annually for the support of public schools in the state. This aid is apportioned in accordance with established formulas and is distributed to school districts and offices of county superintendents of schools.

This program of school finance and state aid, which has been placed by the Legislature under the jurisdi tion of the State Department of Education, include both administration of state aid and apportionmen of state aid.

Administrative research includes the preparatio of reports and the collection of a wide range of dat on California public schools, as required by numerou provisions of the Education Code and as requeste by the Legislature, the State Board of Education, an others responsible for the operation of the publi schools.

A. Priority Program in School Finance

1. School Finance and Efficiency

The state participates with local jurisdictions in financing the operation of the public schools of the state, and this highly important work is a priority program in the Department of Education. The largest portion of state subventions to public education is made through transfers from the General Fund to the State School Fund for apportionment to local school districts. The State School Fund is the vehicle for the state's financial support to public education. The major categories of the apportionment systems are: (1) basic and equalization aid; (2) county school service fund; (3) pupil transportation; and (4) special education.

The state's participation in financing local education is predicated on the foundation program, which is the primary mechanism for the apportionment of state general support to the public schools. It is based on the premise that the state and school districts together should guarantee every pupil a minimum acceptable level of school support. The foundation program consists of a three-part combination of state and local support composed of (1) basic aid, which is required by the State Constitution; (2) district aid, which represents local effort; and (3) equalization aid, which is provided by the state in order to assist the less wealthy school districts to achieve the level of the foundation program. Distribution of school aid at the district level is shown in Figure 18.

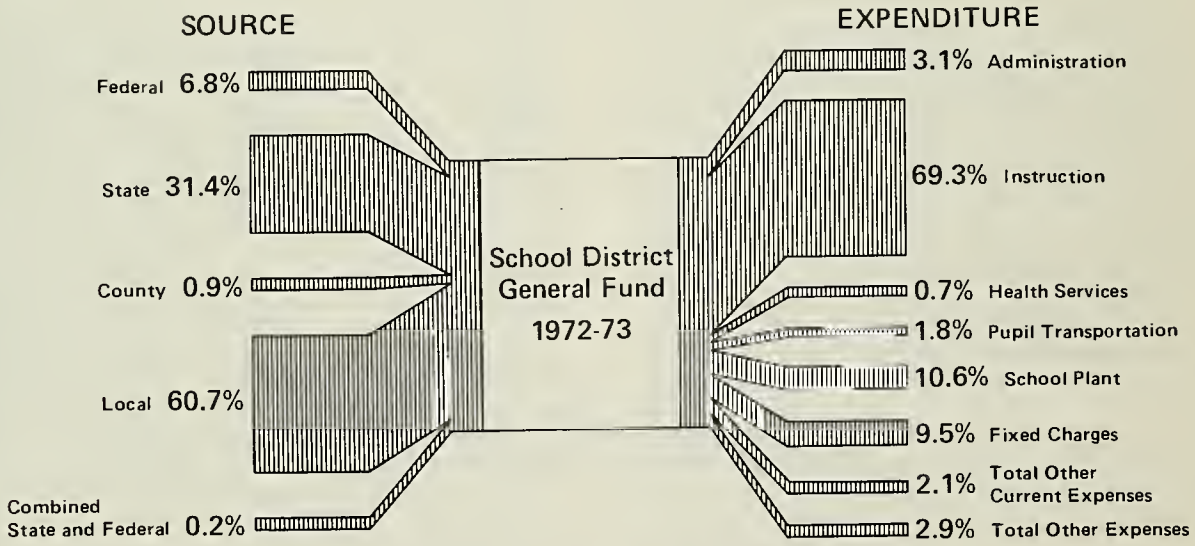

Fig. 18. Distribution of school aid at the school district level

DEPARTMENT OF EDUCATION—Continued

IV. SCHOOL FINANCE AND ADMINISTRATIVE RESEARCH—Continued

A. Priority Program in School Finance—Continued

The apportionment of funds is based upon the average daily attendance (a.d.a.) of pupils in each school district. As indicated in Figure 19, the rate of increase in total number of units of a.d.a. has leveled off from that of previous years. For the first time in a number of years, the a.d.a. for elementary schools showed a decline in 1972–73. High school and co munity college a.d.a. continues to increase, howev as the wave of pupil population that entered the low grades several years ago now moves into the upp grades. The enrollment decline will be reflected at t higher levels in about three years.

Level	1971-72	1972-73	Estimated 1973-74	Estimated 1974-75
Elementary*	3,221,329	3,167,256	3,122,300	3,082,350

DEPARTMENT OF EDUCATION—Continued

IV. SCHOOL FINANCE AND ADMINISTRATIVE RESEARCH—Continued

A. Priority Program in School Finance—Continued

In 1974–75 State School Fund apportionments to public schools including community colleges will total approximately $2.4 billion, an increase of approximately $177 million over that provided in 1973–74. The net increase in 1974–75 is slightly less than the additional new funds provided by Ch. 1406/72 due to offsetting reductions resulting from changes in a.d.a. and assessed valuation.

The passage of Ch. 1406 at the close of the 1972 legislative session and Ch. 209 of 1973 increased the State School Fund regular foundation program levels and provided new funds for early childhood education and for educationally disadvantaged youth. Ch. 1406 provided about $561 million and Ch. 209 $66 million in new state money to school districts in 1973–74 and they will provide $177 million in 1974–75.

By statute and by administrative agreement between the State Controller and the Department of Education, financial data must be collected from the school districts and offices of the county superintendents of schools, processed, and published as the Controller's cost report. To supplement the Controller's cost report, a special financial report, the adult cost report. must be prepared and published. This report is prepared to separate education costs for regular students from those of adults. so as to provide decision makers with data for evaluating foundation allowances against actual expenditures.

Education Code Section 18102.10 requires that a comparison be made of the costs incurred by school districts and county superintendents of schools for each funded program in the physically handicapped, mentally retarded, and educationally handicapped areas. These data are required for evaluating and recommending proposals for special education financing.

The federal government requires that an annual report be made to certify the total income and expenditures for Elementary and Secondary Education Act (ESEA) funds allocation. In addition, the state must process federal forms relating to Public Law 874 funds allocation.

Each year the total school finance picture is reviewed prior to the beginning of the legislative session, and recommendations formulated by the Department of Education are submitted to the State Board of Education. After receiving board approval, these recommendations are placed in bill form and submitted to the Legislature. As the legislative system progresses, special reports are required, particularly those that show the effect of a comprehensive school finance proposal on the individual school districts in California.

Other reporting requirements include the following:

1. Collect data on percent of current expense incurred for classroom teachers, as required by Education Code Section 17504, and reprot the findings to the Legislature.
2. Collect data on ratio of public school administrators to classroom teachers, as required by Education Code Section 17526, and report the findings to the Legislature.

The Education Code requires control of the budgets of the county superintendents of schools by the Bureau of School Apportionments and Reports. This function also includes advisory services. Financial data collected become part of the Controller's cost report, which is a basic review document for future allocations.

B. Administration and Apportionment of State Aid

The administration and apportionment of state aid element of Program IV involves (1) collecting and processing data and preparing a number of reports; and (2) providing the machinery through which moneys are apportioned to local educational agencies. This program element ensures that moneys of the state reach the local agencies in the correct amount and at the times designated in the Education Code.

This program element provides a major data base for the Department of Education. In addition, the element has the responsibility for management of the county school service fund.

The objectives of the administration and apportionment of state aid component are (1) to receive, record, interpret, process, and prepare the necessary reports for publication, as required by the Education Code and operational requirements of the various programs; (2) to prepare instructions, design forms, or update and print forms for the collection of data on which apportionments are based; (3) to review and verify the data received; and (4) to certify the various apportionments required by the Education Code.

The major apportionments required each year are the principal apportionments (advance apportionment and first and second principal apportionments), special purpose apportionments (pupil transportation, driver training, early childhood education, educationally disadvantaged, and the like), Miller-Unruh basic reading apportionment, and development centers for handicapped minors apportionments.

New legislation requires several additional apportionments during 1973–74: vocational education for community colleges, instructional materials allowance, early childhood education and educationally disadvantaged.

Effective July 1, 1974 the responsibility for apportionments to community colleges is transferred from the Department of Education to the Board of Governors of the California Community Colleges pursuant to Chapter 940/73.

DEPARTMENT OF EDUCATION—Continued

IV. SCHOOL FINANCE AND ADMINISTRATIVE RESEARCH—Continued

B. Administration and Apportionment of State Aid—Continued

Most of the functions of this program element are ongoing mandated activities which must be performed each year on a continuing basis. However, the number and magnitude of legislative, judicial, and administrative decisions which significantly alter these ongoing activities have accelerated in the past few years. Examples of such change agents are Ch. 140 72 and Ch. 208/73, the pending decision in the *S rano v. Priest* case, and the revised procedures. ou lined in the 1973 edition of the *California School A counting Manual.*

DEPARTMENT OF EDUCATION—Continued

IV. SCHOOL FINANCE AND ADMINISTRATIVE RESEARCH—Continued

B. Administration and Apportionment of State Aid—Continued

Assembly Concurrent Resolution 54 (1973) requires the Department of Education to make a report to the Legislature in early 1974–75 on the effects of Ch. 1406. Management of the County School Service Fund will be markedly affected by the revenue controls imposed on county superintendents of schools by Ch. 208/73, as well as by the changes needed to bring the County School Service Fund into conformity with the new *California School Accounting Manual*. The accounting manual will require considerable change in the field of financial reporting, causing some duplication of effort during the period of converting from the current accounting system to the new one.

C. Administrative Research

The administrative research element, formerly a part of Program III, school administration support, provides data concerning many facets of school district operations. These data are used by school districts; county, state, and federal agencies; colleges and universities; legislators; and private citizens in making judgments and decisions regarding both public and private school education below the college level. Several areas of research are specifically mandated, but others fall within general legal provisions for disseminating statistical data to the public.

The Legislature, the State Board of Education, and the Department of Education must have the most recent data upon which to base their actions. In some instances, these form the basis for legislation; in other instances, data document the impact of legislation already introduced.

The number of ad hoc requests for new data or the rearrangement of existing data is increasing. In addition, other units within the department, most notably the food services and the textbook distribution offices, occasionally require special research or computational help involving special surveys and reports.

The data currently required by statute include the following:

(1) Data on district staffing ratios as governed by Education Code sections 321–326 and 17521–17528,

(2) The number of educationally handicapped pupils a district may enroll,

(3) An annual report on various aspects of school district bond elections as required by Education Code Section 21709,

(4) Statewide average teacher's salary as required by Education Code Section 5793.1, and

(5) An annual determination of the average general purpose tax rates in elementary, high school, and unified school districts as one factor in establishing tuition payments for certain special education pupils as required by Education Code Sections 6870–6873 and California Administrative Code, Title 5, Section 3121.

The publication entitled *California Public Schools: Selected Statistics* was initiated to satisfy the recommendation of the 1969–70 Supplementary Report of the Committee on Conference Relating to the Budget Bill.

The ongoing work plan objectives of the administrative research element are to collect the necessary data and prepare and distribute reports on the following: (1) district ratios of nonteaching personnel to teaching personnel; (2) districts that have exceeded specified ratios of administrative personnel to teaching personnel; (3) graded and special class enrollments; (4) school district bond and tax elections; (5) various tax rates currently in force in California school districts; (6) salaries paid public school teachers and other certificated personnel; and (7) supply of and demand for teachers.

The administrative research element also has responsibility for securing affidavits from all known private schools and supplying private school data to units which need it, as required by Education Code Section 29009.5.

Input	1972–73	1973–74	1974–75
Totals, State Operations *(General Fund)*	$162,612	$259,629	$276,735
Personnel man-years	12.5	11.3	11.3

DEPARTMENT OF EDUCATION—Continued

V. LIBRARY SERVICES

Free library service in the United States rests on the premise that access to information is a necessity for citizens and governmental decisionmakers alike. The goal of all public libraries in California is to make needed information readily available to users in a coordinated, effective, and economical manner. The State Library's responsibility is to help the public libraries in the state provide timely, excellent, free library service for all residents of the state.

The entire State Library program is based on statutory requirements. The program elements are: (a reference and research services for the Legislatu and state agencies; (b) statewide library support ar development; (c) special clientele services; and (d State Library support services. The focal point this program structure is the clientele group serve

D. State Library support services	24.7	27.1	45.3	724,890	874,802	683,535

A. Reference and Research for the Legislature and State Agencies

The establishment of one central library with a library staff trained in the indexing and retrieval of information meets the need to strengthen and improve the flow of information upon which important governmental decisions are made. According to Education Code Section 27051(k), the Department of Education may "serve as the central reference and research library for the departments of state government and maintain adequate legislative reference and research library services for the Legislature." To the extent that the State Library is able to provide the research services required throughout state government, costly parallel efforts at developing libraries in the various agencies are reduced. When such agency libraries are required, the State Library cooperates with backup support in resources and research.

The objectives of this program element, which are continuous, are to improve and accelerate access to information by use of automated information retrieval system, staff training in order to expedite these services, and collection development to support automated information retrieval.

The activities of this element were part of the resources and services element in 1972–73 and 1973–74. A total of 13,023 reference requests were handled in 1972–73 by the administrative-legislative reference section, which is directly responsible for serving state agencies and the Legislature. This compares to 13,990 requests handled by that section in 1971–72. The extent of similar service in other sections of the library is being documented during the current year.

In addition to providing materials and reference services to state agencies and the Legislature in 1972–73, the California State Library analyzed its service to determine which information needs were being me and to what extent library material and reference in formation were being utilized.

Emphasis in 1973–74 is on immediate access to in formation by installation of automated information retrieval systems and on increased staff training and development. About three-fourths of the materials purchased this year will be in anticipation of requests from state agencies and the Legislature, representing a shift in priorities in the internal allocation of materials funds. Improved access to information should reduce the response time for this service.

The 1974–75 program will provide the maximum accessibility of library materials for all state agencies and the Legislature. Surveys in 1972–73 indicated that the Legislature and those departments familiar with the State Library facilities were heavy users, while many other departments were possibly unaware of their availability. Services will be brought to the attention of nonusers among state agencies. The number of reference and research requests handled will be the indicator of program accomplishments in the budget year.

Input	1972–73	1973–74	1974–75

DEPARTMENT OF EDUCATION—Continued

V. LIBRARY SERVICES—Continued

B. Statewide Library Support and Development

1. Government Depository Program

Section 14900 of the Government Code states: "It is the policy of the State of California to make freely available to its inhabitants all state publications by distribution to libraries throughout the state. . . ."

An ongoing need of citizens is to have access to source documents of the government. For local libraries to make this material available effectively, one central authority is necessary; the government depository program of the State Library provides this coordinating function.

In order to make the most effective use of resources, the State Library determines the best locations for depository collections. State agencies are encouraged to make their publications available through the depository program.

The California State Library, as administrator of the Library Distribution Act, works closely with publications representatives of state agencies and with the Office of State Printing to see that the provisions of the law are carried out and to resolve problems that may arise.

The library is a depository for the official publications of the State of California and of local governments in California. It is also a regional depository for United States government publications under the Library Depository Act of 1962. It also collects publications from other states and foreign countries.

The library's objective for the 1974–75 budget year is to provide a comprehensive listing of state publications to facilitate information access. It will intensify contacts with state agencies to achieve that objective. Assistance to depository libraries will be extended. The number of entries in the catalog of California state publications in 1972–73 was 1,531 as compared with 1,098 in 1971–72.

2. Interlibrary Loan and Reference Support

The purposes of the interlibrary loan and reference support component, which was included in the resources and services element of the 1972–73 and 1973–74 budgets, are (1) to supplement the collections of public libraries in the state; (2) to locate materials not held at the California State Library; and (3) to supply information in response to reference questions that cannot be handled by the local libraries. The State Library's function of supplementing the collections of other libraries in the state is mandated in Education Code Section 27051(*l*), which provides for "an established interlibrary loan system."

The first edition of the *Union List of Periodicals* was published and distributed in 1973–74. Approximately 100.000 additions and changes to the holdings records file have been received from 200 libraries and converted to machine-readable form for inclusion in the *Union List.*

Projections for 1974–75 are for stability in volume of interlibrary loan and reference transactions, based on the continuing viability of public library systems. Plans are to offer wider bibliographic searching service by means of automated information retrieval systems with access to computerized data bases.

A second edition of the California *Union List of Periodicals* is planned for 1974–75. Approximately 100,000 holdings, additions, or changes will be received from the 200 contributing libraries. Automation of the union catalog implementation will proceed.

In 1972–73 approximately 147,000 requests were received from other libraries for materials or information. In response, approximately 65,000 items were shipped in interlibrary loan, of which 60,000 were items from the State Library collection. Of those requests not filled, the requestors were told which other libraries in the state had the material. Data on type of request was collected in 1973–74 so as to provide indicators of success in locating materials in relation to the number of requests received and to develop 1974–75 workload projections.

3. Consultant and Research Services

The consulting program provides advisory, and technical assistance to public libraries, librarians, and library authorities. Studies and surveys are made, local programs are analyzed and evaluated, training programs are given, and research assistance is provided. Statistical data from all public libraries are collected and published annually. The consulting staff has also been of assistance to the State Librarian in the administration of the Public Library Services Act, which provides assistance to 21 public library systems, and the federal Library Services and Construction Act, which also provides for grants to public library systems.

Although the Consultant Services Bureau is the organizational unit that has primary responsibility for assisting libraries statewide, expertise of the entire State Library staff is drawn upon when required. Authority for this function is Education Code Section 27051(j).

Persons with expertise in children's services, audiovisual, and information science were appointed to the staff in 1973–74. Program evaluation, especially on the federally funded programs, is being made a priority activity. Efforts to improve the process of collecting data from public libraries and public library systems are being intensified, reporting forms are being revised, and the feasibility of developing or adapting a computer-based information system is being explored.

It is expected that 1974–75 will be a year of significant reassessment and possible redirection in the development of cooperative library services, networking, resource pooling, and communications. Local

DEPARTMENT OF EDUCATION—Continued

V. LIBRARY SERVICES—Continued

B. State Library Support and Development—Continued

libraries will be assisted through training programs in legal research, uses of government documents, and local government reference.

4. State and Federal Grants Programs

The goals of both state and federal grant programs are to assist libraries in providing improved library service through cooperative efforts and demonstration projects.

Since 1963, under the state Public Library Services Act (PLSA), the State Library has awarded planning, establishment, and per capita grants for developing and maintaining public library systems, which now number 21, cover the entire state, and include 138 of the 177 public libraries in California. Since no single library has the capacity to meet the demands of all citizens, the pooling of resources will give each citizen access to the widest possible range of information resources.

The primary objective of the state's PLSA program is to encourage interjurisdictional cooperation for improved service at costs lower than would be incurred if that level of service were provided by each local jurisdiction.

The federal Library Services and Construction Act (LSCA), was first passed in 1956 and several times amended. LSCA titles are descriptive of its objectives and are as follows:

Title I: Public library services including strengthening of the State Library; state institutional library services; library services to the physically handicapped;

Title II: Public library construction;

Title III: Interlibrary cooperation, bringing together different types of libraries into coordinated programs.

The State Librarian is the legally authorized state agency official charged with the administration of both the state PLSA and federal LSCA programs.

Federal and state aid has wrought major changes in California library services; specifically, in system development and sharing of resources and information. Federal and state funds have not replaced local effort in funding libraries, but they have encouraged development of nontraditional programs and those designed to reach out to the unserved. Funds to strengthen the State Library have supported staff, materials, and automation projects.

Administration of the state Public Library Services Act (PLSA) program, based largely on distribution of grants by formulas, includes establishing applica tion criteria, reviewing plans of service for conform ity to the law, administering the contracts, receivin the required reports, and evaluating the programs c the various systems.

The administration of the federal Library Service and Construction Act (LSCA) requires a basic stat plan, a five-year, long-range plan, and an annual pr gram, updated each year. These documents are sul ject to approval by the U.S. Office of Educatio Grants are awarded by the State Librarian, who ac ministers contracts, evaluates and reviews program and reports to the U.S. Office of Education.

In January, 1973, the Legislative Analyst charge the State Librarian with review of the funding fo mula for state assistance to public library syste and with recommending any necessary statuto changes by November 1, 1973. A plan for a full-sca outside review of systems in the context of tot statewide library service was developed. This stud was scheduled for 1973–74 in the LSCA five-year pla and is financed from federal funds.

In 1973–74 the systems comprehensive review an study plan is being administered. After bids ar advertised nationwide, an outside consultant firm wi be selected to perform the study. Effort to obtain th background and information needed to provide th Legislative Analyst with the recommendation fo statewide system development and funding will re ceive first priority treatment.

The systems study, completed in 1973–74, will pr vide a basis for development during 1974–75 of new 10-year library service program in California.

A total of 119 contracts and amendments were ad ministered by the State Library in 1972–73. Of these 98 were for federal grants and 21 were for stat grants. It is anticipated that federal funds will b available in 1974–75 at a comparable level and tha the existing PLSA state subvention will be extende pending a recommendation for a new funding for mula.

DEPARTMENT OF EDUCATION—Continued

V. LIBRARY SERVICES—Continued

C. Special Clientele Services

1. Books for the Blind and Physically Handicapped

To carry out the purposes of the federal and state programs for books for the blind and physically handicapped, this program component provides talking books to patrons at whatever rate their reading needs require, subject to the availability of materials.

The federal government produces talking books, which are books read orally and recorded on phonorecords, magnetic tapes, or cassette tapes, as a service to those who are not able to use conventional printed methods. Books in braille are also produced. The braille and talking books are made available by the Library of Congress to designated agencies. The State Library is the responsible agency for this service in California.

In 1965–66, the year before physically handicapped persons became eligible for the service, there were 4,200 patrons. The average number of books each patron received monthly was 4.33. In 1972–73 the number of patrons had increased to 9,400. Realistically, service levels are limited by staff size and handling time. The minimum short-range service objective has, therefore, been set at five books per month per borrower.

In 1973–74 preliminary inquiries are being made into existing programs for automating this service. Senate Bill 281 to raise the service level was passed in September, 1973.

In 1972–73 a total of 9,400 borrowers received some 275,000 items. The projected number of borrowers will be 10,800 by the end of the 1973–74 fiscal year and over 12,000 by the end of 1974–75.

Finally, this budget contemplates combining the Clearinghouse Depository services to blind and handicapped school children with the Blind and Physically Handicapped unit in the State Library to provide a more efficient delivery system of services to this special clientele group. A program review of this combined service is in progress with a reporting deadline of March 1, 1974.

2. Processing Center

The purpose of the processing center is to provide book processing services to contracting libraries at the lowest possible costs by taking advantage of the economies of volume purchasing, cataloging, and physical processing. Under the authority of Education Code Section 27054(a) and (b), the State Library has, since 1958, operated a centralized processing service for those libraries which choose to participate.

The costs for developing the processing center were funded by the federal Library Services and Construction Act (LSCA). Since 1958 a portion of the actual cost of the center has also been borne by these funds. The State Library intends to provide for a fully member-supported processing center in 1974–75.

The basic charge for routine book processing for 1973–74 was $2.25 per volume to members, with the understanding that for the 1973–74 fiscal year only, the balance of the actual cost for this service would be subsidized by Library Services and Construction Act funds. This charge was to cover the cost for improved delivery time.

The processing center is to be maintained strictly on the basis of member reimbursements during 1974–75, as determined during the 1973–74 year, and contracts with an estimated 40 to 50 libraries will be executed on this basis.

Routine book processing activities will be performed on about 110,000 of the estimated 120,000 volumes ordered by the center members in 1974–75. Cataloging will again be needed for approximately 6,000 volumes. A new cards-only service also will be performed with an estimated workload of 20,000 sets.

An in-process control system will be developed and implemented to provide both better control and better response to member questions. A more formal member communications system is planned for implementation. Level of production will again be the primary indicator of performance.

Input	1972–73	1973–74	1974–75
Expenditures:			
Special clientele services	$684,518	$1,464,983	$1,072,306

General Fund	*681,565*	*927,555*	*561,528*
Federal funds	–	*71,360*	–
Reimbursements	*2,953*	*466,068*	*510,778*
Personnel man-years	79.9	104.4	65.5

D. State Library Support Services

1. Administration

The objectives of the administration component include the following:

a. Maintaining a position of leadership in planning for library service at the local, state, and national levels.

b. Administering the California State Library and its mandated programs in an economical and efficient, and professional manner.

c. Budgeting and expending funds in the best interests of California libraries.

d. Coordinating state and federal grant programs for libraries according to law and in the best interests of the people of the state.

Plans for 1973–74 were directed at modernizing library management, in reorganizing the program budget structure; improving accounting procedures and control; analyzing the physical facilities; developing systematic personnel procedures, including recruitment and training; analyzing classifications, class relationships, and job assignments in the library; developing performance standards and work-

DEPARTMENT OF EDUCATION—Continued

V. LIBRARY SERVICES—Continued

D. State Library Support Services—Continued

load indicators; developing operating manuals; and performing other important housekeeping functions.

The 1974–75 budget year will require that more administrative staff time be directed to the development and implementation of plans and recommendations for new directions in statewide library service.

2. Collection Management and Control

The goal of the collection management and control component of the State Library's program is to prepare and control necessary informational materials for the following two elements: (1) reference and research for the Legislature and state agencies; and (2) statewide library support and development. A further goal is to provide a description of and an organization of these materials so that appropriate materials can be quickly retrieved and used by staff and patrons.

By acquiring and organizing books, periodicals, and other types of publications, the State Library supports the department's legislated responsibility to provide these informational services.

According to Education Code Sections 27000–27105, the Department of Education is directed to collect and organize materials for use by state government and to provide backup, where possible, for California public libraries. The state has thus recognized the need to have effective access to a variety of informational sources.

Selection of materials for the State Library is based on (1) anticipated need; (2) requests by state employees, officials, and legislators; and (3) available funds.

A new departure has been made in State Library buying policies. Materials were previously purchased along the lines of a general, traditional library. Materials are now purchased in the following categories: (1) social and political science; (2) law; (3) science and technology of direct interest to state agencies; e.g., engineering, ecology, agriculture, and so forth; (4) educational management and technology; (5) public administration; (6) economics; (7) library and information science; and (8) California history.

The book and periodical materials are supplemented by a superb collection of government documents. A increasing percentage of government research is don by contract and reports are purchased from the co tractor. Reports from governmental agencies then selves are received by free depository arrangements.

In 1973–74 an estimated 21,000 volumes will b acquired at a unit rate of 2,500 volumes per position and 122,000 issues of serials will be acquired at unit rate of 16,000 issues per position. A special pr gram for acquiring microform materials is planne LSCA funds for strengthening state libraries will b used for this project. Savings in space and retrieva time will result.

A total of 21,100 books will be cataloged i 1973–74 at a rate of 1,000 books per position. In ad dition, 1,700 new serial titles will be cataloged dur ing the year at a rate of 750 titles per position. A special project to provide brief-form cataloging fo about 10,000 backlogged books and another project t catalog the remainder of the books and the 1,500 seria titles will also be implemented. Special processing o Californiana materials will be provided for 90 manu scripts, 30 maps, 2,179 pictures, and 731 miscellaneou Californiana items.

A staff of seven performs all materials preservatio activities. All materials acquired, cataloged, and processed are to be given the physical preparation re quired to place them in circulation.

An estimated 185,000 requested items are being circulated in 1973–74. A workload of 32,000 volumes is anticipated for 1974–75.

All materials acquired, cataloged, and processed in 1974–75 can be given required physical processing by the present staff, and 4,000 items already in the collection can be repaired for continued use. No increases are recommended for this operation during the 1974–75 fiscal year.

Input	1972–73	1973–74	1974–75

VI. DEPARTMENTAL MANAGEMENT AND SPECIAL SERVICES

The Department of Education, with a staff of approximately 2,500 employees, is responsible for the yearly disbursement of approximately $2.6 billion in funds, materials, and supplies to local educational agencies. The management of these resources and the successful fulfillment of program objectives are dependent on effective leadership, policy direction, and the necessary support services provided by the Departmental Management and Special Services Program.

It is therefore the objective of this program to provide leadership and support at a level that will make it possible for the department to meet its major responsibility: the education of children and adults in California.

A. Priority Programs in Departmental Management and Special Services

Two of the department's priority programs for 1974–75 fall within the Departmental Management and Special Services Program: (1) analysis and applicability of testing procedures, which represents an activity of the Office of Program Evaluation and Research; and (2) departmental reorganization.

1. Analysis and Applicability of Testing Procedures

In the state assessment program, the Office of Program Evaluation and Research provides legislators, educators, and the public with data concerning the achievement level of California pupils and other pertinent factors related to the educational process. Long-standing problems in education require research beyond the scope of individual districts. The state is in a unique position to (1) collect pertinent information from a great number of districts; (2) take the leadership in providing new approaches to recurring problems; and (3) disseminate information regarding successful practices.

Education Code Sections 5779 and 12820 require that the State Department of Education conduct a testing program and select or develop test instruments for the approval of the State Board of Education. It further requires that other selected information be collected and reported annually together with test scores. (See program statement I.J., Results of Statewide Testing Program.)

During 1972–73 the following reports of statewide testing were prepared and presented to the State Board of Education:

Miller-Unruh Basic Reading Program, 1970–71.

Miller-Unruh, Educationally Handicapped, Spring, 1971.

State Summary—Spring Testing, 1972.

State Summary—Fall Testing, 1972.

Complete State Testing Report, Including School District Profiles, 1970–71.

Special Mathematics Achievement Report, Spring, 1972.

State of California Inventory Math Achievement (SCIMA) Report, Spring, 1972.

Other accomplishments during 1972–73 were as follows:

a. A special math test was designed, prepared, administered, scored, and reported.

b. A newsletter called *Feedback* was initiated to keep districts informed about the progress being made in implementing the changes in the state testing program mandated by Ch. 930/72.

c. Regional meetings were held to keep districts informed regarding the changes in the testing program.

d. A test for pupils in grade one was developed; it was administered for the first time in the fall of 1973.

e. Preparation began on the development of reading tests for grades two and three. A series of meetings was held throughout the state to determine the objectives to be tested.

In 1973–74 and 1974–75, the number of reports will be about the same as in 1972–73, with perhaps the addition of one or two special reports. The number of related publications and regional meetings will be about the same, but the number of issues of *Feedback* will probably increase.

Figure 20 shows the time line for the state assessment program.

2. Departmental Reorganization

The State Board of Education in 1971 made departmental reorganization a matter of high priority in its continuing effort to strengthen the California public school system. The organization redirection and development task force was created and charged with responsibility for providing recommendations for improvement of the organizational structure, redirection of departmental efforts, and strengthening management capability.

The accomplishments of this component in 1972–73 were the following:

a. Provided the department with a new organizational structure.

b. Provided a management and team-building training program for all managers on the education program matrix management team.

c. Estabished a management information unit in the office of program evaluation and research.

d. Provided assistance to the superintendent to strengthen the decision-making process.

e. Reorganized the executive cabinet.

The work plan objectives of the organization redirection and development component for 1973–74 were the following:

a. Develop organizational plans for restructuring compensatory education, vocational education, and special education to make their structures compatible with matrix management requirements and age-span objectives.

b. Analyze current legislation for required organizational changes, and develop plans for implementing these changes.

c. Provide assistance to improve state, county, and district interrelationships.

d. Develop organizational plans for each ad hoc program development team or component.

e. Conduct problem-solving workshops to resolve organizational problems as required.

f. Conduct team-building workshops for vocational education, compensatory education, and special education.

g. Submit reports to control agencies on status of reorganization as required.

h. Assist the superintendent and the Executive Cabinet on special problems related to management processes and organizational structure.

B. Departmental Management

The departmental management program element is divided into three components: (1) executive, which includes the superintendent's office and those offices directly responsible to the superintendent; (2) program management; and (3) management services, which includes such functions as budget, fiscal, accounting, data processing, personnel and training, publications, and management analysis.

1. Executive

This program component consists of the following activities: (1) superintendent's office; (2) deputy superintendents for programs and administration; (3) program planning and development; (4) program evaluation and research; (5) governmental affairs; (6) Mexican-American liaison; (7) liaison with nonpublic schools; (8) information dissemination; and (9) legal.

a. Superintendent's Office

To coordinate the activities of 1,054 school districts and to plan efficiently for and to meet effectively the needs of approximately five million pupils in California public schools, the State Department of Education must have overall executive leadership. As the director of education, the superintendent provides coordination and major administration of all the programs of the department. He is assisted by the chief deputy superintendent, the assistant superintendent in charge of the Los Angeles office, and the deputy director for congressional relations in charge of the Washington, D.C., office.

The superintendent determines priorities which recognize and meet the changing educational needs of the public school system. His office interprets and explains to the public and to the Legislature the decisions and actions that are necessary to provide effective educational programs.

The service provided by the centralized staff include legal counsel, coordination of legislation, program planning, evaluation, and organization redirection and development.

b. Deputy Superintendents for Programs and Administration

The deputy superintendent for programs and the deputy superintendent for administration function at the policy level as members of the superintendent's executive cabinet. The deputy superintendent for programs exercises leadership in delivering the program services of the department to the local educational agencies throughout the state; and the deputy superintendent for administration provides leadership for the activities of the department which are directed toward the improvement of management practices within the department and in local educational agencies. The final planning and implementation of the department's reorganization plan in 1972–73 and 1973–74 enlarged the scope of responsibilities for each of the deputy superintendents.

The major new activity within the office of the deputy superintendent for programs during 1972–73 was the establishment, staffing, and final operational planning of the education program matrix for full implementation during 1973–74. The matrix plan was designed to streamline the delivery of the department's program services to local educational agencies and to avoid the overlapping, duplication, and isolation associated with the old system of rendering services by four relatively autonomous divisions: instruc-

DEPARTMENT OF EDUCATION—Continued

VI. DEPARTMENTAL MANAGEMENT AND SPECIAL SERVICES—Continued

B. Departmental Management—Continued

tion, special education, compensatory education, and vocational education. The program matrix organization establishes three major educational programs or age spans through which comprehensive, consolidated services are delivered to local educational agencies. They are early childhood education, intermediate education, and secondary/adult education.

The position of education program administrator was created during 1972–73 to activate the new matrix organization and to provide leadership within the matrix management team. Managers of each of the three age spans were also appointed during 1972–73. The role of each age-span manager is to identify specific program objectives and, through negotiations with support unit managers, ensure that these objectives include all program resources of the department. The education program administrator, the three age-span managers, and the support unit managers for general education, special education, compensatory education, and vocational education met regularly during the year to establish working relationships and to develop plans for 1973–74.

The deputy superintendent for programs is responsible for the coordination and overall operation of the education program matrix. He is also responsible for planning, developing, and implementing such high priority activities as bilingual-crosscultural education and career education. Typically, these commence through task forces and eventually reach operational status in the department. The identification, development, and implementation of such activities require managing and coordination through one office in the department.

In addition, the deputy superintendent for programs, as directed, represents the superintendent at conferences, public meetings, and in negotiations with representatives of the federal government, local educational agencies, and other state agencies.

Fiscal year 1973–74 marked the official implementation of the education program matrix. Plans for combining the duties and responsibilities of the deputy superintendent for programs and the education program administrator will be completed by the end of 1973–74; the two positions are combined in the 1974–75 budget.

The major 1972–73 change in the Office of the Deputy Superintendent for Administration was the creation of the Division of Financial Resources and Distribution of Aid as a part of the reorganization and redirection of the department. The new division consolidates all fiscal and distribution services within one unit. This division and the Division of Administrative Services then became operational units within the Office of the Deputy Superintendent for Administration. The overall responsibilities of the deputyship are, therefore, both internal and external. The internal functions include providing fiscal, budget, business, and publication services; management analysis; and personnel training within the department. External responsibilities are general and specific admi istrative and financial services such as manageme assistance, school planning and approvals, and tra portation direction and supervision to local educ tional agencies.

There had been a need to administer both intern and external management services through a coor nated and consolidated process. The placement these two divisions under the deputy superintende for administration has provided the basis for a co tinually improving program in the provision of i ternal controls and direction and external assistan

Additional responsibilities of the deputy superi tendent for administration are (1) providing st assistance to the State Board of Education Scho Support Committee; (2) serving as executive sec tary of the Educational Management and Evaluatic Commission; and (3) representing the superintende on the State Allocation Board.

The 1972–73 responsibilities of the Office of De uty Superintendent for Administration continue wit out modification in 1973–74 and 1974–75. Emphas will be placed on those tasks leading to attainment objectives related to departmental priorities.

c. Office of Program Planning and Development

The major purpose of the Office of Program Pla ning and Development is to ensure that the Depar ment of Education develops and maintains compr hensive and coordinated sets of plans (includi goals, priorities, objectives, and courses of action that directly address identified needs. These nee define the progress that must be made if California public schools, under the responsible and accountab leadership of the State Board of Education and t State Department of Education, are to be effective i assuring quality education and equality of educationa opportunity and are to be efficient in the use of publi resources.

For the department to continue as a flexible an responsive force for quality education and to exe dynamic leadership in assisting local educational age cies to meet individual and societal needs, the develop ment of an increased, coordinated, and comprehensiv planning capability is imperative at both the state an local levels. Such planning should be institutionalize as an integral part of educational administration.

The office of program planning and developmen has been directed by the Superintendent of Publi Instruction to work to ensure the effectiveness of th department's planning process toward accomplishin departmental priorities. In discharging its responsi bilities, the office cooperates closely with, and is inter dependent with, program managers who administe the department's complex operations.

Education Code Section 153 states that the State Board of Education "shall study the educational con ditions and needs of the state. It shall makes plan

for the improvement of the administration and efficiency of the public schools of the state." The Office of Program Planning aud Development was established in July, 1971, to assist the board, the Superintendent of Public Instruction, and the State Department of Education to accomplish this mandate. This activity has since its inception been supported by federal funds provided by the Elementary and Secondary Education Act, Title V, Part A, Section 503, as amended.

The specific accomplishments of the Office of Program Plauning aud Development in 1972–73 were as follows:

a. Completed the first draft of a comprehensive loug-range master plan for the department, incorporating data collected, analyses of those data, and the results of the goal- and priority-setting processes.

b. Provided short-range planning and problem-solving capability to program managers and to the superintendent and his executive staff.

c. Assisted in planning for the implementation of the matrix management system for the units in the department having responsibility for instructioual programs.

d. Developed needs assessment aud comprehensive planning guidelines for use by local educational agencies in couformance with the requirements of the consolidated application forms.

The work plan objectives of this activity for 1973–74 and 1974–75 are the following:

a. Maintain, update, and revise the Departmeut's master plan.

b. Provide aud assist in the installatiou of all parameters of a master plan for the departmeut, including the development of processes which will ensure that program plans adequately reflect established Department goals, subgoals, and priorities.

c. Provide complete short-range planning assistance on 30 or more tasks within the department each year.

d. Gather information which is specific to policy formation by the superintendent, and provide policy recommendatious and alternative solutions to problems assigned by the superinteudent.

e. Provide analyses of emerging educational issues, problems, and opportunities as required.

f. Operate ready-response strategies for all emergency problems which the superintendent assigus.

g. Assist local educational agencies in improving their planning capabilities, and submit a report to the Executive Cabinet on the status and needs of the agency's planning capabilities.

d. Office of Program Evaluation and Research

The activities of the office of program evaluation and research are carried out in three areas: (1) evaluation services; (2) state assessment; and (3) management information. A fourth subproject, research services, is to be added in 1974–75.

(1) Evaluation Services

By conducting au evaluation services program. the Office of Program Evaluation and Research ensures proper evaluation and reporting of all programs for which the State Department of Education is responsible, the program's goal is to improve the evaluation capabilities of educators at state, regional, and local levels and to provide technical evaluation assistance wherever needed.

The Office of Program Evaluation and Research was formed in July, 1971, to consolidate in one unit all evaluation functions of the State Department of Education. The office was charged with providing technical services to other department units and to groups established by the Legislature and by the State Board of Education. The office was also charged with the evaluation of all specially funded programs or projects operated through the Department of Education.

The evaluation services program combines three programs from last year entitled (1) Western Interstate Planning and Evaluation Project, Title V, Section 505; (2) ESEA, Title V, Section 503, Annual Report; and (3) services to agencies within the Department of Education, ad hoc committees, commissions, and task forces.

Projects for 1972–73 included evaluation reports for ESEA, Title I; followthrough; preschool programs; demonstration programs in reading and mathematics iu junior high schools; migrant education; special education; Miller-Unruh basic reading; and ESEA, Title III. Summary reports of department activities were also prepared for the superintendent.

Activities in 1973–74 and 1974–75 are projected to be very similar to those in 1972–73 except that the following programs will also be evaluated: early childhood education; bilingual-crosscultural education; disadvantaged youth (SB 90, 1972); and Miller-Unruh.

(2) State Assessment

(Analysis and Applicability of Testing Procedures, see VI. A., Priority Programs.)

(3) Management Information

Although the department has within its various units a great amount of data, it is often difficult to locate and obtain that information. The need is to have a central depository where all information pertinent to the decisionmaking process is stored. The goal of the management information center is to be able to provide top department management with the information required for making policy decisions. This goal is in keeping with the general thrust of the department to improve its decisionmaking capabilities.

The management information center was discussed as early as 1971–72. Through the cooperative efforts of the organization redirection and development task

DEPARTMENT OF EDUCATION—Continued

VI. DEPARTMENTAL MANAGEMENT AND SPECIAL SERVICES—Continued

B. Departmental Management—Continued

force and the Office of Program Evaluation and Research, the center was launched in January, 1973.

The basic work plan for 1972–73 consisted of planning a physical facility and exploring means of gathering and displaying data.

The 1973–74 plan is for the management information center to go into actual operation. This calls for the completion of the physical facility, the purchase of appropriate audiovisual equipment, and implementation of a design for displaying progress of various departmental programs.

During 1974–75 new systems for gathering data will be designed, information displays will be produced, filmstrips will be produced, and additional equipment will be purchased. A system for communications between the center and program managers will be devised and instituted.

(4) Research Services Unit

Through the activities of the Office of Program Evaluation and Research, collected data are presented in descriptive form. These descriptive data, to have optimum usefulness, must be translated into conclusions and inferences regarding causal relationships. However, these research findings are not presently disseminated in a systematic fashion to the educational program managers for program modification and improvement.

At present, various units in the department are submitting proposals for grant funding independently of each other. Many sources of external funding exist, both from the federal government as well as from foundations and state governmental sources. A general resource should be established within the department to indicate the most appropriate avenue for submission of proposals.

The Office of Program Evaluation and Research has been performing certain research activities over the past two years; for example, a special mathematics study that defined the specific grade levels and content areas in which deficiencies in mathematics concepts were found. Further, the office has submitted and received special funding grants from Section 411 of the General Provisions Act of 1970; from ESEA, Title V, Part C; and from the Legislature (SB 1109, 1973). These grants will be used in defining characteristics of general education programs in addition to those characteristics defined by the conventional test results. In this manner, unique features of programs can be disseminated to the appropriate audiences. This program formalizes what has been heretofore an informal effort.

In 1974–75 the functions described will be consolidated into a readily identifiable unit within the Office of Program Evaluation and Research. The unit, to be housed in the management information center, will be available as a resource to all departmental staff. The necessary reference materials will be developed and categorized, and technical assistance for the development of proposals will be provided.

Specific individuals in the state assessment pr gram and the evaluation services program will identified to provide expertise in research and d velopment functions with specific reference to statis cal analysis, research design, instrumentation, ar report writing.

e. Governmental Affairs

The governmental affairs activity was establishe in 1970 to ensure a coordinated effort on the part the State Board of Education, the State Departme of Education, and educational leadership throughou the state with regard to legislation affecting Califo nia education. Its goals are to ensure that the Depar ment of Education and the State Board of Educatio are informed of and represented before the Legi lature on matters affecting educational policy ar to provide the Legislature with accurate and timel information upon which to base decisions regardin education. Its objectives are (1) to determine an provide for introduction of legislative proposa desired by the State Board of Education and the S perintendent of Public Instruction; (2) to ensur prior to legislative hearings, that accurate analys of all education proposals are prepared; (3) to en sure a timely response to all informational inquiri from legislators and their staff; and (4) to ensu that reports required by the Legislature are sub mitted.

In 1972–73 this activity concentrated its efforts o (1) school finance reform; (2) early childhood edu cation; (3) revision of the statewide testing program and (4) state textbook adoption.

The work plan objectives for this activity in 1973 74 were focused on (1) establishment of a Californi master plan for migrant education; (2) adoption a general educational development test; (3) author zation for an additional diagnostic school for neuro logically handicapped children (accomplished i September, 1973); and (4) special assistance fo year-round school programs.

In accordance with the work plan for 1974–75, b mid-October, 1974, proposals for legislation for revie and analysis will be collected from the department operating units. These proposals will then be sub mitted to the executive cabinet and the State Boar of Education for approval. Those approved will b forwarded to the Legislature for its consideration.

f. Mexican-American Liaison Office

The purpose of the Mexican-American liaison offic is to strengthen the leadership of the Department o Education through the creation of a communication link between the Superintendent of Public Instruc tion and the Mexican-American population of th state. The communications link was established i September, 1972, with the appointment of a 15-mem ber Mexican-American advisory committee and a liai son officer. Through the committee the superintenden and the department have gained needed informatio

and guidance relative to the educational issues and concerns of the Mexican-American population.

Such a communications resource should result in increased student achievement, decreased dropout rate, alternative programs of instruction relevant to the linguistic and cultural differences of Mexican-American students, and increased confidence in the state's public school system.

The activities involved in maintaining the effectiveness of the communications link include the following: (1) meeting with Mexican-American leaders; (2) developing mailing lists for dissemination of information; (3) reviewing and assessing proposed guidelines and policy statements; (4) assisting district personnel in resolving conflict situations; (5) coordinating activities of the advisory committee; and (6) evaluating the results of committee and staff efforts.

The nature of the project necessitates the continuation of activities in 1973–74 and 1974–75 that were begun in 1972–73. As new issues and concerns are identified, the process of review, analysis, research, recommendation of action, and evaluation will begin again.

g. Liaison With Nonpublic Schools

To provide for children in nonpublic schools the attention and services required by state and federal legislation, the State Department of Education established in January, 1973, the position of consultant in private school education. Before that time the contacts and relationships with nonpublic schools had been delegated to various units and individuals within the department, causing duplication of effort and inadequate attention to problems.

Nonpublic schools are essential to the state's educational program because they provide a viable option to parents who wish to choose such an education for their children. It has become important that nonpublic schools be represented at the state level, particularly since federal and state legislation has increasingly mandated that programs and services be made available to the pupils who attend these schools. The Department of Education, as the administrator of these programs and services, requires a knowledge of and contact with all aspects of nonpublic education. Since 1969 the department has also been responsible for the annual registration of all nonpublic schools (kindergarten through grade 12) and the publication of an annual directory of these schools.

The specific accomplishments of this activity in 1973 were (1) development of a coordinated working relationship with administrative units in the department responsible for programs and services to nonpublic schools and their pupils; (2) provision of advice and information on all topics pertaining to nonpublic schools; and (3) provision of close liaison with the California Executive Council of Nonpublic Schools.

The work plan objectives of this activity for 1973–74 and 1974–75 include (1) maintaining and coordinating cooperative working relationships with department administrative units involved in all nonpublic school programs; (2) providing information and advice on such matters as legislation, curriculum, accreditation, teachers, transcripts, and complaints; and (3) developing better means of communication between the nonpublic and public schools in the state and between the Department of Education and the nonpublic school unit in the U.S. Office of Education.

h. Information Dissemination Office

In light of the "right-to-know" and the "need-to-know" imperatives of the general public, state and federal agencies, local educational agencies, and the State Department of Education itself, the department established in January, 1973, an office of information dissemination.

The educational system depends on gaining understanding and support from many individuals and groups in order to achieve maximum results. Today, more information must be communicated to more persons over longer lines of communication to get tasks coordinated and accomplished. Good communications is a two-way street. Getting information to the employees, districts, and the public is but part of the job. Getting information from these sources is every bit as essential.

The accomplishments of the information dissemination activity in 1972–73 encompassed (1) establishing itself as an integral part of the department; (2) working within the educational family and through established means of communications, such as the media; and (3) improving communication.

i. Legal Office

The legal office has continuing responsibility for all aspects of the department's legal work. The goal of the legal office is to guarantee to the State Board of Education, the Superintendent of Public Instruction, departmental program managers, state and federal agencies, local educational agencies, and the public that departmental programs are conducted in accordance with and not in violation of law.

Briefly stated, the continuing objectives of the legal office are as follows:

a. Provide the services of attorneys who will advise the state board, the superintendent, and departmental program managers on the legality of policies, regulations, and conduct of programs; the conformity of policies and programs to the legal principles of equal educational opportunity; and the resolution of problems involving interpretations of law.

b. Assist departmental program managers in the legal aspects of programs.

c. Identify potential problems that might lead to litigation.

DEPARTMENT OF EDUCATION—Continued

VI. DEPARTMENTAL MANAGEMENT AND SPECIAL SERVICES—Continued

B. Departmental Management—Continued

d. Represent the board, the superintendent, and departmental program managers through legal defenses of policies, programs, and decisions in hearings.

e. Cooperate with the State Attorney General's office as appropriate.

f. Assist in the development of legislation affecting public education in California.

g. Prepare and disseminate legal information.

h. Certify to the superintendent that departmental policies and programs conform with law.

i. Take action to reduce the number of court cases in which the board, the superintendent, and/or departmental managers are named as defendants.

j. Respond to inquiries from outside the department regarding matters of law affecting public education.

The 1972–73 activities and 1973–74 work plans for the legal office were based upon the above continuing objectives.

In 1974–75 the legal office will accomplish the following additional objectives:

a. Expedite requests for legal opinions and other legal services. Within one working day after receipt of a request for legal service, the attorney will contact the client to discuss the request and agree upon a date for completion of the service.

b. Assume a greater role in program development. The legal-section role in contract review will be expanded and strengthened. The attorneys assigned to program units will work more closely with staff officers. The chief counsel will establish liaison with county counsels, school attorneys, and other attorneys interested in education to identify potential problems at the formative stage.

2. Program Management

To provide leadership and to ensure that the educational system offers maximum learning opportunities to all California students, the Superintendent of Public Instruction must have in the Department of Education an efficient and effective management system. This system must (1) be viable; (2) include a means for dealing with complex problems, often on short notice; and (3) offer a system for delivering educational services to children that is responsive and accountable.

The units through which the department's program is managed are as follows:

a. Division of Financial Resources and Distribution of Aid,

b. Division of Administrative Services,

c. General education management,

d. Special education,

e. Compensatory education,

f. Vocational education,

g. Division of Libraries,

h. Matrix management.

(1) Early childhood education management,

(2) Intermediate education management,

(3) Secondary/adult education management.

Major changes in the management structure took effect in 1972–73. The Division of Financial Resources and Distribution of Aid was created, consolidating fiscal and distributional services within one unit; and the deputy superintendent for administration was given responsibility for consolidating all internal and external fiscal and administrative functions of the department. This phase of the new departmental organization was inaugurated on November 1, 1972.

The matrix management system was implemented during 1972–73 and went into operation officially as of July 1, 1973, for those in the department who are responsible for educational program management. Under the education program matrix design, education program managers for three age spans (early childhood, intermediate, and secondary/adult) are responsible and accountable to the superintendent through the education program administrator and to the Deputy Superintendent of Public Instruction for Programs for the development and implementation of programs to improve the education of all students. The program support activities (general, special, vocational, and compensatory education and child development) are responsible and accountable to the education program administrator for provision of services within the total age-span program.

General education, one of the support activities within the education program matrix, also introduced a completely new organizational design featuring a matrix during 1972–73. This plan, encompassing some 36 categorical and mandated educational programs and eight task forces which were previously a part of the former Division of Instruction, went into effect on July 1, 1973. The emphasis is on coordination and elimination of duplication in delivering general educational services to local educational agencies. The professional staff of over 80 consultants has been organized according to geographical areas; each consultant provides services as a generalist within one of five program areas. (See I.E., general education management.)

In developing these new matrix organizational structures, the department has preserved lines of authority and those other management processes essential to effective operations. Each employee involved in an educational program answers to one supervisor for all the traditional supervisorial relationships, and all are assigned to the accomplishment of specific, written output. The department is thus moving toward improved program management which cautiously maintains respected, traditional management practices while embracing a new mechanism.

DEPARTMENT OF EDUCATION—Continued

VI. DEPARTMENTAL MANAGEMENT AND SPECIAL SERVICES—Continued

B. Departmental Management—Continued

That mechanism—matrix management—places all employees responsible for instructional programs in specific reporting units for traditional personnel management. It is anticipated that outcomes and activities will be carefully delineated in a yearly master program contact, a document executed between the education program managers who hold basic program responsibility and those support activity managers charged with supporting those programs. The master program contract will be the prime management tool through which the educational age-span program manager will be able to control educational program activities. These master program contracts will follow management by objectives, with resources being budgeted to achieve certain specific objectives.

Programs administered by the department are funded from a wide variety of sources, each with its own constraints and regulations. Federal law, state legislation, court and administrative decisions, and actions of the State Board of Education and other agencies affect the management of educational programs and frequently require changes in basic programs and policies on very short notice. The program management function of the department is designed to respond quickly and effectively to such changes.

3. Management Services

Under the new organization for administrative and fiscal management in the department, the Deputy Superintendent for Administration has established two divisions of responsibility. One division provides support services of an administrative nature: personnel and training, management analysis, school facilities planning, school approvals, and publications. The other division provides services of a financial nature: apportionments and reports, fiscal management (budgets, fiscal reports, accounting, audits), and distribution of aid, which includes textbooks, surplus property, and food services.

The goal of management services is to provide the level of service required by the program branch of the department so that effective program services are made available to local educational agencies. Progress toward this goal will be achieved during 1973–74 and 1974–75 through continued efforts to (1) develop specialized management services; (2) consolidate services; and (3) develop management systems that will improve the level of support services to program managers.

a. Budget Office

The budget office is responsible for the preparation and administration of the department's budget.

The Department of Education expends and disburses nearly $2.6 billion each year, including the state school aid apportionments. As a part of this process and to meet legal requirements governing operations of state agencies, the department must develop a budget as an orderly plan for reaching objectives, estimating the resources required, and obtaining approval and funding. Further, the preparation and compilation of budget data and justification statements in a uniform manner enhances planning, coordination, control, and review by department management and the executive and legislative branches of state government.

In 1972–73 the budget office and the fiscal reports office, both formerly included in the fiscal office, were established as separate units.

b. Fiscal Reports Office

The Department of Education administers approximately $300 million in federal grant-in-aid programs and $100 million in state funded programs each year in addition to state apportionments to school districts. This $400 million is provided by some 50 federal grants and agreements, 15 budget act items, and special appropriations.

The regular state budget and accounting processes provide a vehicle for coordination and documentation of programs funded by budget act appropriations. However, the coordination and documentation of the $300 million worth of education programs funded by special appropriations and federal grants need to be developed more completely. It is imperative that adequate reporting systems and procedures for the nonbudget act group of programs be developed and integrated with the standard fiscal reporting processes.

The fiscal reports office, established as a separate unit in 1972–73, has the responsibility to develop and operate the reporting systems and procedures necessary to provide a wide range of fiscal information regarding all programs and funds that is not available from the normal operations of either the budget or accounting systems of the department.

c. Accounting Office

The accounting office is responsible for performing the accounting and fiscal housekeeping functions for the programs and units of the department. Day-to-day transactions relating to budget allotments, expenditures, encumbrance of funds, and claims filing (support appropriations and grants) and the preparation of financial reports must be performed with reasonable timeliness. The objective is to reduce the claims processing time to 20 days or less.

The capability of the accounting office to meet increased workload has been increased with the development and installation of an automated data processing system for the accounting records called the program cost accounting system (PCA). This system became operational in 1972–73; however, it will be necessary to continue parallel operation of the previously used bookkeeping machine system for the records pertaining to prior year appropriations as long as they are open. The PCA system became fully operational in 1973–74.

DEPARTMENT OF EDUCATION—Continued

VI. DEPARTMENTAL MANAGEMENT AND SPECIAL SERVICES—Continued

B. Departmental Management—Continued

In connection with PCA, a time-reporting system is being developed to serve the needs of the matrix program system.

Also in 1973–74, food services program payments are being automated to improve cash flow to school districts and other recipients.

d. Business Service Office

The business service office has the responsibility of providing the necessary supportive services for department operations. These are facilities planning, building management, real and personal property management, telephone and other wire communication systems, purchasing, shipping, receiving and supply, cashiering, textbook ordering, mail room and messengers, duplicating, addressograph, and other related office services.

e. Contract Analysis Office

The contract analysis office was established as an independent unit on July 1, 1973; before that time this function was a part of the business service office. Its responsibility is to handle all contracts and agreements for the hiring of equipment; obtaining various services, including consultant and professional services; and maintaining equipment. Approximately 400 major contracts, 100 amendments, and 300 minor contracts (service and maintenance agreements) are prepared per year.

f. Internal Audit Office

The Department of Education expends and distributes to local educational agencies approximately $300 million in federal funds each year under a wide variety of laws, state plans, regulations, and contractual arrangements. In the past, the department made no independent reviews to determine that the disbursement and expenditure of funds complied with appropriate laws, policies, and plans. This resulted in numerous audit exceptions and criticisms by control agencies in regard to the department's ability to carry out its responsibilities effectively.

The internal audit unit was activated in June, 1973. Its establishment provides the department with a means of recognizing potential problem areas and the opportunity to initiate corrective action before crisis situations develop.

g. EDP Management Office

The EDP management office provides liaison between the user, the Department of General Services' service center, and consultant services to support maximum utilization of service center capabilities; it provides technical assistance to program managers and departmental administrators in developing, defining, and coordinating specifications for information requirements and operational needs so that data processing activities in the Department of Education can be administered in a more economical and effective manner.

This office was operational for the last six month of 1972–73; during this time it devised a method an implemented the procedure for elimination of r dundant and duplicated collection of commonly use data (this function was transferred to the ED information systems office during 1973–74); provide for contractual services from the service center; d rected the preparation of four data processing feas bility studies and recommended the adoption of th U.S. Department of Agriculture's automated foo and nutrition system to facilitate federal repor ing; devised a system to provide data processin cost/benefits analysis for use in reducing EDP op erating costs; and provided technical assistance t program managers.

Continuing major objectives of the EDP manag ment office for 1973–74 and 1974–75 are as follows

a. Develop procedure for consolidating and mon toring the common district master file.

b. Assist program managers in preparing informa tion systems feasibility studies, requests for pr posals, contracts, and evaluation of projects for co and schedule.

c. Manage and coordinate contractual relationship for all data processing services performed for th department by service centers or consulting firms.

d. Provide inservice training for in-house dat processing systems analysis on time-sharing princ ples and all related applications.

h. EDP Information Systems Office

With the completion and field implementation o the California Education Information Syste (CEIS), the thrust of the EDP information system office was shifted in 1973–74 to the support of thre activity areas: (1) field coordination; (2) data inven tory/definition/control; and (3) department infor mation system.

Field coordination activities include acting in coordination and information source role regardin the CEIS system; reviewing and controlling con tracted maintenance of CEIS documentation; de veloping an annual survey and report of CEI utilization as required by Education Code Sectio 479; developing statewide data processing informa tion standards and reference materials for depart ment and field use as authorized by Education Cod Section 477; and providing limited consulting an coordination service to department and field unit regarding information availability, standards, an processing.

Data inventory/definition/control activities includ maintaining, monitoring and developing procedure for the further refinement of the existing data ele ment catalog and report of reports; reviewing curren and proposed information reporting forms used b the department to eliminate duplication and stand ardize definitions; and determining the feasibility o establishing a system for the standardized identifica

tion of reported information elements by codes and associated reporting.

Department information system activities include developing procedures allowing local educational agencies to submit data to the department in a machine-readable media (cards, tapes); performing a review of the existing financial reporting system used by the department; and developing a feasibility study identifying the appropriateness, scope, and cost of establishing a comprehensive system using a common data bank and providing flexible reporting capability.

i. Personnel and Training Office

The State Department of Education personnel and training office has responsibility for approximately 2,500 positions. The effective utilization of these human resources requires a comprehensive personnel management program. The major facets of this program are recruitment, selection, appointment, equal employment opportunities, assignment and reassignment, classification, salary administration, development and training, welfare and morale, health and safety, evaluation, discipline, employer-employee relations, personnel management consultation, and personnel and training records and information.

By the end of 1972–73, essentially all classification plan changes, movement of positions, and personnel transactions associated with the reorganization of the department approved to that date had been completed. By the end of 1973–74, all of the major components of the reorganization will be implemented.

An affirmative action policy for the department was developed, an in-depth ethnic survey completed, and the development of unit affirmative action plans was begun in 1972–73. Extensive recruitment contacts were made with groups representing ethnic minorities and involved in affirmative action.

Personnel management work plan objectives for 1974–75 are as follows:

a. Complete the design and implementation of a classification plan for professional employees to reflect functional and organizational changes associated with department reorganization.

b. Maintain an aggressive Career Opportunities Development Program, including selection, assignment, and career ladder mobility. Utilizing the ethnic census of the department, improve annually the utilization of the ethnic minority work force of the department by major unit, occupation, and level. The goal is to approximate the California population representation of ethnic groups and sexes.

c. Prepare analyses and make recommendations concerning proposed legislation affecting the Department of Education's human resources management program.

The continued successful operation of departmental programs and activities during 1974–75 and future years will require a core of managers skilled in the application of modern team management techniques and managers responsive to change. The goal of the training and development office is to make possible the continued development of each employee's knowledge, skills, abilities and talents as they relate to his responsibilities and to departmental objectives.

j. Bureau of Publications

The Department of Education makes extensive use of printed materials for presenting directives, guidelines, statistical data, research findings, and suggestions for developing and improving instructional programs and management systems in the schools of the state. The Bureau of Publications has the responsibility of preparing these materials for dissemination to the public served by the department. The objective is to communicate effectively by making current and accurate educational information available in response to identified needs, even when those needs are changing rapidly.

A more specific objective in 1972–73 was to reduce its backlog of work, and it was reduced from 4,521 pages of copy to edit and process to 2,549, even though the flow of work remained the same and additional responsibilities were assigned. The bureau's objectives for 1973–74 and 1974–75 are to reduce the backlog by 500 pages each year. The output of the bureau is shown in the accompanying table.

Item of output measurement	Actual figures 1971–72	1972–73	Estimated figures 1973–74	1974–75
Printing requests submitted to the bureau	968	906	900	950
Requests for duplicating on department facilities reviewed and processed	Not available	1,875	1,900	2,000
Pages edited and published by the bureau [a]	6,211	7,249	7,800	8,300

[a] For purposes of establishing a uniform system of measuring workload, all figures represent 8½"x11" or 6"x9" pages of published material.

The continuing functions of the Bureau of Publications, which operates on a direct reimbursement basis, are as follows:

a. Provide all units within the department professional editorial help needed in developing materials for publications.

b. Respond to the needs of joint apprenticeship and training committees and other agencies outside state government that are involved in job-related training of a vocational nature and that look to the department to assist them in obtaining the best training materials possible.

c. Perform all editorial and production tasks required to produce department publications and forms of high quality, and provide cost estimates as needed.

d. Prepare for photo-offset production all copy and artwork needed in publications and forms.

e. Maintain the county-district-school (CDS) code and addressograph lists, updating them continuously and checking them for accuracy.

DEPARTMENT OF EDUCATION—Continued

VI. DEPARTMENTAL MANAGEMENT AND SPECIAL SERVICES—Continued

B. Departmental Management—Continued

f. Compile the data and prepare camera-ready copy for the California Public School Directory and the California Private School Directory.

g. Serve as the department's clearinghouse for copyrighted materials.

h. Monitor publications issued by the department for suitability and adherence to department policies, and help the department develop a long-range publications program that reflects adopted priorities.

i. Comply with the provisions of the Library Distribution Act.

Beginning in 1973–74 the Bureau of Publications is assuming responsibility for distributing, pricing, selling, and maintaining inventories of department publications.

k. Management Analysis Office

The management analysis office provides staff services to the Superintendent of Public Instruction and his administrative and program managers by developing and maintaining administrative tools and preparing analytical surveys and reports for decision-making and implementation so that they can successfully meet their program objectives.

This office was created in 1972–73 to provide analytical staff assistance to department administrators and program managers by documenting and improving administrative and operating systems which had been previously fragmented and undocumented.

In the first year of its operation, the office assumed maintenance and control of the department's administrative manual and management memo system, developed a new contract processing system, examined the fiscal structure of the Bureau of School Approva with recommendation of funding alternatives, deve oped an indepth study of the formal and inform administrative communication system, and develope a position control system.

Among the specific work plans undertaken in 197 74, to be continued as needed in 1974–75, are the fo lowing:

a. Provide staff analytical services on special pro ects such as consolidation of fiscal activities, voca tional education management review, centralization c departmental library facilities (resources center), A 99 fiscal systems, publications distribution, busine services system study, and personnel systems and pr cedures.

b. Maintain a system of paperwork managemer and forms control.

c. Maintain the departmental management and in formation memo system.

d. Develop and maintain the department's admi istrative manual.

e. Prepare, modify, and issue departmental organi zation charts.

C. Special Services

1. Board of Education

The Legislature and the California State Board of Education are the governing and policymaking bodies for public elementary and secondary education in the state. The board has the ongoing responsibility for studying the educational conditions and needs of the state and for adopting plans for the improvement of the public school system in California (Education Code Sections 101–112 and 151–161).

The state board determines all questions of policy within its powers; it adopts rules and regulations consistent with the laws of the state for its own government and for the government of (1) its appointees and employees; (2) the elementary and secondary schools of California; and (3) such other schools as may receive in whole or in part financial support from the state.

The board is composed of 10 nonpaid lay members appointed to four-year terms by the Governor, who makes the appointments with the consent of two-thirds of the California Senate. A student representative of the California Association of Student Councils also sits on the board as a nonvoting member. The Superintendent of Public Instruction serves as the secretary of the board.

2. Educational Commission of the States

The Educational Commission of the States is the operating arm of the Compact for Education. The compact was established for the purpose of improving state systems of education.

3. Advisory Commissions and Committee

Chapters 1188 and 1408, Statutes of 1971 (AB 2800 and SB 1526), created five educational commissions and one committee. These advisory groups superseded 13 permanent educational commissions, committees, and councils, some of which had overlapping functions and some of which had been perpetuated beyond their original need or purpose. The intent was to provide a more economical, efficient, and logical structure to educational policymaking. The Legislature said "an educational policy advisory commission" is composed of professional and lay members and advises the State Board of Education; "an educational advisory committee" is composed of specialists and advises the Superintendent of Public Instruction. The six advisory groups and their objectives during their first year of service are as follows:

a. Educational Innovation and Planning Commission

This commission, charged with advising the State Board of Education on general planning policies and subsequent innovation, has continued to emphasize systematic information gathering, which allows the commission to make informed recommendations on present and future educational needs. Its recommendations for subsequent innovation will concern the effective use of all resources by the state board.

b. Educational Management and Evaluation Commission

The role of the Educational Management and Evaluation Commission is to advise the State Board of Education on practices of modern management applicable to public school administration, program budgeting and accounting systems, methods of program evaluation, cost effectiveness, and the like.

c. Curriculum Development and Supplemental Materials Commission

The Curriculum Development and Supplemental Materials Commission is responsible for (1) developing curriculum frameworks for instructional areas commonly taught in the public schools, as ordered by the State Board of Education; reviewing existing frameworks and recommending improvements or new curriculum frameworks; (2) ensuring that curriculum frameworks reflect stated goals and provide continuity among instructional areas and instructional levels from kindergarten through grade 12 and that they provide clear criteria for textbook selection; and (3) recommending instructional and supplemental materials to the State Board of Education for adoption.

d. Equal Educational Opportunities Commission

The Equal Educational Opportunities Commission was established to inform and advise the State Board

DEPARTMENT OF EDUCATION—Continued

VI. DEPARTMENTAL MANAGEMENT AND SPECIAL SERVICES—Continued

C. Special Services—Continued

of Education on (1) policies that will promote equal educational opportunity for all children in California's public schools; (2) policies that promote equal employment and advancement opportunities for school district employees; (3) policies that will improve intergroup relations in the schools; and (4) state laws, regulations, and procedures relating to the commission's areas of concern.

e. Advisory Commission on Special Education

The role of the Commission on Special Education is to serve as a resource to the state board in matters pertaining to special education, including (1) recommendations on needed research and suggested priorities; (2) recommendations on program development, including priorities for use of federal funds, credentialing of special education teachers, and legislation; and (3) advice and information to the board on appropriate tests of measurement for special education programs.

f. Advisory Committee on Educational Research in Basic Educational Programs

In order to provide the organized and concerted effort in educational experimentation and research required for the improvement of educational programs, this committee has been charged with the following: (1) differentiating between successful and unsuccessful school programs; (2) examining the effectiveness of various educational programs; (3) measuring the potential for self-sustained learning among pupils of various aptitudes and characteristics; and (4) discovering ways to improve all instruction, especially reading and mathematics.

In creating this committee, the Legislature authorized the establishment of innovative schools throughout the state and charged the committee with advising the Superintendent of Public Instruction on the establishment, staffing, and operation of these innovative schools.

4. Advisory Council on Vocational Education

The California Advisory Council on Vocational Education is charged with the responsibility of evaluating vocational education and reporting its findings to the public. In addition, the council advises the State Board of Education, the Board of Governors of the California Community Colleges, and other agencies on matters relating to the implementation of vocational education programs.

This council is obligated by federal law to determine how effective and efficient the statewide program of vocational education is in meeting the needs of the people. Further, it is to recommend, when appropriate, more effective and efficient means of providing every student leaving school the opportunity to be prepared to enter the world of work with an entry level marketable skill. The council also works to improve the working relationships and communication between all agencies, both public and private, serving the vocational education needs of the people of California.

Special Facilities—Capital Outlay

Schools for the Blind and Deaf, Northern California

Pursuant to Chapter 1120, Statutes of 1973, the Schools for the Blind and Deaf will be located on a single site of approximately 100 acres in a major metropolitan area of Northern California. This site will contain a facility for the blind with a capacity of 150 children, 50 blind-deaf and 100 with multiple impairments. The same site will also contain a facility for the deaf with a residential capacity of 100 elementary students, 250 secondary students and 50 multihandicapped students. The reason for the single site is to promote capital and operational economies which are administratively or operationally practical and educationally sound in the joint or mutual use of such facilities as maintenance, utilities, health services, food preparation, purchasing and storage. However, each school will maintain the integrity of its own educational programs.

Recognizing the need to replace the existing facilities located in Berkeley, the 1973 Legislature appropriated $3,100,000 for site acquisition, planning, construction and equipment for a new facility. In keeping with legislative intent the 1974–75 Budget includes $19,942,000 for working drawings, construction and equipment for the permanent facilities on a single site.

MAJOR PROJECTS:

New Facilities

Site acquisition, preliminary plans, working drawings, construction, and equipment	–	$3,100,000 APWCE					
Funds for working drawings, construction and equipment are requested for 1974–75. The project is scheduled for occupancy in July 1976	–	–	$19,942,000 WCE				
TOTALS, EXPENDITURES, CAPITAL OUTLAY	–	$3,100,000	$19,942,000				
Capital Outlay Fund for Public Higher Education	–	*3,100,000*	*19,942,000*				
TOTAL, FIVE-YEAR PROGRAM							$19,942,000

RECONCILIATION WITH APPROPRIATIONS

School for the Deaf, Riverside—Capital Outlay

This residential school, located in Riverside, has a capacity of 540 normal deaf resident students and 60 deaf day students and, in addition, a capacity of 110 multihandicapped deaf students housed in modular units. The school is situated on 75 acres of state-owned land and consists of single-storied buildings of both brick and steel modular construction. The entire plant includes 15 dormitories for the normal deaf student with an average capacity of 31 children, eight dormitories for the multihandicapped deaf student with an average capacity of 14 children, two administration buildings, six buildings housing classrooms for the normal deaf child, six classrooms for the multihandicapped child, buildings for vocational shops, gymnasium and exercise rooms, social hall, media center, infirmary, kitchen, dining room, bake shop, boiler plant and mechanical shops. In addition, areas are provided for recreational activities including a swimming pool, football field, baseball diamond, running track, basketball and volley ball courts and playground areas for small children.

CONTRIBUTIONS TO TEACHERS' RETIREMENT FUND

SUMMARY OF PROGRAM REQUIREMENTS	ACTUAL 1972–73	ESTIMATED 1973–74	PROPOSED 1974–75
State's contribution to member benefits *(General Fund)*	$135,000,000	$135,000,000	$135,000,000

Need

To finance retirement benefits for California's public school teachers.

Objectives

To finance teacher retirement benefits which are not funded by either the employer s or the employee's contributions.

Authority

Section 14112, Education Code.

General Description

Contributions to the Teachers' Retirement Fund are derived from three separate sources: teachers, employing school districts, and an annual amount from the General Fund.

Prior to the enactment of Chapter 1305, Statutes of 1971, the law required school districts to contribute a maximum of 3 percent of teachers payroll plus $12 per year per teacher. The teacher's contribution varied according to his or her age upon becoming a teacher. The state's contribution represented the balance of the benefit expenditure for that fiscal ye which was not provided by the retired teachers a cumulated contributions and the school districts co tributions. This retirement system was operated on pay-as-you-go basis in that the public contributio both from the school districts and the General Fu were expended, upon receipt, to pay current benefi

Chapter 1305, Statutes of 1971 placed the syste on a reserve funding basis. Beginning July 1, 197 the teacher contributes 8 percent of compensation the system. The employing school districts will i crease their contributions, as a percentage of teach payroll, from 4 percent for the fiscal year endi June 30, 1974 to 8 percent by July, 1978. State fun are provided to low-wealth school districts throug the apportionments for public schools to accommoda this increase. The General Fund will contribute $1 million each year for the next 28 years to cover th unfunded costs of those retirement benefits in for on June 30, 1972. In 28 years the fund will have c deposit sufficient moneys to continue to pay benefi to those persons then on the retired roll and to refun to the active teachers, who withdraw from the sy tem, their contributions with interest.

SUMMARY BY OBJECT

LOCAL ASSISTANCE	1972–73	1973–74	1974–75
Contribution to Teachers' Retirement Fund	$135,000,000	$135,000,000	$135,000,000

General Fund Total Expenditures (accrual basis)	$48,488,764	$46,272,299	$47,999,799

Program Analysis

Objectives

The Public School Building Loan Bond Act statutes and the State School Building Aid Bond Acts statutes authorize the extent of issuance of general obligation bonds of the State of California to finance loans to school districts for the acquisition of land and the construction, alteration, and equipping of school facilities.

Program and Performance

State school building general obligation bonds totaling $2,240,000,000 have been authorized by the electorate of which $1,915,000,000 in bonds have been issued and sold as of December 1, 1973.

The 1973–74 fiscal year provides for a $100.000,000 bond sale to finance supplemental cash needs of the following period for the outstanding final apportionments made to the school districts, and another $100,-000,000 bond sale is planned for the 1974–75 fiscal year prior to June 30, 1975 for the ongoing continuing apportionment program's financing.

School district repayments amounting to $723,071,-288 will be repaid of the estimated $1,487,148,871 debt service as of June 30, 1975 which amounts to 48.6 percent of the debt service since the beginning of the program.

The individual school districts are required to utilize 95 percent of their individual maximum bond capacity or be within $25,000 of reaching the 95-percent requirement before the district is eligible for a state loan. The school districts with outstanding loan balances repay the state on the basis of a district property assessment value as adjusted for an offsetting local district bonded indebtedness payment of the fiscal year with the net amount due for payment each year over a period of 30 years. If a school district requests a deferral of its annual repayment during the 30-year collection period, then under the statutes pertaining to this program an additional 10 years is to be added making a 40-year collection period for that district's outstanding loan. Any outstanding balance of a district after the prescribed period of collection has elapsed is to then be canceled in accordance with the statute provisions.

INTEREST AND REDEMPTION OF SCHOOL BUILDING BONDS

SUBVENTIONS FOR EDUCATION

School Building Construction

Program Objectives

The Office of Local Assistance of the Department of General Services, subject to approval of the State Allocation Board has administered the State Project Area Construction Law. School districts that have had enrollment increases attributable to the state's major construction program were allowed to apply for interest-free loans subject to criteria in the state statutes that make repayments collectable over a 30-year period.

There are no new loans programmed and a section will be added to the 1974 Budget Bill to transfer the unencumbered balance to the General Fund.

COMMISSION FOR TEACHER PREPARATION AND LICENSING

Located in Sacramento

Program Objectives

The Commission for Teacher Preparation and Licensing was established through Chapter 557, Statutes of 1970, to insure excellence in education by encouraging high standards of quality and diversity for teacher preparation and licensing, through broad minimum standards and guidelines.

During 1972–73, the work schedules and plans developed in 1971–72 to implement portions of Chapter 557, Statutes of 1970, were expanded for the approved programs, examinations, licensing, and teacher standards functions. Fifteen percent of teacher preparation institutions had approved programs for professional-preparation and elementary teacher diversified-major programs by fiscal year ending 1973.

Federally supported, the design phase of a study to evaluate the relationship of teacher training a student achievement was initiated during 1972–. The development of measurement instruments is p posed during 1973–74, as Phase II of the study, a will be funded by a continuation of the original au orization. Phase III, scheduled to occur during 197 75, will comprise further study of the research h potheses established in Phase II.

The commission was authorized a $350,000 lo from the General Fund to support the developme of examinations during 1973–74; however, due to unanticipated increase in funds available from t processing of teachers credentials, the General Fu loan is no longer necessary.

I. APPROVED PROGRAMS

Need

Compulsory full-time education for youth between the ages of 6 and 16 is a policy of the State of California. The state establishes educational and personal standards for those who teach and serve these pupils in the public schools. California colleges and universities develop and initiate programs to prepare education personnel. These programs must be subjected to careful evaluation to insure that pupils will be taught and served by competent personnel.

Objectives

To evaluate teacher education programs in California colleges and universities in accordance with standards established or adopted by the Commission for Teacher Preparation and Licensing.

To provide state leadership for the planning, development, and approval of programs offered in California colleges and universities for the preparation of teachers and other service personnel.

Authority

Statutes enacted before 1970: Education Code Sections 13101, 13221–13242.

Statutes of 1970: Education Code Sections 13102, 13103, 13114–13117, 13130, 13135, 13136, 1314 13144.1, 13157, 13157.3, 13157.4, 13157.5, 1316 13160.1, and 13224.

California Constitution, Article IX, Sections 1, and 6, and Article IV, Section 25.

More than 50 institutions of higher educatio received staff assistance in the development professional-preparation programs leading to the mu tiple-subjects and single-subjects teaching credential Professional-preparation program guidlines for var ous specialist and services credentials were develope in tentative working draft form. These working draf received extensive review by colleges, universitie school districts, county offices, and various profes sional associations. The tentative guidelines were sub sequently revised and distributed by the commissio before public hearings. After the public hearings th commission officially adopted professional-preparatio guidelines for the following credentials: bilingual cross-cultural specialist instruction, early childhoo specialist instruction, reading specialist instructio and special education specialist instruction; guide lines for the health services and librarian services cre dentials were also officially adopted.

COMMISSION FOR TEACHER PREPARATION AND LICENSING—Continued

I. APPROVED PROGRAMS—Continued

Projections indicate that there will be at least 25 of the current 31 institutions seeking approval for their teacher preparation programs which would become operational in the school year 1974–75. In addition, professional-preparation program development assistance will be given to those institutions interested in developing programs for the service and specialist credentials.

Preliminary plans will be established for implementation of the commission's system for assessment of operating conditionally approved professional-preparation programs. In the development of the tentative approval system, the commission will involve representatives from institutions of higher education, school districts, professional associations, special interest groups, and lay persons.

The remaining services and specialist credentials and professional-preparation program guidelines will be developed. These credentials include those for health science specialist instruction, mathematics specialist instruction, and pupil personnel services. Tentative working drafts will be prepared and the established procedures for review and revision will be followed.

Output

The primary output of the approval programs element are the educational personnel prepared through the professional preparation programs developed by California colleges and universities, and approved by the commission. During 1972–73, conditional approval for a two-year period was granted to 39 institutions to operate professional-preparation programs during the school year 1973–74 and 1974–75. Two institutions received conditional approval for only one year. Those of the remaining 31 institutions which have stated their intent to seek approval for the professional-preparation programs leading to the multiple-subjects and single-subjects teaching credentials will receive program development assistance.

PROGRAM REQUIREMENTS	72–73	73–74	74–75	1972–73	1973–74	1974–75
Continuing program costs	8.8	10	10	$234,858	$274,957	$281,336

II. EXAMINATION PROGRAM

Need

The Teacher Preparation and Licensing Law of 1970 provides that examinations are to be a primary means of credentialing. The Examinations and Evaluation Branch is required to develop the overall examination process and provide an evaluation system for the approved programs function.

Objectives

To have examination options for new credentials operative in 1974–75 and 1975–76.

To provide policies, procedures, and basic data for program evaluation.

Authority

The authority for the function is from the Teacher Preparation and Licensing Law of 1970 and commission directives.

General Description

Each of the 15 advisory panels selected during 1971–72 to advise in the selection, interpretation, and administration of examinations, completed the task of determining the scope and content of its subject. Each panel prepared a scope-and-content statement for commission review and distribution to the field. Panels also completed the task of reviewing existing published examinations relative to each panel's subject matter and, in general, recommended that existing examinations were inadequate to fulfill scope-and-content statement specifications. In the absence of suitable examinations, the advisory panels recommended development of new California subject-matter examinations.

To date, the commission has adopted and approved examination development scope-and-content statements for administrative services, art, business, foreign languages, home economics, industrial arts, and music. The Examinations and Evaluation Branch is now proceeding with developing examinations in these areas.

The initial plan to establish tentative requirements for the development of totally new California examinations consistent with the requirements of the Ryan Act was to contract with test development agencies interested in bidding for each subject-matter examination. Details of the commission's intent to build subject-matter examinations for teaching credentials were mailed to test development agencies throughout the United States. Each test development agency was asked to respond as to whether it would be interested in bidding for a contract to develop single-subject examinations based upon adopted scope-and-content statements. Three agencies expressed interest in bidding for the examinations.

The commission negotiated with interested test development agencies, and drafted and obtained General Services approval for a contract to serve both as a working document for examination bids from test development agencies and as a contract between the commission and a contractor for the development of

COMMISSION FOR TEACHER PREPARATION AND LICENSING—Continued

II. EXAMINATION PROGRAM—Continued

each single-subject examination. Bids were received for development of examinations for six of the adopted scope-and-content statements. Because of excessive projected costs, the commission rejected all bids received and is now seeking alternate ways of obtaining examinations, not limited to returning to bidding contractors for further negotiation. The Examinations and Evaluations Branch is now proceeding with an attempt to renegotiate bids received from test development agencies, and is making an effort to draft a plan for the examinations to be developed by the commission. The latter is in the event of failure in negotiations with testing agencies.

Field test results from a preliminary draft of test items for the "teaching of reading" examination we reviewed by the Commission Examinations Committ and the Reading Panel during the 1972–73 fiscal ye Test items for a final draft of the examination we selected and submitted to a contractor for printi The commission approved and adopted the new exa ination to meet the reading requirements of the Ry Act. The new examination is now being periodical administered at various locales in the state. It w be revised and updated as results from administr tions are evaluated by the commission.

During 1974–75, the commission will continue develop the requirements for the test administrati system for commission adopted examinations.

III. LICENSING PROGRAM

Need

In recognition of the importance that education plays in the lives of individuals and the welfare of the state, the people of California have, since 1851, sanctioned a system of licensing public school teachers and allied personnel with the aim of assuring that such personnel are physically, morally, and intellectually qualified to meet their responsibilities in training our youth.

As the Education Code has been amended over the years, there has resulted a proliferation of different types of credentials available to prospective teachers and, as a result, a complex system has evolved for administering the issuance of licenses. Because of the complexity of the system and the cost involved, the delay in responding to the needs of the applicant, the school district, and the institutions, the code was further amended under the Teacher Preparation and Licensing Law of 1970 for the express purpose of simplifying the existing licensing procedures and providing alternate routes through which licenses could be obtained. In addition, high quality in education is to be assured through enforcement of statewide standards governing the employment of public school teachers and other professional staff.

Objectives

To provide:

Equal opportunity for high-quality education f all people in California through the administration statewide standards governing the employment of ed cation personnel.

A licensing service to school districts, counties, ed cational institutions, and individuals which insur uniform administration and enforcement of standar and their continual improvement.

Interpretations of the stature and the establishme of statewide minimum standards and guidelines f teacher licensing.

Rules and regulations to govern the commission procedures for teacher licensing and to establish in proved standards for existing and new licenses.

Updated, revised, and simplified procedures f processing applications, with the end objective of r ducing costs and the time required to evaluate th applicant's qualifications.

Authority

Chapter 557, Statutes of 1970.

Output	1971–72	1972–73	1973–74	1974–7

COMMISSION FOR TEACHER PREPARATION AND LICENSING—Continued

IV. TEACHER STANDARDS PROGRAM

Need

To assure that persons serving as certificated employees in the public elementary and secondary schools have met the standards of the commission relating to mental and physical health, character and morals, and professional conduct in accordance with those sections of the Education Code enumerated under "authority."

Objectives

To examine applications for credentials and life diplomas and for the renewals thereof when there has been an allegation relating to an arrest record, unprofessional conduct, mental health problem, or physical health problem; and, when satisfied that the applicant meets the professional standards set by the Commission for Teacher Preparation and Licensing, to authorize the issuance of the proper credential.

To initiate proceedings to suspend and revoke credentials for cause in accordance with the policies of the Commission for Teacher Preparation and Licensing and appropriate sections of the Education Code.

To recommend to the commission the termination of suspension orders and reissuance of credentials to persons who have had credentials suspended or revoked, when satisfactory evidence of rehabilitation has been presented.

To report to the commission mandatory revocation actions.

To strengthen the program of reporting to all school districts as well as offices of county superintendents of schools and chief state school officers throughout the nation the names of persons who have had credentials revoked, suspended or reinstated.

Authority

Education Code, Article 1, Sections 13102, 13103, 13104, 13114, 13115, 13120, 13120.1, 13120.2, 13120.3, 13121, 13121.1, 13121.2, 13123, 13174, and 13175. California Administrative Code, Title 5, Sections 6001, 6026, 6027, 6050, 6070, 6073, 6074, 6075, 6076, 6077, 6092, 6093, 6094, 6095, and 6097.

PROGRAM REQUIREMENTS	72–73	73–74	74–75	1972–73	1973–74	1974–75
Continuing program costs	3.7	4	5.5	$356,184	$284,159	$329,248

V. BEGINNING TEACHER EVALUATION STUDY PROGRAM

Need

The Legislature has given the Commission for Teacher Preparation and Licensing responsibility to ". . . formulate performance standards for general teaching and other educational specialties;" and to "develop objective, independently verifiable standards of measurement and evaluation of teaching competence as it relates to teacher licensing."

Many of the present formulations of performance standards for teachers are not based on empirical information about how the performance standards relate to student achievement. The research which has been done to provide empirical evidence upon which to develop performance standards has been inconclusive.

Objectives

To identify teacher behavior which is related to student achievement in reading and mathematics.

To develop measurement procedures and instruments to assess that teacher behavior.

To stimulate modification of teacher preparation programs by emphasizing the improvement of teacher competence.

Authority

Statutes of 1970: Education Code Section 13114.

General Description

During the 1972–73 fiscal year, the commission received federal funds to develop a research design for studying teacher behavior as it relates to student achievement. A research design conference was convened to review the original design and to recommend modifications and additions. Plans for the remaining years of the study were developed based on the work of the design conference.

A federal grant for Phase II of the Beginning Teacher Evaluation Study was approved for the 1973–74 fiscal year. Funding for the study is provided by the National Institute of Education. Phase II, the second year of the study, is a developmental year, during which measurement instruments will be selected, developed and revised to meet study needs, and research hypotheses will be generated.

The research hypotheses generated in Phase II will be studied in greater depth in Phases III and IV, 1974–75 and 1975–76.

PROGRAM REQUIREMENTS	72–73	73–74	74–75	1972–73	1973–74	1974–75

COMMISSION FOR TEACHER PREPARATION AND LICENSING—Continued

VI. ADMINISTRATION PROGRAM

Need

The executive secretary of the commission directs the staff in the implementation and maintenance of commission policy; informs the public and the Legislature of the decisions and actions of the commission; and is responsible for effective and sound administrative and financial practices.

Objectives

To provide sound and effective leadership in mee ing current and future administrative problems, ar to coordinate and provide necessary administrati and business management services to all activities the commission, pursuant to its policies.

Authority

The Teacher Preparation and Licensing Law 1970, (Chapter 557, Statutes of 1970).

CALIFORNIA EDUCATIONAL FACILITIES AUTHORITY

The issuance of revenue bonds by the California Educational Facilities Authority to provide private institutions of higher education within the state an additional means by which to expand, enlarge, and establish dormitory, academic, and related facilities was authorized by the Legislature in 1972 (Chapter 1432). The California Educational Facilities Act, effective March 7, 1973, is contained in Chapter 7 of Division 21, of the Education Code (commencing with Section 30301).

A total of $150,000,000 of bonds is authorized, of which not more than $50,000,000 shall be issued and sold within the first two years.

Many types of facilities are eligible, including a hospital or clinic for teaching at a school of medicine. Facilities used for sectarian instruction or as a place of religious worship are not eligible.

The law specifically provided that bonds issued shall not be a debt or liability or a pledge of the faith and credit nor the taxing power of the state or any of its political subdivisions. The full faith and credit of the participating institution and of the authority will be pledged to the payment of bonds. All expenses must be paid from revenues and other moneys available to the authority.

This is a trust activity and involves no state revenues or expenditures.

COORDINATING COUNCIL FOR HIGHER EDUCATION

(Located in Sacramento)

Program Objectives

The Coordinating Council for Higher Education was established under the Donahoe Higher Education Act of 1960. The council is advisory to the Governor, the Legislature, appropriate state officials, and the governing boards of public higher education in California.

The council is comprised of one representative from the University of California, one representative from the State University and Colleges, one representative from the California Community Colleges, one member appointed by the Governor to represent the private colleges and universities, six members appointed by the Governor from the general public, and one ex officio, nonvoting member representing the State Board of Education.[a]

SUMMARY OF PROGRAM REQUIREMENTS	ACTUAL 1972–73	ESTIMATED 1973–74	PROPOSED 1974–75

I. STATE COORDINATION

Authority

Division 16.5, Higher Education, of the Education Code, Chapter 1, Section 22501; Chapter 5, Sections 22700, 22701, 22702, 22703 and 22704 and 22606, SCR 105.

Effective April 1, 1974, the powers, duties and functions of the Coordinating Council for Higher Education are transferred to the California Postsecondary Education Commission.

PROGRAM REQUIREMENTS	72–73	73–74	74–75	1972–73	1973–74	1974–75
Continuing program costs						
(General Fund)	20.2	22[a]	–	$490,296	$433,181	–

II. HIGHER EDUCATION FACILITIES AND EQUIPMENT PROGRAM

A. Title I of the Higher Education Facilities Act of 1963.

Need

The earlier rapid growth of enrollments in our nation's colleges and universities places heavy, unprecedented demands on institutions of higher education to provide additional physical facilities, often from already limited resources. While the intense pressure appears to be easing, growth is still anticipated.

Objectives

Title I of the Higher Education Facilities Act of 1963 (HEFA) provides financial assistance to colleges and universities for the construction of physical facilities to accommodate increased enrollments.

Authority

Title I, Public Law 88-204, as amended, Education Code, Section 22752.

General Description

Title I of HEFA provides 50-50 matching grants to public and private four-year institutions, community colleges and technical institutes for construction of undergraduate academic facilities.

The Coordinating Council was designated by the Legislature as the state agency to administer this program in California.

[a] Effective April 1, 1974, the powers, duties and functions of the Coordinating Council are transferred to the California Postsecondary Education Commission.

COORDINATING COUNCIL FOR HIGHER EDUCATION—Continued

II. HIGHER EDUCATION FACILITIES AND EQUIPMENT PROGRAM—Continued

B. Higher Education Act (Equipment) (Title VI-A of the Higher Education Act of 1965)

Need

The pressures of growing enrollments have required our colleges and universities not only to construct new classrooms and laboratories but also to purchase additional, often expensive, instructional equipment including closed circuit television.

Objectives

Title VI-A of Public Law 329 provides federal funds to institutions of higher education for the acquisition of classroom and laboratory equipment in order to improve the quality of instruction in selected areas.

Authority

Title VI-A Public Law 89-329 and Education Coc Section 22752.

General Description

Title VI-A provides 50-50 federal matching gran for the purchase of instructional equipment to a credited institutions that offer at least one year postsecondary education. The Coordinating Counc for Higher Education was designated by the Legisl ture as the state agency for the administration of th program in California.

PROGRAM REQUIREMENTS	72–73	73–74	74–75	1972–73	1973–74	1974–75
Continuing program costs *(Federal funds)*	6.2	7 [a]	–	$98,645	$80,000	–

III. TITLE 1 (HEA, 1965), COMMUNITY SERVICE AND CONTINUING EDUCATION

Need

America faces social and environmental problems of unprecedented magnitude and complexity. There is a need to utilize fully the knowledge, talent, and expertise available in our institutions of higher education in the search for solutions to these problems.

Objectives

This federal program emphasizes the development of strong, cooperative relationships among institutions of higher education, local community governments, and community groups, in the solution of pressing community problems. These problems may relate to employment, economic development, housing, intergroup relations, or whatever is relevant in the context of local community needs and the institutions' resources.

Special consideration is given to programs that incorporate the resources of several institutions into a regional consortium.

Authority

Title I, Public Law 89-329 and Education Code Section 22756.

General Description

Title I of the Higher Education Act of 1965 pro vides federal grants on a matching two-to-one basis t institutions of higher education for the implementa tion of programs in community service and continu ing education.

The Coordinating Council was designated by th Legislature as the state agency to administer the Titl I program in California.

Recent Title I programs have dealt with regiona planning of human services and the upgrading o human services personnel, maintenance of environ mental quality, regional instructional television, an mobile advisement centers for educational counseling An independent statewide evaluation covering th first five-year period of Title I operations in Cali fornia, completed during 1972–73, documented speci fic ways in which Title I programs have aided in re leasing the expertise of higher education institution to assist local communities in solving their problems. That evaluation study received nationwide recogni tion.

[a] Effective April 1, 1974, the powers, duties and functions of the Coordinating Council are transferred to the California Postsecondary Education Commission.

COORDINATING COUNCIL FOR HIGHER EDUCATION—Continued

V. STUDENT FLOW STUDY PROGRAM

Need

For several years members of the Coordinating Council and its staff, the Department of Finance, the Legislative Analyst, and others have perceived a need for more information about undergraduate students and programs. Interest in information about the community colleges has been particularly strong, because of their huge enrollments and continuing growth. Recurring questions about the extent to which the community colleges are fulfilling their basic functions led to the passage of SB 722 (Harmer, 1972), which called upon the Coordinating Council staff to undertake a longitudinal study of student performance and persistence in the community colleges over the next three years.

The scope of the study, which is outlined in SB 772, includes student characteristics, persistence rates, factors associated with attrition, reentry into postsecondary education, employability of former students, and the need for additional access.

Authority

Senate Bill 772 (Harmer) General Fund Ch. 1376/72.

Objectives

1. To obtain quantitative data on student flow through community colleges for use in local, regional, and state-level planning for the expansion and establishment of new community colleges.
2. To establish a data base for community college students, to include data needed for planning on both a continuing and recurring basis, with attention to variables required by the NCHEMS student flow model.
3. To identify students whose educational needs are not now being met by community colleges and analyze their problems and unmet needs for postsecondary education which the colleges are equipped to handle.
4. To identify strengths and weaknesses in current career, educational and personal counseling programs in community colleges.

General Description

The study was started in the fall of 1972 with the selection of a fully representative sample of 32 community colleges by the council staff and the drawing of random samples of new students by the colleges amounting to somewhat more than 32,000 students. A series of reports has been projected for the next several years which will deal with the educational origins of the students, their personal characteristics, the goals and objectives which they declare and which may be inferred from what they do, their level of performance in community college courses, patterns of persistence and stopout, and their employment and other activities after leaving the community college. A final report will be made to the Legislature early in 1976, which will summarize the activities and achievements of these students over a period of 3½ years.

Major staff efforts in 1972–73 were devoted to campus visitation to make arrangements for drawing samples and collecting data, and to an analysis of the background characteristics of the students in the samples and the total student bodies at these institutions. Performance and persistence data for the first year of enrollment by the 32,000 have been obtained, which will be subjected to various analyses in 1973–74. At the same time, additional performance data will be gathered for the second year of enrollment, including followup information for students who did not persist.

The Student Flow Study will be continued by the California Postsecondary Education Commission. The analysis of persistence and performance data will continue into 1974–75, with additional data collection and analysis for students who transferred to other institutions and for dropouts in the 1972 sample who reenter postsecondary education. Graduates and noncompleters who enter employment will also be surveyed for information about the relationship of their college training to their jobs, and their needs for further education. Performance data collection will continue through fall 1975 for students who persist and others who reenter the colleges.

VI. COMMUNITY ADVISEMENT CENTER

Need

During the past decade opportunities for postsecondary education and training have expanded dramatically for most segments of the population previously underrepresented in programs of formal study beyond high school. Experience has shown, however, that merely providing access is not enough for students of all backgrounds and levels of ability to avail themselves of their opportunities. They must be informed of their options and assisted in making intelligent choices from among them.

The inadequacy of existing educational and career guidance services is well known. In high schools it is not uncommon for counselors to be assigned 600 or 700 students each. High school dropouts, young adults, women wishing to resume their education or update their skills, the elderly, and many other persons who want or need to continue their education have no likely place to turn for guidance.

[a] Totals footnoted represent authorized positions which will terminate on March 31, 1974.

COORDINATING COUNCIL FOR HIGHER EDUCATION—Continued

VI. COMMUNITY ADVISEMENT CENTER—Continued

Authority

Public Law 92-318 TITLE III, Section 404.

Objectives

To improve the information and advisement services now available to potential students in order to assist them impartially in making wise decisions about the pursuit of education and training beyond high school.

To demonstrate the cost effectiveness of providing educational advisement in a noninstitutional setting by employing specially trained paraprofessional counselors and centralizing the collection and distribution of information.

To reinforce the guidance and counseling services in the Sacramento region by serving as a referral agency and by encouraging the exchange of materials and information.

To increase the awareness of the Sacramento community of the diversity and multiplicity of postsecondary opportunities available locally, including those in proprietary schools and vocational training programs.

General Description

In July 1973 the Coordinating Council for Higher Education was awarded a planning grant by the Fund for the Improvement of Postsecondary Education to design a Community Educational Advisement Center as a pilot project in the greater Sacramento area, with the understanding that the center will b come operational during the summer of 1974.

The planning now in progress will determine t appropriate location for the center, the size and qua fications of its staff, the primary target populatio and a precise definition of the nature and range the center's activities.

Whatever the determinations resulting from t planning phase may be, the following functions w constitute a major part of the center's operation:

1. Collecting, packaging, and distributing inform tion on postsecondary educational and training pr grams in the Sacramento area and maintaining cu rent inventories of such programs.

2. Advising individuals—especially those witho convenient access to existing counseling resources of their opportunities, through a process which a tempts mutually to discover the most appropria program for the individual's needs and purposes.

3. Maintaining a file of employment informatio manpower data, and career literature, and explorin techniques for integrating educational and caree guidance.

4. Providing on-the-job training for paraprofe sional counselors and for prospective counselors er rolled in graduate school.

5. Reinforcing educational guidance services i Sacramento schools and colleges and serving as a authoritative source of information for the complet range of postsecondary opportunities and financia aid programs.

CALIFORNIA POSTSECONDARY EDUCATION COMMISSION

Located in Sacramento

Statewide Objectives

The California Postsecondary Education Commission was authorized by Ch. 1187/73 (AB 770) and begins operations on April 1, 1974. The commission succeeds the Coordinating Council for Higher Education as the principal agency concerned with coordination and policy planning for the several higher education segments in the state.

California's system of postsecondary education consists of five segments: the public segments, including the University of California, the California State University and Colleges, and the California Community Colleges; and the private segments, which include the state's independent colleges and universities and the proprietary institutions.

Since the passage of the Donahoe Higher Education Act of 1960, the state has recognized the need for comprehensive planning for the public segments. The California Postsecondary Education Commission is mandated to continue this policy of comprehensive planning; to broaden it by improving the planned interfaces between the public and private segments; and to improve it by ongoing and periodic studies in depth of a variety of educational problems.

The central element in this process is the annual formulation of a continuing statewide five-year plan. This plan should provide for the optimal development of California's human resources through a system of postsecondary education which prudently husbands the state's financial resources. By law, the commission will require the public segments to submit long-range plans in a form which is acceptable to the commission. The commission itself will generate other information for the planning process. The plan will include such factors as the need for new facilities, the range and appropriateness of programs for the public segments, and budgetary priorities. Policies regarding student charges, student financial aid, and access to higher education will also be studied. Finally, planning will take into account the potential contributions of private postsecondary institutions to public goals.

Under the law, the commission has significant program review responsibilities. It will scrutinize new programs in the public segments, and will periodically review established programs in order to determine whether a need for them still exists. This review process will facilitate pinpointing instances of overlap among segments, determining capital outlay needs, and arranging programs according to their budgetary priority.

The Commission is authorized to undertake studies in a number of specific areas. It will continue the work of the Coordinating Council for Higher Education by studying the cost of instruction in the public segments, facilities needs, and faculty salaries. The study of persistence and performance among Community College students will also continue under Commission auspices, and will attempt to achieve a better understanding of the large dropout rate among students in this segment.

One reason for the commission's mandate to include private institutions in its studies is the realization that they serve the state's eduational goals in unique ways. The commission will be concerned with the viability of the California independent colleges and universities. Programs, tuition, and scholarship policies in the public segments directly impact these institutions, and the commission is required by law to evaluate this impact.

Proprietary institutions have served Californians by providing job-related skills. In the past, both educators and students have had difficulty anticipating job market demand. The commission is authorized to undertake studies in this area which should be valuable both to students and to the institutions of higher education. It will also be concerned with vocational education and continuing educational opportunities for adults, including those opportunities which are provided in the off-campus programs of the four-year segments.

The Postsecondary Education Commission is mandated to become a central point for the acquisition, storage, and dissemination of information pertaining to higher education. Such information is frequently sought by researchers, including legislative and administrative officials; but research has been hindered and made more costly by the fact that information is often inaccessible or, if compiled, compiled in differing formats in each segment. The commission's role as an information data bank, along with its analytical and review studies, will also be helpful in the statewide planning process.

The Commission itself will consist of 23 members who are broadly representative of the segments. Members will be appointed by the legislature, the Governor, and will also include individuals serving *ex officio*.

To provide maximum flexibility for the new Commission, until it can develop its objectives and programs, this budget proposes allocation by Personnel Services and Operating Expenses without fine breakdown. Details will be provided by budget revision during the current and budget year.

FEDERAL PROGRAMS

The federal government provides support for demonstration and continuing programs that meet critical social needs. The California Postsecondary Education Commission is delegated responsibility as the state agency for receiving and allocating federal funds as required by the federal government. Over $1 million will be distributed by the Commission in 1974–75.

The commission administers funds of the following federal programs: Title I of the Higher Education

CALIFORNIA POSTSECONDARY EDUCATION COMMISSION—Continued

Statewide Objectives—Continued

Facilities Act of 1963 (Construction Grant Program), Title VI-A of the Higher Education Act of 1965 (Equipment Grant Program), Title I of the Higher Education Act of 1965 (Community Services and Continuing Education Program), Higher Education Facilities Comprehensive Planning Program, and Title VII of the Housing Act of 1964 (Training in Community Development). The commission is also the recipient of a federal grant to study the need for Community Advisement Centers.

Chapter 1187, Statutes of 1963, designated the commission as the state administrative agency pursuant to federal programs as amended by P.L. 92-318. Authority is established under Division 16.5, Higher Education, of the Education Code, Chapter 5.5, Sections 22712, 22752, 22253, 22755.

WESTERN INTERSTATE COMMISSION FOR HIGHER EDUCATION

Headquarters Office at Boulder, Colorado

Program Objectives

The Western Interstate Commission for Higher Education (WICHE) was created in 1951 by five western states through the Western Regional Education Compact. The membership now consists of 13 western states, including California, which ratified the compact in 1953. Its objective is to encourage the participating states to work cooperatively in improving educational programs and facilities. The commission is a public, nonprofit agency which consists of 39 members, three from each state, appointed for four-year terms by their Governor. The commission is served by a staff which is located at the main office in Boulder, Colorado, and at five regional offices.

SUMMARY OF PROGRAM REQUIREMENTS

	ACTUAL 1972–73	ESTIMATED 1973–74	PROPOSED 1974–75
I. Western Interstate Commission for Higher Education *(General Fund)*	$15,000	$28,000	$28,000
II. Mental health program [a]	(7,500)	(7,500)	(7,500)

Need

In order to provide acceptable higher educational facilities in the western region in the most efficient manner, it is necessary for the western states to set up a cooperative system designed to carry out this purpose. Many of these states separately do not have sufficient numbers of students to warrant the establishment and maintenance within their borders of adequate facilities in the essential fields of technical, professional and graduate training. Nor do all the states have the financial ability to furnish within their borders institutions capable of providing acceptable standards of training in these essential fields.

Objectives

1. Improve the quality of education.
2. Expand educational opportunities, including those in continuing education.
3. Coordinate and expand interstate and interinstitutional cooperative programs.
4. Help institutions of higher education improve both academic administration and institutional management.
5. Assist the education community in appraising and responding to the changing needs of the West.
6. Raise the level of public understanding of the role of higher education.

Authority

Education Code Sections 31001–31008.

General Description

WICHE serves as a factfinding agency and a clearinghouse of information about higher education. It also makes basic studies of educational needs and resources. These functions are accomplished through the 45 programs and projects offered by WICHE within its three divisions: the Division of General Services, the Division of Mental Health, and the National Center for Higher Education Management Systems (NCHEMS).

A. Division of General Services.

This division currently sponsors 14 programs covering a wide range of activities in higher education. They include a four-state regional medical program, a program development unit, continuing education and research projects in nursing, a program to increase access of ethnic minorities to higher education, a continuing education program for library personnel, and a student exchange program for western students in the health sciences. California institutions receive funds from WICHE and other states to educate students from participating states not having health science programs. Tables A and B summarize the numbers of students educated and number of dollars received by California institutions of higher education as a result of the exchange program.

B. The Division of Mental Health

In addition to giving basic support to the Western Interstate Commission for Higher Education, the State of California through the Department of Mental Hygiene contributes $7,500 a year for support of WICHE's mental health program. This amount appears in the annual budget of the department.

The Division of Mental Health, which now has eight programs, was formed in 1956 at the request of the Western Regional Conference of the Council of State Governments. The following are some of the programs which have been of assistance to California citizens.

1. Summer work study programs in which college students are given an opportunity to determine whether they want to go on to careers in mental health.

2. Psychiatric education for general practitioners of medicine. Seminars are held to improve the psychiatric skills of general practitioners whose education has been deficient in this specialty area.

3. The development of new methods of collection and utilization of mental health data. As a result of one activity in this area, an annual census of mentally retarded state hospital patients is conducted. The resultant data outlining patients' needs is of great assistance in developing appropriate specific programs.

4. The development of new curricula for those preparing for careers in corrections, juvenile delinquency, probation, and parole as well as programs of continuing education for those already in the field.

For footnotes see the end of this agency presentation.

WESTERN INTERSTATE COMMISSION FOR HIGHER EDUCATION—Continued

Program Objectives—Continued

5. Assistance to four-year universities and colleges in the 13 western states directed toward improving the organization and delivery of mental health services throughout their campus communities.

In addition to these programs, personnel of the California Department of Health attend WICHE conferences and seminars where the latest and best methods for training personnel and developing mental health programs are outlined and discussed.

C. National Center for Higher Education Management Systems (NCHEMS)

This division, established in 1969, aims at improving higher education management through the design, development, and implementation of planning and management systems at institutional, state, and national levels. From among the 23 separate programs developed by NCHEMS, the following are currently significant in their use by California institutions of higher education:

1. Program classification structure—design o taxonomy of higher education programs that serve as a framework for comparable data excha and reporting, assist in program budgeting, and s as the framework for the development of general analytical models.

2. Information exchange procedures—develop of conventions regarding the manner in which inst tional data may be aggregated and arrayed for in institutional comparison.

3. Resource utilization analysis—development techniques which will aid institutions in more effici utilization of resources available to them.

4. Outputs of higher education—improvement planning, evaluation, and decisionmaking in hig education by development of quantitative and qual tive understandings of the outputs of education p grams.

Other NCHEMS products presently being de oped include student flow models, faculty activ analyses, cost funding principles, statewide plann systems and resource allocation and planning mod

UNIVERSITY OF CALIFORNIA—Continued

I. INSTRUCTION AND DEPARTMENTAL RESEARCH

The instruction and departmental research function includes most of the direct instructional resources associated with the schools and colleges located on the nine university campuses. These resources include faculty, teaching assistants, and various instructional support staff, supplies, and equipment needed to provide the breadth of courses and degree programs necessary to achieve the university's diverse instructional responsibilities. Included are classroom and laboratory instruction as well as joint scholarly research activities of students and faculty.

The eight general campuses expect an increase of 4,145 full-time students over the budgeted enrollment for the current fiscal year. A general fund increment of $7 million is provided to maintain the 1973–74 workload criteria for this enrollment increase. Two hundred and thirty-nine full-time faculty positions and related instructional support are added to maintain the 1973–74 student/faculty ratio of 17.41:1. An increase of 88 full-time teaching assistants will maintain the 1973–74 undergraduate student/teaching assistant ratio of 46.27:1. An increase in instructional support of $2.9 million will maintain the 1973–74 ra of instructional support per FTE faculty.

At the request of the Legislature, a higher educ tion budget project was initiated in 1971 under tl direction of the Department of Finance with partic pants from each of the higher education segment the CCHE, and the Legislative Analyst's office. Tl project was initiated for the purpose of developir alternate methods for budgeting faculty and is cu rently considering improving budgetary procedure f all instructional resources. As an interim method budgeting instructional staff, the University of Cal fornia and the CSUC have agreed to express the respective instructional staff requirements in tern of student credit units (SCU) per FTE instructiona staff. The proposed increase for 1974–75 of 239 ful time faculty is expected to produce 246.50 studer credit units (SCU) per faculty, which improves th figures actually generated for 1972–73 (240.68) an budgeted for 1973–74 (244.01). Calculations of SC per faculty by level of instruction are shown o Table 1.

EXTENDED UNIVERSITY

The extended university of the University of California, an experimental program whose pilot phase extends through 1974–75, was initiated in 1972–73. Degree programs are offered to students qualified to engage in university studies, but who are now effectively denied access because of university requirements with respect to part-time study, work obligations, finances, location, home responsibilities and/or other personal impediments to full-time, residential study.

The proposed budget for 1974–75 will permit con tinuation of those programs funded in 1973–74 Forty-two faculty positions will accommodate 77 FTE students in programs at the upper division leve leading to bachelors degrees and at the graduate leve leading to masters degrees. The total budget o $1,801,000 consists of $1.3 million of general funds for instruction and supporting expenditures, plus registration and educational fee income for support o program administration and services.

For footnotes see end of this agency presentation.

Instructional Costs and Faculty Productivity

Tables 1 and 2 present a display of instructional cost and students credit units per faculty. This information serves several useful analytical purposes: Among others, it affords an opportunity to examine the unit cost of instructional effort and its relationship to faculty instructional workload and degree output.

The cost data reflect all state general funded costs of instruction including a pro rata share of libraries, maintenance of plant and other institutional services. Since a method for determining the dollar value of the instructional component of faculty effort is currently lacking (faculty members also have research, public service, and administrative responsibilities), total faculty costs have been included as a component of instructional program expenditures. Unit costs by level are derived from annualized fall quarter student credit units and the distribution of fall quarter faculty contact hours. Table 1 displays students credit units per faculty and unit cost data for all four levels of students and reveals a significant difference in cost per unit of credit between levels. Table 2 recasts the information according to the three levels of instruction and provides cost at each level.

Two measures were enacted during the 1971 state legislative session which will help to assure continuing refinement of California's higher education management data systems. SCR 73 and SCR 105 urge both the University of California and the California State University and Colleges to produce program information in a form which will allow comprehensive financial comparisons of academic programs in the future, including the full cost of instruction of students. The data displayed this year represent a further step in this direction.

Data for actual years prior to 1972–73, as contained in the 1973–74 Governor's Budget, are not comparable because of major improvements in methodology that cannot be applied to these earlier years.

UNIVERSITY OF CALIFORNIA—Continued

I. INSTRUCTION AND DEPARTMENTAL RESEARCH—Continued

Table 3 indicates instructional faculty workload for the year 1972, developed for the first time on the University's new data system for instructional resources. The new system is much refined and accordingly more accurately reflects actual faculty-student contact. Because of material changes it is necessary to start a new series of data presentation since results using the new DSIR system are not comparable with data shown in earlier years. As further detail and historical statistics become available in the future, it will be possible to analyze and interpret input and output variables.

HEALTH SCIENCES

Enrollment is expected to increase by 601 headcount students (6.7 percent) in 1974–75 over budgeted enrollment level for 1973–74. Additional State funds totaling $4.4 million have been included for 1974–75, including (1) $3.2 million for 101.27 FTE new faculty and related support, resulting from application of the University-approved student/faculty ratios for each health science school to the planned total enrollment, (2) $1.3 million for increasing the state support of stipend costs for interns and residents, and (3) a $105,000 reduction in state funds which replaced the loss of federal funds in 1973–74 for the Schools of Public Health and a regional medical program. State funds of $392,000 are continued for the expenses of 85 medical residencies added in 1973–74 in primary care fields. A special state appropriation of $1.2 million was provided in 1973–74 and will continue in 1974–75 for support of a University program of clinical health sciences education, research, and public services at the Charles Drew Medical School.

SUMMER SESSIONS

University of California Summer Sessions are self-supporting instructional programs which offer courses leading to established regular session degrees and which also offer courses in a number of specialized programs. These summer programs provide a broad spectrum of instructional offerings. The specialized programs include intensive language courses conducted at several campuses which enable students to accelerate their progress toward degrees, and also serve as refresher courses for new and continuing students and for language teachers. Programs in education are offered to improve instruction in California's schools and colleges; credits earned may be applied toward California teaching credentials. Courses tailored to meet the specific needs of mid-career professionals are also offered. The projected decline in 1974 enrollments coincide with the national trend of falling enrollments in summer session.

II. ORGANIZED RESEARCH

The University is designated by the Donahoe Act as " . . . the primary State-supported academic agency for research." Its research activities contribute to the social, economic, and technological progress of the State and the nation. More specifically, the University, through the application of mission-oriented research toward the solution of complex problems facing society, enables man to control his environment more effectively. In addition, the research process is essential to the training of scholars in the methodology of inquiry and the nature of the creative scholarly process, especially in the advanced graduate and professional instructional programs. While individual research is necessary for the University professor to stay abreast of his field, all major universities have established organized research units to pool research talent and budgetary resources from traditional academic disciplines, in an interdisciplinary effort to meet the needs of inquiry, and to provide continuous contact with granting agencies and University administration. State General Fund support for organized research will be consolidated into the budget bill for 1974–75 at the current level. Included below is a table showing total expenditures for 1972–73, by primary fund source.

Totals	$231,154	$41,618	$189,536

III. EXTENSION AND PUBLIC SERVICE

The objective of extension and public service programs is to muster and focus special capabilities and resources for the benefit of the whole community so that the needs for continuing education, cultural enrichment, and public problem-solving can more effectively be accomplished. Programs include agricultural extension, university extension, and campus public service. At the request of the University a State General Fund reduction of $65,500 is included in anticipation of federal support for the Los Angeles Nurse Practitioner program.

IV. ACADEMIC SUPPORT

Libraries

The University libraries provide ready access to books, documents, and other scholarly materials for the University's students, faculty, staff, and faculty from other California colleges and universities. In addition, the libraries may grant borrowing privileges to any California adult. University libraries serve both instructional and research needs and thus must be diverse in nature and maintain comprehensive information about man's knowledge. The rapid expansion of knowledge requires an intensive effort to keep library materials current.

The proposed library budget for 1974–75 contains a state-funded increase of $500,000 to augment the University's intercampus and intersegmental library cooperation program for the purpose of extending the use of existing library resources. For reference-circulation, $347,000 or 40.0 FTE is provided for an enrollment-related workload increase. In addition, $697,000 is included in Universitywide provisions and programs for book price increases to maintain the current acquisitions level.

PROGRAM REQUIREMENTS	72–73	73–74	74–75	1972–73	1973–74	1974–75

UNIVERSITY OF CALIFORNIA—Continued

IV. ACADEMIC SUPPORT—Continued

Organized Activities

This function includes activities which are organized and operated in connection with educational departments and are conducted as basic support for the departments' educational programs. Examples of current programs include: demonstration schools (University elementary schools, nursery schools, and a psychology clinic school) which serve as interdepartmental teaching laboratories for experimentation, research and teacher training; dental clinics; vivaria, which provide centralized facilities for ordering, receiving and care of all animals necessary for teaching and research in the biological and health sciences; support for the arts, which includes direct sponsorship of performances and exhibits and funding for galleries and museums; support of specialized physical science, agricultural science, and engineering projects which are of service to academic departments and to industry; and support for intercollegiate athletics a smaller campuses.

In addition, the University has assumed responsibil ity for neuropsychiatric institutes, located at Lo Angeles and San Francisco, which were transferre from the Department of Health on July 1, 1973. Thes institutes provide mental health care and constitut the state's chief resource for training psychiatric resi dents, social workers, and related mental health pro fessionals. The reduction of $865,000 reflects th elimination of a one-time allocation in 1973–74 t offset the cost of start up problems of patient billing and collections.

Inpatient days of care will decrease in 1974–75 du to the remodeling of the youth drug unit at Langley Porter and the initiation of a partial hospitalization program at the Los Angeles facility.

Teaching Hospitals

The University operates four human medicine teaching hospitals at Davis, Los Angeles, San Diego, and San Francisco, as well as a veterinary medicine teaching hospital at Davis, for the clinical training of its health sciences students. The Orange County Medical Center, operated by the county, is the primary facility for clinical training at the Irvine medical school. Through other clinical affiliations with the Veterans' Administration, county hospitals, and private and community hospitals, students are exposed to a wide variety of diagnostic and therapeutic techniques.

This budget continues the 1973–74 level of clinical teaching support and proposes to transfer $1.3 million of the costs of interns' and residents' stipends from the expenditure program of the teaching hospitals' to the instruction and departmental research program. The total operating budget of University teaching hospitals will increase by $5,704,455 due to increases in patient care revenue.

V. STUDENT SUPPORT

Student services includes those noninstructional services which are provided for the benefit of the entire student population. The General Fund is used only to support those student services which provide administrative support to the instructional process. Included in this group are the registrar and admissions offices, and portions of counseling, dean of student activities, financial aid administration, and public ceremonies. A second group of student services activities is primarily for student well-being and consequently is funded largely from University registration fee income. These are categorized as student activities, personal student services, and instructional student services. Student activities include cultural and recreational programs, while personal student services provide health, housing, and placement services. Instructional student services combines both the instructional and noninstructional related portion of counseling, dean of student activities, and financial aid administration.

General Fund support for this function is proposed to remain at the same level as in 1973–74. University registration fee income is the major component of the restricted fund increase.

Student Aid

This program provides numerous financial aid opportunities for undergraduate and graduate students with financial need. During 1972–73, approximately 37,500 (31 percent of undergraduates and 42 percent of graduate) students received assistance from one or more financial aid programs administered by the University at a total cost of more than $56 million. The major sources of income for University-administered programs include student fees, federal funds, University opportunity funds, and gifts and endowments. Additional sources of financial assistance come from federally insured loans, traineeships, fellowships, "G.I." benefits, state scholarships, state-funded nonresident tuition waivers and part-time jobs during the school year.

The educational fee is the source of funding for the proposed increase in student aid. $1.5 million of the increase is needed to become an authorized lender under the Federal Insured Student Loan progra The balance of the increase is needed for growth existing grant programs.

Sources of funds for financial aid for University California students are shifting. These shifts, p marily in federal funds, are away from grants favor of loans and away from institutionally adm istered programs toward direct aid to students. F 1973–74, the federal government is implementing new Basic Educational Opportunity Grant (BEO program which is intended to substitute direct stude grants for part of the institutionally administer student opportunity grants (SOG). Similarly, there a shift in emphasis from University-administered N tional direct student loans (NDSL) to commerci loans insured by the federal government (the Feder Insured Student Loan Program—FISL.)

VI. INSTITUTIONAL SUPPORT

Administration and Services

Activities funded within these closely related functions include planning, policymaking, and coordination within the Offices of the Chancellor, President, and the Offices of the Regents. Also included for funding are a wide variety of supporting activities such as police, accounting, payroll, personnel, materials management, publications, and federal program administration, as well as self-supporting services such as telephones, storehouses, garages, and equipment pools.

Administration and services budgets will increa by $1,029,000, related to two program areas. Fir $980,000 in additional state funds will provide f expansion of the University's information syste development capability and for related data proce ing costs. Second, in accordance with Assembly B 42 of the 1972 Regular Session, $49,000 will provi for uniform and equipment replacement costs f certain categories of University employees.

VI. INSTITUTIONAL SUPPORT—Continued

Maintenance and Operation of Plant

This function provides for the maintenance and preservation of the University's physical plant which comprises 31.6 million square feet of buildings with related equipment and land. Major component activities include utilities and refuse disposal, custodial and grounds maintenance, structural and equipment maintenance, fire departments on two campuses, and plant administration.

General operating support for plant operations and maintenance will increase in 1974–75 by $1,989,712. This includes $645,000 of basic support for 918,605 square feet of new buildings to be added in 1974–75 ($449,000 for utilities, $84,000 for additional refuse disposal costs, $80,000 of initial operating support for a new fire station at Santa Cruz, and $32,000 for other related workload increases). Also, $1,350,000 is provided to improve building maintenance and janitorial services. An additional $3.3 million is budgeted in the University's provisions for allocation to cover increases in utility costs related to existing space.

Grounds—acres per staff FTE				20.2A	21.5A	21.5A

Provisions for Allocation

The 1974–75 increase in University central provision accounts includes $12.2 million for fixed costs ($2,984,000 for general price increases at 4 percent; $697,000 for library book price increases; $3,305,000 to cover mandatory cost increases for utilities; and $5,200,000 for academic and staff merit salary adjustments). The provisions for merit increases are calculated at a somewhat lower level than in previous years. Also, this budget provides $1 million for academic promotions. $250,000 is provided as restoration of a one-time 1973–74 cutback in the UC Press operating subsidy, and $1,100,000 is funded from federal contract and grant overhead to accommodate rising contract and grant workload. The University savings is reduced by $1.6 million to make the University's savings requirements more comparable with other state agencies.

State funds for Unemployment Insurance are reduced by $800,000, eliminating all budget support for this program in 1974–75. The University must also return $900,000 from unexpended prior-year Unemployment Insurance appropriations. These reductions are based on the premise that General Fund claims costs are lower than originally projected and that existing University reserves are adequate to cover claims and administrative costs in 1974–75.

An additional increase of $18.8 million is elsewhere in the budget to provide salary increases for university employees. No provision is made for employee fringe benefit increases as further study is required to determine the appropriate level of their benefit needs. Such a study is proposed to be conducted by a team composed of representatives of the Department of Finance, the Legislative Analyst, the State Personnel Board, the Postsecondary Education Commission and the University of California to review the salary and benefits of nonfaculty classes at the University of California, in relationship to comparable state civil service classes. Consideration will be given in future wage and benefit determinations to the findings of the proposed study.

The entire $32.2 million salary increase appropriation for the 1973–74 fiscal year is included in the expenditure detail although $8.1 million of the amount is still dependent upon Federal Pay Board action. The 1974–75 expenditures continue the full amount although the $8.1 million uncertified portion is reflected as a separate appropriation in order to treat it the same as civil service uncertified amounts have been treated in the salary increase portion of the Budget.

For footnotes see end of this agency presentation.

SPECIAL REGENTS' PROGRAMS

Expenditures for Special Regents' Programs for 1974–75 will total $20.9 million, an increase of $4.9 million over 1973–74. These programs are financed from regents' restricted funds.

Student Aid: The largest Special Regents' Program is student aid. Funds have been used to bring the University within the reach of more students who would not otherwise be able to attend. An augmentation of $1.5 million for 1974–75 will provide a total of $13.2 million for scholarships, fellowships, grants-in-aid, loans, tuition waivers and work-study employment. As a new program, it is proposed that $695,000 be funded on a continuing basis for nonresident tuition waivers to attract distinguished students to the University. State-funded waivers are continued at approximately 6 percent of nonresident students. To mitigate the effects of federal fund reductions, a $550,000 augmentation is provided for the University Student Aid program to maintain grants-in-aid and work-study employment for the substantial increase in students. Because of the likelihood of federal reductions in the National Direct Student Loan Program, University matching funds are reduced by $150,000.

Educational Enrichment: Certain special programs are designed to benefit students by significantly enlarging the scope of their educational experience. Increases totaling $321,000 will be provided for the Education Abroad Program, the Ethnic Studies Program and the Intercampus Exchange Program. A reduction of $250,000 will discontinue the Special Library Allocation Program.

Education Abroad Program: The Education Abroad Program enables students to benefit from an intensive involvement in a different cultural milieu at 13 University-affiliated centers in 12 foreign countries. The program will be augmented by $261,000 to incorporate as continuing program costs the temporary allocations provided by the Regents since 1970–71 to honor reciprocity agreements with host institutions.

Ethnic Studies Program: This program enabl campuses to accelerate and expand curriculum pla ning efforts, provide basic support for continued d velopment efforts, and hire staff to review library r sources and needs related to ethnic studies. Th 1974–75 allocation of $750,000 for the Ethnic Stu ies Program represents a $44,000 augmentation ov 1973–74 to cover the anticipated salary range adjus ment, merit increases, and employee benefits.

Intercampus Exchange Program: This progra helps to maximize the use of existing facilities an other resources by promoting a wide variety of inte campus activities. The judicious sharing of certai resources among the campuses, including library ma terials and research facilities for faculty and grad uate students, means that each campus does not hav to provide full and duplicative services. An increas of $16,000 over 1973–74 will provide support fo salary increases, higher equipment replacement cost for the intercampus bus service, increasing costs fo the library copying services, and the need for mor Universitywide conferences to facilitate planning an disseminate information of teaching innovation an improvements.

Special Library Collections: Funding for this pro gram is being eliminated in 1974–75 because it en courages the campus libraries to divert resource towards purchasing special library materials. Thus the program is being discontinued to enable the li braries to better utilize existing resources for curren education and research program needs.

Faculty Study: This new program category wil incorporate the regents' faculty fellowships and tw new programs: Regents' Research Program ($1.3 million) and dissemination of research results ($200, 000).

Regents' Faculty Fellowships: This program pro

UNIVERSITY OF CALIFORNIA—Continued

VI. INSTITUTIONAL SUPPORT—Continued

SPECIAL REGENTS' PROGRAMS—Continued

vides summer support for promising junior faculty members and summer support on sabbatical leave supplements for faculty members in the creative arts and humanities. An increase of $21,000 is proposed, which corresponds to the 1973–74 cost-of-living increase in academic salaries.

Regents' Research Program: In 1970–71, regents' funds were allocated to the campuses to provide organized research support. It is not clear whether the current fund sources will generate sufficient income to support the $1.3 million of continuing research costs, so the Regents' Research Program will be shifted to the Special Regents' Programs.

Dissemination of Research Results: The allocation of $200,000 for this new program will enhance the University's public service role through the development and implementation of pilot programs to improve access to and dissemination of research results. These programs will be developed at both the Universitywide and campus levels. The objective is to make University research results more available for use in the solution of public policy questions.

Other Regents' Programs: Included within this category are Isla Vista improvements, management studies, teaching assistant loans, provision for contingencies and a new program entitled correction of seismic and fire hazards.

Correction of Seismic and Fire Hazards: An appropriation of $2,000,000 will be included for the president to allocate, as required, for life safety projects, consisting primarily of correction of seismic deficiencies, and secondarily of fire detection and prevention systems in University structures not eligible for state support.

Teaching Assistant Loans: An appropriation of $149,000 will be provided for short-term loans for teaching assistants, and for those in similar positions, to ease financial hardships during the period of initial employment to receipt of the first paycheck.

GENERAL ANALYSIS

All critical capacity requirements of the University of California are being met to permit them to accept increased enrollments. Special efforts are made to maintain the planning and design activities which are essential to future growth. Through allocation of resources on a priority basis and through increased utilization of facilities, it has been possible to assure that the University will be able to fulfill its educational objective

Objectives

The University of California is a statewide institution of higher education with the following major functions:

1. *Instruction*

a. Broadly based instruction leading to the baccalaureate degrees,
b. Graduate programs leading to master's degrees and doctoral degrees, and programs of postdoctoral instruction,
c. Instruction in professional fields,
d. Programs for the preparation of teachers, and
e. Joint doctoral programs with the state colleges.

2. *Research*

The University is designated by the Master Plan for Higher Education in California as the primary state-supported academic agency for research, both basic and applied, and as the primary public repository for scarce documents and other unique library resources needed for the doctor's degree and for research programs.

3. *Public Service*

Provide public service in areas related to the University's programs of instruction and research.

The last four years of the five-year building program are the University's current estimates of need and do not represent a program approved by the administration. All projects reflected as funded from University overhead funds or nonstate funds are not reviewed by the Department of Finance.

NOTE: Estimates for 1974–75 take into account enrollment experience of fall 1973. Projections beyond 1974–75 have not yet been adjusted in light of the enrollments of fall 1973. The discontinuity of the projections is particularly pronounced for Irvine, where fall 1973 enrollment greatly exceeded the estimate.

Berkeley Campus							
MAJOR PROJECTS							
Alterations, 1972–73	$1,500,000[3PWCE]	–	$32,000[3E]	$32,000[E]			
Funds are requested for 1974–75 for equipping alterations to the second floor of the Doe Library.							
Life sciences building, correct seismic deficiencies	–	–	–	6,616,000[WCE]	$6,159,000[CE]		
Wheeler Hall, correct seismic deficiencies	–	–	–	2,358,000[WCE]			
Non-structural changes, correct seismic deficiencies	–	–	–	546,000[WC]			
Campus buildings, group 1, fire protection	–	–	–	1,086,000[WC]			
Alterations, 1974–75	–	–	592,000[3WC]	548,000[WCE]			
Funds are requested for 1974–75 for working drawings and construction to improve building space utilization, modernize for changing educational technologies, and rehabilitate current building performance standards in Lewis and in the life sciences building.							
Doe Library addition	434,000[3PW]	–	–	490,000[E]			
Funds are requested in 1974–75 for constructing a new 95,000 asf three-level research library addition east of Doe Library annex.							
Recreation field improvements, step 2	–	–	1,132,000[1C]				
Campus buildings, group 2, correct seismic deficiencies	–	–	3,100,000[2WC]	3,100,000[2WC]	3,172,000[2WC]		
Sports and recreation building	–	–	9,585,000[1C]	263,000[1E]			
			515,000[1C]				
Parking structure F, Hearst field	–	–	3,265,000[2C]				
			822,000[1C]				
Residence halls unit 1, detectors	–	–	84,000[2PWC]				
Residence halls unit 2, detectors	–	–	87,000[2PWC]				
Campus buildings, group 3, fire protection	–	–	562,000[2PWC]				
Parking structure D, step 2	–	–	50,000[1PW]	1,150,000[1C]			
Women's faculty club renovation	–	–	75,000[1PWC]				
Utilities, correct seismic deficiencies	–	–	–	547,000[WC]			
Hill area watertank and tower, fire protection	–	–	–	274,000[WC]			
Alterations for temporary occupancy and moving, correct seismic deficiencies	–	–	–	597,000[WC]			
Hearst mining and electron microscope buildings, correct seismic deficiencies	–	–	–	615,000[PW]	4,190,000[C]	$5,015,000[CE]	$825,000[E]
Campus buildings, group 1, correct seismic deficiencies	–	–	–	223,000[P]	272,000[W]	5,385,000[CE]	
Campus buildings, group 2, fire protection	–	–	–	1,086,000[WC]			
California Hall, correct seismic deficiencies	–	–	–	76,000[P]	2,263,000[WC]	150,000[E]

STATE BUILDING PROGRAM EXPENDITURES	Actual 1972–73	Estimated 1973–74	Proposed 1974–75	Projected 1975–76	Projected 1976–77	Projected 1977–78	Projected 1978–79
MAJOR PROJECTS —Continued							
Utilities and site development, 1974–75	–	–	222,000[3WC] 268,000[FWC]	707,000[WC]			
Funds are requested for 1974–75 for working drawings and construction of campus sanitary sewer system improvements, general campus lighting, alternate electrical service, communication ducts, and campus bicycle paths. Matching Federal funds will be requested from the Environmental Protection Agency's clean water program.							
Correct seismic deficiencies, 1974–75	–	–	–	207,000[WC]			
King Hall basement development	–	–	445,000[3WC]	33,000[E]			
Funds are requested for 1974–75 for working drawings, construction of 7,500 asf within an unexcavated basement of King Hall for the law school to provide academic and administrative office space, conference rooms, clerical offices and study carrels for teaching assistants and law students.							
Fire and police station	–	$60,000[3W]	1,455,000[3C] 20,000[1C]	102,000[E]			
Funds are requested for 1974–75 to construct a 19,420 asf central station to include 12,480 asf for the campus fire department, 4,290 asf for police and 2,650 asf of shared facilities. The structure will have offices, apparatus room for fire trucks and ambulance, maintenance areas, booking and holding area, labs, lost and found, communications center, training room, shower and locker room. Parking reserves will fund construction of administrative space for the parking office.							
Recreation hall	255,000[1PW]	3,945,000[1C]	200,000[1E]				
Struve Hall, detectors	–	–	57,000[2PWC]				
Campus parking, 1974–75	–	–	285,000[1PWC]				
East Hall renovation	–	–	–	211,000[WC]			
Relocate vegetable crops field headquarters	–	–	–	753,000[WC]

Los Angeles Campus							
MAJOR PROJECTS							
Service yard expansion	–	$1,994,000[MC]	$27,000[3E]				
Funds are requested for 1974–75 for equipping portions of a three-level reinforced concrete structure of 46,000 asf storehouse operation-type building providing receiving, processing, storage and administrative space for the various supply service systems supporting the general campus and health sciences center. Furniture and equipment will be provided for additional staff and expanded functions.							
Fuel storage facility	–	–	321,000[3WC]				
Funds are requested for 1974–75 for working drawings and construction of a three-compartmented, underground reinforced concrete structure beneath an existing road to contain tanks holding 420,000 gallons of fuel oil, and attendant pumps and feed piping to connect to the existing tanks at the central steam plant. Road modifications and aboveground facilities will provide for tank truck and trailer turn-out, fire hose and water line, chain link fence, and a retaining wall.							
Kinsey Hall, life safety and rehabilitation	–	–	–	$100,000[E]			
Campus storehouse building conversion	–	–	999,000[3WC]	22,000[E]			
Funds are requested for 1974–75 for working drawings and construction to convert the old laundry building of 12,340 asf to a facility for the campus mailing division and for purchasing department and inventory by extending an existing mezzanine to provide a complete second floor, installing a mechanical ventilation system for air conditioning the building, modifying existing loading docks and a freight elevator, and augmenting electrical capacity.							
Placement and career center building	–	700,000[1PWC]	25,000[1E]				
North campus student facility	–	910,000[1PWC]	50,000[1E]				
Utilities and site development, 1974–75	–	–	799,000[1PWC]				
Ackerman union student store alterations	–	–	500,000[1PWC]				
Parking structure—Westwood Plaza, south	–	–	114,000[1PW]	1,786,000[1C]			
Exterior lighting, step 2, 1974–75	–	–	–	406,000[WC]			
Health sciences center, correct safety deficiencies	750,000[2PWC]	240,000[kPWC]	–	2,276,000[C]	$1,138,000[C]		
Perimeter road completion	–	–	–	439,000[WC]			
Life sciences unit 3	2,798,000[FC]	–	–	900,000[E]			
	5,844,000[3C]						
	1,000,000[1C]

Riverside Campus							
MAJOR PROJECTS							
Webber Hall addition	–	$900,000[3E]	$680,000[3E]				
Funds are requested for 1974–75 for equipping 76,049 asf of space for environmental sciences, biochemistry, nematology, plant pathology, statistics, computer center, vivarium, and general academic areas in Webber Hall addition.							
Alterations 1973–74, step 2	–	–	562,000[3CE]	$255,000[CE]			
Funds are requested for 1974–75 for construction and equipping major alterations in Webber Hall, humanities, entomology, geology and library buildings to accommodate departmental space reassignments consequent to the completion of Webber Hall addition.							
Steam plant automation	–	–	530,000[mWC]				
Funds are requested for 1974–75 for working drawings and construction of a steam plant automation system to install specialized equipment in the steam plant and seven major buildings for monitoring and controlling the operation of the mechanical and electrical systems in each structure which will produce an estimated annual savings of approximately $150,000.							
Utilities and site development, 1974–75	–	–	–	282,000[WC]			
SPN I and II—correct seismic deficiencies	–	–	137,000[2PW]	1,793,000[2C]			
Ten major buildings, fire suppression devices	–	–	–	1,019,000[WC]			
Filters and coolers for glasshouses, step 2	–	–	–	408,000[WC]			
Activated charcoal filters—all state funded buildings on campus	–	–	–	520,000[WC]			
Correct structural seismic deficiencies	–	–	–	285,000[WC]			
Utilities and site development, 1975–76	–	–	–	296,000[WC]			
Major buildings, correct life safety deficiencies	–	–	–	828,000[WC]			
Humanities building—modify HVAC system	–	–	–	382,000[WC]			
Glasshouse and headhouse 15	–	–	–	497,000[WCE]			
Biological and agricultural sciences library addition	–	–	–	154,000[PW]	$2,432,000[C]	$103,000[E]	
Field house	–	–	–	676,000[1PW]	11,324,000[1C]	500,000[1E]	
Cultural center (1,500 seat auditorium)	–	–	–	340,000[1PW]	1,260,000[1C]	220,000[1E]	
					4,100,000[1C]	80,000[1E]	
Aberdeen Inverness residence halls, sprinklers	–	–	–	184,000[2PWC]			
Student craft center, phase I Canyon Crest Park	–	–	–	60,000[1PWCE]			
Student activity offices	–	–	–	300,000[2PWCE]			
Recreation center phase I, Aberdeen—Inverness area	–	–	–	30,000[2PW]	470,000[2CE]		
Utilities and site development, 1976–77	–	–	–	–	111,000[WC]		
Lothian Hall, sprinklers	–	–	–	–	104,000[2PWC]		
University commons, sprinklers	–	–	–	–	90,000[2PWC]

Temporary office buildings, fire protection, 1974–75	–	23,000 [k P W]	–	285,000 [C]			
Medical sciences building fire protection	–	–	–	397,000 [W C]			
Replacement facilities for U.C. Hospital non-inpatient care areas	–	–	–	348,000 [P W]	$4,322,000 [C]	$500,000 [E]	
Parnassus avenue development	–	–	–	736,000 [W C]			
Fire protection, 1973–74	–	631,000 [k P W C]					
Fire protection, 1972–73	$80,000 [3 P W C]						
Totals, Major Projects	$80,000	$689,000	–	$4,158,000	$4,322,000	$500,000	
TOTALS, EXPENDITURES, CAPITAL OUTLAY	$80,000	$689,000	–	$4,158,000	$4,322,000	$500,000	
Capital Outlay Fund for Public Higher Education	–	*689,000*					
Educational fee funds[3]	*80,000*						
Unfunded projects	–	–	–	*4,158,000*	*4,322,000*	*500,000*	
TOTAL, FIVE-YEAR PROGRAM							$8,980,000
Unfunded projects							*8,980,000*
Santa Barbara Campus							
MAJOR PROJECTS							
Learning resources center	$2,499,000 [3 C]	–	$917,000 [3 E]				
Funds are requested for 1974–75 for equipping a new building of 29,500 asf, to integrate campus service and instructional facilities for the development, production, storage, and distribution of educational media.							
Utilities and site development, 1974–75	–	–	330,000 [3 W C]				
Funds are requested for 1974–75 for working drawings and construction of campus safety lighting and improvements to the West Campus water system, in addition to funding the cost of the University's share for improvements to the Goleta Sanitary District sewage treatment plant.							
Various buildings, correct seismic deficiencies	–	–	–	$443,000 [W C]			
Campbell Hall, correct seismic deficiencies	–	–	–				
North Hall, correct siesmic deficiencies	–	–	–				

For the list of standard (lettered) footnotes, see the end of the Capital Outlay section of the budget.

UNIVERSITY OF CALIFORNIA—Capital Outlay—Continued

STATE BUILDING PROGRAM EXPENDITURES	Actual 1972–73	Estimated 1973–74	Proposed 1974–75	Projected 1975–76	Projected 1976–77	Projected 1977–78	Projected 1978–79
Santa Barbara Campus—Continued							
MAJOR PROJECTS—Continued							
Alterations related to engineering	–	–	532,000 [3WC]				
Funds are requested for 1974–75 for working drawings, construction and equipping a program of alterations and/or reassignments of space in five campus buildings, including new laboratory outfitting and the conversions of existing laboratories and related partitioning and alterations to meet requirements for changed usages.							
Library alterations	–	–	–	2,060,000 [C]	$33,000 [E]		
Funds are requested for 1974–75 for working drawings to provide an additional 6,700 asf of library space and interior partitioning rearrangements, and to extend air conditioning into the original portion of the existing library building, correct fire and earthquake safety deficiencies and lighting inadequacies, and close an existing entrance to improve circulation and security.							
Library addition	371,000 [PW]	–	1,000,000 [FC]	444,000 [E]			
Funds are requested for 1974–75 for construction of a 91,000 asf addition to the existing library to provide a four-level extension functionally integrated with the existing library. Together with the improvements in the existing library, the addition will provide increased campus capacity for 540,000 volumes and 1,386 reader stations.							
Residence halls detectors and structural, step 2—fire protection	–	–	285,000 [2PWC]				
Storke campus apartments, detectors—fire protection	–	–	228,000 [2PWC]				
Five major buildings, correct seismic deficiencies	–	–	–	269,000 [PW]	3,520,000 [C]		
General campus 1975–76, correct seismic deficiencies	–	–	–	146,000 [PW]	1,854,000 [C]

UNIVERSITY OF CALIFORNIA—Capital Outlay—Continued

STATE BUILDING PROGRAM EXPENDITURES	Actual 1972–73	Estimated 1973–74	Proposed 1974–75	Projected 1975–76	Projected 1976–77	Projected 1977–78	Projected 1978–79
Davis—Health Sciences							
MAJOR PROJECTS							
Medical surge unit 5, equipment	–	–	$360,000 E				
Funds are requested for 1974–75 for equipping 17,500 asf in surge-type accommodations for school of medicine faculty and graduate students associated with the present 100 MD student class size program. This equipment is budgeted as an advance against the medical sciences unit 1 equipment complement.							
Veterinary medicine unit 2	–	–	9,060,000 WC	–	$800,000 E	$800,000 E	
Funds are requested for 1974–75 for working drawings and construction for a 90,000 asf classroom, laboratory, and office building for the school of veterinary medicine to relieve deficiencies in existing accommodations and to permit enrollment increases and expansion of the DVM class size from 94 to 128 students.							
Utilities and site development, medical scences unit 1	–	$81,000 W	2,427,000 C				
Funds are requested for 1974–75 for construction of utilities and site development related to medical sciences unit 1 including addition to the central utility building to provide chilled water capacity for air conditioning; external utilities including domestic water, utility water, gas main, steam supply and return system, chilled water distribution system, and television cable; and, medical sciences circulation road including sidewalks, lighting, landscaping and storm drainage.							
Utilities and site development, veterinary medicine unit 2	–	–	1,227,000 WC				
Funds are requested for 1974–75 for working drawings of utilities and site development for the proposed veterinary medicine unit 2 project including: addition to central utility building, external utilities, and extension of circulation road to serve the proposed building.							
Medical sciences unit 1	–	20,460,000 C	533,000 E 55,000 1E	$1,560,000 E	830,000 E		
Funds are requested for 1974–75 for an initial increment of equipment to equip 73,000 asf in buildings B, C, and D which will be completed in April 1975, and which will contain library educational resources, and administration, classrooms and physical plant and suport facilities. Equipment for student activity facilities in building B will be funded from student fees.

San Francisco—Health Sciences

MAJOR PROJECTS							
School of dentistry building	–	$3,722,000 WC –3,322,000 C	$11,000,000 C	$500,000 E	$636,000 E		
Funds are requested for 1974–75 for construction of a 68,000 asf building containing office, classroom, laboratory, clinics and related support facilities. This building, in conjunction with remodeled existing dental school facilities will provide the necessary new and modernized on-campus facilities to accommodate a DDS class size of 108 students. Additional clinics and departmental facilities required for this increased class size will also be provided in two off-campus locations. Total DDS enrollment will be 423 students with another 165 students in graduate professional, dental hygiene, and graduate academic programs.							

For the list of standard lettered capital outlay footnotes, see the end of this budget supplement.

STATE BUILDING PROGRAM EXPENDITURES	Actual 1972–73	Estimated 1973–74	Proposed 1974–75	Projected 1975–76	Projected 1976–77	Projected 1977–78	Projected 1978–79
San Francisco—Health Sciences—Continued							
MAJOR PROJECTS—Continued							
HSIR—East 15th floor completion for school of medicine (genetics)	–	–	545,000 WC				
Funds are requested for 1974–75 for working drawings and construction to complete the interior of the 15th floor of the east HSIR tower for use by the genetics program in the school of medicine. The project will provide approximately 8,000 asf of faculty and student office, laboratory, and support facilities.							
U.C. Clinics "C" level interior completion for campus services, step 1	–	–	216,000 WC	221,000 WC			
Funds are requested for 1974–75 for working drawings and construction to complete approximately 12,000 asf of the interior shell space located on the "C" level of the parking structure II, to house campus administration and service activities, such as accounting, mailing division, ancillary physical plant shops, and storage.							
Moffitt Hospital modernization—new service facilities and related alterations—SB 519 deficiencies	–	–	2,100,000 C				
Funds are requested for 1974–75 to augment the 1973–74 construction appropriation to provide for a major strengthening and enlarging of the structural systems in the new construction portion of the Moffitt Hospital modernization project so as to meet the requirements of the building code amendments called for by Senate Bill 519.							
Replacement facilities for U.C. Hospital inpatient care areas—part of Moffitt Hospital modernization	–	–	6,445,000 WC	644,000 E			
Funds are requested for 1974–75 for working drawings and construction to provide replacement space as part of the Moffitt Hospital modernization project for inpatient care areas in U.C. Hospital which must be vacated because of seismic deficiencies in the existing U.C. Hospital building.							
Clinical eye center	–	–	2,093,000 1PWCE				
Moffitt Hospital improvements—reserve funded projects under $100,000, 1974–75	–	–	990,000 1PWC				
Moffitt Hospital equipment—reserve funded, 1974–75	–	–	600,000 1E

University of California

HASTINGS COLLEGE OF LAW

Located at San Francisco

Program Objectives

The college functions under the direction of a board of directors. The overall objectives of the college are:

1. Provide students a top quality legal education so that they will become experts in the use of the tools of their craft, and thus achieve a high level of professional competency.

2. Provide the legal profession with promising young men and women who can meet the needs of an increasingly interrelated and interdependent society. In other words to produce lawyers prepared for the various private and public roles performed by the legal profession.

3. Ensure that its graduates are sensitive to the problems of the administration of justice, have an appreciation of the technological-social-economic context in which legal institutions are shaped, and understand the responsibilities of the law as a means of deliberate change.

I. INSTRUCTION PROGRAM

Need

The instruction program is designed to provide thorough and systematic instruction in those branches of the law which will best prepare students for their responsibilities to the community as members of the legal profession.

Objectives

1. Develop in the students the required competency in substantive law demanded by the legal profession.
2. Develop students' skills in legal research and writing.
3. Provide students with an adequate background in the law through the study of comparative law, legal history and jurisprudence.
4. Instill in students through theory-practice clinical courses a level of professional competence and skill that will shorten the period of training in the law office.
5. Develop special skills in advocacy for trial lawyers, legal educators and judges. This task is to be accomplished with the addition this year of a new program, The Center for Trial and Appellate Advocacy, in the theory practice element of the instruction program.

Authority

Section 23451, et seq., Education Code.

General Description

The Instruction Program is composed of three elements including the classroom, theory practice, and the Center for Trial and Appellate Advocacy. Through these elements it is planned that the student will receive a combination of theoretical instruction, practical experience, and specialized training for trial lawyers.

Output	1972–73	1973–74	1974–75
Number of graduates	400	546	440
Percent of senior class	96%	98%	98%
Total number taking state bar examination	339	500	380
Total number passing state bar examination on first try (%)	266 (78%)	400 (80%)	304 (80%)
Total number passing state bar examination by second try (%)	325 (96%)	480 (96%)	364 (96%)

Faculty	*43*	*50.6*	*50*
Staff	*8.2*	*10*	*1*
Student assistants	–	*3*	

Theory-Practice

In this element, students receive training and insights in the skills of courtroom and office practice. This includes practical experience in preparation and conduct of trials including brief and oral arguments before the court. The experience assists the students in achieving proficiency in preparation and trial of civil cases, appellate procedures and legal medicine. The following activities are examples of this involved:

1. All second-year students, except those eligible and who elect to work on the Hastings Law Journal, are required to participate in the largest and most comprehensive moot court experience in the country. The course is operated under supervision of the Coordinator of Moot Court with the assistance of a student moot court board. This board selects and edits cases involving controversial issues which are assigned to the students. Two students, working as a team, research, brief and argue their assigned case. Oral presentation of argument is held and prominent members of the judiciary, practicing attorneys and selected students serve as judges.

2. A substantial number of students elect the trial practice course where the emphasis is on demonstrative evidence, jury selection, opening statements, examination of witnesses, or direct cross-examination and argument.

3. Third-year students who have achieved a cumulative average of at least 74 percent for two years are permitted to enroll in the legal clinic seminar for firsthand experience with actual cases, interviewing clients, gathering facts, interviewing witnesses and preparing the case for trial. This is done through volunteer-participation program including legal aid public defender's office, district attorneys, private attorneys, and many others.

4. A carefully selected group of students is permitted, under the close supervision of the federal public defender's office to represent indigents before the United States Commissioners. A prerequisite is previous clinical experience and a close study of the U.S. codes.

5. The Hastings San Francisco Neighborhood Legal Assistance Foundation Program involves the students in a five-hour seminar on consumer, welfare and housing problems as presented by the community in the form of individual litigants. The student is required to interview clients, witnesses and other parties in developing the case, to prepare memorandum of law and to bring the matter up to the point of actual trial. This is accomplished under the supervision of a licensed attorney.

6. Legal research and writing is a special seminar program calling for intensive training in advance techniques of legal research and writing including drafting of documents, legislation, and briefing.

Input	1972–73	1973–74	1974–75

Center for Trial and Appellate Advocacy

General Description

Provide specialized training to lawyers, legal educators and judges through short term intensified courses. It is estimated that 265 attorneys will be registrants in 1974–75 and 50 law students will benefit through the experience in assisting the participants and advocacy faculty.

Input	1972–73	1973–74	1974–75

HASTINGS COLLEGE OF LAW—Continued

II. INSTRUCTIONAL SUPPORT PROGRAM

Need

Students and faculty members need reference material for various preparations and presentations in the legal education process and need to be kept informed of current developments in the changing aspects of the law.

Objectives

1. Provide reference material so that students and faculty members can prepare for various aspects in the learning and teaching of law.
2. Provide students and faculty members with a current publication of recent developments in the changing laws.

Authority

Section 23451, et seq., Education Code.

General Description

The instructional support program is composed of the library and law journal elements and ensures that student and faculty members will have the use of reference material and will be kept informed, with members of the bench and bar, of current developments through the preparation and publication of the law journal.

PROGRAM REQUIREMENTS	72–73	73–74	74–75	1972–73	1973–74	1974–75
Continuing program costs	13.9	16.5	16.5	$350,505	$386,134	$414,843

Law Journal	1	1	1	44,008	47,376	48,926

Law Library

In the law library, provision is made to maintain a carefully selected collection of legal reference material sufficient in number and scope to allow students and faculty members to research questions of law in preparation for classroom presentations and assignments, and for moot court, trial practice and legal clinic assignments. At the present time Hastings Law Library consists of some 102,000 volumes.

The library is open until 11 p.m. five days a week and until 10 p.m. on Saturday and Sunday to maximize the availability of reference material.

This year's budget proposes to add to the service capabilities of the law library with the addition of one professional librarian, one and one-half library assistants, equipment, and an increase in the level of funding for binding and preservation of the library collection.

Output	1972–73	1973–74	1974–75

Law Journal

In the law journal portion of the budget, provision is made to keep students, graduates, members of the bench and bar informed of current developments in the law and problems related to the legal profession. This is accomplished by preparing a scholarly publication five times a year. Present subscriptions by students and the public approximate $29,000.

The Hastings Law Journal is devoted to indepth analysis and discussion of significant legal problems. Its articles range from exhaustive discussions by eminent legal scholars and members of the legal profession to notes and comments by students on recent developments in the law. In addition, it presents reviews of new books of special interest to the legal profession. Students selected to participate in the work of the law journal find it a rewarding and valuable educational experience. Ninety will do so in 1974–75. The benefits of the law journal experience are realized not only during the formal legal education, but also are apparent in the advantage the student has when seeking a position after graduation. Students are selected to participate in the work of the law journal on the basis of a combination of their ability to research, to write and to analyze particularly complex legal situations, and the achievements they have attained in their law school courses.

The several aspects of the law journal, its educational worth and the scope of its articles, combine to form a publication of immeasurable value to the practicing bar and to the entire legal profession.

Input	1972–73	1973–74	1974–75

III. STUDENT SERVICE PROGRAM

Need

Good health is required by students in order to achieve academic goals, and students with limited financial resources require assistance in the form of loans, grants, scholarships and/or work experience in order to complete their legal education. To benefit from the legal education the students and graduates require a wide range of professional opportunities.

Objectives

Provide comprehensive student health services involving both oncampus treatment by a doctor and nurse, and more extensive medical attention at the University of California Medical Center.

Provide supportive financial aid and counseling through loans (federal, state, private), scholarships, grants-in-aid, special grants based upon financial hardship, and the student pay—work-study portion of the program to assist students in meeting their financial needs.

Provide employment for second-and third-year students in various private and public law offices and agencies on a part-time basis during the academic year, both from the standpoint of financial assistance and on-the-job experience, and for second-year students during the summer period.

Provide comprehensive placement services for graduating students.

Authority

Section 23451, et seq., Education Code.

General Description

The student services program is composed of three elements which are the offices of health services, financial aid and placement. Through these functions, the students are provided with services to assist in maintaining good health and necessary financial assistance to complete the instruction program and placement services are available in order to maximize the benefit from a legal education.

PROGRAM REQUIREMENTS	72–73	73–74	74–75	1972–73	1973–74	1974–75
Continuing program costs	5	5	6	$502,960	$743,498	$1,001,061

Student pay—work-study	–	–	–	60,816	64,830	64,830

Student Health Services

General Description

The student health service provides oncampus dispensary care including services of a nurse and physician four hours a day, five days a week. Emergency care is provided at the San Francisco Medical Center, University of California. Hospitalization is also provided at the San Francisco Medical Center. The basis for the medical service is an agreement entered into between the medical center and the college. Through this element, married students and their families can obtain supplemental major medical insurance coverage at their own expense.

Input	1972–73	1973–74	1974–75
Expenditures	$91,362	$108,880	$106,000

Student Financial Aid

The financial aid office is responsible for planning, developing and providing financial assistance for students who would not be given the opportunity for legal education without additional resources. The functions of the office are divided into four groups: (1) information dissemination and application processing, (2) need analysis and award distribution, (3) financial, loan and work counseling, (4) reports and program development.

All financial aid applicants are required to file the college scholarship service "Graduate and Professional Students' Financial Statement", which gathers, processes and evaluates information concerning family and student assets and liabilities. These statements combined with student interviews determine the type and amount of financial aid for which the applicant is eligible.

The financial aid office also assists students in the securing of financial resources from external programs such as guaranteed loan programs, American Bar Association programs, Council on Legal Education Opportunity grants as well as other governmental and private grants and scholarships.

Student Placement

General Description

The extensive placement program serves three functions: To fit the student into his proper place in the legal profession by providing oncampus interviews with firms, legal departments of public agencies and corporations, and various branches of the judiciary; to provide, through its summer observation program, law practice experience during the summer months for the second-year student; and to fit students into part-time employiment with law firms, government agencies, public law offices, the judiciary and special poverty law office programs that will provide not only valuable law experience but insure some financial remuneration enabling him to continue school.

Output	1972–73	1973–74	1974–75

IV. INSTITUTIONAL SUPPORT PROGRAM

Need

To achieve the overall objectives of the college, the activities must be directed and coordinated to produce the most effective and efficient administration. To accomplish this management requires fiscal information on resources used in relation to resources available. In order to provide a legal education to a representative portion of the population, the college must have a timely system of selecting students in accordance with criteria and standards. To reflect a student's progress toward and achievement of a legal education official records must be maintained. The assistance of the alumni is required for additional student financial aid resources and employment of students and graduates. In addition all activities of the college require functioning facilities.

Objectives

1. Provide active leadership in meeting current administrative problems.
2. To provide management with fiscal information on resources used in relation to resources available and to provide business services for program supervisors in the performance of various program operations.
3. Provide a reasonable selection system for accepting students.
4. Provide for maintenance of student records.
5. To foster a continuing relationship between the alumni and the college including the involvement of alumni in campus community affairs.
6. To maintain physical plant facilities and provide security to permit operations of the programs.

Authority

Section 2345, et seq., Education Code.

General Description

The law school was founded in 1878 by Serranus Clinton Hastings, the first Chief Justice of the Supreme Court of the State of California. On March 26, 1878, the Legislature provided for affiliation with the University of California. The college board of directors has the primary responsibility through its executive officers for the administration of all affairs of the institution. The Chief Justice of the Supreme Court of the State of California is president of the board of directors, which is composed of eight members. Vacancies in the board of directors shall be filled by the board.

The juris doctor degree is granted to the graduate of Hastings College of Law by the faculty of the University of California and signed by the president of the university.

This program is carried out through the activities of executive management, general administrative services, facilities operation and community relations offices.

Executive Management

Administration of the college is the responsibility of the dean and his chief administrators including an associate dean and registrar, and three assistant deans. The dean and the registrar are, by statute, officers of the college; the registrar serves as secretary to the board of directors. Administrative responsibility includes fiscal management and planning, coordination of instructional programs, alumni promotion, fund development, public relations, curriculum planning, development of new instructional and theory practice programs, supervision and development of physica plant operations, and personnel management.

In this year's budget an additional assistant dea position has been added to assist in the collegewid coordination of student affairs activities.

HASTINGS COLLEGE OF LAW—Continued

IV. INSTITUTIONAL SUPPORT PROGRAM—Continued

Admissions

Students are accepted through a screening process so that students most highly qualified and with the greatest aptitude for the law are selected. Special attention is devoted to student applications under the legal education opportunity program in an effort to ensure that the student may reach the academic goal. Selection is based on the applicant's undergraduate record, the law school admission test score and other information submitted. Overall, about 10 percent of those who submit initial applications are accepted into the college. As a result, a highly qualified student body is enrolled.

Input	1972–73	1973–74	1974–75
Expenditures	$32,201	$36,284	$37,652
Personnel man-years (staff)	3.8	4	4

Facilities Operation

Daily housekeeping and upkeep of the physical plant of the college is provided in facilities operation. The area involved includes the annex located at 55–75 Hyde Street and the rented space at 305 Golden Gate Avenue. The activities include the making of special repairs, supervision of student lounge, dining areas and maintenance of the classroom, library and other college areas. Provision is made for security and preservation of order in the college area. Provision also has been made in this budget for correcting nine special repair and maintenance projects.

Input	1972–73	1973–74	1974–75
Expenditures	$261,323	$355,446	$401,294
Personnel man-years	16.3	18.5	19.5
Staff	*8.5*	*13*	*14*
Student assistants	*7.8*	*5.5*	*5.5*

Community Relations

The alumni association has more than 5,200 living members, the vast majority of whom are practicing in California. The association includes approximately 160 of the judiciary and a number of California legislators. It is instrumental in providing loan funds and scholarships and also constitutes a reservoir of prospective employers for the students. It distributes a news bulletin three times a year and a biannual alumni directory. Events are sponsored for alumni and students to exchange ideas regarding the practical aspects of the legal profession.

Input	1972–73	1973–74	1974–75
Expenditures	$40,019	$45,073	$46,866
Personnel man-years (staff)	3.9	4	4

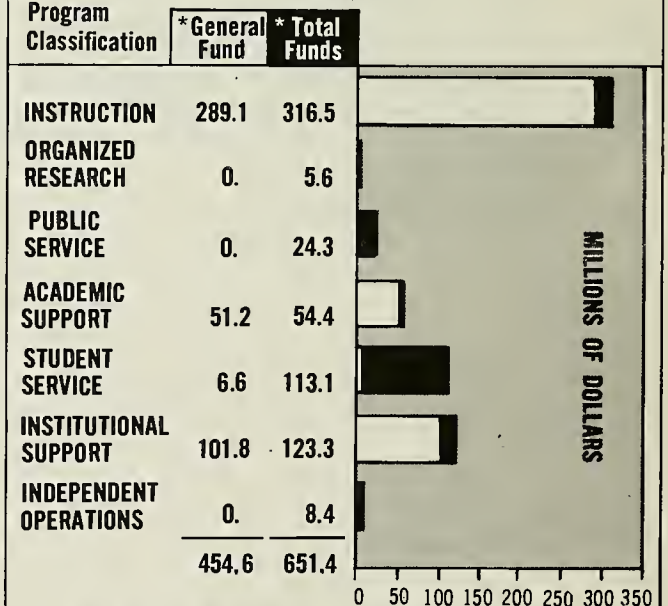
Introduction

The California State University and Colleges (CSUC) system estimates that it will educate 232,795 full-time equivalent students in 1974–75. This major public segment of higher education provides instruction throughout California on 19 campuses and through a statewide network of external degree programs. General Fund support for CSUC is proposed at $454,583,504 in the budget year. Figure I displays the 1974–75 funding proposal as it relates to each of CSUC's programs.

Managing a segment of more than 30,000 employees and 319,000 students (headcount) is an especially complex and challenging task. CSUC is developing tools which provide better systemwide planning and operational information, and is using others developed by the National Center for Higher Education Management Systems (NCHEMS). For example, the NCHEMS Program Classification Structure is the basis for the budget format on the following pages, and also has been used in designing and implementing a computerized accounting and budgeting data system.

Table I summarizes the 1974–75 projected sources of funds and their intended program use in the framework of the NCHEMS Program Classification Structure.

Figure I
CALIFORNIA STATE UNIVERSITY AND COLLEGES PROGRAM BUDGET
1974/75



* Totals include the unallocated portion of the 1973/74 salary increase ($5.9 million) which is not reflected in the individual program totals.

[1] This summary includes expenditures, but not personnel man-years, for auxiliary organizations and foundations special projects.

THE CALIFORNIA STATE UNIVERSITY AND COLLEGES—Continued

Introduction—Continued

Other NCHEMS' products are being used experimentally and in one case as actual operational tools. Eight campuses have tested Resource Requirements Prediction Models for use in the budgetary process. Several are testing and employing student flow models which track student course selection decisions and year-to-year progress in order to determine needs for future instructional programs and resources.

The Fullerton Campus pilot project deserves special mention. It is the initial implementation of the objectives mandated by special legislation in 1971 (Senate Bill 1239, Harmer, Chapter 1164). Since 1972, extensive liaison between the Fullerton Campus and NCHEMS has led to application of NCHEMS products within one school of the campus. Currently, efforts are directed to campuswide usage and validation of these management tools. Future plans include expansion of those management information procedures to other CSUC campuses. In addition, the Fullerton Campus is part of a national NCHEMS coordinated 60 campus consortium developing means for presenting higher education information that is comparable and sufficiently comprehensive for planning use at the federal, regional and state levels as well as on the individual campus.

I. INSTRUCTION

Need

The California State University and Colleges provide a program of instruction to serve the following needs:

1. Educating individuals in the liberal arts and sciences, in applied fields and in the professions so that they are equipped for entry or advancement in a profession or occupation, and/or are prepared for advanced study.
2. Assuring opportunities for qualified individuals to be admitted to college and to progress toward degree, credential, or certification goals.
3. Updating knowledge and upgrading skills after graduation.

Objectives

The objectives of the instructional program of the California State University and Colleges are as follows:

1. To turn out trained and qualified individuals.
2. To ensure efficient, effective, and relevant instructional programs through a continuous evaluation of existing programs and the planning of new programs.
3. To admit, instruct and award degrees to qualified students in the liberal arts and sciences, certain professions, applied fields, and teacher education during the regular academic year and summer at 19 local campuses and at off-campus centers of learning.
4. To operate an extension program to supplement regular classroom instruction.
5. To provide methods of increasing the scope and relevancy of instructional programs.

The 1974–75 budget for regular instruction projects a reduction in full-time equivalent students of 495 FTE, despite the continuing systemwide increase of full- and part-time students (headcount). Table II displays the 1974–75 changes in FTE and headcount students on each campus for the past, current and budget years. Table III provides similar information for other instruction program components: special (summer) session instruction and extension instruction (for credit).

A. Regular Instruction

The primary function of the California State University and Colleges is the instruction of undergraduate and graduate students, through the master's degree level, in the liberal arts and sciences, applied fields, and certain professions not elsewhere assigned by the Master Plan. Table IV displays the distribution of undergraduate and graduate FTE students within the various academic disciplines. Table V provides complementing data on section enrollments (class size) for 1971–72 and 1972–73.

Academic planning carried out on each CSUC campus ensures the availability of appropriate instructional resources. These include faculty, technical, clerical, and administrative personnel, facilities, equipment, operating supplies and materials, libraries, and other services.

Academic advisement of students in the California State University and Colleges typically is carried out by the teaching faculty and department chairpersons as part of the ongoing instruction program. The faculty advisor assists students in planning their academic programs by acquainting them with departmental, institutional, and Education Code requirements.

Instructional programs presently are offered on 19 CSUC campuses. Humboldt, Los Angeles, Hayward, Pomona, San Luis Obispo, San Bernardino, Dominguez Hills, and Bakersfield instruct on the quarter system. Instruction is provide on a semester basis at the other CSUC institutions except Stanislaus which operates on a 4-1-4 term basis. Los Angeles, San Luis Obispo, Hayward, and Pomona are year-round operations, with a state-supported summer quarter. The International Program allows CSUC students to study abroad for two semesters and receive credit for such work on their home campuses.

All curricular offerings are based on the Master Curricular Plan for the California State University and Colleges and are expressed in an academic master plan for each campus. The Chancellor may approve the establishment of new academic programs when such programs have been projected in an academic master plan previously approved for that campus by the Board of Trustees. These programs are subject to review by the Coordinating Council for Higher Education (to be replaced by the Postsecondary Education Commission).

In 1972–73, the California State University and Colleges awarded 55 percent of the bachelor's degrees and 35 percent of the master's degrees granted in California. More than 200 different baccalaurea and/or master's degrees are offered in broad dis pline areas. Table VI displays the number of bac laureate and master's degrees conferred over the pa four years, through 1972–73. Table VII shows t distribution in 1972–73 of these degrees by academ discipline.

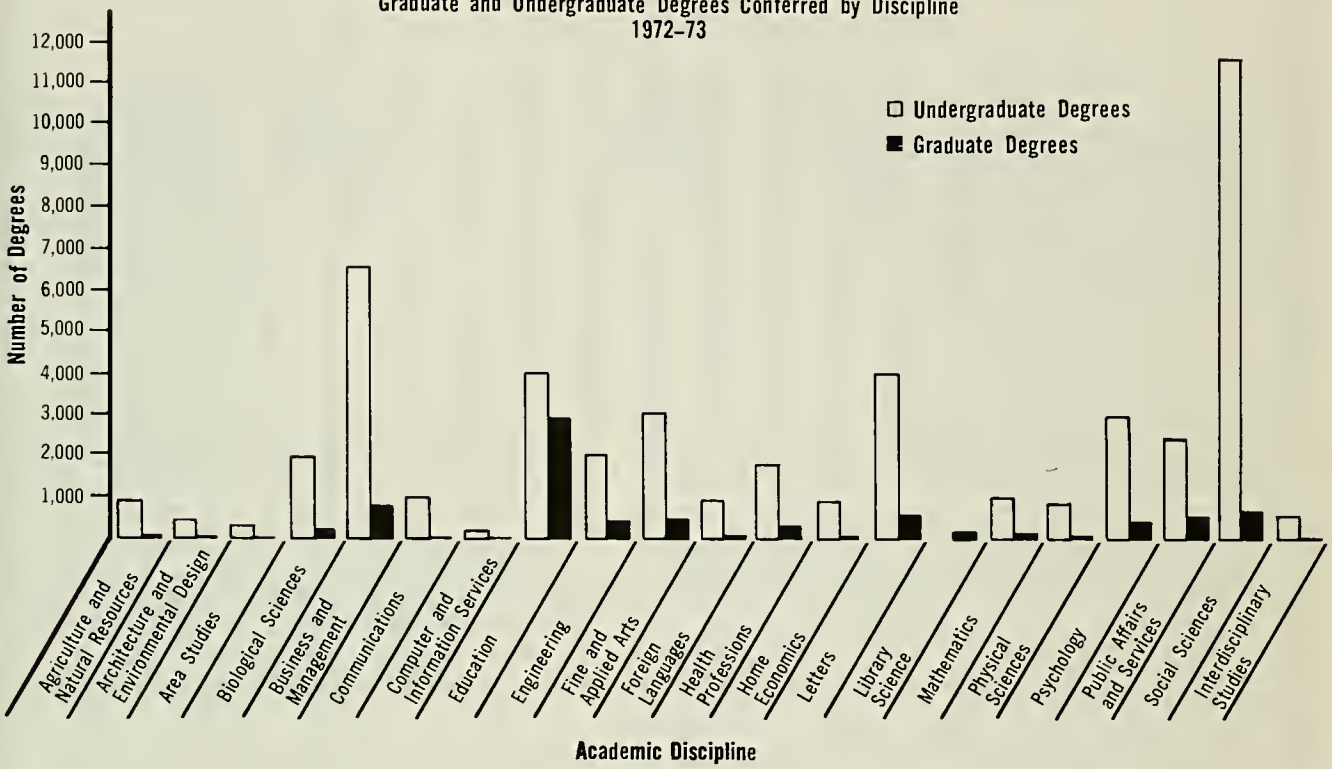
1972–73



In 1973–74, $1.3 million was provided for the development and evaluation of innovative instructional Programs [2]. Program support has been continued in the 1974–75 budget. Examples of fund use include a weekend college, credit by examination, assessment for credit of work and other outside experiences, increased use of media in instruction, modularized courses for self-pace learning, credit by examination, and efforts to familiarize faculty with specific instructional technologies.

Project evaluation by the Office of the Chancellor is an integral part of the innovative program. Periodic progress reports are being provided to the CSUC Board of Trustees, faculty and the executive and legislative branches of state government.

1974–75 Regular Instruction Program

The 1974–75 budget includes $1,401,248 for the Innovation Program. Funds are provided for continuation of support for certain promising campus projects begun in 1973–74, as well as the development of new campus pilots. The balance of available resources will be allocated to systemwide projects. Particular effort will be made to expand the development and use of comprehensive competency-based examinations to provide accelerated course achievement.

The 1974–75 instructional faculty proposal reduces total CSUC faculty from 13,068.1 for 1973–74 to 13,050.9 for 1974–75. This is the result of a reduction in FTE enrollment from the budgeted level of 233,290 in 1973–74 to 232,795 in 1974–75. Table VIII summarizes the most recent actual (fall 1972) distribution of CSUC faculty by rank and level of instruction.

[2] Specific budget allocation for the Innovative Program is included in the Academic Support Program; however because of the influence on Instruction, the program description is included in the Regular Instruction narrative.

Totals	3,258.3	–	3,057.3	–	4,388.9	–	637.6	–	278.1	–	230.9	–	11,851.1	
Percent of Total Faculty		27.5		25.8		37		5.4		2.4		1.9		1

The faculty budget includes 75.3 positions that will be allocated by the Chancellor's Office to reduce the impaction of increased student demand in certain course offerings. This method of distributing instructional faculty positions should favorably affect normal student progress, reduce excess credit accumulation and aid the CSUC system in meeting shifts in student demand.

Instruction of students by the budgeted faculty will require a systemwide per term average productivity of 267 student credit units per full-time equivalent faculty (SCU/FTEF), which is equivalent to the student faculty ratio of 17.8 to 1 budgeted for the current year. This productivity goal will require an average faculty workload slightly exceeding 12 units per term including faculty units earned for independent study.

In 1971, the Legislature directed the Department of Finance to cooperate with the California State University and Colleges, the University of Californi the Coordinating Council for Higher Education, ar the Legislative Analyst, in developing a faculty pr ductivity-based method of budgeting faculty positio for both senior segments of public higher educatio The interim device selected is the "productivit ratio." Table IX, Faculty Productivity by Campu displays changes between the past, current and budg year in average student credit units generated b faculty on each of the 19 campuses. Table X, Facult Productivity by Discipline, illustrates the differenc in 1972–73 and 1973–74 among the academic disc plines. Note the substantially lower ratios in the pr fessional disciplines of nursing, engineering an architecture as contrasted with the high ratios in suc disciplines as psychology, home economics and bus ness and management.

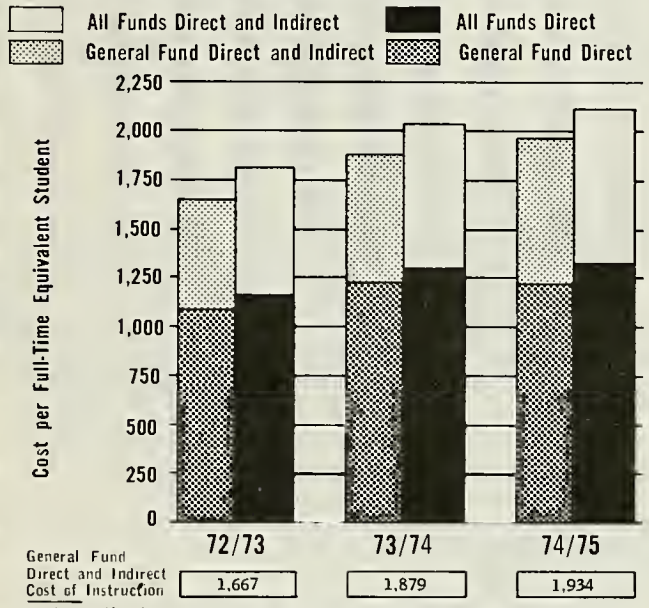
Steps also have been initiated by the Coordinating Council for Higher Education (to be replaced by the Postsecondary Education Commission) to develop "costs of instruction" information. This budget displays in Tables XI and XII unit cost data for CSUC. "Unit cost" is a variable which captures the influen of class size, faculty productivity, and other critical i structional factors. Such measures will have conside able budgetary and general analytical use in t future.

Table XI

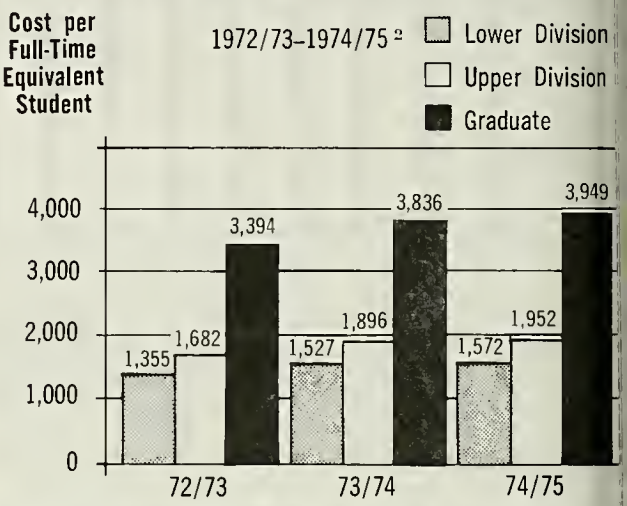
CALIFORNIA STATE UNIVERSITY AND COLLEGES
The Cost of Instruction per FTE Student [1]
1972/73–1974/75 [2]



[1] Instructional costs pertain only to regular instruction and exclude costs related to summer session and extension for credit. Direct costs are essentially "teaching costs;" and indirect costs include the prorated costs of the support programs.
[2] Costs related to 1974/75 proposed salary increases are excluded.

Table XII

CALIFORNIA STATE UNIVERSITY AND COLLEGES
The Cost of Instruction per FTE Student [1]
(General Fund cost by level of instruction)



[1] Instructional costs pertain only to regular instruction and exclude costs related to summer session and extension for credit. Costs include direct teaching costs as well as indirect costs prorated from support programs.
[2] Costs related to 1974/75 proposed salary increases are excluded.

This budget increases the funds available for sabbatical leaves. An additional $183,183 has been budgeted to continue the present provision of one sabbatical leave out of 12 eligibles in 1974–75.

Recent changes in statutes augmenting practice teaching requirements (the "Ryan Act") have increased the amounts of funds due local school districts who provide practice teaching services. The 1974–75 budget includes $260,000 to fund this increase and to support the related need for additional campus coordinators.

In the use of innovation funds, special emphasis has been placed on competency-based learning. Administration of experimental programs in credit by examination has been undertaken. This budget provides $134,250 to support credit by examination activities on a continuing basis.

This budget provides $997,308 to change the technical-clerical formula established 15 years ago at 0.22 support positions for each faculty FTE. Through the budget, clerical staff support will increase to 0. positions for each full time equivalent departmen chairman. This additional support responds to the in creased emphasis at the upper division and graduat level of study and the expanded scope of academi programs and related administrative requirements.

Also included are $15,134,000 for a 5.45 percen salary increase for instructional and related classes and $5,382,000 for a 3.73 percent salary increase fo noninstructional California State University and Col lege employees. Also, $5,114,000 is proposed for non instructional employee benefit increases. This amoun has been added as the result of a recent study of tota equivalent compensation need within the state civi service, whose classes and benefit structure are com parable to noninstructional positions in CSUC. Th total salary and employee benefits increase proposed for CSUC employees in 1974–75 is $25,630,000.

THE CALIFORNIA STATE UNIVERSITY AND COLLEGES—Continued

I. INSTRUCTION—Continued

A. Regular Instruction—Continued

In addition to the salary increase proposed, the 1974–75 budget includes $1.4 million for elimination of a present unique salary differential between faculty classes. The California State University and Colleges system currently maintains two separate salary schedules for faculty, distinguished only by whether faculty have an earned doctorate or its equivalent. Through this budget, all faculty at the same rank will be placed in a single class. Distinction will be made through individual evaluation of ability and performance, and will result in step and rank differentiation. The 1974–75 budget also includes $1 million for faculty promotions.

Input	1972–73	1973–74	1974–75
Expenditures	$255,789,923	$298,861,892	$307,534,452
Personnel man-years	16,318.6	16,531.3	17,385.1

B. Special Session Instruction

The California State University and Colleges operate summer sessions at all campuses. Table III on page 506 displays actual and full-time equivalent enrollments for summer session on each campus. This is a fully reimbursed institutional term, and not part of the ongoing college year in CSUC.

Summer sessions throughout the CSUC system have been experiencing declining enrollments since 1969 when 12,331 full-time equivalent students were enrolled. In 1974–75, 9,539 FTE students are projected based on the recent trend.

A CSUC systemwide task force is studying problems facing summer session and will make recommendations on steps necessary to deal with them. Consideration is being given to economic pressures on the program, changing student needs, competition, enrollment trends, and to ways of developing programs that will serve more qualified students in the future.

Input	1972–73	1973–74	1974–75
Expenditures	$6,039,116	$6,575,851	$5,595,581
Personnel man-years	606.7	605.2	522.9

C. Extension Instruction (For Credit)

Extension instruction, a non-state-supported function designed to serve a variety of needs, is offered year-round by the California State University and Colleges. One aim is to provide students a means for making up deficiencies in the educational program and to accelerate the attainment of degrees and credentials. Within the field of continuing education, teacher education provides access for teachers to new techniques to improve instructional expertise. Courses are concentrated at the upper-division level and are designed to satisfy school district and state credential requirements.

Extension enrollment in 1973–74 is 8,371 full-time equivalent students. Table III on page 506 displays enrollments for this instructional component. Instruction is offered in public administration, criminal justice, business administration and psychology.

Recently, much of extension instruction has been provided through the External Degree Program. This program enrolled 310 FTE students in the rather limited, pilot degree programs of 1972–73. The External Degree Program presently offers instruction in 14 degree programs and anticipates adding three or four more degree programs early in 1974. An overriding intent of this program is to be self-supporting which may preclude participation by low income students. Therefore, an additional $175,458 has been budgeted, primarily for fee waivers to assure access to these students.

Input	1972–73	1973–74	1974–75
Expenditures	$2,608,788	$3,479,113	$3,336,185
Personnel man-years	217.6	298.5	289.1

II. RESEARCH

Need

Governmental agencies, business, industry and community associations require research assistance. Providing this type of assistance makes classroom instruction more effective.

Objectives

To provide community services research within the competence of faculty of the California State University and Colleges, to the benefit of classroom instruction.

General Description

This program is entirely reimbursed by governmental agencies, business and industry, and community associations requesting research over a wide problem range. Research is authorized when problems are within faculty members' competence, when adequate financing can be provided for facilities, staff, and equipment, and when the projects are within the institution's educational mission.

THE CALIFORNIA STATE UNIVERSITY AND COLLEGES—Continued

II. RESEARCH—Continued

Costs of the Individual and Project Research Subprograms are those associated with special research projects administered directly by the campuses and funded for specific periods by federal, state, and local governments; nonprofit agencies and foundations; and private businesses and corporations. All of these programs are reviewed and approved by campus officials to ensure that they fall within the educational mission of the institution. It is considered essential that 80 percent of the research projects involve students, that students receive financial aid (stipends or salaries), and that projects relate closely to the instructional program.

PROGRAM REQUIREMENTS	72–73	73–74	74–75	1972–73	1973–74	1974–75
Research	7.5	18.7	18.7	$6,272,856	$5,628,313	$5,640,134
General Fund	*1*	–	–	*13,930*	–	–
Reimbursements	*6.5*	*18.7*	*18.7*	*160,026*	*258,313*	*270,134*
Foundations	–	–	–	*6,098,900*	*5,370,000*	*5,370,000*

III. PUBLIC SERVICE

Need

Various community segments within campus geographical service areas require specialized services.

Objectives

To make available to the public the resources and unique capabilities that exist within the CSUC institutions.

PROGRAM REQUIREMENTS	72–73	73–74	74–75	1972–73	1973–74	1974–75
Continuing program costs	534.5	502.6	447.8	$25,028,627	$25,691,779	$24,260,237
General Fund	–	–	–	*–13,820*	*–100,000*	*–100,000*
Reimbursements	*532.4*	*499.6*	*444.9*	*5,598,773*	*7,226,636*	*5,796,538*
Continuing Education Revenue Fund	*2.1*	*3*	*2.9*	*24,166*	*35,143*	*33,699*
Foundations	–	–	–	*19,419,508*	*18,530,000*	*18,530,000*
Program Elements:						
A. Community education (non-credit)	2.1	3	2.9	24,166	35,143	33,699
B. Campus community service	532.4	499.6	444.9	25,004,461	25,656,636	24,226,538

A. Community Education (noncredit)

Included in this element are costs associated with formal extension organizations established to provide continuing educational services. This differs from the extension instruction element under Instruction in that the courses offered here are not necessarily for credit or applicable to a degree program. Typically participants are teachers returning to pursue new developments in instructional methods or engineers upgrading their knowledge of new techniques.

Input	1972–73	1973–74	1974–7
Expenditures	$24,166	$35,143	$33,6
Personnel man-years	2.1	3	

B. Campus Community Service

Various resources and capabilities existing at CSUC institutions are made available to the public through this element. Typically these services are managed within academic departments.

Included in element costs are funds for a portion of the support for the San Diego Educational Television Program. The current year funding level has been retained in 1974–75 to maintain the proper funding balance between community service and instruction.

Input	1972–73	1973–74	1974–7
Expenditures	$25,004,461	$25,656,636	$24,226,5
Personnel man-years	532.4	499.6	44

THE CALIFORNIA STATE UNIVERSITY AND COLLEGES—Continued

IV. ACADEMIC SUPPORT

Need

An effective instructional program requires support capabilities for the retention, preservation and display of materials, and the provision of services which directly assist the instructional functions of the institution.

Objectives

To maintain and operate facilities that directly service classroom instruction. Examples include libraries and audiovisual centers, data processing centers, as well as natural resource areas, fisheries and marine science facilities.

PROGRAM REQUIREMENTS	72–73	73–74	74–75	1972–73	1973–74	1974–75
Continuing program costs	3,116.9	3,389.1	2,704.8	$45,095,891	$51,222,153	$54,366,948
General Fund	*3,104.9*	*3,379.2*	*2,696.4*	*42,128,635*	*48,168,414*	*51,231,220*

Continuing Education Revenue Fund	*12*	*9.9*	*8.4*	*108,539*	*115,609*	*92,017*
Auxiliary organizations	–	–	–	*2,075,603*	*2,100,000*	*2,100,000*
Program Elements:						
A. Libraries	1,601.2	1,680.2	1,713.8	25,603,829	27,686,123	29,426,819
B. Audiovisual services	361.2	391.6	392.5	5,120,304	5,622,406	5,785,450
C. Computing support	209.9	217.2	230.4	4,465,895	5,048,855	5,824,851
D. Ancillary support	130.2	147.6	149.9	3,803,326	4,110,510	4,209,383
E. Academic administration and personnel development	814.4	952.5	218.2	6,102,537	8,754,259	9,120,445

A. Libraries

Library services consist of all activities which directly support the operation of a cataloged or otherwise classified collection of published material. Libraries create the bibliographical and informational resources necessary to carry out the primary function of instruction in The California State University and Colleges.

The system operates a library at each of the 19 campuses. It has no branch libraries. CSUC library holdings range in size from 123,000 volumes at Bakersfield to 652,000 volumes at San Jose.

TABLE XIII
Library Acquisitions

	1972–73	1973–74	1974–75
Volumes acquired	593,568 [1]	506,818 [2]	500,000
Total systemwide volumes	6,932,673	7,439,491	7,939,491

[1] The 1972–73 acquisitions total includes 93,568 volumes provided from a $2,000,000 savings in 1971–72.
[2] The 1973–74 acquisitions total includes 6,818 volumes provided from a $150,000 savings in 1972–73.

Expenditures in this program element relate to the acquisition and processing of books, serials and a variety of other materials; maintenance of current holdings and card catalogs; services to individual students, faculty members, and other library clients; interlibrary loans and supervision of these activities.

The Department of Finance recently completed an evaluation of the California State University and Colleges libraries to determine the potential for cooperation in acquisition and processing, and for reducing low use materials' purchase duplications. The evaluation indicated that large percentages of academic library holdings seldom are used. With full cooperation and assistance of CSUC personnel, the study analyzed the opportunities for increased interinstitutional cooperation among the public academic libraries in California. Substantial benefits are available to students and faculty, through a collaborative and cooperative arrangement involving CSUC and other postsecondary institutions in the public and private sectors.

1974–75 Program

Funding of $1.5 million will be provided in 1974–75 to expand and accelerate the resultant Library Development Program through automation, coordinated planning and cooperative collections.

The ongoing library budget is designed to maintain the level of book acquisitions and reader services provided in the 1973–74 budget. Thus, basic book acquisition will remain at 500,000 volumes for 1974–75.

The 1974–75 budget makes provision for increases in the acquisition prices of library books. Budgeted funds for 1974–75 increase 1973–74 average price per volume ($15.21) by 6 percent to an average $16.12 for 1974–75.

Since, due to legislation, elementary grade textbooks which formerly had been provided free must now be purchased, $101,400 is provided in 1974–75 for that purpose.

This 1974–75 budget provides $96,445 to accommodate the one-time, non-recurring cost of moving the libraries at Chico and Sacramento into new quarters. The 1974–75 budget also provides $243,528 for circulation control positions, reshelving activities and other related circulation monitoring duties in four new and enlarged library facilities on the Chico, Bakersfield, Sacramento and Northridge campuses.

Input	1972–73	1973–74	1974–75
Expenditures	$25,603,829	$27,686,123	$29,426,819
Personnel man-years	1,601.2	1,680.2	1,713.8

THE CALIFORNIA STATE UNIVERSITY AND COLLEGES—Continued

IV. ACADEMIC SUPPORT—Continued

B. Audiovisual Services

Audiovisual services include activities associated with providing these materials to support the primary programs of Instruction, Research and Public Service. The scope of audiovisual services includes utilization, materials preparation and technical services.

The use of instructional television by The California State University and Colleges has long been a matter of interest and concern. A systematic approach to its development was proposed by a study conducted by the Office of the Chancellor in 1962. In January 1965, the trustees adopted a resolution which established policy guidelines for its orderly developme This resolution recognized the use of television as important means for making the instructional proce more productive and efficient.

Television is being used in nearly half of the sta universities and colleges in a variety of applicatio and for professional curricula in broadcasting.

Input	1972–73	1973–74	1974–7
Expenditures	$5,120,304	$5,622,406	$5,785,4
Personnel man-years	361.2	391.6	392

C. Computing Support

Support to instruction is the principal responsibility of this element. Students are the largest users of CSUC computing facilities and computer support for instruction takes two forms: (1) training in computer and information sciences; and (2) using the computer as a tool for instruction and research in a number of academic programs.

The demand for specialists in computing technologies affords The California State University and Colges full opportunity to offer curricular programs in computer and information sciences at selected institutions serving large geographic areas, in accordance with statewide planning procedures. The goal of computing programs is to produce individuals both at the undergraduate and graduate level sufficiently competent in computer technology to meet the demand in this field.

Instruction in other areas further increases demand for computer time. Access is essential in the fields of business, engineering, and mathematics and is becoming a prerequisite for architecture, biological sciences, physical sciences and social sciences. Recognizing that computer support increases the quality of instruction in all fields, and recognizing that a significant number of students need some knowled of computing in order to enter a variety of occup tions, the state universities and colleges will contin to provide exposure to the largest possible number students. The goal of instructional usage in The Cal fornia State University and Colleges is to make st dents especially knowledgeable in the uses of mode information systems technology.

1974–75 Program

The 1974–75 budget includes an augmentation $1.34 million for continued expansion of computin capabilities throughout the system. Of this, $650,00 will permit substantial growth of instructional tim sharing. Other systems modifications, equipment u grading and procedural improvements will resu from the budget increase. Also, as in 1973–74, $105 000 will be used for implementation of compute assisted registration activities on several campuses.

Input	1972–73	1973–74	1974–75
Expenditures	$4,465,895	$5,048,855	$5,824,85
Personnel man-years	209.9	217.2	230.

D. Ancillary Support

Certain professional instructional programs are much more effective when there are facilities available for practical application of the principles taught in the classroom. There are several clinics, bureaus, centers and institutes that fulfill the above objective. Included in these are the nursery schools at San Diego and San Francisco, which provide practice teaching experience at the preschool level. Also there are college farms at Fresno, Chico, San Luis Obispo, and Pomona operated in conjunction with those campuses' agricultural instructional program. Natural resources and fisheries facilities at Humboldt and the Mos Landing Marine facility at San Jose complement th many disciplines concerned with natural sciences an the conservation of natural resources.

The costs of these ancillary facilities are a direct result of the enrollment in the professional curricula involved.

Input	1972–73	1973–74	1974–75
Expenditures	$3,803,326	$4,110,510	$4,209,383
Personnel man-years	130.2	147.6	149.9

THE CALIFORNIA STATE UNIVERSITY AND COLLEGES—Continued

IV. ACADEMIC SUPPORT—Continued

E. Academic Administration and Personnel Development

Administrative support and management direction are required to support the primary programs of Instruction, Research and Public Service. It is general practice in program budgeting to have the management and administrative program elements identified exclusively within the appropriate program. However, in higher education, management responsibility extends across the primary programs; for this reason, an exception has been made to classify all academic administration within this single subprogram.

Input	1972–73	1973–74	1974–75
Expenditures	$6,102,537	$8,754,259	$9,120,445
Personnel man-years	814.4	952.5	218.2

V. STUDENT SERVICE

Need

The California State University and Colleges have a program of student services because of the need to:

1. Develop individuals not only with background and experiences in formal academic programs but also in programs of a cultural, social, and recreational nature.
2. Resolve educational, vocational, and personal problems of students as these relate to their membership in the academic community.
3. Acquaint individuals with the financial realities of college attendance as well as with student aid programs in order that students in need may initiate or continue their academic programs.
4. Maintain a healthful campus environment and to discover and alleviate the physical and emotional problems of individual students.
5. Maintain basic student support facilities.

Objectives

The objectives of the student services program in the California State University and Colleges are as follows:

1. To provide programs of cultural, social, and recreational nature which complement and supplement academic programs.
2. To assist students with the resolution of educational, vocational and personal problems by providing individual counseling and testing services, financial aids, counseling, occupational information, and health services.
3. To provide basic student services such as food, health, housing and bookstores.

General Description

The program of student service is concerned with the provision of certain vital student services, basic to the effective and efficient functioning of any institution dedicated to higher education.

Student service programs are supported by the General Fund, the CSUC material and service fees, and through foundations.

PROGRAM REQUIREMENTS	72–73	73–74	74–75	1972–73	1973–74	1974–75

THE CALIFORNIA STATE UNIVERSITY AND COLLEGES—Continued

V. STUDENT SERVICES—Continued

A. Social and Cultural Development

Student activity programs on The California State University and Colleges campuses reflect the conviction that the student is dependent upon his cultural setting for the realization and development of his potential. Encouragement is given to students to extend their education through active participation in campus-sponsored programs. Informal, out-of-classroom programs of a cultural, social or recreational nature complement and supplement academic disciplines, as well as provide experiences in self-gover ment, social skills, acceptance of responsibility, ar development of effective human relations. These a considered an essential part of the educational pr gram. Coordination of off-campus programs is al accomplished through this element.

Input	1972–73	1973–74	1974–7
Expenditures	$11,007,723	$11,353,086	$11,697,6
Personnel man-years	137.1	135.2	13

B. Supplementary Educational Service

Supplemental, noncredit instruction is provided to educationally and otherwise disadvantaged students who have demonstrated that they would otherwise be capable of and would benefit from a college education. These programs are outside of the normal curriculum. Services are provided principally through the educational opportunity program's tutorial service.

1974–75 Program

The 1974–75 budget provides $32,437 for a pilot program for services to disabled students. Present di abled enrollment is approximately 5,000 students. A this population has increased, the regular studer services program has been generally unable to provid for the unique needs of disabled students. This pr gram will be evaluated to determine the most effectiv future means of providing these services.

Input	1972–73	1973–74	1974–75
Expenditures	$74,061	$130,845	$134,2
Personnel man-years	15.4	24.3	2

C. Counseling and Career Guidance

Counseling and testing programs recognize that in order for the state and the student to realize maximum return on their investments, college communities should provide professional counseling services. Students needing such services may be aided in evaluating their educational objectives, strength of motivation, intellectual potential, and vocational and professional goals.

The placement program is responsible for providing occupational information and for placement of students in professions for which they have been prepared. This responsibility includes the careful articulation between instructional programs and the changing professional needs of the business community and followup on the placement of graduate The placement office provides services to the studen from the time he enters college until he is ready t enter full-time employment.

In 1974–75, $1,823,852 is provided for advising counseling, and other services for EOP students. Thi represents a continuation of the current level of serv ice. These activities are carried out primarily unde the program elements of supplementary educationa service and counseling and career guidance.

Input	1972–73	1973–74	1974–75
Expenditures	$9,922,800	$11,132,747	$11,386,51
Personnel man-years	732.2	816.8	822.7

THE CALIFORNIA STATE UNIVERSITY AND COLLEGES—Continued

V. STUDENT SERVICE—Continued

D. Financial Aid

Financial aid offices provide information regarding the costs of college attendance and the availability of sources of financial aid. They are responsible for the administration of a complex program of student awards including scholarships, grants, fellowships, loans and employment designed to make it possible for students in need to initiate or continue their academic programs. The student financial aid officer develops written materials describing the various programs for which he has responsibility, initiates applications for federal funds, evaluates student requests counsels students, makes financial aid awards and submits detailed reports of fund expenditures. Since student financial assistance touches upon individual, institutional, community, state, and national concerns, the aid officer works closely with a variety of groups: administrators, faculty, parents, high school and community college counselors, bankers, and representatives of local, state and federal governments.

There are several systemwide student financial aid programs which are partially or totally funded by the federal government. These include the National Direct Student Loan, College Work-Study, and Educational Opportunity Grant Programs of the U.S. Office of Education (HEW), the Nursing Student Loan and Scholarship Programs of the Public Health Service, and the Law Enforcement Education Loan and Scholarship Programs of the Department of Justice.

Other programs include the State Scholarship, Graduate Fellowship and College Opportunity Grant Programs administered by the California State Scholarship and Loan Commission and institutional scholarships, grants, and loans. The state also provides financial assistance to educationally and economically disadvantaged students through the Educational Opportunity Program.

The Federally Insured Student Loan Program (FISL), under which banks make loans guaranteed by the federal government, provides for approximately 20 percent of the total systemwide student financial assistance. Total borrowing by students in the CSUC system under this program for the 1973–74 academic year was approximately $18.5 million. The FISL Program is administered by the campuses through verification of student registration and financial need to private lending banks.

Table XIV shows the scope and sources of funds of the financial aid subprogram for 1972–73 and 1973–74.

V. STUDENT SERVICE—Continued

D. Financial Aid—Continued

1974–75 Program

State support will continue through the primary programs of the California State Scholarship and Loan Commission (state scholarships, graduate fellowships, and college opportunity grants), through matching provisions of federal programs, and through the CSUC-administered Educational Opportunity Program.

As shown in Table XIV total support for financial aid programs, including the Educational Opportunity Program has increased from approximately $9 million to more than $90 million in 1973–74, a portion of which is administered through CSUC's budget. Table XV displays details of the state supported Educational Opportunity Program for 1972–73 through 1974–75.

TABLE XV

California State University and Colleges
Educational Opportunity Program
Awards and Expenditures

1972–73 through 1974–75

	Actual Year 1972–73			Current Year 1973–74			Budget Year 1974–75		
	Number of grants	Average dollars/grant	Total grant dollars	Number of grants	Average dollars/grant	Total grant dollars	Number of grants	Average dollars/grant	Total grant dollars
1st yr	3,500	$440	$1,540,000	4,220	$462	$1,949,640	4,220	$462	$1,949,640
2nd yr	2,800	220	616,000	2,898	231	669,438	3,376	231	779,856
3rd yr	–	–	–	1,342	240	322,080	2,240	240	537,600
4th yr	–	–	–	1,074	240	257,760	1,107	240	265,680
Totals	6,300		$2,156,000	9,534		$3,198,918	10,943		$3,532,776
Totals, Administration and Counseling			$1,474,868			$1,807,385			$1,823,852
TOTALS, PROGRAM COSTS			$3,630,868			$5,006,303			$5,356,628

Due to the rapidly changing nature of student financial aid programs, increased monitoring of campus operations and precise awareness by campus personnel of system, state and federal regulations and procedures is required. The 1974–75 budget provides approximately $40,000 for two new positions in the Chancellor's office to accommodate these needs.

Input	1972–73	1973–74	1974–75
Expenditures	$31,203,587	$31,974,459	$39,106,141
Personnel man-years	211.6	210.2	210.2

E. Student Support

Each campus maintains facilities for housing and parking. These operations are totally self-supporting. The special revenue funds are the Parking Revenue, Dormitory Revenue, and Auxiliary Enterprise Funds.

As in all special fund operations, the parking program is maintained through the collection of revenue for the use of the facilities. Construction is financed by special revenue bond issues which are liquidated from operating revenues.

TABLE XVI
Total Number of Parking Spaces

1972–73	1973–74	1974–75
80,647	84,240	85,581

TABLE XVII
Dormitory System Capacity

1972–73	1973–74	1974–75
14,822	16,002	16,002

The health services program is concerned with the health and medical needs of students. Accordingly, the campus health centers are part of a total approach to the provision of comprehensive medical and health care. The 1974–75 budget provides for conversion of the Dominguez Hills Student Health Program from contract to on-campus service.

Basic on-campus health services include: outpatient medical services; X-ray; clinical laboratory; physical medicines; immunizations; first aid and emergency care; personal health supervision and counseling; health evaluation and review; campus public health service; educational and advisory, administrative, and supplementary services.

Special services such as bookstores, cafeterias, vending machines, and other retail services are provided within this element to the student body. These services are tailored to the campus community and provide for student employment as well as contribute to the students' overall campus experience. All such services are provided on a self-supporting basis, but at minimal cost to the students and others.

Input	1972–73	1973–74	1974–75
Expenditures	$48,248,616	$49,798,541	$50,822,315
Personnel man-years	776.9	929.2	892

THE CALIFORNIA STATE UNIVERSITY AND COLLEGES—Continued

VI. INSTITUTIONAL SUPPORT

Need

Efficient administration is needed in order to carry out the goals of The California State University and Colleges. There is also need to ensure that the system's operations are consistent with public higher education policy as developed by the Legislature, amplified and interpreted by the Governor, administered by the Board of Trustees, and implemented by the Chancellor and the campus presidents. Operation of the existing 19 institutions requires a program that services the total system.

Objectives

1. To plan, develop, implement, and control effective management policies which attain the goals of the Board of Trustees, Chancellor, and presidents.
2. To provide personnel, payroll, purchasing and inventory control, accounting, budgeting, legal and other services, at a level sufficient to carry out the California State University and Colleges' program objectives within established statutes and policies.
3. To maintain communication with the faculty through the academic senates.
4. To provide an adequate level of communication through telephone, mail, publications, and printing media.

General Description

Institutional support in the California State University and Colleges is concerned with the provision of various services to the other programs. The necessity for the institutional support program must be defined in terms of its contributions to other programs.

PROGRAM REQUIREMENTS	72–73	73–74	74–75	1972–73	1973–74	1974–75

A. Executive Management

The Trustees assumed responsibility for administration of The California State University and Colleges on July 1, 1961. The board is responsible for policy determination, coordinated planning, management, administration, and control of the State University and Colleges system.

The chief executive officer of the Board of Trustees is the Chancellor. He is appointed by the Board and is responsible for implementing policies and programs enacted by the Trustees, recommending policies and programs to the Trustees, and recommending executive appointments to the Trustees. The Chancellor provides the State University and Colleges system leadership and liaison with the individual institutions, state government, people of the State of California, and other educational institutions and organizations.

Campus presidents are appointed by the Board of Trustees based upon the recommendation of the Chancellor, and after consultation with the Academic Senate and the administrators of the campus involved. They are given authority and responsibility over all campus matters within the policy framework established by the Legislature, Governor, Board of Trustees and the Chancellor.

The Trustees' audit staff reports directly to the Board and is responsible for an ongoing independent management audit of the operations of the campuses and the Chancellor's Office. This budget includes five additional positions to facilitate the ability of the Trustee audit staff to conduct comprehensive management review studies throughout CSUC.

Physical planning and development includes programming, planning, direction, and operation of the statewide plan for the development of physical facilities, providing advice and assistance in physical master planning to the campuses, presenting capital outlay programs and studies of potential sites for new campuses, reviewing, approving and executing capital outlay funding to the campuses, developing new approaches for improving physical development, and with other divisions, conducting special studies relating to space requirements.

In addition to these functions, physical planning and development is concerned with space management and with the development of more effective and ef

THE CALIFORNIA STATE UNIVERSITY AND COLLEGES—Continued

VI. INSTITUTIONAL SUPPORT—Continued

A. Executive Management—Continued

cient procedures for review and control of equipment and building standards.

Budgeting is concerned with the planning, coordination, preparation, and review of support budgets. Activities involved in the budgeting process are the preparation of instructions and guidelines for development of the annual support budget for each campus, review and analysis of institution support budget requests, providing counsel, advice, and information on budget preparation, and providing program costs and justification data required by interested individuals, agencies, and appropriate review bodies.

The purpose of the Legal Services Unit is to advise the Trustees, state universities and colleges, and Chancellor and his staff on legal issues and to represent them as necessary. Two attorney positions have been added in this budget to meet workload requirements.

The Academic Senate is included in this program element and represents the CSUC faculties for all campuses for the purpose of advising the Board of Trustees and other concerned agencies on matters affecting academic policy. Its members are chosen by the full-time faculty on the individual campuses.

The primary functions of Institutional Research are to plan, execute and evaluate studies of varying scope and detail to provide an informed and reliable basis for the formulation. implementation and evaluation of educational policies and long-range planning for the California State University and Colleges. Studies are conducted concerning institutional processes, sociopsychological environments and other research inquiries in the field of higher education. Applied research is also conducted on administrative and academic operations including the compilation, analysis and interpretation of numerous descriptive and comparative statistics. In addition, the institutional research function participates in cooperative research endeavors with other state agencies, among the state universities and colleges and with various divisions of the Chancellor's Office, and assists in the development of programs for institutional studies.

Input	1972–73	1973–74	1974–75
Expenditures	$13,452,328	$16,228,701	$16,460,160
Personnel man-years	714.5	804.5	792

B. Financial Operations

The Financial Operations Unit plans and administers the fiscal affairs of the California State University and Colleges. Similar activities are delineated in separate program components elsewhere. The accounting component includes processing documents required to pay all debts owed by the California State University and Colleges, maintaining records and collecting funds due to the campuses, negotiating specific contracts and leases. securing adequate insurance coverage for the campuses and investing available campus funds.

Input	1972–73	1973–74	1974–75
Expenditures	$7,830,008	$8,930,883	$8,881,972
Personnel man-years	625.8	703.6	687

C. General Administrative Services

This program element reflects the costs of student admissions and records, employee personnel administration and records, and administrative data processing.

The primary function of admissions is to make maximum use of educational facilities and resources by identifying, screening, and admitting qualified applicants to The California State University and Colleges. In 1970 a common admissions program was implemented which established a systemwide application procedure.

The management of registration and records includes the processing, registration and maintenance of student records, preparation and issuance of transcripts, certification of selected data from records, administration of academic probation and disqualification standards, and related activities. In addition, admissions and records offices provide graduation and degree requirements information and advising services to students.

It is necessary to maintain precise records of all employees to insure that appropriate payment and fringe benefit provision is made for faculty, staff and students. In addition, employee records provide management information as the basis for planning and administration of an effective personnel recruitment, retention, training and evaluation program.

Input	1972–73	1973–74	1974–75
Expenditures	$18,172,808	$20,544,131	$21,778,961
Personnel man-years	1,279.7	1,406.3	1,447.7

THE CALIFORNIA STATE UNIVERSITY AND COLLEGES—Continued

VI. INSTITUTIONAL SUPPORT—Continued

D. Logistical Services

Purchasing, inventory, and property control involve preparation of specifications, preliminary negotiation of contracts and leases, preparation of procurement documents, receiving and checking deliveries, preparing stock-received reports, identifying and labeling all equipment, maintaining adequate supply inventories, taking periodic physical inventories, and providing for the maintenance and repair of equipment. This element includes the maintenance and operation of utilities and motor vehicles.

In addition, it provides for security for each campus, encompassing building and equipment security, crowd control and crime control.

The 1974–75 Program

Certain campuses have experienced increased crim inal activity in the recent past. This budget provid additional security officers to seek to reduce crime o "high risk" campuses. For that purpose, $101,77 has been budgeted. Also, in order to reduce crim reporting deficiencies, $60,649 is included for impl mentation of California Law Enforcement Teletyp System (CLETS) terminals on the Fresno, Pomon and San Francisco campuses.

Input	1972–73	1973–74	1974–75
Expenditures	$18,543,463	$19,910,536	$20,848,67
Personnel man-years	945.6	985.9	1,0

E. Physical Plant Operations

The plant operation and maintenance element includes all activities necessary to maintain the physical facilities of the campuses. The total existing building square footage under custodial care for the system is 22,531,174 million square feet. Total existing college acreage is 5,241 acres plus an additional 7,071 agricultural acreage. Electrical maintenance, plumbing, heating, repairs, painting, grounds maintenance and janitorial services are required for support.

The 1974–75 Program

New buildings containing approximately 360,493 square feet will be occupied in 1974–75. Funding o $760,809 is included in this budget to accommodat new personnel and operating expenses.

Legislation has been enacted to provide authoriza tion of allowances for uniforms, protective clothin and safety equipment for eligible employees. Thi budget will provide an additional $136,030 for allow ances for protective clothing for physical plant an student health personnel.

Input	1972–73	1973–74	1974–75
Expenditures	$41,889,070	$48,066,231	$50,835,92
Personnel man-years	3,030.0	3,325.8	3,403.

F. Faculty and Staff Services

This program element consists of the budget allotments for overtime and related faculty and staff service items. Identification of these expenditures here facilitates budgetary control.

Input	1972–73	1973–74	1974–75
Expenditures	$1,028,372	$1,925,093	$2,561,40
Personnel man-years	60	–	

G. Community Relations

The public affairs programs in the California State University and Colleges maintain communication with public, business, professional, governmental and cultural groups.

Community relations efforts have included such activities as school visitations, preparation of information materials for counselors and students, presentations at college nights, PTA meetings and civic groups, and liaison activities designed to improve articulation between secondary schools, junior colleges, and four-year colleges and universities. Systemwide coordination of the program is needed to keep campus-based officers informed in a systematic way about all other CSUC campuses so they can serve as sources for systemwide information.

Because of the amount of interest in the California State University and Colleges by residents, nonresidents, and foreign students, a highly developed system of disseminating and interpreting systemwide requirements and individual college curricula must be maintained.

Information is supplied also to the Governor, the Legislature and appropriate state agencies. It is necessary to keep informed of pending legislation affecting the CSUC and to maintain liaison with state and federal governments. Analyses of legislative and administrative actions are conducted and advice is given to appropriate government entities as to the effects of these actions on education in general and the California State University and Colleges in particular.

The relations with schools activity provides a liaison with feeder schools and communicates the needs and programs of these schools to the California State University and Colleges.

Input	1972–73	1973–74	1974–75
Expenditures	$1,551,869	$1,790,159	$1,941,527
Personnel man-years	64.1	71.5	71.6

THE CALIFORNIA STATE UNIVERSITY AND COLLEGES—Continued

VII. INDEPENDENT OPERATIONS

Need

Certain contractual services are provided for the primary benefit of independent financing agencies, but which also benefit students and faculty. These special projects are considered vital to the campus community, but are not part of the primary mission of The California State University and Colleges.

Objectives

To provide specialized services to agencies of government and industry, utilizing campus facilities and manpower with provision for full reimbursement; and secondarily accruing as many benefits as possible to students, faculty and the instructional programs.

PROGRAM REQUIREMENTS	72–73	73–74	74–75	1972–73	1973–74	1974–75
Continuing program costs	507.5	427.7	446	$9,668,439	$8,156,165	$8,363,612
General Fund	–	–	–	*1,431,224*	–	–
Reimbursements	*507.5*	*427.7*	*446*	*5,610,218*	*5,880,165*	*6,138,612*
Auxiliary organizations	–	–	–	*2,626,997*	*2,276,000*	*2,225,000*

A. Institutional Operations

This element identifies those costs associated with certain projects contracted for and administered through auxiliary organizations of The California State University and Colleges. The expenditures and related reimbursements are either reported by each auxiliary organization or reported as reimbursed activities through the General Fund support budget. The projects themselves are sponsored and financed by agencies of the federal government, the state government, the local community, private and public foundations, and business and industry. The objectives of these projects are prescribed by the sponsoring agency and are independent of the educational mission of The California State University and Colleges. However, significant benefits do accrue to the campus community and the instructional program.

Input	1972–73	1973–74	1974–75
Expenditures	$9,668,439	$8,156,165	$8,363,612

THE CALIFORNIA STATE UNIVERSITY AND COLLEGES—Capital Outlay

SUMMARY

On November 29, 1971, the Governor signed Assembly Bill 123 into law, which created The California State University and Colleges, thereby redesignating the system previously known as the California State Colleges. This legislation provided legal recognition that the California State Colleges had achieved the status of universties in their first decade as a unified system of higher education.

Established as a system in 1960, The California State University and Colleges offers as its primary function bachelor's and master's degrees in the liberal arts and sciences, in applied fields, and in the professions—including the teaching profession. Although doctoral degrees are offered jointly with the University of California, the 1972 Budget Act Item 291, prohibited using the appropriation to accept new enrollments into any joint doctoral program for the 1973–74 fiscal year. Faculty research is authorized to the extent that it relates to the teaching mission.

The Board of Trustees of the California State Colleges was created by Chapter 49, Statutes of 1960, First Extraordinary Session, and on July 1, 1961, took over the powers, duties and functions previously vested in the State Board of Education and the Director of Education relative to the administration of the state colleges. One of the major functions of the Board of Trustees and its administrative staff is the planning of the physical facilities necessary to accommodate the increasing number of students in an orderly manner.

The California State University and College system consists of 19 campuses.

CAPACITY AND ENROLLMENT FOR CAPITAL OUTLAY

The basic unit used to determine full-time equivalent student (FTE) capacity is the student station. Each room, having been categorized by its primary use, e.g., classroom or class laboratory, is assigned an optimum student station count based upon accepted space measurements. This optimum student station count is then weighted in accordance with the type of room, the level of instruction for which it was designed, and the appropriate utilization standard to derive an FTE capacity for each classroom and class laboratory and, in the aggregate, for each campus.

Future classroom and class laboratory space requirements are determined by comparing existing FTE capacity with projected FTE enrollments. Needed FTE capacity is translated into assignable square foot requirements in accordance with the Coordinating Council for Higher Education "Space and Utilization Standards" adopted on March 2, 1971 in resolution 402. These standards incorporate Assembly Concurrent Resolution 151 of August, 1970 and the interim standards set forth in the 1973 Supplemental Conference Committee Report relating to class laboratory standards and faculty office needs.

The existing and funded FTE capacity in classrooms and class laboratories is shown in Table I as 241,873 FTE students available in 1975–76. These capacities were calculated in accordance with the space and utilization standards referenced above.

The Board of Trustees, at its November, 1972 meeting, revised and restated the enrollment ceilings for each of the 19 campuses. These ceilings, in terms of full-time equivalent students in the academic year, are shown in Table II. Table II also shows both gross and net campus acreage for the 19 campuses excluding agriculture.

Enrollment projections for the system are provided by the Department of Finance and are based upon reported enrollment trends; the number of California public twelfth-grade graduates; the number of first-time freshmen attending The California State University and Colleges; the numbers of tranfers by class level and institution of origin; and the number of continuing and returning students and their rates of survival by class level.

These systemwide projections of enrollments are then converted into annual full-time equivalent (FTE) students, based upon the average number of units for which students are enrolled. This total systemwide projection is then allocated to the individual campuses.

Table III presents the estimated FTE enrollment of students from 1975–76 through 1978–79. Other (earned) FTE (e.g., physical education, military science) have been netted out in this table in order that valid comparisons might be made between projected capacities and enrollments.

The budget, both support and capital outlay, is based on annual full-time equivalent students. Table III provides the basis of comparison between projected enrollments and capacity, where capacity is defined as both existing and funded, together with projects proposed for construction in the 1974–75 budget. The capacities for unfunded projects shown in the five-year building program are not included in Table III.

CAPACITY AND ENROLLMENT FOR CAPITAL OUTLAY

TABLE I*

Summary of FTE Capacity Existing and Funded For Construction through July 1, 1974

Campus	*Lecture*	*Lab*	*Total*
Bakersfield	2,761	332	3,093
Chico	10,511	1,220	11,731

Trustees of the California State University and Colleges							
The Board of Trustees of the California State University and Colleges was established by Chapter 49, Statutes of 1960, First Extraordinary Session. The board is charged with the responsibility of governing the state college and university system including the capital outlay program. The last four years of the five-year building program are the agency's current estimate of need and do not represent a program approved by the administration.							
MAJOR PROJECTS							
Project planning	–	$50,000 Pm	$100,000 Pm	$100,000 P	$100,000 P	$100,000 P	$100,000 P
Project planning funds are requested for schematic and preliminary plans for projects scheduled for funding of both working drawings and construction in 1975–76. The projects are chiefly for site development, utilities and remodeling. Funding for schematic and preliminary plans for larger projects is proposed to be from funds appropriated for the specific projects.							
Master Planning	$190,000 Pk	205,000 Pm 15,000 Pk	205,000 Pm	300,000 P	300,000 P	300,000 P	300,000 P
Master planning funds are requested for continuing architectural, landscape architectural, and engineering master planning and consulting services. Approximately $10,700 for master planning for each of the 19 operating campuses is proposed.							
Remove architectural barriers to the handicapped	–	300,000 PWCm	1,000,000 PWCm	400,000 PWC	300,000 PWC		
Funds for preliminary plans, working drawings and construction are requested for 1974–75. These funds will be used to remove architectural barriers to the handicapped at several campuses. It is possible that these funds can be used as matching funds for Federal assistance under the provisions of the Vocational Rehabilitation Act.							
Minor construction	–	–	4,000,000 PWCEm	3,000,000 PWCE	3,000,000 PWCE	3,000,000 PWCE	3,000,000 PWCE
Funds are requested for minor construction for 1974–75. These funds will be allocated to the campuses for preliminary planning, working drawings, construction and equipment for projects costing $65,000 or less and for equipment for new degree programs.							
Special land acquisition	71,483 Lk	178,517 Lk	–	250,000 L	–	250,000 L	
Master planning new campuses	–	–	–	150,000 P			
Land acquisition	29 La

California State College, Bakersfield							
The Trustees of the California State University and Colleges and the Coordinating Council for Higher Education advised the Legislature in 1965 of the need for the establishment of a California State College in Kern County. The Legislature, during that session, authorized funds to be used for site selection studies for this college. The 376-acre site was acquired in June 1967. The college opened September 1970, in facilities on its permanent campus. The college name has since been changed to California State College, Bakersfield. This campus is currently master-planned for an ultimate enrollment ceiling of 12,000 FTE students. The last four years of the five-year building program are the agency's current estimate of need and do not represent a program approved by the administration.							
MAJOR PROJECTS							
Classroom—office building 1	$70,176 Wk 1,982,934 Ck	$328,066 Ck	$229,000 Em				

For the list of standard lettered capital outlay footnotes, see the end of this budget supplement.

California State College, Bakersfield—Continued

MAJOR PROJECTS—Continued

STATE BUILDING PROGRAM EXPENDITURES	Actual 1972–73	Estimated 1973–74	Proposed 1974–75	Projected 1975–76	Projected 1976–77	Projected 1977–78	Projected 1978–79
Funds for equipment are requested for 1974–75. This is the first and only phase of equipment for this building. This project is scheduled for completion in July 1974.							
Less federal reimbursement	–	–500,000	–				
Initial library addition	24,639 WK	1,156,000 CK 45,361 WK	134,000 Em				
Funds for equipment are requested for 1974–75. This is the first and only phase of equipment for this building. The project is scheduled for completion in January 1975.							
Initial P.E. facility	25,011 WCK	32,989 WCK 1,035,000 Cm	46,000 Em				
Funds for equipment are requested for 1974–75. This is the first and only phase of equipment for this building. The project is scheduled for completion in September 1974.							
Utilities and site development—1973	–	7,000 PWm	158,00 Cm				
Funds for construction are requested for 1974–75. The completion of this project is essential to provide utilities service and vehicular access to science building II and to certain portions of the outdoor physical education activity facilities. Of particular significance is the needs for a second access road from Stockdale highway to the campus building complex, since the only existing entry will be seriously overloaded by 1973–74. The project is scheduled for completion in February 1975.							
Initial cafeteria	–	84,000 PWk	1,880,000 Cm	–	$102,000 E		
Funds for construction are requested for 1974–75. This initial cafeteria will provide the CSB campus with food service facilities adequate for the 3,800 FTE enrollment anticipated for the 1976–77 occupancy year. The building should contain about 19,000 ASF, with seating for 684 persons. The project is scheduled for completion in September 1975.							
Science building II	69,9[illegible]	118,062 Wk	3,173,000 Ck	–	250,000 E	$142,000 E	
Funds for construction are requested for 1974–75. The college's rapid enrollment growth is quickly overflowing the science laboratories available in 1972 from science building I. This project will have a total instructional capacity of 542 FTE which consists of 419 lecture FTE, 123 laboratory FTE, and 11 faculty office stations. The building will be mainly for the physical science disciplines with approximately 27,600 assignable square feet and a gross area of 42,600 square feet. The project is scheduled for completion in October 1975.							
Central plant III	–	–	37,000 PWm	$613,000 C			
Funds for preliminary plans and working drawings are requested for 1974–75. This project will complete the "Load Center No. 1" mechanical facility for the college, thus providing HVAC capacity to handle anticipated plant additions until the completion of the permanent library in the later 1970's. This project would provide the installation of a 700-ton chiller, a cooling tower, a 200-h.p. boiler, pumps, piping and some 700 square feet of structural housing. The project is scheduled for completion in September 1976.							
Outdoor P.E. facilities—II	–	–	41,000 PWm	668,000 C			
Funds for preliminary and working drawings are requested for 1974–75. This project will provide a running track and a baseball field. These facilities are not now available to students at the college and are essential in the development of a fully rounded educational experience. The project is scheduled for completion in September 1976.							
Central plant II	992 WCK 12,308 EK	2,692 EK	–	44,000 PW	766,000 C	10,000 E	
Fine arts building	–	–	–	119,000 PW	22,224,000 C	–	$230,000 E

For the list of standard lettered capital outlay footnotes, see the end of this budget supplement.

California State University, Chico

California State University, Chico, established in 1877, offers courses in teacher education, general education, arts and sciences, and certain occupational fields including engineering and agriculture.

The university is located on a site totaling 119 acres in the City of Chico, with an additional 644 acres in the university farm. The ultimate enrollment for this campus has been set at 14,000 FTE students.

The last four years of the five-year building program are the agency's current estimate of need and do not represent a program approved by the administration.

MAJOR PROJECTS							
Convert old library for faculty offices	–	36,000 PWK	$606,000 CM	$20,000 E			
Funds for construction are requested for 1974–75. This project will structurally rehabilitate the old library to bring the building up to present code standards and remodel it to provide 50 faculty offices. The building will have an assignable area of 10,200 square feet and a gross area of

California State College, Dominguez Hills

The California State College, Dominguez Hills was established as South Bay State College by Chapter 65, Statutes of 1960, First Extraordinary Session. The name was redesignated to California State College at Palos Verdes by the Trustees of the California State Colleges on July 12, 1963, and again redesignated in August 1966 and June 1972. A 354-acre site in the Dominguez area of southwest Los Angeles was selected by the Trustees of the California State University and Colleges and acquired by the state.

The initial buildings were opened in the fall of 1968. The fieldhouse was occupied in April 1971 and the social and behavioral sciences building was occupied in September 1971. The educational resources center (library, classroom and administration building) and natural sciences building were occupied in 1972.

This campus is currently master planned for an ultimate enrollment ceiling of 20,000 FTE students.

The last four years of the five-year building program are the agency's current estimate of need and do not represent a program approved by the administration.

MAJOR PROJECTS							
Conversion of initial buildings	$5,400 W C k	$338,600 W C k	$115,000 E m				
Funds for equipment are requested for 1974–75. This is the initial and only phase of equipment for these buildings. The buildings are scheduled for completion in September 1974.							
Natural science building	252,933 E k	247,067 E k 400,000 E m	185,000 E m				
Funds for equipment are requested for 1974–75. This is the third and final phase of equipment for this building. The building was occupied in January 1973.							
Utilities—1973	–	75,000 P W m	526,000 C m				
Funds for construction are requested for 1974–75. This project will provide utilities to the theatre arts building scheduled for occupancy in September 1975. Also, the project includes the extension of the utility tunnel to this facility. The project is scheduled for completion in July 1975.							
Outdoor physical education facilities	–	41,000 P W k	410,000 C m	$25,000 E			
Funds for construction are requested for 1974–75. This project provides a baseball field, track and field area. Approximately 13 acres will be improved. The project is scheduled for completion in July 1975.							
Physical education facility	–	–	198,000 P W m	4,057,000 C	–	$148,000 E	
Funds for preliminary plans and working drawings are requested for 1974–75. This building will provide permanent gymnasium, activity rooms, lockers and showers for the Department of Physical Education and Health. The building will have 52,500 assignable square feet and a gross area of approximately 70,000 square feet. The project is scheduled for completion in June 1977.							
Utilities—1974	–	–	–	160,000 W C			
Theatre arts building	–	1,993,000 C m	–	240,000 E			
Classroom office building	–	3,680,000 C m	–	180,000 E			
Site development—1976	–	–	–	25,000 P W	$410,000 C		
Administration building	–	–	–	–	160,000 P W	2,948,000 C	

For the list of standard lettered capital outlay footnotes, see the end of this budget supplement.

California State University, Fresno

The California State University, Fresno is a five-year institution offering programs in agriculture and general education, and credential programs in elementary and secondary education. The university is located on a site of 1,413 acres northeast of the City of Fresno. The main campus totals 327 acres on which is master planned an ultimate enrollment of 20,000 FTE students. The balance of 1,086 acres is devoted to agricultural use.

The last four years of the five-year building program are the agency's current estimate of need and do not represent a program approved by the administration.

California State University, Fullerton

The California State University, Fullerton is located on a site of 238 acres in the City of Fullerton with a master planned enrollment of 20,000 FTE students to be contained within the existing site. Funds for construction of the first permanent building were appropriated in 1961. This facility, a six-story science building, was completed in the fall of 1963, and housed all of the programs of the university. Other major facilities constructed since 1963 include a music-speech-drama building, a humanities social science building, an art building, the administration-business administration building, an engineering building, and the education classroom building which is scheduled for completion in the fall 1975.

The last four years of the five-year building program are the agency's current estimate of need and do not represent a program approved by the administration.

MAJOR PROJECTS							
Science building conversion V	–	–	$75,000 WCM				
Funds for working drawings and construction are requested for 1974–75. This project will have a total permanent instructional capacity of 20 faculty, 7 offices, and other office space. The project will convert approximately 3,400 assignable square feet from vacated health service space.							

For the list of standard lettered capital outlay footnotes, see the end of this budget supplement.

California State University, Hayward

The California State University, Hayward was established by Chapter 1961, Statutes of 1957, as the State College for Alameda County. The Trustees have since authorized the change in name to California State University, Hayward. This university offers courses in occupational and professional subjects, bachelor and master degree programs in various liberal art fields, and an elementary and secondary education credentials program. This university occupied its permanent 343-acre site in the fall of 1963. Current plans call for campus development on the existing acreage to accommodate an ultimate of 18,000 FTE students.

The last four years of the five-year building program are the agency's current estimate of need and do not represent a program approved by the administration.

Humboldt State University

Humboldt State University is a five-year institution offering both graduate and undergraduate programs in liberal arts, teacher education, and vocational training curricula. The latter includes curriculums in forestry management, fisheries, game management and oceanography. The university is located on a site of approximately 142 acres in the City of Arcata. The university's marine laboratory is located on an additional 1.9 acres in the City of Trinidad 15 miles north of the main campus. The university is master planned for an ultimate enrollment of 10,000 FTE students.

The last four years of the five-year building program are the agency's current estimate of need and do not represent a program approved by the administration.

California State University, Long Beach

The California State University, Long Beach was established in 1949 as an upper division liberal arts college, and beginning in the fall of 1953 was authorized to offer lower division courses. It is now a five-year multipurpose university offering instruction for undergraduate students and graduate students, through the master's degrees, in the liberal arts and applied science fields and in the professions, including the teaching profession. The university helps serve the educational needs of the metropolitan areas of southern California.

In 1951, the university was permanently located on a 322-acre site donated by the City of Long Beach which is adequate to support the ultimate master plan enrollment of 25,000 FTE students.

The last four years of the five-year building program are the agency's current estimate of need and do not represent a program approved by the administration.

MAJOR PROJECTS							
Industrial technology building	–	$215,000 C F	$3,870,000 C k	–	$644,000 E		
Funds for construction are requested for 1974–75. This project will provide the first permanent space for the Department of Industrial Technology and has an instructional capacity of 437 FTE which consists of 209 lecture FTE and 228 laboratory FTE and 55 faculty offices. The building has an assignable area of 46,988 square feet and a gross area of 66,691 square feet and is scheduled for completion in September 1976.							

For the list of standard lettered capital outlay footnotes, see the end of this budget supplement.

MAJOR PROJECTS—Continued							
Science building conversion	–	–	8,000 Wm	$115,000 C	35,000 E		
Funds for working drawings are requested for 1974–75. This project will convert space formerly used by the Nursing and Psychology Departments and research space to a 16 student station upper division laboratory for anatomy and physiology. The project is scheduled for completion in September 1976.							
Old administration building conversion	–	–	68,000 PWm	1,137,000 C	97,000 E		
Funds for preliminary plans and working drawings are requested for 1974–75. This project will provide for the conversion of approximately 44,000 gross square feet of space which will be vacated when the new administration building is completed. The project will provide an instructional capacity of 24 laboratory FTE, 112 faculty office stations and an education-psychology clinic for the school of education. The project is scheduled for completion in December 1976.

California State University, Los Angeles

The California State University, Los Angeles, established in 1947, offers courses in business, education, fine arts, applied arts, music, social sciences, physical education, natural sciences, engineering and special education.

The university moved to its present 165-acre site in 1956 to accommodate the increase in student enrollments.

The campus is master planned for an enrollment of 25,000 FTE students.

The last four years of the five-year building program are the agency's current estimate of need and do not represent a program approved by the administration.

MAJOR PROJECTS							
Physical science building	–$877,784 Ca	$117,947 Ca	$500,000 Em	$400,000 E			
	960,308 CF	178,955 CF					
	490,676 Ek	9,324 Ek					
		500,000 Em					
Funds for equipment are requested for 1974–75. This request will provide equipment for the third of four phases in the physical science building. This building was completed in September 1972.							
Site development—1975	–	–	195,000 Wm	1,977,000 C			
Funds for working drawings are requested for 1974–75. This project will provide new street access improvements to serve the entire campus from the south and north. Included in the project is the relocation of utilities. The project develops approximately 48 acres of recently acquired land and relocates 442,000 cubic yards of earth by a balance cut and fill. The project is scheduled for completion in September 1976.							
Biological science building conversion	–	–	25,000 PWm	297,000 C	$50,000 E		
Funds for preliminary plans and working drawings are requested for 1974–75. This project converts approximately 23,000 asf of space vacated by the physical sciences for use by the biological sciences. There will be no change in rated FTE capacity. This project will be completed in September 1976.

California State University, Northridge

The California State University, Northridge, became a separate state college July 1, 1958 by authority of Chapter 2265, Statutes of 1957. This university offers degrees at both the bachelor and master levels in business, liberal arts, science and engineering, and also offers a credential program in education. The campus, located in Northridge, comprises approximately 353 acres, and will accommodate an ultimate enrollment of 25,000 FTE students.

The last four years of the five-year building program are the agency's current estimate of need and do not represent a program approved by the administration.

California State University, Sacramento

The California State University, Sacramento was established in 1947. The university offers courses leading to bachelor's degrees in business, engineering, government services, laboratory technology, nursing, social service and teacher education. Master's degree programs are available in business administration, public administration, applied life science, social work, engineering, applied mathematics, education, and psychology. In addition, the university offers preprofessional curriculum preparatory to graduate study in law, medicine, dentistry and others, and also has an elementary and secondary education credential program. The university, currently master planned for an ultimate enrollment of 25,000 FTE students, moved to its present 282-acre site in 1953.

The last four years of the five-year building program are the agency's current estimate of need and do not represent a program approved by the administration.

California State College, San Bernardino

California State College, San Bernardino was authorized by Chapter 64, Statutes of 1960, First Extraordinary Session. It is scheduled to be a fully accredited five-year state college with its programs designed to meet the needs of the service area consisting primarily of San Bernardino and Riverside Counties.

The college opened in the fall of 1965, in its initial complement of facilities, on the permanent site of 430 acres. The permanent campus will be large enough to accommodate the ultimate enrollment of 12,000 full-time enrolled students planned for this campus.

The last four years of the five-year building program are the agency's current estimate of need and do not represent a program approved by the administration.

STATE BUILDING PROGRAM EXPENDITURES	Actual 1972–73	Estimated 1973–74	Proposed 1974–75	Projected 1975–76	Projected 1976–77	Projected 1977–78	Projected 1978–79
MAJOR PROJECTS							
Site development—1974 (entrance road)	–	–	$9,000 W m	$193,000 C			
Funds for working drawings are requested for 1974–75. This project will provide the entrance road to the campus from state college parkway in accordance with the approved master plan. This road is needed to correct the existing congested traffic problems and the hazardous conditions. The project is scheduled for completion in September 1975.							
Creative arts building	–	$144,000 P W F	–	2,720,000 C	$248,000 E

San Diego State University							
MAJOR PROJECTS							
Little theater rehabilitation	–	$12,000 PWm	$225,000 CEm				
Funds for construction and equipment are requested for 1974–75. The project will bring the building up to code standards and modernize the facilities. The project has a capacity of 116 lecture FTE and includes approximately 6,800 assignable square feet and a gross area of 8,000 square feet. This project is scheduled for occupancy in January 1975.							
Art building	–	–	3,462,000 Ck 2,252,000 Cm	–	$406,000 E		
Funds for construction are requested for 1974–75. This project will have a total instructional capacity of 271 laboratory FTE. The project also includes 30 faculty stations. The building will provide permanent space for the Art Department with approximately 58,300 assignable square feet and a gross area of 79,500 square feet. This project is scheduled for completion in September 1976.							
Life sciences rehabilitation	–	–	26,000 PWm	$287,000 C	27,000 E		
Funds for preliminary plans and working drawings are requested for 1974–75. The project will bring the building up to building code standards and modernize the facilities. There will be no change in instructional capacity. The project is scheduled for completion in July 1976.							
Utilities—1974	–	–	8,000 Wm	182,000 C			
Funds for working drawings are requested for 1974–75. This project will provide additional utilities to the existing buildings to meet the additional loads and upgrade and replace obsolete, worn-out and unsafe utilities and controls. This project is scheduled for completion in September 1976.

San Diego State University is located on a 271-acre site that will become the population center of metropolitan San Diego. The University offers 66 approved bachelor degree majors, 56 master degree majors, and three joint doctorates. Enrollments have increased in all academic areas.

A master plan figure of 25,000 FTE students has been set for the campus, and future incremental purchases of approximately 10 additional acres is anticipated by the trustees to allow development to meet this figure.

The last four years of the five-year building program are the agency's current estimate of need and do not represent a program approved by the administration.

San Francisco State University

San Francisco State University, established in 1899, is a multipurpose coeducational institution which offers a full range of degree and credential programs at the baccalaureate and master's degree level.

The university moved to the present 102-acre site near Lake Merced in 1954 in order to be better able to meet the demands placed upon it by continually increasing student enrollments. The current master planned ultimate enrollment figure is 20,000 FTE.

The last four years of the five-year building program are the agency's current estimate of need and do not represent a program approved by the administration.

San Jose State University

San Jose State University was established in 1857. It is a five-year accredited university which provides both undergraduate and graduate instruction in liberal arts and sciences, applied fields, and in the professions. The university is located on a 137-acre site in the City of San Jose and is master planned for an ultimate enrollment of 25,000 FTE students.

The last four years of the five-year building program are the agency's current estimate of need and do not represent a program approved by the administration.

MAJOR PROJECTS							
Home economics building rehabilitation	–	$62,000 PWm	$1,300,000 Cm	–	$67,000 E		
Funds for construction are requested in 1974–75. This project							

For the list of standard lettered capital outlay footnotes, see the end of this budget supplement.

MAJOR PROJECTS							
Boiler plant addition	–	$21,000 PWm	$340,000 Cm				
Funds for construction are requested for 1974–75. This project will provide one chiller and auxiliary equipment in the existing boiler plant to serve future buildings. The project is scheduled for completion in June 1975.							
Site development—1974	–	–	736,000 Cm				
Funds for construction are requested for 1974–75. This project will provide a main north access road leading from the Rohnert Park Expressway, thereby eliminating circuitous and congested traffic through town. The project is scheduled for completion in September 1975.

California State College, Sonoma is a fully accredited five-year institution with programs in the liberal arts, sciences and in the professional fields of teacher education and enterprise management. Its primary service area is Marin, Napa, Sonoma, and the southern parts of Lake, Mendocino, and Solano Counties.

Sonoma State College was established by Chapter 66, Statutes of 1960, First Extraordinary Session of the California Legislature. It opened its doors in September of 1961 in rented quarters in what is now the City of Rohnert Park. The college moved from these steadily expanding rented quarters to the permanent 220-acre campus two miles east of Rohnert Park in August of 1966.

This campus is currently master planned for an ultimate enrollment ceiling of 10,000 FTE students.

The last four years of the five-year building program are the agency's current estimate of need and do not represent a program approved by the administration.

California State College, Stanislaus

California State College, Stanislaus is an accredited institution with programs in the liberal arts and sciences and in the professional fields of teacher education and business administration. Its primary service area is Calaveras, Mariposa, Merced, San Joaquin, Stanislaus, and the Tuolumne Counties.

Stanislaus State College was established by Chapter 1681, Statutes of 1957, and opened its first classes in rented facilities on the Stanislaus County Fairgrounds on September 10, 1960. It began full operations on the permanent campus in July 1965. This campus is master planned for 12,000 FTE students without any anticipated increase in the existing 219-acre site.

The last four years of the five-year building program are the agency's current estimate of need and do not represent a program approved by the administration.

MAJOR PROJECTS						
Scene shop	–	$98,000 WCm	$11,000 Em			
Funds for equipment are requested for 1974–75. This is the first and only phase for this building. The building is scheduled for completion in August 1974.						
Cafeteria	$30,378 Wk	1,483,000 Ck 55,622 Wk	103,000 Em			
Funds for equipment are requested for 1974–75. this is the first and only phase of equipment for this building. The building is scheduled for completion in January 1975.						
Physical education facility	–	–	117,000 PWm	$2,185,000 C	$85,000 E	
Funds for preliminary plans and working drawings are requested for 1974–75. The building will provide 7 faculty office stations and a gymnasium, activity rooms, lockers and showers for the Department of Physical Education and Health with approximately 28,800 assignable square feet and a gross area of 38,250 square feet. This project is scheduled for completion in September 1977.

California Polytechnic State University, San Luis Obispo

California Polytechnic State University provides accredited educational programs with emphasis on the applied fields of agriculture, engineering, business, and home economics, together with the closely related supporting fields of physical sciences, natural sciences, and mathematics. A program of required general education courses combines with the college's occupationally centered instruction to prepare graduates for citizenship, leadership, and constructive community living.

The university is located just outside San Luis Obispo at the foot of the Santa Lucia mountain range, 12 miles from the Pacific Ocean. The campus has been gradually augmented to its present 5,099 acres of which 374 acres compose the main campus and the balance is agricultural land.

This campus is currently master planned for an ultimate enrollment ceiling of 15,000 FTE students.

The last four years of the five-year building program are the agency's current estimate of need and do not represent a program approved by the administration.

MAJOR PROJECTS							
Engineering west addition	$114,250 W k	$78,750 W k 577,000 C F	$159,000 E m

California State Polytechnic University, Pomona

California State Polytechnic University, Pomona, provides accredited educational programs at the university level in agriculture, arts, business, engineering, science, and in the preparation of elementary and secondary teachers.

The Pomona campus, originally founded by W. K. Kellogg as an Arabian horse ranch in 1925, was given to the State of California in 1949 for use by the California State Polytechnic College. Academic instruction began on the 482-acre main campus in 1956. A master plan to accommodate 20,000 FTE students has been approved.

The last four years of the five-year building program are the agency's current estimate of need and do not represent a program approved by the administration.

MAJOR PROJECTS							
Air condition engineering building	–	–	$83,000 [W C m]				
Funds for working drawings and construction are requested in 1974–75. This project provides air conditioning for offices in engineering buildings 11 and 12. These buildings are single story sheet metal structures with plywood walls. These offices are inferior rooms with inadequate ventilation and are unbearable in the summer months. Since the campus is a year round university, these offices are needed during the summer months. This project is scheduled for completion in June 1975.							
Site development—1974	–	–	8,000 [W m]	$202,000 [C]			
Funds for working drawings are requested in 1974–75. This project provides an entrance road to the campus from the south in accordance with the approved master plan. This road is needed to correct a dangerous intersection. The project is scheduled for completion in September 1976.							
Science building	$138,540 [E k]	$7,626,000 [C k] 11,460 [E k]	–	509,000 [E]	$400,000 [E]	$300,000 [E]	
Faculty office addition	–	–	–	27,000 [P W]	425,000 [C]	13,000 [E]

CALIFORNIA MARITIME ACADEMY

Located at Morrow Cove, Vallejo

The California Maritime Academy was originally established in 1929 by the State Legislature as a unit of the State Department of Education. In 1972 it was given its present status as an independent institution of higher education, obtaining certain administrative services from the trustees of the California State University and Colleges.

Federal authority for state nautical schools originally stems from an act of Congress of 1874. The United States Maritime Administration's interest was mandated by the Merchant Marine Act of 1936, which directs the maintenance of an adequate merchant marine to support American domestic and foreign commerce and to meet the requirements for national defense. The act provides that the merchant marine be "manned with a trained and efficient citizen personnel." The present federal-state relationship in the field of maritime education results from the Maritime Academy Act of 1958 which specifies "It is declared to be the policy . . . to promote the national policy with respect to the United States Merchant Marine . . . by assisting and cooperating with the states and territories in the operation and maintenance of maritime academies or colleges for the training of merchant marine officers."

The State of California experiences a high level of activity in all phases of the maritime industry including dry cargo ships, tankers, container ships, oceanographic and research vessels, dredges, inland waterway tugs and barges, fishing vessels, drilling ships, offshore drilling service vessels, and a few passenger cruise ships. Nearly one hundred million tons of cargo pass through California ports every year, each ton generating, according to one estimate, $22 for the local economy.

The statutory mission of the California Maritime Academy has been defined by the newly reconstituted Board of Governors as follows: "To provide instruction in the nautical sciences, marine engineering, and related fields, including all those necessary to provide the highest quality officer for the American Merchant Marine and California maritime industries and licensing therein."

The graduates become licensed officers in the merchant marine. Historically the course has been given in three years. However, the requirements of broa ening, enrichment, and attainment of accreditatio seem to indicate that more time will be needed t achieve a bachelor of science degree with a specializa tion in either deck or engineering fields. The student also receive instruction in naval science under th auspices of the Navy Department. The mission of th department is to provide, by a permanent system c training and instruction in essential naval subjects, source from which qualified officers may be obtaine for the inactive Naval Reserve.

The present three-year training program, durin which the student attends school 11 months of eac year, culminates with the U.S. Coast Guard examina tion for a license as either third mate or third assist ant engineer. The student must pass the license exami nation before he can receive a degree.

The program at the academy is supplemented by sea-training session each year of three months' dura tion aboard a merchant-type ship loaned to the Stat of California by the Federal Maritime Administra tion. These sea-training sessions are essential to estab lish the eligibility of the student to take the U.S Coast Guard examinations.

The Federal Maritime Academy Act of 1958 permits an outright grant of $25,000 to academies operating in accordance with prescribed standards, and an additional $50,000 for academies that agree to accept students from other states. The act also provides payments of not more than $600 per student per academic year to assist in defraying the cost of uniforms, books and subsistence; for each student the academy receives $400 of this, and the student $200.

In addition, the federal government pays for the annual drydocking, overhaul, and major repair of the ship, at an estimated cost of over $242,000; this amount is not included in the budget.

Graduates find jobs in manning the merchant fleet, on research vessels, dredges, tugs, service vessels, and in the fields of plant inspection and maintenance, terminal operations, and shoreside transportation.

The 1974–75 budget includes sufficient funds to provide for the training of 260 students in the academy's program.

SUMMARY OF PROGRAM REQUIREMENTS

	ACTUAL 1972–73	ESTIMATED 1973–74	PROPOSED 1974–75

Number of graduates	60	53	65

[a] The 1972–73 and 1973–74 figures represent average student counts and the 1974–75 figure represents the anticipated student count at the beginning of the year.

[b] Totals do not include funds for 1974–75 salary increase, as this institution's salary increase funds are included in the overall state salary increase items.

CALIFORNIA MARITIME ACADEMY—Continued

I. CLASSROOM INSTRUCTION

Need

Basic scientific and specialized technical knowledge built on a foundation of general studies are required for the development of qualified merchant marine officers. As well, these officers need the general education level associated with professional competence at the executive level in marine related industries.

Objectives

The objectives as proposed by the newly reconstituted Board of Governors are:

(1) To educate each midshipman in an accredited college program in nautical sciences, marine engineering and related fields.

(2) To train each midshipman in the skills and knowledge essential to licensing in the American Merchant Marine.

(3) To develop in each midshipman a strong sense of duty, honor and service to country and instill in him a pride in his profession.

(4) To develop in each midshipman a sound body and the physical attributes necessary to successfully meet the rigors of the sea.

Authority

Education Code Sections 25951, 26052, 26063.

General Description

The instruction program provides general education classes and specialized courses to prepare students for careers as licensed merchant marine officers and as executives in the maritime industry. The curriculum provides for specialization in either nautical science or marine engineering. Satisfactory completion of the academic program and successful performance on the U.S. Coast Guard license examination enables a student to graduate from the three-year program with a bachelor of science degree in either nautical science or marine engineering.

Students select their area of specialization (deck or engineering) before starting classes for their first trimester. Other than a few elective courses, the academic program for either area is largely prescribed, but options or areas of emphasis will be increasingly utilized in the curriculum.

Recent developments in the maritime industry (containerization, automation, supertankers, etc.) are currently being reflected in curricular development. Furthermore, considerable effort is being made toward the goal of accreditation for the Academy by the Western Association of Schools and Colleges.

A 65-foot diesel-powered vessel continues to play an important role in the instructional program. The Academy is developing agreements with other institutions to utilize its vessels in special oceanography programs.

PROGRAM REQUIREMENTS	72–73	73–74	74–75	1972–73	1973–74	1974–75
Continuing program costs	22.6	22.6	25	$381,076	$440,786	$486,140
General Fund				*265,616*	*312,514*	*338,078*
Federal funds				*51,517*	*54,037*	*63,380*
Reimbursements				*63,943*	*74,235*	*84,682*

II. SEA TRAINING

Need

Practical skill in navigation and ship operations is essential in the development and training of deck and marine engineering officers.

Objectives

To provide experience and training in navigation, seamanship and communications for midshipmen specializing in nautical science, and to provide experience and training in the operation of marine engineering plants for midshipmen specializing in marine engineering.

Authority

Education Code Sections 25951, 26052, 26055, 26056.

General Description

During three of their years at the Academy, midshipmen participate in a sea-training trimester. A part of the cruise consists of an annual shipyard overhaul which affords the midshipmen firsthand experience in readying a ship for sea through inspection and replacement procedures. From time of departure until return to the Academy, the midshipmen operate the ship under the supervision of their officer-instructors. The sea-training trimester is not an observation cruise but rather a learn-by-doing experience under all types of sea conditions. During the sea-training trimester the midshipmen learn firsthand the duties and responsibilities of the Merchant Marine officer and put into practice the theoretical knowledge learned in the classrooms ashore. They are thus fully qualified to assume the responsibilities of ships' officers.

III. RESIDENTIAL

Need

Midshipmen are recruited statewide and from out of state, necessitating a residential facility and provisions for meals.

Objectives

To provide a residence facility and meals for midshipmen enrolled at the Academy.

Authority

Education Code Sections 26054, 26055.

General Description

The academy's daily routine has a paramilitar posture (0600 to 2200) providing for residence fa cilities and daily meals for the midshipmen on nearl a year-round basis. This continuing requirement i interrupted four times during the year: Christma recess (two weeks); sea-training trimester (1 weeks); spring recess (one week); and summer rece (three weeks).

PROGRAM REQUIREMENTS	72–73	73–74	74–75	1972–73	1973–74	1974–75

IV. ADMINISTRATION AND INSTITUTIONAL SERVICES

Need

Educational institutions require administrative direction and logistic support in order to insure efficient and effective operation.

Objectives

1. To provide academic and administrative leadership, coordination, and supporting services for achievement of the academy's overall objectives.
2. To provide utilities and maintenance services.

Authority

Education Code Sections 25951, 26051–26055, 26062, 26101–26156.

General Description

The administrative staff and plant operation per sonnel provide the necessary ancillary services in sup port of the training program provided for midship men. The 67-acre campus contains three classroom buildings, residence hall, dining hall, gymnasium, sea manship building, library and administration build ing, which require continuous maintenance and up keep.

Also included in the budget totals for this program in 1974–75 are the following items: (1) $14,996 from federal vocational education fund for the cost of a continuing education program, (2) $14,000 in contract services for management services previously provided by the Department of Education, and (3) $40,000 for special repairs and maintenance items.

California Maritime Academy—Capital Outlay

EXPENDITURES	Actual 1972–73	Estimated 1973–74	Proposed 1974–75	Projected 1975–76	Projected 1976–77	Projected 1977–78	Projected 1978–79	
The Maritime Academy is located in Vallejo near the north end of the Carquinez Bridge and will have an average enrollment of 260 students in 1974–75. The campus occupies 67 acres, and permanent facilities consists of two classroom buildings, engineering building, library, administration buildings, seamanship building, mess hall, residence hall, and a gymnasium with a pool. The reconstituted Board of Governors was appointed and assumed governing responsibility on March 7, 1973. The 1973–74 budget did not include funds for major capital outlay. Subsequent funding will depend upon the new policy and program to be established by the Board of Governors. The additional residence needs are not included pending the policy of the new Board regarding residency requirements. The 1974–75 construction program consists of one major project: working drawings and construct the modifications of the primary electrical distribution system. The last four years of the five-year program are the agency's current estimate of need and do not reflect a program approved by the administration.								
MAJOR PROJECTS								
Modification and upgrade of primary electrical distribution system	–	$75,000 [w c]						
Funds for working drawings and construction are requested for 1974–75. The project will provide adequate electric service, street lighting, and power distribution facilities for the present facility.								
Library (equipment)	$12,501							
Corporation yard and warehouse facility	–	–	–	$224,800 [w c]				
Ocean science and waterfront facility	–	–	–	33,000 [w c]	$330,000 [c]	$110,000 [e]

BOARD OF GOVERNORS OF THE CALIFORNIA COMMUNITY COLLEGES

Program Objectives

1. To give direction, coordination, planning and leadership to California's Community Colleges in order to achieve systematic development toward their fullest potential.

2. To promote quality education in community colleges through high standards in academic transfer and occupational and technical programs.

3. To improve district and campus programs through informational and technical services on a statewide basis, while recognizing the community-oriented aspect of California's network of 97 community colleges.

4. To seek adequate financial support while ensuring the most prudent use of public funds under the board's purview.

The Board of Governors of the California Cor munity Colleges has 15 members appointed to fou year terms by the Governor, serving with the advi and consent of the Senate. The board's headquarte is in Sacramento, with a chancellor appointed by tl board as head of the operating arm, the chancellor office. The agency operates with administrative, pr fessional and clerical staff and has small regional o fices working under its occupational education un in Los Angeles, Oakland and Sacramento.

The board was established by Chapter 1549, Sta utes of 1967, to provide statewide leadership to tl public community colleges segment of California high education, for planning, coordination and directio

I. EXECUTIVE

General Description

The executive division directs the staff operation under the Board of Governors of the California Community Colleges, with the Chancellor, two vice chancellors, an analytical studies unit, and supporting clerical staff.

The vice chancellor, programs and operations, supervises the work of the units of academic and student affairs, administrative and fiscal services, and occupational education.

The other vice chancellor supervises external af fairs, including state and federal, public and lega affairs. Reporting to this vice chancellor are the lega counsel and the director of governmental affairs.

The proposed personnel increases for this divisio are to be available from January 1, 1974 to Decem ber 31, 1975. These two positions are being create to develop the census figures as prescribed by legisla tion (SB 6, Statutes of 1973).

BOARD OF GOVERNORS OF THE CALIFORNIA COMMUNITY COLLEGES—Continued

II. PROGRAMS AND OPERATIONS

General Description

The program and operations division is responsible for developing, implementing, and coordinating the educational, fiscal, administrative, and facility planning policies and procedures required to fulfill the goals established by the Board of Governors. The division consists of three units: academic and student affairs, administrative and fiscal services, and occupational education. These units are further subdivided into sections.

PROGRAM REQUIREMENTS	72–73	73–74	74–75	1972–73	1973–74	1974–75
Continuing program costs	70.7	82.7	86.7	$6,399,290	$7,970,372	$8,151,064
General Fund	*34.6*	*35.7*	*35.7*	*5,508,859*	*6,870,628*	*6,886,845*
Reimbursements	*36.1*	*38.5*	*37.5*	*890,431*	*1,068,834*	*1,155,116*
Workload and administrative adjustments	–	8.5	7.5	–	30,910	–25,380
Proposed increases	–	–	6	–	–	134,483
Program Elements:						
Administrative and fiscal services	17.3	27.8	27.8	347,863	467,066	524,555

Occupational education	27.6	30.5	30.5	638,100	732,899	749,748

Administrative and Fiscal Services Unit

The administrative and fiscal services unit is headed by an assistant chancellor and is comprised of sections for administration, financial services, and credentials administration. The assistant chancellor reports to the vice chancellor, programs and operations. Many of the functions performed by the division are mandated by legislation, especially those related to financial services and credentials.

Administration Section

Need

This section provides staff management services to the Board of Governors and the Chancellor's Office. It is responsible for accounting and personnel, budget preparation and management, and general staff services.

Objectives

To be responsible for the broad range of general staff services required by the Board of Governors, including accounting and personnel, budget preparation, recommendations and management, organization and production of Board of Governors agendas and other publications, and housekeeping and communications.

Financial Services Section

Need
